Drains

=====

=====

Name: \$9.50 Fudge
Description: 6' old sandstone cut out drain. MPL=150m.
Features: When it opens out again, look down valley for a nice view.
Access: Between the 7th & 8th Rathole, look for signs on side of
Bells
Line of Road about 5kms past Bell [NDR, XNL, XWPT]. Look
towards
hut and behind there is a open canal, follow underground.
[GPS:-33.486486,150.213803]
Locality: Clarence
Region: NSW
Country: Australia
Eek!: The redback spiders & spilt fudge.
Water Level: Ankle
To-Do: Follow it to the end which will probably end in the
valley?..
Found: 2003 Infectoid/Millsy/Ogre/Rogue/Teacup/Trainman.
Rating: 3.0/5.0
Created: 1995-12-31 13:00:00
Modified: 2016-03-30 09:27:13

Name: 100th
Alternate: System
Description: Stormwater drain, oldest in Brisbane, with adjoining aircon
system.
Features: Atmospheric, skanky, dirty, muddy 10ft redbrick, room, 7ft
rcp,
large room with oviform redbrick side tunnel, aircon
cavity,
Wheat Creek culvert section - Brisbane Tuff of 1860 (RHS
at slide
junction).For aircon access find wooden covered manhole on
left
fork at slide junction, climb down into wall cavity,
follow to
pit. For stone culvert take right fork at slide junction.
Access: #1:Outlet behind Riparian Plaza, Eagle St Pier [159
R10/11]
#2:Grille door to aircon in Post Office Square carpark.
#3:Various RMHs at corner of Edward St and Rowes Lane [159
Q10]
Locality: Brisbane CBD

Region: QLD
Country: Australia
Eek!: Construction over drain entrance, is LOUD, maybe security.
Aircon
may be alarmed.
Water Level: Tidal, mostly ankle to shin at low tide, need boat at high tide
Cond: Large construction over top of drain entrance
History: Found 1990 by Doug and Co while on a one day holiday.
Construction in 2003 destroyed fork and added pillars at entrance. Designed by W.D,Nisbet of Harbours and Rivers it was
built between 1875-1877. The finely detailed porphyry headwall
was destroyed in 1989.

Name: 21 Golden Steps
Description: 9ft high conc rectangle guarded by a large slightly
mangled grille.
Features: 3 sets of steps, the first of which is next to a huge
grilled wall inlet that provides excellent atmosphere during the
day. The remains of the old original inlet grille are wrapped in
rusting, buckled fashion around a split to twin 6ft rectangles
which in turn lead to small twin slides.
Access: At the intersection of Mount Pleasant Rd and Roxburgh Dr,
follow the pathway opp Roxburgh Dr about 150m northward to a
creek on the left. Squeeze thru gaps in bars. [Mapart: 192 H75 or
115 P20]. Often this is blocked by debris. In that case
follow the Park Drive pathway down from the opposite side of the Ro
and pop the m/h next to the grilled wall inlet. [Mapart:192 h76]
Locality: Rosedale
Region: OR
Country: United States of America
Water Level: Ankle in places to the final staircase at which point it
becomes shin, then gets progressively deeper until the outlet
submerges into the Don River
Found: 2002 Angels of the Underground.
Rating: 4.5/5.0
Created: 1995-12-31 13:00:00

Name: 3Vanillas
Description: 1st - Immediately after the outfall of the 1st section, to
the
left is a ~5ft RCP. It's stoopy and runs uphill parallel
to
Statham Ave/Bettington Ave for ~100m.

2nd - Follow the bushwalk in the direction of the first
two
section's Outfalls. After ~1km you'll have passed a
mangled
chain-link fence, you are now on private property.
Continue down
the track which follows the creek, after another ~1km
you'll
have reached an overhead (sewer?) pipe. Great place to
chill..
You don't deserve 3 green dots for it but.

Access: Access is at the lowest point of Statham Ave/Bettington
Ave
(Between the two off-streets Becky Ave & Camelot Ct), is
the
access to the first to two drain structures - just park up
the
road or in an off-street then walk down..
meters,
(LANDMARK) 2x ~10ft RCP's run parallel for a mere few
they serve as an underpass for the road above.

 Name: A.D.D.
 Alternate: Drakeford drain
 Description: 3x 6ft RCPs outlets flowing into the the lower end of the
 Athlon Drive open canal (the same canal system as Secret
 Squirrels). "Welcome to A.D.D." was spray painted throughout the
 system.
 Features: Decent sized chamber. Junction room. Nice bunker style
 grille room. Small waterfall upstream. MPL=300m TEL=?
 Access: Park a bit further up from where you would park if you
 were doing SS. (Near the Cnr of Wheeler Cres and Beaver Pl) Walk down
 to the canal and follow it downstream.
 1. Outlet [GPS:-35.397601,149.073072]
 2. Grill Room [GPS:-35.395663,149.072597]
 Locality: Wanniasa
 Region: ACT
 Country: Australia
 Care: You are visible to cars passing the Drakeford Drive bridge
 when entering from the outlet.
 Eek!: Man hole lid in the bunker room has been fixed in place
 with the use of liquid nails.
 Water Level: Dry - Shoe

Cond: Heavily graffed up to the grill room.
History: NA
To-Do: Try and get into Drakeford drive bridge. Would be good for an
expo - the bridge, ADD and then squirrels all in a short
distance
of each other.
Notes: Can't find any record of this drain - though i'd say it
would
had, have to be known to the clan in the past. Despite
there
being no clan tags, I find it hard to believe it hasn't
been
visited in all the years we have been going to to SS.

Name: Adelaide Ave Crossing
Description: 5ft high 3 meters wide rectangular entry in park at
Guilfoyle St Yarralumla. Leads to large grilled chamber with multiple
side pipe junctions and shape changes. Chamber contains 4x 4ft
RCPs and 1x 3ft by 3meter rectangle. Low rectangular pipe at
chamber goes for 40-50ms then comes to a small chamber with about
5 side pipes all around 3-4ft. Two of them go straight head
opening up to another chamber after about 5ms it then turns into a
singular 5ft and runs under Deakin for ages, with chambers about
every 40 meters all containing side pipes varying between 3 and
4ft.
MPL=500m
Features: Shape changes, Slightly weird grille room. Big, long and
low.
Access: Park in vacant lot on verge of Guilfoyle St closest to
Newman street or Gunn street. Entry here: [GPS:-
35.312539,149.100793]
Emergency exit via chamber manhole here [GPS:-

Name: Adelaide Darkie
Alternate: Adelaide Whore
Description: Adelaides most popular Drain. 1 X Rectangle, 8' high, gets
taller

Features: to max 10' then shrinks to 1.5m for last stretch
Awesome Drain!!! Changes shapes from rectangular, to big
side archways, goes underneath historic bridges, has incredible
tunnels, redbrick sections, sandstone sections, slate
sections, historical sites, dilapidated ceilings, can be good for
beginners or excellent for the most hardcore drainer. DO IT!
Access: Enter creek bed from under bridge going into National Wine
Centre. In First Creek. [UBD: 4L2] Catch 123 Bus
Locality: Adelaide
Region: SA
Country: Australia
Water Level: Dribble to Waist
History: The old side tunnels that are now blocked off used to be
open canals that land owners covered to build over them. Oldest
section is probably close to 100 years old. There was
once a great pillar in the tunnel, keep your eyes out for a new
section with the writing 'Bring back the pillar'

Name: Adult Swim
Description: Drain running underneath the Western Line, a park, and
Blacktown Hospital. Begins as 4x 4.5ft square outfalls and then
becoming 2x separate low but wide 4.5ft x 9ft concrete culverts which
do not seem to connect upstream. Finally, drain becomes a 6ft RCP
and shrinks to 4.5ft thereafter for about 150m. MPL=650m.
TEL=1.3km. U2. NB. Lengths based on possible upstream entrance which
remains as yet unconfirmed.
Features: Interesting section nicknamed "The Cage" which is where
the water running beside the railway line enters the drain. This
looks to be some sort of cage door that has been kicked down
(presumably

fence by locals) and now makes a handy entry/exit with a nearby
 to jump into a public park. Pipes and plywood hanging from
 ceiling in one section.
 Access: Park behind Blacktown Pool, near netball courts. Walk to
 corner of netballs courts, open creek and railway line, jump
 fence and then enter outfall.
 outfall. #0 Outfall at [GPS:-33.7729,150.917685]. Interesting

Name: Alcatraz
Alternate: Campbell main drain
Description: Alcatraz (named after a distinct bit of graffiti in the
first

the junction room) is a large drain system that runs through
 with south eastern CBD suburb of Campbell. Campbell is popular
 the military and defence staff due to it's close proximity to
 Duntroon, Australian War Memorial, the Royal Military College,
 HQ. This the Australian Defence Force Academy, DSD, ASIS and ASIO
 from Mt. drain is responsible for channeling storm water run off
 Features: Ainslie to Lake Burley Griffin. MPL=2km (approx)
 Grille rooms. Sections with metal roofing. Large and long
 rectangular corridor. Multiple large chambers.
 Extremely Changes size from 5 to 6 to 7-8 ft. Junction rooms.
 You're long + large downstream chamber. Interesting make shift
 engineering. Multitude of side pipes and waterfalls.
 Australia. beneath some of the most heavily secured buildings in
 Access: Closest intersection to this drain is White Crescent and
 Blamey Crescent. Park at Campbell shops [GPS:-
 35.289242,149.153812] Walk
 Campbell through Campbell playing fields along footpath through
 directly neighbor hood oval, on the park side of southern cross
 apartments, until you hit white crescent. Drain entry is
 across white crescent from Southern cross apartments
 [GPS:-35.288076,149.153581] Make your way down into the
 creek bed. You will be greeted by a 5 foot RCP (opens up to 6ft
 after 30 meters). Lower right hand corner bar has been bent just
 enough for a moderate sized man to get through. People who are a
 little large are better off opening a manhole which I believe is
 here in the park [GPS:-35.289436,149.15462].
 Burley Outfall / DS (entry/exit) is actually directly into Lake
 the Griffin via the creek near Wendouree Dr which runs along
 north-shore of the lake.
 [GPS:-35.292238,149.140937]
 abandoned Grille room opposite new asio HQ near car park of the

defence force building. Step irons have been removed from
the grille room - requires 2m drop.
[GPS:-35.291653,149.14292]

Square UPDATE: The manhole where the shape changes from RCP to
car (yellow step irons) opens directly into the 'secure' ASIO
approx. park. Might be wise to avoid exiting from that one.
location [GPS:-35.291798,149.143922]

Locality: Campbell
Region: ACT
Country: Australia
Care: Some sections are with out any form of exit for quite a
while. Houses surround and over look the inlet of this drain.

Enter with caution.
Eek!: Drain is on a constant downward slope the whole way. Can
be slippery and difficult to exit through the inlet. A rope
has been installed to make exiting/entering easier from the inlet.

Water Level: Dry - Shin
Cond: Graffiti for the first 200 meters or so then nothing.
History: Previously, the drain was an open creek.
To-Do: Explore upstream side pipe in first junction room.
Graffiti arrows pointing to this side pipe read "to our bed
chamber" and "church"

from the Explore 5.5ft RCP that heads back upstream toward city
last downstream chamber (closest to LBG)

Name: Anal Retention
Alternate: AR
Description: 30m long, 5m wide and 6-8m high stormwater retention pumping system. Fed by small siphons from the main drainage trunk.
Features: The large chamber. Nice ladders. Working lights you can switch on/off. Pumping equipment. Multiple exit and entry points.
Lots of frogs.
Access: Park on Lusty street, Wolli Creek. Head to the corner of the apartment block at 21-23 Lusty street. Through gate or over fence depending if gate is open. Head to end of path and into bush section on your left. Lift grille and remove 'mud' catcher flap.

Locality: Head down ladder. [GPS:-33.928806, 151.149786]
 Region: Wolli Creek
 Country: NSW
 Care: Australia
 too Next to an apartment complex. Try to enter without drawing
 open much attention to yourself. Don't fall off ladder. Don't
 Grilles grilles in footpath. Replace the 'mud' catcher on exit.
 grilles are heavy and aren't hinged. No tags unless you want the
 to be locked shut.
 Eek!: Schizo frogs. Probably best to wait a couple of days
 before visiting after a large storm.
 Water Level: Dry to Death
 Cond: Excellent.
 History: The project started in 2012 and was completed in March
 2014 at a cost of 2.1 million dollars. The objective of the project
 was to address potential flooding in the Lusty Street Area Wolli
 Creek (7 Ha) by constructing a large below ground detention tank
 (700m3 capacity) to initially collect and store rainwater flows
 in major storm events and then pump the tank out using 2 large
 electric pumps once the storms have abated. This system will reduce
 flood water depths in Lusty Street by 300mm. Also the project
 involved the installation of a large Gross Pollutant Trap aimed at
 it from collecting waterborne debris in stormwater and preventing
 its being conveyed to Wolli Creek and Botany Bay. Pictures of
 construction can be found here:
https://www.rockdale.nsw.gov.au/Council_Projects/Pages/Projects.aspx#drain
 To-Do: Get access to the main drainage trunk - should be a
 manhole around here: [GPS:-33.929022, 151.148694] . Have a few
 beers and a yarn down in the tank.
 Notes: Found on a last minute impromptu trip to explore Odyssey
 drain with Drain Bandit. I (Delo) was trawling council
 stormwater documents just before heading out. Stumbled across the
 Rockdale

council link (mentioned above in history) and decided to swing
by for a geez.

Name: Anzac
Description: Huge drain, featuring the world famous Chamber, spiritual home of
drain exploration,location for 16 years of Clannies
Nights. One of the biggest and most spectacular tunnels in the world.
Features: Huge 14' arched outlet, leads to chamber held up by large jacks,
then onto The Chamber, the amazing spiritual home to drain exploration and the annual venue for the Cave Clan
Clannies.
Often decked out with chairs, this underground auditorium is full

as of graffitti artwork, including the famous 'Clanies' peice
 drain well as a huge Yellow Submarine. Beyond The Chamber the
 join runs as a 6' covered canal, before splitting with twin 8'
 numerous redbricks leading eventally to where Yarra drain used to
 shape changes.
 Access: (unlisted)
 Locality: (unlisted)
 Region: VIC
 Country: Australia
 Care: Entrance is sometimes slippery. Gets occaisional sewage
 overflow.
 Water Level: Its tidal, but only barely, at highest tide it may be
 ankle deep
 Cond: Amazing. Its like a peice of living urban history.

Name: Arachnophobia
Description: A drain that originally appeared on Fils early Canberra
list and
doesn't appear to have been visited since the early 2000s.
The
name is very fitting. I wouldn't recommend visiting if you
have a
phobia of spiders - or even insects because there are many
different types throughout this system including a "nest"
of
centipedes.
MPL=800m TEL=1.2km
Features: Different shapes and sizes. Mainly consists of 6ft RCP and
5.5ft

rectangle. Very cool junction room with natural light and
and a
grilled man hole cover. Insects.
Access: Park at the George Harcourt inn (intersection of Barton
Hwy and
Gold Creek Rd.) Park closest to Barton Highway and cross
in to
the median strip you will see the open canal and be
greeted with
two 6ft RCPs awaiting your entrance.
entry (1). 2x 6ft RCP inlet [GPS:-35.194235,149.086011] - Best
35.1955,149.088041] (2). 4ft by 3m dual rectangle inlet [GPS:-
(3). Outlet [GPS:-35.199461,149.091602]
Locality: Nicholls
Region: ACT
Country: Australia
Care: If entering from 6ft RCP inlet - take care crossing Barton
highway - cars travelling at high speeds around a slight
bend.
Eek!: Insects
Water Level: Dry - Slimey
Cond: A little graffiti
History: Found in the mid to late 90s by FiL
To-Do: NA drain fully explored.
Notes: Definitely worth doing if you're in the area.

Name: Aydun's Burrow

Description: Very pretty brick drain heading under the train tracks
from one of the Your Taxes catchments.

Gross and tight entry. You will graze yourself and cover
yourself with mud squeezing into it.

It
really is quite nice, but probably never worth doing (list
everything).

Features: TEL=42m
Nice arched brick drain.
Good view of 2 Goodrich
St, Scarborough.
Carries a plastic pipe for around
10m.

Blocked RCP side-pipe.
Access: Small RCP on the side of the abseiling entry to Your Taxes
[GPS:-34.271488, 150.954773].
Exits at
[GPS:-34.271673, 150.955139]

Locality: Wombarra

Region: NSW

Country: Australia

Care: Body-width RCP leading into a 1m drop onto slimy brick.

Tetanus-ridden stakes protruding from the walls.
Water Level: shoe (but you need to lie in it)

Cond: Untouched, unsurprisingly.

To-Do: Slide down the 5m drop at end, to the square concrete
drain under

2 Goodrich St

Notes: In Your Taxes catchment; has it already been explored?

Naming locations after yourself is lame.

Locality: Pascoe Vale - Coburg North
Region: VIC
Country: Australia
Water Level: Last 150m shin deep
History: In the past, the last 150m was flooded and a boat was required.
In 1996, the water board dug out the creek to lower the waterlevel finishing the pleasant boat trip expeditions... forever! From the Drain Guide: "The first time we explored this drain we tied a rope to a rubber boat and sent Cobra in.
"Don't let the rope go" he pleaded. He struggled against the flow as he

call out made his way into the darkness and around the bend. He'd
there", and every now and then in apprehension: "Ayyy, you still
Eventually we'd give a tug on the rope to let him know we were.
paddle or a the rope ran out, and Cobra was up a drain without a
could lifeline. In the distance, if we listened carefully, we
named hear... "Ayyy, ayyy... you there?" Hence, the drain was
Notes: "Ayyy Flooded"

Name: B.L.F.
Alternate: Builders and Labourers Federation.
Description: 5ft RCP.
Features: None. One of the worst drains in Melbourne.

Iso update:

Access: Spillway overflows in retarding basins
Upstream of Blackburn Drain. [Mel:47K12]
[GPS:-37.835251,145.173130]

Locality: Via park on corner of Springvale and Canterbury Rds
[GPS:-37.836555,145.176252]
Forest Hill
Region: VIC
Country: Australia
Care: You have to walk thru private property to get to it.

Iso update:

Water Level: Retarding basins are fenced off and visible from adjacent
with dry Knee deep at outlet. Iso update: Can do the whole thing
feet if careful
History: BLF (Builders and Labourers Federation) was named so
because the drain resembled a building site.

Iso update:

on Outfall was probably discovered when works were being done
nearby commercial property. BLF was 'rediscovered' and
mapped in 2015, whereupon it was found that it is not a single
drain, but a system of several retarding basins, creeks, canals and
RCPs.

Name: B.U.R.P.
Alternate: Big Underground Round Pipe; Glenroy Retarding Basin
Description: Huge 7ft drain with inlet funnel, empties on-stream into Melbourne's largest flood retarding basin. TEL = 100m
Features: 7ft RCP leads to a vertical mini Geehi-like funnel, then continues as an enormous 12-15ft RCP for another 60m before emptying out into Moonee Ponds Creek via the retarding basin.
This is usually a fairly shallow, but fast flowing drain, and you will get fairly wet by walking in the flow.
Access: Follow path between 62-64 Moonee Boulevarde, jump fence and head towards the huge funnel in the middle of the floodplain, then head North down the hill towards the creek.
[GPS:-37.697306,144.903127]
Locality: Glenroy
Region: VIC
Country: Australia
Water Level: Shoe - Shin
Notes: If you exit through the inlet and follow the tributary creek to the left you will soon come to a fairly average round tunnel called F.A.R.T. which has a couple of high (but small) waterfalls.
Found: 1988 Dougo and his wee little brother

Name: Basura's Fl@shback

Description: It starts as a twin tunnel system about 4 feet high goes for about 200 mts and it gets to a chamber of about 6 feet in that chamber there are three round pipes that appear to be coming from the other side of Barrenjoey Rd (where the coles is) and there are 4 channels running downstream.

I took one of these channels which are quite low and go for about 300 mts. The water gets chest high due to the fact that your back will start to hurt and you will have to squat a bit. The bottom of the pipes are full with algae, then sand.

If you keep going you can get out at the Beach. By then I was all wet from the chest down.

It may be possible to explore it more comfortably using a body board or some small flotation device for the last bit. It would save your back.

Features: It starts as shoe high water and becomes chest high and back breaker the closer you get to the beach.

Massive Eels around, shy but they get snappy if bothered.

are in Nice grates along the way. Do not try to open them as they around a carpark that is dark and the local kids like to drive fast.

Main chamber is nice and roomy.

Access: The whole explored area was nice and free of graph. there are You can enter at The Boulevarde -33.656554,151.319097

careful overgrown weeds in the open channel. You need to be because this open channel is between the shops and some houses.

Check Exit downstream at Newport beach -33.655077,151.323446.

popping tides and it is better done at night so nobody see you out and decide to put bars in the exit.

Locality: Newport
Region: NSW
Country: Australia
Care: Empty pockets. No electronic devices unless they are
waterproof.
Same with torches.
Best done with some sort of footwear as there are some
oysters in the pipes and algae.
Best done late at night.
Eek!: Slimmey and slippery entrance.
Algae and sand near the beach.
Oysters that can cut your feet.
Back and legs take a considerable toll for such a short
drain.
Water Level: Shoe - Chest (Tidal)
To-Do: Check the upstream pipes in the main chamber. Check the
origin of the drain upstream of the open air canal entrance.
Notes: I give it a good rating because it has no graph and it is
my first drain, more experienced explorers may differ from
this rating.

Name: Batcave Extension
Alternate: BCE
Description: Twin 6ft RCP drain upstream of Batcave open canal system.
Features: A couple of semi decent rooms, side pipes and a lot of stalactites.
Access: Park at sports club on the corner of Flinders way and La Perouse St, Manuka [1]. Cross La Perouse St and follow open canal to entry [2]. [1]Parking [GPS:-35.326885,149.131915]
[2]Outfall entry [GPS:-35.327127,149.130808] Mahole exit: [GPS:-35.330009,149.123167]
Locality: Manuka
Region: ACT
Country: Australia
Care: A house overlooks the out fall, enter with caution.

Eek!: Stalactites in right side pipe in first junction room.
Exposed HV electrical conduit submerged in water. High pressure gas
danger tape.
Water Level: Shin - Dry
Cond: Heavily graffed
History: This drain was once known to the cave clan. I'm not sure
who listed it, or, if it was ever listed. If anyone knows
(siolo?) sing out so the found by data can by be upated.
To-Do: Explore side pipe in 2nd chamber.
Notes: The original Batcave is better. This one doesn't even
contain bats... What a rip.

Name: Bathurst Drain
Alternate: Bathurst Darkie
Description: Long open canal like walk with several underground
sections and RCP's opening out to Macquarie River.
Features: Large underground sections, redbrick in parts.
Access: #5,UE: Jumping fences at Lambert & Rankin Sts [NDR], or
various other places along Rankin St.

Update, DC:

The best entrance
point is the through the large but easy to navigate GPT at
the corner of the G.W.H (Durham St) and Rankin Streets.

Jump the fence here: [GPS:-33.412472,149.580063]
Locality: Bathurst
Region: NSW
Country: Australia
Care: Slippery
Eek!: Bats
Water Level: Ankle in parts
History: One of three drains in Bathurst that feeds into Macquarie
river, splits from one drain into three at bottom of
Mt.Panorama*.

Notes: (*see update).
here: (2015 DC): The upstream section heads under Lambert St
-33.419810, 149.571193

This part
distance is a 7ft corridor style drain which only runs a short
towards the before becoming 2x3ft RCP with a 5ft sidepipe heading
Jail.

Found: 1985 Millsy.
Rating: 3.0/5.0
Update: 2014-03-12 13:00:00 (DC) - Ok, this was last updated in
1985 and the info does not seem very accurate, or it has been
upgraded somewhat since then.

is a This drain is nothing to do with Mt Panorama creek. That
joins up very separate system (with no decent drains), that also
to the Maquarie River.

underground Bathurst Drain is pretty cool, and although the main
curves, section is only around 400m long, it does take several
12ft and has a few cool changes along the way, from large 10-
square culverts, to larger cinder block sections, to nice
redbrick sections under old bridges, small sidepipes ect.

Oh, there are LOTS of bats in this drain, and it carries a
SHITLOAD of water in the rain.

The drain goes under houses, streets, shops and clubs, and
features a couple of grills along the way too.
It then continues as an open canal for over a km, passing
under several more bridges, towards the Lambert Street end,
upstream of there it shrinks down heading under a school.

Name: Beck Valley
Description: Historic(it even has a commemorative plaque) storm drain
the runs into central Nottingham from the River Trent.
Features: 9ft arched outlet that leads a long way thru varous
pillared

chambers before changing into a huge 12ft diameter
redbrick pipe.
This continues on eventually becoming 8ft, with a sewer
overflow
side pipe that leads to a staircase, then it reaches a
staircase
itself, becoming a 6ft arch with a few balconied shafts.
Access: At the end of rd, there is a wall with a plaque on
it.
Either jump the wall or head round thru the small marina
to the
outlet.
Region: East Midlands
Country: United Kingdom
Care: As well as the depth of the water at the outlet, the floor
is
dangerously slippery.
Water Level: Groin deep at outlet, gets gradually shallower over the
next
400m. Minimal flow upstream of this
History: Built in 1889.

Name: Belt Line
Alternate: Corpse Slime, St Clair.
Features: Large grilled outfall with odd flow control contours,
leads to a 6ft rcp with large manhole shafts and a side tunnel. This
leads off a long way before shrinking, taking in numerous other
side pipes, most of them short, except for one that leads to a
large room, with a 6ft arched tunnel running both u/s and d/s
past the tunnel youve just come out of, but on the wrong side.
Following upstream leads thru one of the older drains in TO, with
funny manhole shafts, shape changes and an odd CSO. Going
downstream

Yonge from the room leads to a very old, very cool chamber under
 it your St, from here the Corpse Slime starts and before you know
 was, as back at the side tunnel you originally took. Confused? I
 course, the tunnels 'Figure 8' under and over each other. In due
 Line following the older tunnel will see you reach the Belt
 Storage Chambers.
 Access: Manhole only. From the east end of Heath Street East, go
 down stairs into ravine. Find grilled outfall then follow trail
 up into Mount Pleasant cemetery. Follow road to triangle
 intersection, pop manhole in road just before
 intersection.[Mapart: 115 M20]
 Locality: Davisville

Name: Bird Nest
Description: A decent little drain in the Northern Suburbs of Canberra.
Features: One of the biggest grille rooms in Canberra (Height Wise).
Birds nest. Slightly smaller grille room upstream. MPL=100ms
TEL=UNKNOWN
Access: (1) Park at sports arena (take a left at roundabout on
Clarrie Hermes Dr after passing Horse Park Drive when heading away
from Gungahlin) (2) follow the footpath north under bridge.
Lift 1x1 swing grille - Requires a slight drop of about a meter as
step irons cannot be reached from the swing grille. (3) To
access

upstream grille take 4ft pipe upstream or alternatively lift

nearby gatic manhole cover. (2). (1) Park here
 [GPS:-35.177405,149.097162] (2) Best entry Swing Grille
 [GPS:-35.176103,149.097087] (3) Up stream grille
 [GPS:-35.171914,149.098011]

Locality: Casey
 Region: ACT
 Country: Australia
 Care: Careful dropping into swing grille. Upper body strength required

when navigating GPT bars into Side pipe.
 Eek!: Don't scare the baby birds.
 Water Level: Dry - Ankle
 Cond: No graffiti
 History: Suburb began being constructed in 1991. Quite a lot of Housing development taking place.

To-Do: Explore 5 ft down stream
 Notes: Birds are sick
 Found: 2013 Delo
 Rating: 2.0/5.0
 Created: 2013-10-11 13:00:00

Name: Blackberry
 Description: A system originally found and listed by Fil. Starts off a 4x 4ft rectangular culverts opens up in to a chamber after 45ms - Changes 6.5ft RCP MPL=900ms TEL=1.2kms

Features: Strange slanted roof chamber near Fairfax street end.
 Large grille room. Shape changes.

Access: (1) Corner of Bauhinia St and Fairfax street take one of the 4ft Rectangular openings from the open canal *hard.
 [GPS:-35.258958,149.113202]
 (2) North west corner of Belconnen way and Dryandra St - 6ft opening *easy. Left hand 6ft rcp from grille room is the longest passage exits in the bush in the Bruce ridge nature reserve.

[GPS:-35.258263,149.109539]
 Exit [GPS:-35.259754,149.099213]

Locality: O'Connor
 Region: ACT
 Country: Australia
 Eek!: Lot's of wasp nests near side pipe exits.
 Water Level: Dry - Dry
 Cond: Grille room is heavily graffed
 History: Records of this drain appear to be lost

To-Do: NA - Fully explored.
Notes: Explored and listed - 2013 Delo

Name: Blacktop Wormhole
Alternate: Emerton Drain
Description: 6ft RCP drain bearing south down Popondetta Rd. Drain
eventually shrinks to 5ft after a garbage-filled section and
continues thereafter into oblivion. MPL=300m+. U2.
Features: Drain changes direction several times and includes several
eventually interesting bends - one shaped like an 'S'. Drain
changes to a section with a black-painted roof. Shortly
thereafter drain becomes filled with a buildup of rocks
and garbage, including several number plates (mostly off
bikes).
Access: Park on Popondetta Rd. Outfall at [GPS:-

* Thru 8 seg pizza in Blackwattle lane.

New found access manhole on intersection of Boundary St

and Ivy

Ln; extremely heavy manhole in the centre of the road

overflow. [GPS:-33.88899,151.195778]. Leads into 4' balloon sewer

UPDATE Ratter 2012:
The Balfour/O'Connor St. manhole has recently been
concreted over! A manhole in the construction site [-
33.885573,151.199489]
was lidless and covered with a wooden pallet on 20/07/12.

Ratter update:

An unbolted gutter grille on the south side of O'Connor St
[GPS:-33.886058, 151.200204] offers more discreet access
to the pillar room via a short crawl/wriggle, which should be
attempted legs-first because there's a 1m drop at the end.

Locality: Pyrmont
Region: NSW
Country: Australia
Care: Entrance is covered at high tide. Plan expos using tide
charts.

Sewage overflow affected.
Water Level: Tidal, Knee-Waist
Photos: Sent with complaint letter and map to the EPA.
Notes: Was cleaned up by Syd Water but after 2 years reverted
back to being turd infested again.

UPDATE Ratter 2012:
"Raptor's Pillar Room" is connected to this drain. Access
via side pipe under the Abercrombie St grille; approx 100m
crawl/waddle.

Found: 1994 Predator/Diode/Mullet.
Rating: 5.0/5.0
Update: 2015-04-13 14:00:00 (Ratter) - The park above Raptor's
Room (Chippendale Green) is often crawling with Normals well
into the night. An unbolted gutter grille on the south side of
O'Connor St [GPS:-33.886058, 151.200204] offers more discreet access
to the pillar room via a short crawl/wriggle, which should be
attempted legs-first because there's a 1m drop at the end.

Update: 2013-04-09 14:00:00 (Ratter) - 09/04/2013: The two shafts
leading into Raptor's Room (topped with heavy cast-iron grilles)
have

has finally had ladders installed. One half of the NE grille missing bolts and is liftable.

Update: 2012-04-28 14:00:00 (Ratter) - [corrections & new discoveries from the "2012: A SLIME ODYSSEY" expo]

oviform Since the turds were banished from Blackwattle, the concealing the beyond "The Beyond" is 4ft high with a flat floor sewer. It becomes standing height again under Broadway.

and The mighty "shit pit" is now completely filled with sand gravel.

actually a The second "sandstone arch" under the old brewery is sandstone oviform! (or mummy? curved floor and ceiling, flat walls.) The hole in the roof is still there as of 28/04/12, and so are the planks Ghost and I used to climb out.

it's The sandstone arch upstream of the hole isn't "1.5m high", think) more like 90cm. This continues to the edge of Regent St (i where it becomes a slightly taller square tunnel with a wedged floor.

can Just past the bus depot grille is a small room where one almost stand up. This is followed by a short length of brick oviform, another room, then stoopy brick arch.

of The tubifex worms are gone, and so is the "two inches of half-composted human waste" - all we saw were a few pieces the corn. Further along there's a heavy square steel grille in useless ceiling [GPS:-33.886297,151.203408] which is absolutely of fresh as an entrance or exit and doesn't even provide a breath it. The air; the stench of ripe arse wafts from a side pipe below tunnel dead-ends somewhere under the tracks.

here's the updated drain map: <http://i.imgur.com/jPE1b.png>

Update: 2011-08-02 14:00:00 (Ratter) - Just downstream from the
 Plaque Room, off to the side of the old brick oviform, is a new
 concrete room with a skylight grille in the middle of Abercrombie
 St [GPS:-33.884567,151.198643], right in front of the hotel.
 Excellent spot for screeching at surface-dwellers.
 Manhole entrance behind the old CUB, cnr O'Connor &
 Balfour St [GPS:-33.886081,151.200136]. Leads to 1050mm RCP; the
 brick oviform is 50m downstream and "Rebirth" is 550m upstream.
 Downstream from the CUB manhole, then back up the next
 branch on the right, are a ton of shape changes: 1.3m high brick
 oviform, 1.6m high crumbling sandstone arch, 50m of 1050mm RCP with
 a deep flooded shaft in the middle, more brick oviform, then back
 to sandstone arch. There's a 1m square hole knocked in the
 roof here, looking out into the construction site!
 probably [GPS:-33.885984,151.201672](?) This convenient exit
 won't be around for long.
 1.5m high Upstream, the sandstone arch becomes deadly low - about
 tree in the middle, but the floor is awash with gravel, mud and
 steel roots (and you'll be crawling through it). A stainless
 the bus grille (unhinged) is located by the old rail line behind
 depot [GPS:-33.886180,151.203244]. Those who dare to press
 brick onwards will be rewarded with glorious standing-height
 oviform, two inches deep in half-composted human waste and
 THROBBING with tubifex worms (<http://www.youtube.com/watch?v=trUr6cuBlFw>). I turned
 back here. [Yeah, I know most of this is probably old news, but I
 figured I'd better add it to the KD.]

Update: 2010-08-16 14:00:00 (Scarecrow) - Round of applause to
 Sydney Water! BWB is squeaky clean, all the way to the outfall-
 not even a scrap of toilet paper floating along.
 the This being said, the live sewers could still overflow into

main drain from km upstream.
Currently (mid August 2010) there are still works going on
inside
the drain; wooden supports etc for worker access.
New found access manhole on intersection of Boundary St
and Ivy
Ln; extremely heavy manhole in the centre of the road
[GPS:-33.88899,151.195778].
Hatsumi and Scarecrow.

Name: Blackwattle's Evil Twin
Alternate: [insert better name here]
Description: A smaller, grottier branch of Blackwattle Bay, not
connected to
the rest of the system. How the hell has this not been
found yet?
TEL: 1.5km according to map
Features: From upstream to downstream:
- 20m of glorious sandstone arch! The ceiling and half the
walls
are built from stone blocks; the rest is cut out of the
rock. Two
huge rusting pipes to climb over.
- Round brick pipe with a slide at the upstream end.
- A short section of low sandstone tub. This is where the
Grose
St manhole is.
- A weird concrete room with a sloping floor and sinister
cockroach colonies in the corners. Another brick pipe runs
upstream but it's bricked up a few metres in.
Here's where it gets disappointing.
- Alternating RCP and brick pipe, both about 1200mm.
- The brutal quarter-pipe slide. The long-legged among us
might
be able to climb across to the ledge on the left-hand
side;
otherwise you're going to get very wet. Every surface in
this
room is slippery with condensation.
- Another length of RCP with tags! I'm fairly sure the
graffiti
was done *before* the pipe was installed, since a few are
upside-down or at odd angles.
- Sandstone tub with piles of broken bricks, and a long
piece of
pipe that couldn't possibly have washed into the drain.
- Godawful 1050mm RCP with the smell of ripe arse wafting

size. upwards. This leads to a junction with an RCP of the same
 capped Being a moron, I didn't explore the upstream section.
 - After a long hard slog through the shit, it changes to
 turned canal with a corrugated iron ceiling of the same height. I
 back here.
 - We popped a manhole in Wentworth Park and found more
 capped canal: around 1m high and dangerously tidal. We didn't
 explore very far.
 Access: - 8-seg manhole in the footpath of Grose St, across from
 the carpark [GPS:-33.883976,151.194080]. Use this if you want
 to see the sandstone arch.
 - Possible access: well-stuck manhole against the wall of
 the greyhound track in Wentworth Park [GPS:-
 33.878375,151.193476]. We
 couldn't lift it.
 - Manhole on the NW side of Wentworth Park, halfway
 between the greyhound track and the light rail [GPS:-
 33.876281,151.191090]
 Locality: Glebe
 Region: NSW
 Country: Australia
 Care: Air in the downstream section is cloudy and smells like
 shit. The air currents kept changing direction but I'm pretty sure
 this was a result of the tide coming in, and Sydney Water was doing
 some sort of work on the very upstream end at Bay St, which we
 didn't explore - maybe they were fixing the turdflow?
 Eek!: Don't slip down the dodgy slide! imho it's best to resign
 oneself to getting soaked and just slide it.
 Water Level: Dry - Death (Tidal)
 Cond: Some pristine 1800s sections, but it seems most of it has
 been ripped out and replaced with RCP.
 History: It's Blackwattle Bay, but not as we know it, Jim.
 To-Do: Take photos.
 Explore upstream from the junction! There's almost
 certainly more beauteous sandstone waiting under Parramatta Rd.
 Wriggle up to the Lake Northam overflow and screech at
 people.

any Skateboard the hellish downstream end to see if there are
interesting changed under Wentworth Park.

99% Need to get that lid next to the greyhound track open, I'm
branch sure it leads in and it would drop pretty close to the
be that leads under Mitchell Lane East, which I reckon might
worth checking.

Notes: Oh come on this has to have been discovered before.

Low-res scan of document used to find this section of
drain;
[http://www.heritage.nsw.gov.au/07_subnav_01_3.cfm?
itemid=4570535&imageid=4570083](http://www.heritage.nsw.gov.au/07_subnav_01_3.cfm?itemid=4570535&imageid=4570083)

ledge to It's probably worth mentioning that the move from the
difficult, so the pipe to get back up the steep slide is rather
remember you may want to take rope if you don't have a tall
person/climber, otherwise you're stuck, although I can't
seeing anything nearby to rig off?

Name: Boggart

Description: An old sandstone/concrete drain. Mostly 4-5' high, few standing spots. TEL 330m. Best done during the day.

Features: The outfall is behind and beneath a house, on top of a waterfall.

Proceeding upstream:

- 130m of 4.5' concrete arch
- tall room with trash baskets under Honda Rd
- about 30m of open canal, passing through someone's front yard and under their house
- 70m of 5-6' sandstone hallway, similar to Mass

Extinction or the side pipe in Gobbledox. One section is heavily eroded and the walls are crumbling. Contains two short slides.

- about 10m of 3' concrete rectangle under Bannerman St
- 60m 3.5' rcp with a slide
- 20m 3-4' sandstone channel with corrugated iron arch ceiling
- splits to two 3' concrete canals, covered by mesh, with liftable steel grilles in the ceiling.

Both branches head uphill at a steep angle and become small shitty RCP under Powell St. I didn't explore past here.

Access: (from d/s to u/s)

- Outfall behind 4 Bogota Ave [GPS:-33.839177,151.224760]
- Cast-iron grille in front of 16 Bogota Ave [GPS:-33.838556,151.224448]. Drops into concrete arch.
- Open channel in front yard of 4 Honda Rd [GPS:-33.838101,151.224024]. Basket room and conc arch is d/s, sandstone hallway is u/s.
- Heavy double steel grille outside 7 Bannerman St [GPS:-33.83736,151.223672]. May not be liftable; it had a car parked over it at the time of discovery.
- 25m crawl through 2' side pipe from cast-iron grille in front of 6 Bannerman St [GPS:-33.837204,151.223839]. Connects with the u/s end of the sandstone hallway.
- Two steel grilles in bush behind 69 Shellcove Rd, access via Powell St [GPS:-33.83659,151.223126]. Look for the gap in the fence, and follow the stone steps down to the drain.

Locality: Neutral Bay

Region: NSW

Country: Australia

Care: The climb down to the outfall is fairly steep and a little sketchy (loose dirt with nothing to grab onto except grass).

yards.
Residents may not appreciate you traipsing through their
yards.
Water Level: Dry - Shoe
Notes: Ratter tore his pants open while crawling in through the
side pipe, and had to walk back through Neutral Bay with his

Name: Bulk's First
Alternate: Penis Pump
Description: New 6ft high X 55m long culvert under rail tracks at
Chullora
Rail yards. Starts off as a 6ft high by 12ft wide concrete
rectangle, then after 15m becomes a 6ft RCP till other
side of railway. Was shorter & smaller, but has recently been
lengthened & enlarged (hence 'other' name). Bulk's 1st CC find!
Features: Brand spanking new 6ft high drain under Chullora, man made
wetland outfall.
Access: The actual drain is here...
[GPS:-33.885102,151.052942]

Best way to access it is via the corner of Weeroona Rd &
East St,
Roockwood here...
[GPS:-33.884414,151.051664]
Walk south from there towards railway embankment & there
drain
exit & wetland should be very visible near the new bridge.
Alternatively you can enter gate here...
[GPS:-33.883672,151.065224]
And make your way through the rail yards, but this is only
recommended in small numbers late at night.
Locality: Chullora
Region: NSW
Country: Australia
Care: On active rail land, major fines & buttpain if caught.
Eek!: Live rail lines, workers, golfers, avoid 'em all.
Water Level: Shoe - Ankle
Cond: New, just rebuilt (2011).
History: Was a 5ft concrete culvert, recently has been opened up to
6ft
with added man made wetland outfall.
To-Do: See what else they are building around there as there
seems to be
major ongoing earth works.

Modified: 2004-10-31 13:00:00

Name: Bypass
Alternate: Airport Link Drain
Description: A drain in Clayfield that connects very new concrete
sections

with a much older brick section.

Most of the RCP's are 5ft. The older tunnel is probably
about the same but shrinks down to a back breaking 4ft upstream.
Features: Moderately sized concrete chamber with grille, Red brick
floored section, Junction where the older tunnel has been cut into
and merged with a newer RCP.
Access: #1 Manhole at the end of Suckley Rd located next to grille
in garden bed. This entrance is in the main concrete chamber.
[GPS:-27.411624,153.057039]

#2 Two double barrel RCP's at Schulz Canal outfall (in
park approx 50 meters from entrance #1). This entrance leads
you into a tall concrete cavity that involves climbing up a rope to
the square concrete section.

Locality: Clayfield
Region: QLD
Country: Australia
Water Level: Shoe - Dry
Cond: Concrete - New / Brick Section - Good
History: The old brick floored tunnel has been cut into and
connected up with a new RCP pipe. Unsure of the age of the older
tunnel. New concrete sections were installed during the construction
of the Airport Link tunnel.
Found: Japes and Keve
Rating: 3.0/5.0

Name: Cam Stuart and The Dude
Description: 4-4.5ft RCP drain zig-zag'ing around Sanders Rd, Hilda Rd and Flinders Ave. TEL=300m+. U2.
Features: There is a wooden section far upstream nailed into the side of the drain where an adjoining RCP seems to have collapsed. Some RCPs are uneven with the main flow of water between two of them disappearing underneath and reappearing further down where the RCPs have realigned. Spotted a large, yellowy-orange lizard in this drain as well! Graffiti further upstream says "CAM STUART AND THE DUDE WAZ ERE "'91'" suggesting that I wasn't the first one here :(

Access: North of a park attached to Sophia Doyle Reserve on the western end of Sanders Rd at [GPS:-33.758422,150.974102]. Concrete manhole cover in the park, a few metres north of the swings and slide.

Locality: Baulkham Hills
Region: NSW
Country: Australia
Water Level: Dry - Slimey
Cond: Clean, smooth, minimal graffiti.
To-Do: Continue going upstream. Drain looks like it ends at Seven Hills Rd from topside but who knows really?

Found: 2010 Red (1991 Cam Stuart and The Dude?)
Rating: 1.0/5.0
Created: 2010-08-16 14:00:00

Name: Camo's Tomb
Description: Old brick drain that empties into canal downstream of Clantomb. MPL=1km.
Features: Short 6ft Rcp leads to an 8' high waterfall lined with bluestone and redbrick. Climb the waterfall and continue through 7'

redbrick arch. Tunnel reaches a knee deep GPT then splits
into
two 5' RCP's. Right one leads to a small redbrick chamber
paved
with bluestone - splits and shrinks again.
Access: #1: On the southwest bank of Moonee Ponds Ck just
downstream of
Montague Street.[Mel:29A-5] [GPS:-37.760576,144.934232].
#2: Gutter grill cnr Pascoe Vale Rd & Thomas St. Confirm
with
locals.
Locality: Moonee Ponds
Region: VIC
Country: Australia
Care: Slippery in parts.
Water Level: No
History: Instead of turning at the bottom of the waterfall the
drain
continued straight to Moonee Ponds Ck. The cement section
was
added during the 1970's. The ladder at the waterfall was
added
in 1996.
To-Do: Confirm gutter grill entry point and pinpoint GPS.
Nearby: Clantomb, Five Mile Creek, Dean and Wilson St's; Brunswick
and
Ormond Rd Bridgerooms.

Name: Chastity belt
Alternate: (Upstream) Alpha Sierra.
Description: An 8 foot rcp that turns to 6 foot after 40metres, 6foot
section
is approximately 200metres in length which then turns into
5foot
knee deep section.
MPL=300metres

TEL= unknown
Features: 8foot entrance is always nice, relatively graff free
except for
old shit at the entrance. About 200metres in there are
two
gutter grills which give lovely natural lighting in that
section
(during daylight).
Access: Access is an absolute bitch, in between #8 and #10
Clarendon rd,
Peakhurst (-33.957535, 151.049844) - Is an open natural
creek
which at this stage is ridiculously overgrown with
vegetation, at
times the bougainvillea and bamboo are impenetrable (hence
name).
There are gutter grills near and opposite
#47 Jacques avenue Riverwood (-33.958769, 151.053441) that
would
provide access and exit points.

Locality: Riverwood
 Region: NSW
 Country: Australia
 Care: Gutter grill entry and exit points in Jacques avenue are
 in view
 of Riverwood police station.
 Daytime entry
 through Clarendon rd is recommended because of the fact
 it's in
 between houses and torch light might be seen by the
 neighbors.
 Eek!: Spiders, eels, thorns and snakes.
 Police
 station
 Water Level: Knee deep in creek heading in. Was knee deep in upstream
 5foot
 section.
 Cond: Excellent
 To-Do: Follow further upstream under peakhurst park and pray to
 the
 drain gods (the one and only God) that it opens up.

Name: Cheltenham steps
Alternate: Drainenham
Description: A short but sweet drain under the rail-line.

Twin 5' RCPs under the rail line (upstream from
access)
and twin 4' RCPs leading under the road to the outfall.

The retardation basin (outfall) on the
eastern side of the road is very wet, but you can easily
explore
the whole thing without touching a drop of water.

One star because of the grille-rooms, but otherwise pretty average.

Upstream
room is untouched, however downstream room contains graffiti.

MPL=50m. TEL=80m.
Features: The main feature is the upstream large grille-room, featuring person-height steps leading north. You can climb the steps if you so choose. If you really want, you can squeeze out at the top and walk along the new canal inside the rail corridor. This room is untouched.

Also a short (5m long) black plastic pipe leading into this room (yawn). It sounded funny walking in it.

Access: Lift the section of grille with plastic-coated step-irons below it at [GPS:-33.758518, 151.081306]. You may need to pivot the fasteners near the hinges.

Alt
access upstream [GPS:-33.758647, 151.080850], however this is in a live rail corridor.

Magic's (April 2015).
Created: 1995-12-31 13:00:00
Modified: 2015-05-18 14:00:00

Name: Child-Catcher / Icky Sump
Description: Filthy sump, followed by 200m of 4' & 3' rcp leading into
a
12' tall chamber with a ladder leading up to a heavy steel
in the grate in the middle of Sterling Cct, Camperdown. 2 bends
access
RCP capped with manholes - the less disgusting means of
weeds
for the future explorer. These must be somewhere in the
outside the perimeter fence of the early 2000's housing

development topside, on the former site of the Royal
 Alexandra Children's Hospital. This was demolished in the mid 90's
 and the land gradually re-developed. A large cavity below the
 northernmost bend of Sterling Cct may have been left over
 from the time when this was a 100-yr old hospital. Not so as it
 turned out - rather this is a twin cinderblock-walled chamber -
 9' tall and 20' wide, divided by a wall with rectangular
 portals. Access is blocked by two 9' cages designed to trap garbage
 coming into the downstream section of the drain. The left
 cage is bent out by the force of the water to form a foot-wide
 orifice, which is unfortunately not wide enough for passage. The
 cavity is about 20m long with circular pipes on the other side
 feeding water into it. If the place was flooded with children,
 only a trickle of the smallest ones would fit through this hole.
 Cats and dogs may do better, but since this was a children's
 hospital, the location is christened "Child-Catcher."
 Features: Hard-core access, the big chamber, possible old section
 still up ahead.
 Access: Next to the Orphan School Creek outfall in the wall of the
 canal - 4' RCP leading to the Icky Sump. 2 guys with buckets,
 emptying out the sump to get underneath the buffer. We got it down
 from ass-level to knee-level in about an hour, but the manholes
 beyond further upstream are a better idea. Access to the chamber
 Sterling the cage is through a 3' pipe underneath a gutterbox in
 Cct in full view of paranoid residents.
 Locality: Camperdown
 Region: NSW
 Country: Australia
 Care: The housing development is private property - Stirling Cct
 is well-lit and in full-view of dozens of apartments with big
 new windows. Security, cars going over the grate in the road.
 Eek!: That fucking sump! It's full of evil crap - oil, mud,
 trash, junk and garbage. Also: leeches (apparently).

Water Level: Waist - Ankle
Cond: brand-new
History: Possible old section left over from the Royal Alexandra Children's Hospital.
To-Do: Get into the big chamber & parts beyond.
Found: 2007 Loop / EvilJ / Alone
Rating: 1.0/5.0
Update: 2010-01-09 13:00:00 (Scarecrow) - To Do: Get into the big chamber
& parts beyond. DONE.

Should be Also, this is probably the best worst drain in Sydney.
rated higher.

GPS:-33.8027739434,151.172779285, XED, XNL, XWPT] or back.

UPDATE 2009 - Fenix:
Ginger an i found the easiest (and least spider
infested..) entry
to be at the bottom of Freeman Road the road in
between Oliver
and Eddy.
On the left going down Freeman Road, just before
the turning
circle at the bottom there's a set of stairs
going down to a
grassed area between 2 apartment buildings. On
the left of this
is a large grill that looks into the main room.
The lowest
section of this can be opened (by at least 2
ppl..) but
is
extremely heavy, and isn't hinged. There is
however,
about 10

feet away and directly opposite this on the
right side
as you go
down, a smallish, light grille that you can
swing open
and prop
against the fence, that drops down into the
furthest
downstream
part of the drain that's worth exploring. As far
as the
whole
'crates' issue dTrog suggested, the first climb
up can
be
achieved by propping the heavyduty road dividing
post
that's to
be found in this section of the drain up against
the
corner and
as long as you have someone to boost you or lift
you
in, you
should be right. We got to a point far upstream
however, where we
couldn't go any further and a number of
milkcrates at
this point
may have saved the day - we saw more but
couldn't get
at it.
Locality: Chatswood
Region: NSW
Country: Australia
Care: Building now completed. One owner can look down from his
ground
floor balcony into one end of the chamber. Be a nice
purchase for
a CC member - their own drain.
Eek!: No step irons on d/s falls. Take three milk crates.
Water Level: Shoe. Permanent water flowing
History: Explored many years ago by a little dTrog. Both drain &
dTrog
have definitely increased in size.
Found: 2003 dTrog.
Rating: 2.0/5.0
Update: 2010-06-21 14:00:00 (Hatsumi) - GPS:-33.800737,151.179117
Upstream end grills, from here you can go all the way down
all
the waterfalls to main chamber and tank tracks etc
though.
don't think anyway has bothered any further u/s of here

Name: Chopped Liver
Alternate: Liverpool Trunk Drainage
Description: This is the main drainage network for the Liverpool CBD.
It was built in 2015 with TBM's and pipe jacking techniques.
Begins as a 6.8' RCP outfall into the Georges River and heads in for
100m or so before reaching a decent ''circle' shaped room with a
tall manhole shaft which is pouring out water (quite loudly
too, kinda freaky). It then splits of into two drains. The left is
5.10' or so, the other is around 4ft and curves off quickly. The
5.10' tunnel head for several hundred metres and splits off
several times upstream 'till it shrinks away to 3ft or so. Didn't
fully explore all the smaller side tunnels, though may be some
more decent bits to this I suspect. Several 3' & 4' ones along
the way.
Features: Several "Rounded" rooms (a few square ones too), TBM rock
and sections and floors (especially it some junction rooms)
sections (See swirling patterns on some of the upstream concrete
one pic). Several slides, pretty tall manhole shafts in parts,
that acting as a lovely waterfall feature, many street grills
across need to be sussed from above, as one had car shadows going
it.
Access: Head down to the old bridge and weir here:
between the [-33.9250318,150.9279817], then bash through the bush

river and the railway fence until you reach the outfall
here:
[-33.9230832,150.9295025].

Enter
the drain.

Locality: Liverpool
Region: NSW
Country: Australia
Care: The way to this drain is very overgrown, wear long pants,
watch
for rail staff etc.

Eek!: Car shadows going across street grills, open with caution.
Water Level: Dry to shoe.
Cond: Looks new enough to me, no evidence of prior explorers of
any
description either. Very clean drain.

History: Some pics of the building of this drain here:
[LINK] (<http://www.botharboring.com/key-project/liverpool-cbd-trunk-drainage/>)

To-Do: Explore all this side pipes, and find and explore the
other
drains in the area. Have a few interesting looking GPS
points I
may add into comments.

Name: Chullora Drainage
Description: Starts as an open canal going D/S South come across Three
6ft corridors going under Hume Hwy Ends in a Marsh.
Take main Canal back - travel East in the open canal,
Three more 6ft corridors into 2nd marsh area. Traveling
across the mash see one 8Ft RCP and another 6Ft corridor.
8Ft'er wasn't followed all the way as the water level was
reaching around hip with a lot of Decaying matter.
6Ft'er Enters into a 3rd marsh maybe continues on?

MPL = 1.2Km
TEL = 1.0Km

Access: Hole in Fence [GPS:-33.88896,151.057456]
Bring rope! - makes it a lot easier getting up and down
the 8Ft Canal wall.
1 Worth St
Chullora NSW 2190
Locality: Chullora
Region: NSW
Country: Australia
Care: You're in SRA Property - Avoid Being seen in the open
canals.

Water Level: Slimey - Chest
History: Rumor goes -
"Chullora WWII storage facilities access was from a steel
door,
bolted into the side of a stormwater drain which runs
along the old RTA building in Chullora, it then runs under the Hume
Hwy and eventually under the rail workshop."
To-Do: Follow system the complete way and travel NORTH once you
entered the first open canal and find the Door! - If it exists!

Notes: the 8Ft'er RCP get very unpleasant with about 30cm of
decaying matter.

Name: Claisebrook
Alternate: CMD (Claisebrook Main Drain)
Description: The largest system found in Perth to date. Once an open
river,
Claisebrook has long since been buried. MPL=3km+
Features: Large box culvert section, similar to gobbledox, runs from
the

GPT original outlet to the modern day Claisebrook Cove. Unique
 and Pumping equipment at far downstream end. The original
 outlet from when the river was buried in the late 1800s - a 3m
 round red brick pipe. Shape and size changes - a lot of 8ft red
 brick pipe and 6ft red brick pipe upstream. Interesting side pipes.
 Junction rooms and splits. Old chains, bolts and latches. You're in
 a buried river - feel her flow - she's a beauty!
 Access: 1 . Open rectangular manhole off Brook street (opposite
 Glyde street) [GPS:-31.952060, 115.875230] - This manhole is
 situated close to two others, the round manhole leads to a sump and
 the other rectangular one close to the road is a sewer. It is
 entering recommended to use Hi-Vis and witches hats/barriers if
 during the day.

2. Padlocked
 access hatch to far downstream end GPT/Pumping equipment
 [GPS:-31.952213, 115.877737]

Locality: East Perth
 Region: WA
 Country: Australia
 Care: The flow of water is quite strong and deep in some
 sections. A few potholes in the red brick sections. No emergency exits
 have been found to date. Do not do after rain - give it a
 couple of days. There is believed to be a weir to control the water
 level of the lake in Hyde park, similar to the one in Perth
 Darkie, in the Northbridge branch (right hand pipe) at first major
 upstream junction room.

Eek!: Don't fall into the GPT pit! You'll be sucked out into the
 river.

Water Level: Shoe-knee / Death
 Cond: Excellent. Untouched.

History: Claise Brook was an ephemeral fresh water stream which ran
 from Lake Monger through Lakes Georgiana, Sutherland, Irwin and
 Kingsford, and drained down Wellington Street to Tea Tree
 Lagoon at what is now known as Claisebrook Cove. Another
 tributary of

Square),

 Found: 2013 Delo
 Rating: 2.0/5.0
 Update: 2014-05-20 14:00:00 (Delo) - 21-05-2014 Delo

1. The 4th sister or Cent Slot. This is the pipe on the right at the out fall of this system. It is completely separate from coin drop. It does not share any interconnecting pipes. it starts off as a low weird shaped 4.5ft before splitting into 3x 3ft RCPs that meet up in a junction room. From the J room onwards, the

pipes split and go in separate directions the one I followed contained a series of waterfalls.

2. - Confirmed that system does connect to Le Cage au Folles. It connects via small 2.5 ft high by 3m long rectangle. To access this connecting pipe use entry 4 and take 6ft RCP on the right. Was flooded/blocked with debris at last visit.

Name: Constipation
Description: A decent shrinker. Starts off as a nice 7ft rcp for about
180m,
a 4ft nice and cosy junction room with a mini waterfall through
the train rcp. There's an rcp that appears to be going underneath
further tracks but it has been filled in - hence the name. Going
too the rcp's get gradually smaller, there's a gpt with a
strategically placed trolley to get across without getting
through a wet (no idea how it got there though!). You can exit
chamber gutter box thats in the side of a road in the last small
before the pipes get crawly. MPL:650m
as The smaller rcp downstream is boring as batshit, long with
nothing to see, lots of rubbish (almost stepped on a knife
and at well.. welcome to the west!), smells funky at some parts
trek it the end the grill is locked so the lucky explorer must

back the same way.

Features: Cosy chambers, blocked off rcp.. that's about as exciting
as it gets in the west, hah!
Access: [GPS:-33.774055,150.837693]

Exit through gutterbox on corner of Rupertswood Rd &
Beames Ave is only safe in the late hours of the night. There may be
more exits recently made for us during the recent development
near there, it's on the todo list.

If done at night, try to avoid parking on Beames Ave. Seen
a few dodgy looking guys around there. Park in the side streets
with houses around.
Locality: Rooty Hill
Region: NSW
Country: Australia
Care: I know the majority of you think the west is dangerous
after a certain incident long ago, this part isn't too bad but if
you see any groups of people that look like they're up to no
good.. just keep to yourselves and don't grab their attention. ;)
Eek!: Bring a book, you may get bored :P
Water Level: Shoe - Dry
To-Do: There has been construction within the last year which
seems like the drain could be extended a bit along with some added
grills for easier exit. Must go back and see what the deal is.
Found: Listed 2010 Xsv
Rating: 2.0/5.0
Created: 2010-07-21 14:00:00

Name: Cook's River
Description: 8' x 6' rect feeding onto the Cooks River. Becomes 8'
round, then rises to 3', with twin 5' off to the R that open out into
a very old parallel spraycrete tonkin. MPL=708m. TEL=708m.
Features: Interesting end.
Access: #9,UE: Sth side of Cook's River between Sixth Ave and
Beamish St [Sw:295A14, UBD:253J10, Grg:371J10,

GPS:-33.9036408332,151.097923234].
#0,UX: Rather dodgy grille on
cnr of Ninth Ave and Loch St [Sw:294R16, UBD:253H12,
Grg:371H12,
GPS:-33.9098280729,151.096282371, XED, XNL, XWPT], very
near a
roundabout.
Locality: Campsie
Region: NSW
Country: Australia
Water Level: Tidal, Ankle-Waist
Found: 1990 Dougo/Melb Clan.
Rating: 3.0/5.0
Created: 1995-12-31 13:00:00
Modified: 2004-08-31 14:00:00

Name: Cooked
Alternate: Drop out of life with drain in hand
Description: The sober may look. The buckled may try. But only the
cooked will
survive. MPL = 1km~
Features: The boiled crab step - 3-4ft high by 3ms wide box culvert
- low
outfall section after the decent brick rail culvert - very
cool
arched roof with a channel exposing a sewer pipe that is
cracked
in places, causing a mixture of sanitary napkins, feces
and half
digested carrot to float about.
Crawl of the
poached - Brick paved floor section that greets a small
incline.
At the top of the paving you'll find a foot deep channel
directing the flow of water. A cross pipe marks the start
of the
crawl. 2ft by 3m box culvert.
The chamber of the
Cooked - A large sandstone block chamber which at it's
highest
point is roughly 10ft and 2.5-3m's wide. It is approx. 25-
30m
long. Built in the early 1900's. The natural creek bed is
exposed
and elements of the past and elements of the future have
gathered
in the multiple rock pools to cook in peace. Kandos cement
bags
line the roof. A 6ft sandstone tub continues the journey
of the

drain while the RCP at the end of the chamber provides an
 exit / alt. entry.
 Tub of Cookery - A bending and
 curvy sandstone tub section that changes from 6ft to 5.5ft
 to 5ft before staying at 5.5ft. Papers on the roof of this
 section are dated 1912. Leads to the 'crawl of the buckled' RCP.
 Crawl of the buckled - a 2ft-3ft RCP that leads to the
 gates of 'bucklers pillars room'.
 Bucklers pillars rooms
 - A newish addition to the drain. A group of pillars greet
 you with more cross pipes. A side pipe to the right of the
 gate leads you to the 'void of sobriety' - A large cavity under an
 apartment complex.
 Access: 1. (Cooked) Enter the open drain channel from the top of
 Head Blackmore oval (near the corner of Darley and Canal Rd).
 point upstream under brick rail culvert. Recommended access
 grille at [GPS:-33.875111, 151.152196]. 2. (Buckled) Gutter box
 Tub the corner of Francis St and Darley Rd. Drops you into the
 Fortress section just up from the sandstone chamber. Similar to
 fence of entry. [GPS:-33.875480, 151.154214]. 3. (Sober) Over the
 canal, the Leichhardt north light rail stop stairs into the open
 canal head downstream into RCP. Leads directly into the chamber
 [GPS:-33.875480, 151.154214]. You can also access the open
 best from Darley rd through service hole in the fence - may be
 of option for day trippers [GPS:-33.875480, 151.154214]. Void
 leads to sobriety - grate in driveway of 32-78 Francis street,
 large cavity under the apartment complex [GPS:-33.878526,
 151.154601].
 Locality: Leichhardt
 Region: NSW
 Country: Australia
 Care: If entering through open channel near the light rail at
 night try to keep your torch light to a minimum. Be aware of traffic
 if

entering GBG on the corner of Francis and Darley - may
want to use traffic cones / same goes for the sobriety entry
grille.
Eek!: May be raw sewerage at the outfall.
Water Level: Dry to Shin
Cond: Excellent. Untouched. No graffiti.
History: Elderly.
To-Do: Explore further up the 4ft from Bucklers pillars.
According to an old map it runs over Norton street and through Pioneers
Memorial Park. If the rest of the drain is anything to go by -
there is gold at the end of the crawl. Bring shifter to loosen the
bolts on the GPT trap at the void of sobriety so bigger boned
people can fit through and see the cavity.
Notes: Close to an excellent drain, only thing stopping me from
giving it the highest rating is the low sections.
Found: Delo 2016
Rating: 4.5/5.0
Update: 2016-07-15 11:41:27 (Ratter) - Update Access: The canal
next to the light rail station has been replaced with RCP and most
of the surrounding vegetation has been cleared. Access is still
possible at the point where the RCP joins the existing drain, but
it's much more exposed than it used to be.
Created: 2016-03-24 14:00:13
Modified: 2016-03-27 00:20:01

Name: COOMF Drain
Description: 6ft RCP with few small rooms, Splitting into twin 4ft RCP.
Explored from 6ft upstream end. Did not explore 4ft
sections - because small drains are crap.
Access: U/S: Creek in park at kink in Coronation Rd
[GPS:-33.758716,150.984480]
D/S: Empties into Sophia Doyle Reserve along Eames Ave
(immediately opposite western corner of Doreen Cres and
Eames Ave).[GPS:-33.757511,150.97986]
Manhole cover in Jasper Road Public School at
[GPS:-33.760855,150.982562] and a drain opening on Seven
Hills

hardcore Road at [GPS:-33.76269,150.982923]. Drain finally has a
upstream exit here: [GPS:-33.763893,150.983183].

Locality: Baulkham Hills
Region: NSW
Country: Australia
Water Level: Dry - Ankle
To-Do: Get super keen explorer to confirm D/S exit.
Notes: First Explored by Cody the Drain Dog

Found: Rating updated to Average from Boring.
Cody 2010
Rating: 2.0/5.0
Update: 2010-07-19 14:00:00 (Red) - I have completely explored the
main part of this drain and partly explored the side pipes and
this was my description of it pre-clan member days:

Description: 6ft RCP drain beginning in a reserve. Soon
turns into a room with two smaller connecting pipes (4.5ft) with
the main water flow diverting down the left hand side tunnel
while the right tunnel, slightly elevated, remains relatively
dry. These twin pipes soon become, after another room, a low
yet wide 4ft rise running underneath a road. Low rise soon returns
to a 6ft RCP. Towards the end, side pipe appears going up
stream in a southerly direction. Main flow continues north and exits
into a nearby creek. A 4ft side pipe continues upstream in
southerly direction with many grills to stick your head out of. At
one point, you can see a substation (Jasper Rd Substation).
Pipes keep going south without a change in direction and, as a
result, exploration was soon abandoned.

Following this drain above ground I have determined it has
a concrete manhole cover in Jasper Road Public School at
-33.760855,150.982562 and a drain opening on Seven Hills
Road at -33.76269,150.982923. Drain finally has a hardcore
upstream exit here: -33.763893,150.983183.

'guess' is Access: Upstream access is correct but the downstream way off. This drain actually exits at -33.757511,150.97986. This drain empties into Sophia Doyle Reserve along Eames Ave (immediately opposite western corner of Doreen Cres and Eames Ave).

Care: Watch out for rusty concrete support poles stick out of concrete overhead at places. Some rather large tree debris gets caught down here too from bushland upstream.

Average. Personally, after exploring this, I would give it a 3 -

Explored on 24/06/2010 by Red/Toothpick and again on 01/07/2010.

Modified: 2010-07-22 14:00:00

Name: Cordyceps
Alternate: Scotchman's Creek Main Drain, Green Drain
Description: 1.4 m RCP that gets bigger quickly, flooded 2.4 m outfall.
TEL = 2.2 km.
Features: Small steps, 3 m high waterfall, sewer overflow, plastic pipes,
weird overflow room with incomplete, parallel tunnel.
Access: #1. Lift grille (locked but unbolted) and enter webby
overflow pipe on corner of Elm Gr and High Street Rd, walk in
either direction until features are exhausted (-37.871834,
145.146091).
Ave, #2. Wade up outfall on corner of Falconer St and Fiander
waist-chest deep for ~50 m (-37.879678, 145.149037). #3.
Unbolt grille at end of Tawonga Ct and head downstream (-
37.868284, 145.152204).
Locality: Mount Waverley
Region: VIC
Country: Australia
Care: Hidden by embankment - grille at overflow may be a two-man job.

Water Level: Waist-chest at outfall, but dry feet after 50 m.
Cond: Excellent, almost graf free and quite clean.
History: Frequently looked at by MelbClan in the early days, this
wasn't explored until 2015 due to the depth of water at the
outfall as well as the apparent shitness of the overflow entry. Named
in honour of mouldy dead spiders upstream in grille section.
To-Do: Unbolt upstream grille for smoothness of access.
Found: Iso & Thongs, 2015

Name: Corn Brook
Alternate: Only The Penetant Man Shall Pass
Description: Longest drain in Manchester at 5.6kms long. Very old
shapechanger.
Features: Hardcore drain, multiple shapechanges, varying from 3'-14'
high, mostly arch or rectangular. Includes long 9' brick
horseshoe arch and 14' high brick and sandstone section. Changes shape
over 35 times. Has one side tunnel. Mostly 6-7ft high.
Access: #0: Inlet is grilled over, outlet is a 5-6ft rect, just NW
of the Corn Brook Syphon Pit, next to the Bridgewater Canal, down
steps from the Pomona Strand, which is a disused, blocked off
road. This gets bigger after 50m. [A-Z:08-A5/108-A1] #1: Hinged
manhole in Wigley St, Gorton, opposite laneway between houses. May
need barricades. [AA: 128B1, A-Z: 96A6] #2: Hinged manhole in
wide section of pavement on nth side of bend in Parsonage St.
[AA: 126D3, A-Z: 108C2], Moss Side
Locality: Gorton-Moss Side
Region: North West England
Country: United Kingdom
Care: Very long! Lots of low sections. Just after the first
chamber is a 75m long section that is over knee deep in nasty mud
that releases gases when disturbed. Both manholes are in dodgy
neighbourhoods.

Water Level: Ankle to shin whole length with lots of knee deep sections. Very deep pit at atart of side tunnel
Cond: Old and very decrepit. Full of potholes and rubble.

Name: Crawlerfall
Alternate: Your mums bits
Description: Long system containing multiple waterfalls that are
connected by
short sections of varying size pipes (mainly 4-5ft), some
of
which require you to crawl. The system includes one 'big
mama'
waterfall along with numerous 'children falls'. MPL=800m
Features: Waterfalls, small to medium sized rooms, small side pipes.
Access: Park in the Cul-de-sac of Robin Place (corner of Mina
Wylie
crescent). Walk down the path towards Tharwa drive and
head
south. Take the 5ft directly in front of you. Ignore the
6ft and
dual pentagon openings, as they lead else where.
Outfall: [GPS:-35.468419,149.090431]

Locality: Gordon
Region: ACT
Country: Australia
Care: The grounds keeper at the retirement village behind the
outfall
of this drain has tried to prevent access by placing
rabbit wire
over the pipes. Best not to be seen entering by him.
Ek!: Going from the step irons to the 5m high waterfall is a
little
tricky and slippery. The concrete manholes open along
Tharwa
drive which is a busy road during the day.

Water Level: Slimey - Shoe
Cond: Untouched.
History: NA
Notes: If you do visit this drain can you put my name up I forgot
a pen.

Name: Criss Cross
Description: Twin 5' RCP's with 7' & 6' junction rooms and 6' RCP section.
The RCP's are not placed parallel/side by side. Instead they jut out and butt into it each other at weird angles for the entire length of the drain. Makes for interesting bends and turns!
Features: MPL: approx 300m
Junctions, chambers.
Access: Enter via outfall on Junction St, Clyde
GPS:-33.836834,151.030297)
first gutterbox you pass on the way upstream can be used as an exit if you need it.
Locality: Manholes are 6 seg and fairly tightly wedged.
Clyde
Region: NSW
Country: Australia
Eek!: eels, fertilizer caked on the ceiling of one RCP,
industrial waste, RCP's imploding
Water Level: Shin - Dry
Cond: falling in in some places
Found: Curly & Rascal 2010
Rating: 2.0/5.0
Created: 2010-02-23 13:00:00

Name: Critters's Tomb
Alternate: Critt's Tomb.
Description: 6ft rcp drain with a small slide and staircase. Heads upstream to eventually join Bourbon drain.
Access: Easiest to explore from within bourbon drain. Otherwise its about 200m north of bourbon on the west side of the Maribyrnong River.
[Mel:28D-7]
Region: VIC
Country: Australia

Water Level: Knee at outlet
History: Burbon and Critters Tomb were found at the same time many
years ago but Critt's, due to the low and often flooded
entrance, wasn't done until a year later. The two drains were given
individual names before we realised that they are joined
by two overflows.
Rating: 1.5/5.0
Created: 1995-12-31 13:00:00
Modified: 2005-11-30 13:00:00

Name: Cro's Tomb
Description: 7ft rcp.
Features: The opposite end.
Access: Follow side creek through Box Hill Golf Course to the rear
of Bowater Scott. [Mel:61E-3]
Region: VIC
Country: Australia
Care: You have to walk thru a private golf course. Take a golf
club with you and pretend you're Tiger Woods. Then you probably
won't get hassled by groundskeeper Willie.
Water Level: Ankle deep in parts
Nearby: Gets Bigger and Fochnebeaver.
Rating: 2.5/5.0
Created: 1995-12-31 13:00:00
Modified: 2006-02-28 13:00:00

Name: Crowsgate
Description: An interesting specimen found to be a virgin with no sign
of graff anywhere. This is a difficult entrance and exit via
old style heavy iron grilles. Take ladder. Goes underneath
Southgate Shopping Centre and has an outfall in Sylvania Waters.
MPL Approx 1km
Features: 'Almost' impossible exit. Do not explore alone, the
stepirons at the exit are almost uselessly positioned and you have to
reach at least 7' high to remove a heavy grille from underneath.
Nice eel resident, largish slide, massive grille would make great
photo

also. op. with light streaming in- can see AMF bowling from it
 10' by 6.5' 'hallway' that goes under the shopping centre.
 Access: Off the Princes HWY, at Sylvania McDonalds by Southgate
 shopping centre. From there walk south down Formosa St. Keep going
 till you pass the parking lot and are near the loading docks.
 Look across the road to your right and there is a small
 alleyway/shortcut between the houses. In the middle here
 you will see 2 sets of grilles.
 Parking in Mcdonalds carpark or Formosa St.
 [GPS:-34.009822,151.102659]
 (Approx outfall location [GPS:-34.014225,151.105812])
 Red 2012: Additional entry/exit via grill at eastern end
 of Jupiter Pl, where the lane ends, here at
 [GPS:-34.009741,151.102154], is relatively easy to get
 into the upstream part of the drain without the need of a ladder.
 Simply remove grill (and cover it or park car next to it so no
 pedestrians fall in), grab onto steel girder supporting
 the GBG, and lower yourself down into the drain using the pipes as
 support and footholds. To get out, pull yourself up via the steel
 with a bit use the pipes and footholds. Can be done quite quickly
 of technique.
 Locality: Sylvania
 Region: NSW
 Country: Australia
 Care: Don't explore on your own, may be trapped, or stuck inside
 during high tides. Stay close to the left wall when going down
 the slide, seems to be least slippery. Be quick to get in/out
 if using the alleyway/shortcut entry, locals walking up and
 down there during the day.
 Eek!: Don't slip down the slide, watch out for protruding wires
 sticking out of the gutterbox when you pass the slide
 going d/s. Lots of roaches and some spiders. Careful when opening
 grilles.
 Water Level: Slimey - Shoe, Knee - Head at outfall
 Cond: Pretty good condition, doesn't look like anyones ever been
 in this.

Notes: Access to Crowmart via this drain. If you've brought a
ladder then you'll have no trouble getting there.
Hallway walls lined with tea-candles.
outfall Check the tides if using the outfall, have seen the
become completely submerged.
past the Not much upstream, gets smaller. Not much explored (U/S)

Name: CSI Baulkham Hills
Description: Crappy 5'RCP under Windsor Rd. MPL=50m.
Features: Contains many 2x4 support beams, several knives, and a large amount of police tape.
Access: Opposite Chelsea Ave [Sw:232G09, UBD:170M09, Grg:247G09]. GPS somewhere here??? [GPS:-33.755589,150.989504]

Access to Drain entrance here, at [GPS:-33.754943,150.989702].
although this property either by jumping fence along Windsor Rd,
property is highly exposed by street lights. Alternative access via jumping the fence in The Cottell Way at the west of the
the or by going through Suburban Farm Drain at the south of
of property. Drain still has wooden support beams and a lot
up the garbage wrapped around each one. Build-up of mud further
of any drain which is holding back a large body of water. No sign
knives.
Locality: Baulkham Hills
Region: NSW
Country: Australia
Care: Why are there so many knives amongst the flood debris?
Whats with the police tape?.
Water Level: Shoe - Ankle
Cond: Contains support(?) beams.
Found: 2006 Seeker.
Rating: 0.5/5.0
Created: 1995-12-31 13:00:00
Modified: 2006-10-14 14:00:00

Name: Cube
Description: 5' RCP outfall leading to 2x GPT baskets that choke fairly heavily making entry a chest deep occasion. 4' RCP for about 100m
concrete then opens into a big square cavity (about 8' high) with pillars and roof support beams, treks on as 4' RCP for ages and ages up to St Leonards somewhere.
MPL: 150m
Features: lovely mossy outfall, room to fit 30 people easily in the cube

room, not so much the tiny RCP

Access: Enter via outfall in reserve on Russell St (cnr Milner Crs), take left RCP. No exit before the cube room, maybe there's one upstream? While walking above ground, spied a shaft in nearby newland park, perhaps it connects.

Russell #1. Outfall; [GPS:-33.829263,151.192594] in reserve on St, half way between River Rd and Miner Cres.

the park #2. (Upper) swing grille; [GPS:-33.826099,151.194263] in opposite 17 Canberra Ave.

park #3. (Upper) manhole; [GPS:-33.827827,151.193269] in the opposite 35 Canberra Ave (next to the end of footpath)

grille is #4. (Upper) swing grille; [GPS:-33.825348,151.195108] located half way on each side of rail fence, 100m north of Oxley St, on Lithgow St.

33.829255,151.195199] Grille at the bottom of Carlyle Ln [GPS:- leads to 4' RCP and a short slide, then a section of 4.5' brick arch under the rail line, after which it becomes 3' RCP.

This is probably the right-hand branch from the GPT basket room.

Locality: Wollstonecraft

Region: NSW

Country: Australia

Care: tight squeeze

Eek!: Choked GPTs

Water Level: Chest - Dry

To-Do: explore upstream where the drain may connect with a deep shaft in park near traintracks

Notes: don't really know who's been up here but noticed it weren't listed so here it is

Found: The cube room is situated under River Rd.

Rating: Rascal/Pandaman

Update: 0.0/5.0

flooded; 2014-02-09 13:00:00 (Ratter) - The outfall is no longer entry is easy.

A brand new CDS unit has been installed in the park just a few metres upstream of the manhole.

Update: 2010-01-15 13:00:00 (Scarecrow) - Total MPL including upper brick

arch sections, approx. 500m.
Gets bigger upstream; 5' brick arch. Features dry rubble
filled
by-pass which loops around.
To Do: explore upstream where the drain may connect with a
deep
shaft in park near traintracks. DONE. it does connect to
the deep
shaft, and it goes under the rail lines.
Note: The manhole is by far the shortest distance to
travel to
the to 'Cube' room.

Name: CuttlefishPox
Description: The 3rd and final Pox in Pox Valley. Massive inverse
parabolic stormwater drain (15'). Like CowPox, this one does not
have churn blocks. Unlike the other two Poxes, this one does not have
weird metal boxes. Why? Dunno!. MPL=157m. TEL=157m.
Access: #0,UE: At cnr Chelmsford & Eden, follow concrete road down
hill (public access) to gated fire trail. Follow fire trail to
Yellow Brick Road (neither yellow, nor made of brick) that runs
beside the F3. You'll know it when you come to it. Follow it down
hill (naturally) until you get to the creek. At that time you
should see your Pox-goal. [Sw:195G17, UBD:133Q09, Grg:192E09,
GPS:-33.6869025681,151.12051458]. For a shorter route, do
the same but when you see a track leading downhill off the
trail to the left, take it.
#9: Opens other side of F3.
Locality: Asquith
Region: NSW
Country: Australia
Water Level: Slimy-Shoe
To-Do: Pop the bolted manholes on that stormwater distribution
outlet thingy behind the tennis Court Complex.
Notes: Found by a combination of reference and probability and
downright poxy determination. All 3 street directories (UBD, Sydways
& Gregory's) showed a third creek in the valley under the F3
in

than the
it was
other two

that area. That portion of the F3 was built much later
main portion Hawkesbury to Mt.White (1967). Named before
found, and the name was based on series formula of the
Poxes.

* As this is easier to get to than CowPox and not near
houses like ChickenPox therefore better for a party.

Nearby: Its sisters: CowPox & ChickenPox.

Created: 1995-12-31 13:00:00

Modified: 2007-01-26 13:00:00

Name: CXIV
Description: Large covered canal, 10'h x 12'w, with 8'h side branch,
shrinks
to 2 x 6' RCPs after 450m. MPL=1.791km. TEL=2.500km.
Features: Hardcore structural support, big enough to have drag races
in.

UPDATE Ghost 2012:
Large and well supported 10 meter x 50 meter x 20 meter
chamber
with down ramp. The chamber still has the old canal
features
still with views and access to mall carpark. You can play
spot
the survey marker upstream. Cavity reasonably lit even
after
dark.
On the left side of the canal there are 2 sections of
fencing,
The most upstream of the two has an unlocked gate. Which
permits
unhindered access to the 'basement' of the shopping center
above.
Height is from crouching to standing height. This area is
large
in size and has all sorts of walls, trenches, pipework,
air
ducting and other cool features.
Access: #9,UE: U/s of Windowville, on S side of McFarlane St, near
cnr
with Pitt St, look for the big Spotlight sign [Sw:272J04,
UBD:210P12, Grg:307J12, [GPS:-33.835003,150.991112]
#3,AX: Main drain shrinks to 4' after the Pillar Junction,
side
tunnel ends after 200m into a canal with a 3' tonkin to
the R and

and 50m onward the canal is covered again by a 200m long 12'h
opens very badly built concrete cap. This shrinks to 4' then
again after 20m.

Care UPDATE Ghost 2012:
#1. Climb over 6ft fence here: GPS:-33.832746,150.993288,
required, sharp wire.
Walk Right along fenceline for 90 meters. Find a hole cut
into

the fence here: GPS:-33.833289,150.994079
Walk to this location: GPS:-33.834125,150.994409 and
traverse

down embankment to drain.
Entry here: GPS:-33.834259,150.994458
Head upstream.

Locality: Merrylands

Region: NSW

Country: Australia

Care: UPDATE Ghost 2012:

The cavity is still incomplete and maintenance workers

are in

this area during business hours.

Security systems maybe installed in the cavity under the

shopping

center in the near future. Be considerate of stray

torchbeams and

high noise. Active shopping center above. Onsite Security

exists

in Shop.

Water Level: Dry-Ankle

Name: D/C's Dissapointment
Alternate: Wirraway Estate Drainage System
Description: A drainage system running beneath a new housing estate in
Lithgow. Pipes range from 5.5 to 6ft at either end of the
drain,
but shrink to twin 2ft in the middle of the system.

Features: TEL= 500+ metres.
Large junction/grille rooms at either end, interesting
overflow/outfall.
The twin 5.5ft
padlocked outlets, are actually just an overflow system
into a
retention pond for during very heavy rain.

The drain also continues downstream to an older
system
via a 3ft sidepipe in the first junction room.
Access: The twin 5.5ft outlet/overflows are here:
[GPS:-33.498790,150.135590]. (Padlocked).

Best access is probably the easy to open grill
above
outlests here: [GPS:-33.498910,150.135712].

Upstream entrance via street grill beside large
bolted
grills here: [GPS:-33.500915,150.134716].
Locality: Lithgow
Region: NSW

Country: Australia
Care: Watch out for nosey neighbours.

heavy This system would probably carry large amounts of water in
rain..

Eek!: Lots of Kangaroo's hanging around at the outfalls.
Water Level: Dry - Shoe
Cond: Basically new
History: When we found this drain, it was night time and raining.
We decided to ignore the 1st rule and have a quick look..

heading We crawled down through a street grill into
the main junction room and seen two seperate 5ft branches

topside off. We quickly exited the drain and followed it along
till we reached the 6ft bolted inlet. We got all excited.
Revisited the drain a few weeks later and to my

dissapointment,
pointless it shrinks in the middle. Making this drain nearly
other than chillout rooms at either end.. :(

To-Do: Not bother crawling through this drain, although
drainboard races here may be fun..

Found: 2014 DC and Cactua
Rating: 1.0/5.0
Update: 2014-05-12 14:00:00 (DC) - Damn, so after the second
grillrooms,

is a these main pipes shrink down to twin 4ft/4.5ft rcp. There
slight downhill slope to 'em though, hmmm, drainboard
races?

grill I still need to investigate a 5.5-6ft rcp down a deep
backyard further upstream of one system, but it is in somebody's
and will be quite difficult.

Rating- Garbage

Name: Deathwish
Description: Crazy drain that run up an extremely steep hill.
Features: 9ft outfall that is a vestibule for two 5.5ft rcps that
run up an
excessively steep hill. Pipes have huge stainless steel
rings
mounted every 2m allowing them to be climbed while slowing
water
down. Halfway up the pipes level out, before going up
again,

shrinking leading to a room and 9ft rcp. Rcp goes on for ages,
slowly, with a few side tunnels thrown in.
Access: Climb down hill from the north end of Evergreen St. Drain
is on edge of creek. May need tools to unbolt grille. [Mapart148
N29]
Locality: Shawnee Slopes
Region: AB
Country: Canada
Care: Very steep. Section of pipes have moved in the earth,
leaving behind a gaping hole in the ground near top of hill.
Water Level: Lots of splash factor, Shin deep at outfall

Name: DeJaNot
Alternate: icrawledforloomsoimlistingit
Description: Weird entry structure with heavy iron grilles on top.
Drops into

3.5ft pipe...crawl through here for 100m approx
until the pipe
curves down and left and drops into a 4.5ft box
rcp.
Going left
will take you via 20m to a 15ft slide/drop - you
will die, do not
attempt. Three quarters of way down slide,
protruding from the
middle, is a decent sized, jagged edge, piece of
steel piping -
this will cut you or splay you on the way to
your concrete death.
before Turning right into the drain there is 20m approx
a right
turn and possible increase in drain height -
between me and this
point was an impressive amount of unavoidable
spider webs. Go
good explorer...this may head off into a
brighter future..it does
in fact head back into the workings of what was
the treatment
plant..perhaps this actually leads into
something more interesting..i may even be vaguely tempted to go
back and find
out because the tunnel shape and materials is
not consistent with
normal rcp.
Features: Slide of death which features is own ball splitting death
pipe.
Access: [GPS:-33.82441,151.221039] if you park near corner of View
and Earle street and look down into the bush you will see a
channel
formed by water heading down the hill towards the tennis
courts.
Drain entry is at lowest point 10m across from tennis
courts -
alt entry grille alongside tennis court fencing also heavy
old

style grille.

[GPS:-33.824261,151.220101] somewhere here is a dirt path winding down to the tennis courts.

Locality: Neutral Bay
Region: NSW
Country: Australia
Care: Replace grilles, kids playing on tennis courts often, could easily become curious enough to climb in.
Eek!: Slide of death. Do not tempt fate.
Water Level: Dry - Slimey
Cond: Fairly new rcp leading to junction ,becomes old 4.5ft box
History: Probably has some.{Yes, "Head of this bay and the course of Willoughby Falls Creek were popular recreation spots until 1891 when construction commenced on the Folly Point Sewage Farm by reclamation of the head of the bay. These works operated from 1899 to 1926 when replaced by the newly opened Northern Suburbs Ocean Outfall Sewer. The site was then 'rehabilitated' and the former sewage filter beds reformed as a series of sports playing fields by North Sydney Council, who purchased the site in 1929."

To-Do: See pic in Gallery - fl@sh} turn right at junction and confirm if it goes into former sewerage treatment works.

Notes: [GPS:-33.823708,151.220012] there is a creek in line from here down to the exit point of DeJaNot....DejaVoux is probably somewhere along this creek line.

Name: Delotarium
Alternate: Delo's tomb
Description: A great system with features galore. Caters both for the
hardcore
drainer and new comers. Up there with Squirrels, Guy
Fawkes,
Belconnen and Penguins. MPL=2.6km
Features: Massive system with multiple large chambers, massive GPT
rooms
(inluding large double GPT corridor), mini spillways,
shape
changes, size changes, weird manholes inside pipes, too
many
waterfalls and sidepipes to count.
Access: Park at the "hall for hire" carpark near the corner of
Gungahlin
drive and The Valley avenue. Walk north through the new
wetland
system. Entry 1 - Walk though knee to waist deep water and
enter

through either of the 5.5ft rectangular entries. Entry 2 - North of Rectangular entry, look for small control pond furthestest away from road. 3m x 1m grille with mini spillway. Left grille and enter. Requires a 12m crawl on stomach into the chamber. Entry 3 Swing grille into the GPT behind goodyear tires/beaurepairs. Entry 1 [GPS:-35.185898,149.124083] Entry 2 [GPS:-35.185511,149.124866] Entry 3 [GPS:-35.185185,149.12551] Outfall (need boat/swim) [GPS:-35.175895,149.134646] Locality: Gungahlin Region: ACT Country: Australia Care: Climbing up into 7ft RCP chamber, very slippery and constant waterfalling. Requires good upper body strength. Navigating from the dual GPT chamber in the "corridor" into the RCP's on either side. Eek!: Old wasp nests in older section of drain. Spiders. Bits of rio sticking out in 5ft section after GPT corridor in left pipe. Water Level: Dry - Swim Cond: Untouched. A few markings and measurements written in pencil in the new section written during the construction. History: Upgrade of an older system. Current google maps capture does not show the new sections of this drain. To-Do: Scale 3m high water fall at inlet end of drain and explore the side pipe up there. Explore more sidepipes Notes: I believe the new rectangular and square sections were finished in late 2012. Found: 2013 Delo Rating: 4.0/5.0 Created: 2013-08-17 14:00:00

Name: Depot Drain
Alternate: Honeycomb.
Description: A wide drain, formerly canal but now covered, with lots of voids/grottos that runs beneath the Audi dealership & South Sydney Council Depot. TEL=500m.

Features: Many voids beneath the depot & dealerships that contain various types of useless obtainium.
*The honeycomb roof under council depot, and access to depot.
Access: #0,UE: Canal between the Audi & Holden dealerships on Link Rd
[Sw:297L17/076L17, UBD:256F13/019L09, Grg:376A13, GPS:-33.9118065933,151.211324961]. Beside Audi building Go d/s.
#5,UX: Thru voids in the south side up to Epsom Rd.
#7,EE: Into the council depot.
Locality: Zetland
Region: NSW
Country: Australia
Care: Seccers at the car dealerships.
Water Level: Slimy-Shoe

Name: Detention
Alternate: Balgownie Detention System
Description: Large Detention System for Mt Ousley runoff. Above ground. Includes one tunnel, and one bridge.
Features: Bridge approx 10m off the ground above primary detention basin.
Side tunnel for excess overflow. Tunnel is about 30m long. Overall detention basin size is approximately half a soccer/football field.
Much local graffiti
Excellent Echo in several areas
Access: North: Cnr of Brokers Road, and Gore Street, Balgownie.
South: Corner of Brokers Road and Lang St, Balgownie.
Walk in on path, jump fence down grassy slope.
[GPS:-34.385065,150.871545]
Locality: Balgownie
Region: NSW
Country: Australia
Care: During heavy rain this area is a flood basin and water detention

detention system. Heavy rain produces enough current through the
lower system to sweep you off your feet and smash you into the
detention wall, and further into the sluice to the creek.
Stay away during heavy rainfall.

Water Level: Dry - Dry
Cond: Dry 99% of the time
To-Do: Create half pipe against sluice wall to create artificial,
surfable wave during rain.

Name: Diamond Backed Rattle Snake
Alternate: Ice-Cream Truck, Great Stains, Greystanes Maze, Bird on a
Wire,
That Drain With too Many Names, Clown Face, School's Out

Description: Pretty interesting drain of decent size and length, and a few surprises.
 Collection of 6.5' RCP, 6' RCP, 5.5' RCP, 5' RCP, 4' RCP, and continuing on further upstream as 3' RCP.
 Grilled chamber at the D/S end (the 'rattle'), various other chamber, including the U/S end with the snake's head.
 MPL=approx 700m, TEL=approx 850m.
 Features: The 'rattle' chamber at the D/S end, two over-flows which form a diamond shaped loop-around, lots of GBGs, the 'head' of the snake- a large smiling face U/S, and a single pillar even further U/S.
 Access: GBG at the southern end of Hackney St (western side is easy, just park your car infront of it) [GPS:-33.81637,150.946955]
 Alternatively, there's a concrete manhole just under one of the trees next to the fenceline, in the south-eastern corner of Darling St Park. Next to the concrete drainage channel that runs north along the edge of the park. [GPS:-33.815954,150.946564]
 D/S grille chamber [GPS:-33.814864,150.946548]
 GBG infront of 13 Gwydir St [GPS:-33.81741,150.947495]
 GBG infront of 11 Gwydir St (otherside of over-flow by-pass) [GPS:-33.817436,150.947699]
 Grille in back garden of Genista Aged Care Facility [GPS:-33.817907,150.947964]
 Manhole into 'head' chamber on Old Prospect Rd, about 50m west of Cumberland Rd [GPS:-33.818974,150.947967]
 Locality: Greystanes
 Region: NSW
 Country: Australia
 Care: The Hackney St grille or the manhole under the tree are the easiest and least visible entry/exit methods. Park your car infront of the grille if you don't have a means of lifting the manhole.
 Water Level: Dry - Shoe
 History: Possibly constructed in the late 80s/ early 90s judging by the tags and names.

To-Do: Someone take an iphone or something that can record
coordinates and locate the other gutterboxes on a map.
Notes: Found by looking for intel listed by Fl@sh, which turned
out to be small drainage, then we saw the downstream grilled
chamber, and followed the drainage channel until a suitable entry
was found.

Description:

Dimensional Parallel
Aranda drain
A drain system running under Aranda that contains some

chamber.
 Features: interesting and unique features. MPL=550ms to "the face"
 internal Brick walls to stem the flow of water - almost like an
 Bizarre. dam - Splendid. A rectangular section ON TOP of a RCP -
 sad, The Face - A large junction chamber where 3x RCPs form a
 stretches of fish-like face - Terrific. A few beautiful, long,
 small 3ft gutter-boxes - creating serenity in grime - Alluring. A
 Marvelous. side pipe that connects into the Belconnen way drain -
 this Square, rectangle and RCP are all shapes you'll find in
 system - Variety.
 Access: Park at the Aranda playing fields (Cnr of Kubura Pl and
 Banambila St). Walk north down the small unsealed service track and
 look for the open canal. Enter through the solitary 7ft RCP.
 Outlet [GPS:-35.253474,149.081473]
 the main If entering from the Belconnen way drain: Head west from
 approx inlet entry point and take the 3ft side pipe to the left
 upstream 150-200ms in. Alternatively, continue on through the
 wall pipe as it changes to 4ft and you'll exit at the 2nd Brick
 section.
 Locality: Aranda
 Region: ACT
 Country: Australia
 Care: A 2 story house has breath-taking views overlooking the
 outlet of this drain. They also have a small dog that is fond of
 barking at strangers that walk too close to their fence.
 Eek!: Knee deep water with added sludge for about 50ms when
 entering from the outlet. Don't lose your shoes! Walk close to the
 edge of the RCP to avoid the worse bits.
 Water Level: Dry - Knee
 Cond: Not visited very often - only explorer graffiti in the old
 sections
 History: It appears this system was originally a continuation of
 the Belconnen way drain. It's possible after some flooding
 occurred

Rectangle, ACTEW have added on newer sections - the Square,
the overflow sections, etc, to beef up distribution. I believe
with majority of the system was a 4ft that's now been replaced
in the the new larger sections to cope with storm water run off
area.
To-Do: Bring a milk crate or two to scale the eyes in the face.
Follow
the light in the left eye.
Notes: Old sections explored by FiL and the Cave Men in 90s.
New sections explored by Delo 2014
Found: 2014 Delo

Name: DINGLEBURN
Alternate: KFC
Description: Twin 5x8 foot box culverts. MPL= approx 750-900 metres.
TEL=
unknown
Features: Not many, pretty boring but long. Right next to KFC car
park if
your hungry.
Access: Upstream access is at the end (dead end) of Palmer st in
ingleburn (-34.001448, 150.864971) although its heavily
fenced in
with cyclone fencing topped off with barbed wire, best way
in is
behind KFC on Macquarie rd, just down from the station
(-33.995739, 150.867275).
Locality: Ingleburn
Region: NSW
Country: Australia
Care: Watch out for locals..... Pretty scary.
Water Level: ankle in places
Cond: Still works
History: I used to ride my BMX through here when i was a kid
visiting my
cousins.
To-Do: I think there is lots to explore around this whole area.

Take my sons bike down there and ride down memory
lane.

Name: Discrace
Description: Recently developed suburb in the northern part of the ACT.
This

grille particular drain sits in a giant floodway with multiple
rooms, gutter boxes and strange mini grille rooms.
Generally connected by 5 - 4ft RCPs, most rooms are all in
relatively short distances of each other. Still a back breaker/knee
scraper. This drain system, as the suburb it's in, has only recently
been completed. I believe it connects to a larger system near
by but I have yet to find where the two join. I've explored a
hundred meters through one set of pipes and it gradually got
smaller.
Features: Multiple grilles and chambers.
Access: Jump small retainer wall and cross the rocks, dodging the
mud pits, enter the 4ft pipe and crawl into first chamber.
Closest street Medhurst Crescent (the side closest to gundaroo
drive) and closest cross section is Nurdurr Drive. Parking - Many
vacant blocks around at time of writing, use one to park on the
safe verge/inside the block. Exit - numerous mainholes that are
to pop. Use one of them or the way you came in.
Interesting note this location looks nothing like it does on google maps. A
lot of developement has taken place in a short time.
[GPS:-35.195461,149.106207]
Locality: Crace
Region: ACT

Name: Dobel Downs
Alternate: The Pretender. Petageko.
Description: This drain begins with a big 7ft RCP and looks very
promising
from Dobel park where a number of large sloped drains
disappear
into a visible pipe system far below. Also known as the
Pretender, because within about 25m you're back to a back
breaking 4ft RCP.
Features: We found a big gecko who liked being petted :). When it
rains
hard the outlet of this drain creates a waterfall of
ferocious
force that shoots out into the valley below. Enough force
to bowl
you over and send you down the creek.
Access: Dobel Rd GPS:-34.05853, 151.02070. On the lower side of
Dobel Rd,
there is a reserve between two houses. Head down this
service
track past the gate for 10m or so. Head left into the
bush. Bush
bash your way down to the creek (15m) Look up the creek
until you
see the big pipe above you. Good Explorer.
Locality: Engadine
Region: NSW
Country: Australia

Care: Slippery rocks, don't fall, you will be mince meat on the rocks
below. No drains when it rains. This one especially!.
Eek!: Huntsmans and Funnel webs enjoy this drain too.
Water Level: Slimey - Ankle
Notes: This drain outlet serves a large portion of northwest Engadine.
This drain boring unless you're admiring the outlet during a heavy downpour.

Modified: 2007-01-01 13:00:00

Name: Domayne Drain
Description: Open canal that becomes a drain to pass beneath a major
road. Heading downstream, the open canal is covered by a brand
new concrete roof about 9ft high, here are various home-boy
graff & CC tags. Further into the drain is the older section where
the drain is 4ft high for about 2m as the bridge above
contains a sewer main! Just before u stoop to go beneath this low bit
u will

about 4ft & notice an old ramp, this drops the floor of the drain
 urself in after about 2 meters u can stand up again where u find
 meters on, the downstream portal which is about 12ft high. A few
 become an just past some more graff & tags the drain opens up to
 Canal. open canal again. It eventually runs into Alexandria
 Features: The original bridge containing a sewer main. For most of
 its length this drain has a 'flat' terracotta floor which
 gives the ramp an unusual 'round-ish' look opposed to the sharp
 edged concrete ramps usually found in drains. There is also an
 'open' 'room' under a bridge nearby that has evidence of ppl
 having either lived or thrown a party there.
 Access: Next to the Domayne shopping centre between Doody St &
 Gardeners Rd. Enter carpark on either side of the canal, jump in &
 walk downstream to drain.
 [GPS:-33.917435,151.194226]
 Locality: Alexandria
 Region: NSW
 Country: Australia
 Care: Shopping next door, lots of narky ppl about during the
 day!.
 Eek!: Roof dips to 4ft for about 2m. Nazi security guards are
 everywhere!.

Name: Driveway
Description: 5' round drain. One room, some smaller branches. TEL=1km.
Access: #9,UE: "Drainage Reserve" between Farah Pl and Diffey St,
off
Hume Hwy. [Sw:293B15, UBD:251H11, Grg:368H11,
GPS:-33.9051316792,151.014208884].
#0,UX: Dual triangular
grilles in front driveway of 80 The Avenue.
Locality: Yagoona
Region: NSW
Country: Australia
Found: 1993 Diode.
Rating: 0.5/5.0
Created: 1995-12-31 13:00:00
Modified: 2004-09-04 14:00:00

Name: Drowning Horse
Description: Dual 6ft outlets spilling into the Yarralumla creek canal.
Runs
under the Phillip light industrial area. The start of the
system
appears to have been upgraded recently. Despite it's
location I
can't find any record of it ever being listed MPL= 1km~
Features: Both 6fts meet up in a decent sized chamber/junction room.
Junction room contains 2x 5fts and a 4ft pipe gushing with
water
where a loud hum can be heard, I suspect this side pipe
connects
up with a recent high rise development and may provide
access to
a cavity under that building. The 2 5 fts run for about
100ms
before amalgamating into a 6ft. Multiple junction rooms
and mini
chambers further up stream.
Access: Corner of Callam St and Hindmarsh drive. Multiple parking
places
nearby. Hard to miss really.
[GPS:-35.348002,149.089736]
Locality: Phillip
Region: ACT
Country: Australia
Care: Main entry/outfall is over looked by multiple domestic
high rise
buildings and is near a legal graffiti area. It is also
visible
from Hindmarsh drive.

Eek!: Some of the intersecting pipes have created loose bits of concrete over head. Try to avoid touching the roof in these areas due to a risk of it collapsing.

Water Level: Dry - Shoe

Cond: A little graffiti at the enterance and some in the older sections upstream.

History: NA

To-Do: Explore the 4ft in the first chamber

Found: 2014 Delo

Rating: 3.0/5.0

Name: Dubbo Dubble
Alternate: Dubbo Twin
Description: Twin 5' and 6' RCPs with waterfalls. MPL 225m, TEL 450m.
Features: Two waterfall shafts, ladders, central grille room, water
dragons.
Access: Western bank of the Macquarie River, opposite Talbragar
St. Twin
5' RCPs 30m south of the train bridge.
[GPS:-32.244302,148.599328]
South of the train bridge where it crosses the Newell
HWY/Whylandra St. Through the inlet grill off the canal
[GPS:-32.243636,148.597013]
Locality: Dubbo, NSW
Region: NSW
Country: Australia
Care: May be water dragons inside the d/s end near the river.
Eek!: Spiders, spider webs.
Water Level: Dry - Knee
To-Do: Follow canal upstream to see if there are any more decent
sections.
Notes: Central grille room is inaccessible/exitable. All topside
grilles
have been welded shut.
Found: 2013 Scarecrow
Rating: 3.0/5.0
Created: 2013-03-30 13:00:00

Name: Duck River
Description: A pathetic set of drains. #1 has a promising entrance, but
is a

worthless, shitty little round drain. #2 and #3 are old
and newer
parallel rectangular, about 6' but short. The 'old' one
has an
interesting 'anti-mini-racers' mega grille on the u/s end.
First
Drain found in Sydney by Cave Clan.
Access: #9,UE: Cnr Munro & Helen St [Sw:293A03, UBD:231G15,
Grg:338G15,
GPS:-33.8784421695,151.013087446]. Goes under Munro St.
Locality: Sefton
Region: NSW
Country: Australia
Found: 1989 Melb Clan.
Rating: 0.5/5.0
Created: 1995-12-31 13:00:00
Modified: 2004-09-04 14:00:00

Name: Duck, Duck, Mongoose
Description: Overflow for the lake at Bella Vista/Norwest Business
Park. RCP
sections 5' at best.
MPL: Approx. 100m.
Features: 6m tall chamber with overflow from the lake pouring into
it from
the overhead grille.
RCP sections not laid properly, creating dips where the
water
gets deep.
Twin rectangular outfall.
Access: Through GBG on Solent Circuit, Bella Vista, at the north
western
corner of the lake. You'll likely see where the water
spills into
the overflow; cross the road and climb down the really
deep shaft
under the GBG. [GPS:-33.730741,150.961717].
Alt entry/exit at the twin outfall; just a bit further
west down
the grassy slope. [GPS:-33.730644,150.961104]
Inlet; [GPS:-33.730941,150.96191] (Inaccessible).
Locality: Bella Vista
Region: NSW
Country: Australia
Eek!: You'll likely get wet up to your knees, and the outfall
isn't
very tall.
Water Level: Shoe - Knee
Found: June 2010, Rascal, Scarecrow.
Rating: 2.0/5.0

Update: 2011-04-08 14:00:00 (Red) - GBG is about 3m deep - pretty cool to climb down. Pipe from the bottom of the GBG is about 2.5ft from memory and quite the crawl - about 40m to where the lake outfall is. Lake outfall is, at present, absolutely packed full of mud. This might change with a heavy flow; but for now, the caged room is inaccessible from this pipe. Above lake outfall on footpath is a gattic which can probably be opened with the right tools and step-irons beneath it to climb down into the caged room.

Name: Dundas Park Drain
Description: 6ft RCP underneath Dundas Park, Dundas Valley, with 5ft RCP extension upstream. TEL=160m (190m with extension).
Access: Park in, around, or near the south-western corner of Dundas Park, 42A Yates Ave, Dundas Valley. Walk towards south-west corner of park. Outfall is north-west of the roundabout on the corner of Quarry Rd and Fullford St, at [GPS:-33.796058,151.052847]. There is a grill here, at [GPS:-33.795976,151.053088]. Upstream entry/exit here, at [GPS:-33.795296,151.054325]. Upstream extension outfall here, at [GPS:-33.795153,151.054818] with entry/exit here, at [GPS:-33.795102,151.055138].
Locality: Dundas Valley
Region: NSW
Country: Australia
Eek!: Drain spiders with glowing eyes!
Water Level: Dry - Shoe
Notes: Dundas Park is a large park which is a popular venue for sporting activities. It covers an area of approximately 6.5 hectares and has several facilities.
Found: 2012 Raptor / Red / Swim
Rating: 0.0/5.0
Created: 2012-12-28 13:00:00

Name: Dungeon
Description: Longest storm drain in Australia.
Features: Nearly 9kms long. Main tunnel is a mix of 12' and 9' rectangle,
Allnut Pk leading past slides, stations and side tunnels to the Grille. here the tunnel splits, and forms a figure of 8, one tunnel crossing under the other, meeting again after various shape changes, underpass chambers and staircases.
Continues on as a twin shape changer before reaching The Wall, a good 6kms from the outlet. Twin 8' rcps lead off from just upstream of the main outlet, passing thru numerous rooms, loops and overflows. Once you reach the grille up the rectangular tunnel you should take the RCP on the left & follow the arrows. This way you'll get to do the whole tunnel.

The 2 8' RCP's at the start should be done on a separate day as, unless bikes are used, they exist as a four hour round trip. RCP's run parallel to each other, passing through a few junction rooms. The last stretch goes for 1hr - watch your step in the LH RCP as it is full of holes. It is possible to exit the RH RCP 10 min before the final junction where the two tunnels become one via an overflow.

Access: #1: Near the intersection of Union Street and Hawthorne Rd, where Elster Canal passes underneath either scale the high fence near the outlet, or climb into the canal on the downstream side of the intersection and head upstream. [Mel: 67K-10]
[GPS:-37.909542,145.019435]
#2: Entry/exit possible to the far end of the RH long RCP via a gutterbox lid in the pavement. [GPS:-37.939294,145.045304]

Locality: Brighton
Region: VIC
Country: Australia

Eek!: The two long RCP's at the outfall become skanky upstream.
LH one has holes in the base of the drain, and RH one sometimes
has money floating in the skank.
Water Level: Mostly dry, few ankle sections far upstream
Nearby: Blades Tomb, Tommy's Hole.
Found: 1987 Blade/Cobra/Dougo/Sloth/Woody
Rating: 3.5/5.0

Modified: 2004-09-04 14:00:00

Name: Dwayne
Alternate: The Rock
Description: This is Dwayne. Dwayne is a wannabe drain under the CSIRO
carpark
in North Ryde.
It's actually a round corrugated-iron detention basin.
Concreted
off at both ends, with drainage through a mesh box.
Standing height, even for the taller chaps. Around 3m(?).
TEL=60m
Features: Outback style corrugated iron.
Access: Entry into Dwayne is via one of the many (4) hinged grates
in the
middle of the carpark. Corner of Delhi Rd and Julius Ave
W.
[GPS:-33.795254,151.140980]
Probably best not to park onsite.
Locality: North Ryde
Region: NSW
Country: Australia
Care: Don't get seen by eager beavers working into the night.
Security guard will stop by to check building once or
twice a
night, so keep an eye out for their patrol car in the
carpark.
Water Level: Slimey - Ankle
Cond: The floor may be a bit rusted.
Notes: Worthwhile visiting if in the area because it does seem to
be
relatively unique. I probably wouldn't go out of my way to
explore this alone, as although it's nice and wide, it's
not very
long.

Name: Dwellers

Alternate: Drain Dwellers Tomb Drain
 Description: Long, large, mostly 10' rcp tunnel, infamous for drowning
 four firefighters who were doing rescue exercises down it in
 the 1970s.
 Features: 10' rcp, long, lots of manholes, with graff pertaining to
 which one the surviving fireman escaped up. Has an odd diversion
 chamber called The Waiting Room. Long flooded section
 caused by a pipe running across the floor. Eventually reaches a split
 with an Rcp on the right and a stairway leading to a brick arch on
 the right. Not a bad drain at all. Can be a bit off-putting to
 newer explorers. Lots of changes included. Don't ask about the
 fireman!
 Access: Follow Gardiners Ck though Malvern Valley Golf Course from
 Solway St on the south bank. [Mel:69B-1]
 Locality: East Malvern
 Region: VIC
 Country: Australia
 Water Level: Ankle at outlet unless your really good at doing the
 splits. Shin at blockage
 Nearby: Mini Tenth, Chameleon, Warrigal Rd Bridge room.

Name: Eel Trap
Alternate: Vermont Drain
Description: Lengthy RCP drain, 2.4 m outfall flooded to thighs,
somewhat
hidden in creek. Gets dry after about 50 m, then leads to
a
large, multi-chambered GPT with a section of vertical
redbrick
shaft (sewer?) protruding. Splits off and gets gradually
smaller
after a number of rooms and grilles. MPL = ~1 km (upstream
sections and entrances need to be verified).
Features: GPT room, grilles.
Access: #1. Enter via outfall at (-37.858367, 145.200540) by
heading
north along the boardwalk from Burwood Hwy where it goes
over
Dandenong Creek, the outfall will be on your right.
Locality: Vermont South
Region: VIC
Country: Australia
Eek!: Eels!
Water Level: Thighs
Cond: Quite good, depth of water at the outfall limits access to
explorers. GPT room often has a bit of gunk in it.
History: First found by Edgar on 15th September 1994 and named
'Vermont
Drain' in a letter to the Cave Clan. Rediscovered by Pip
and Ath

in 2007 when it was extended and subsequently renamed 'Eel
Trap'
by Edgar. See thread on CCF here:
<https://www.caveclan.org/forums/viewtopic.php?f=68&t=2891>
To-Do: Find out what the hell that redbrick shaft is for.
Found: Edgar, 1994

Name: Ferrero Drain
Description: A canal, becoming a drain, becoming an underpass, before turning into small drains, heading towards an old ammunition factory.

twists Begins as a 4ft RCP heading off an open canal (farmers creek canal), this RCP bends and through several concrete access rooms (capped by concrete slabs), running under a paddock, then part of the Ferrero factory carpark, it emerges into another open canal and heads through 4ft culverts under a road, where a 5ft RCP joins up heading back downstream.

The drain continues as 3ft box culverts and RCP before meeting a small covered canal.

Heading back downstream via the 5ft RCP brings you out behind the Lithgow Showgrounds into a small canal, soon rejoining the Farmers Creek canal 50m or so upstream of where you started.

grills, the After looking down several kinda inaccessible street does upstream of the left branch (3ft brick covered canal),

Right eventually becomes a 6-7ft RCP, nearer to the old factory.
branch (3ft covered canal) emerges in a park before also
heading back underground towards the old factory as a 6x4 egg
shaped RCP.

Features: MPL=600m TEL=???
Access: An old sewer overflow in one part.
Outfall is along Geordie St, east of Up Rd.
[GPS:-33.478767,150.13975]

Larger
section accessed from the north end of Enfield Ave.
[GPS:-33.481666,150.139042]
Locality: Lithgow
Region: NSW
Country: Australia
Care: Pretty safe, but emerges under railway tracks beside the
Main Street, so traffic can see you enter the Main Street

culverts.
Water Level: Slimey - Ankle
To-Do: Head upstream of the Main Street culverts, although they
are only 3ft high, it could get interesting..

Name: Fils Tomb
Alternate: Unfinished, Great Rat Corridor, South of Northbourne,
Skipping school
Description: Long drain that runs under primary school and all the way
under Northbourne ave with some interesting features.
MPL=650m
TEL=3km (approx)

Features: Large grille room where drain changes shape from RCP to
corridor shape. Corridor very wide but only 5ft high (maybe less).
Corridor length approx 50meters opened up into junction
room with 3x RCPs. 2x 5ft RCP. 1x 6ft RCP that continues under the
suburb

of AInslie
 Access: [GPS:-35.263746,149.124985] - Entry. Under the David St
 Bridge (west of Hay St). Take single RCP. There are two 4ft RCPs
 10ms south on same side, avoid these. They meet up at main
 grille room near Northbourne.
 [GPS:-35.263772,149.131254] Exit. Man hole in grille room
 Safe to lift from beneath MH here [GPS:-
 35.263992,149.133050]
 opens onto a patch of grass, conveniently, across the road
 from a bottle-o and kebab shop on Lowanna street.
 Locality: Turner
 Region: ACT
 Country: Australia
 Care: Slippery. Careful popping man hole at grille. Main road.
 High visibility.
 Eek!: Rats.
 Water Level: Ankle - Dry
 History: Earliest bit of explorer graffiti I found was from FiL and
 the Cave men who both were there in 1998.
 To-Do: Explore further under 6ft RCP running under Ainslie.
 Notes: Explored by Delo 2013. Records of this drain have appeared
 to be lost (referenced on CCF as 'Unfinished').
 Original rating of Very Good changed to Good, on Delo's
 request.
 Found: FiL / Cave Men
 Rating: 3.0/5.0
 Update: 2014-05-18 14:00:00 (Delo) - Safe to lift from beneath MH
 here [GPS:-35.263992, 149.133050] opens onto a patch of grass,
 conveniently, across the road from a bottle-o and kebab
 shop on Lowanna street.
 Update: 2014-04-29 14:00:00 (Delo) - Can the rating of this drain
 be changed to "Good" (5), please? I must've been very excited
 about it early in my drain exploring days. It doesn't stack up
 to the standard of "very good" drains in the ACT. Thanks.

Name: Fireflys Tomb
Alternate: Fireflies Tomb
Description: A bloody great drain in Calwell and should (in the listers
the mid opinion) be on any ACT expos agenda. Found by Firefly in
well 90s, this drain is Secret Squirrels twin. Despite being
some visited by the Clan in years gone by, this drain, for some
unknown reason, has dropped off the radar.
Features: Twin 6ft RCP outlet, multiple rooms, Large grilled
junction room that gives squirrels a run for it's money, 9ft RCP with
triple 6fts. Series of 5 bunker like grilled rooms. Side pipes
and splits galore.
Access: Park at the Calwell Shopping centre - which is on Webber
car wash) crescent. Walk down to the monk creek canal (behind the
right. follow canal upstream. 2x 6ft RCP outlet will be on your
room 1. Out-fall [GPS:-35.435021,149.116813] 2. Large grille
3. Exit/Entry possible from here [GPS:-35.438687,149.118512]
Start of the 5 bunkers [GPS:-35.441904,149.121653]
Locality: Calwell
Region: ACT
Country: Australia
Care: May encounter teenagers charring weed/practicing gayffiti.

Eek!: None
Water Level: Dry - Dry
Cond: Heavily graffited in Main junction chamber
History: Found by Firefly in the 90s. Graffiti seen that was dated mid 80s. Well known.
To-Do: Explore the split of the 6fts in 2nd room from upstream grilled junction room.
Notes: Only thing stopping me from rating it excellent is it's lacking a shape/material change. - Delo 2014
Found: Firefly 90s
Rating: 4.0/5.0

Name: Firewater
Alternate: Little Creek
Description: Old 7-8ft brick arch drain under railway line, followed by twisting 2.1m box culvert under the industrial area.
Shrinks mysteriously to 3' at a knee-deep outfall. MPL=400m.
Features: Beautiful redbrick arch. Layers of ancient graffiti in mud, paint, and chalk, in varying states of legibility. Baby eels. Big rock wedged in hole in ceiling.
Access: * Main entry/exit via hinged steel grille in gutter on Hobart St, next to big padlocked steel grilles adjacent to railway line
[GPS:-33.763942,150.784888]
* Emergency exit via side pipe leading to cast-iron hatch in fenced-off area behind building at West Star Autos, 3/15 Kurrajong Rd
[GPS:-33.761977,150.784655]
* Concrete slab at top of stepirons just before drain shrinks at downstream end, next to driveway of 9 Kurrajong Rd [GPS:-33.760996,150.783880].
Requires 2 people to lift safely.
* Outfall on Kurrajong Rd between Birch St and Plasser Crescent [GPS:-33.760699,150.783614]
Locality: St Marys
Region: NSW
Country: Australia
Eek!: Redbacks in side pipes.
Water Level: Dry - Knee

Cond: Main passage moderately graffed. Outfall choked with mud.
History: Formerly Little Creek, a tributary of South Creek. Named
for the 30,000 litres of firewater it conveyed when a recycling
plant directly above the drain caught fire:

<http://www.epa.nsw.gov.au/epamedia/EPAMediaRelease15100901.htm>
To-Do: Explore the quadruple RCPs upstream past Hobart Street -
they eventually emerge at Oxley Park [GPS:-
33.771965,150.790499], just
downstream from Colyton Triplets.

Unbolt grilles on Plasser Crescent to provide an emergency
exit via side pipe scuttle: [GPS:-33.762602,150.784644]

Name: Four Two One
Description: 4x 4ft RCPs. The two left ones take you into a large
grille room that appears to be common around this area of the ACT. The
two right ones take you into a completely seperate grille room
which is almost double the size of the first (you can see the
different in size on google maps), yet they are completely seperate.
Entry to both of the grille rooms is only about 4ms from the
enterance. So a long crawl is not in order. (two left pipes) Once in
the

grille room you can cross the GPT pit with a little degree
of difficulty and enter a dry 5ft RCP that is a stoop for
about 100-150ms before coming to a decent sized chamber with a
manhole that leads to the park. I exited here. Need to explore the
RCP from the grille on the right side as it is going in a
different direction.
Features: See description
Access: You can pretty much park right on top of the grille, at
[GPS:-35.17316,149.1371]. If not, find a park on Benaroon
Circuit and make your way to the park, heading towards the water -
the grills are pretty much unmissable. To get to Benaroon
Circuit, use Katherine Ave which intersects with it, which inturn
intersects with Horse park drive that comes off
Northbourne/Rememberance drive. Man hole park exit near
Benaroon Circuit, at [GPS:-35.172346,149.136424]
Locality: Forde
Region: ACT
Country: Australia
Care: There are a few houses about, take care entering/exiting.
Eek!: Spiders. Muddy at entrance.
Water Level: Ankle - Dry
Cond: No graffiti - Untouched
History: Not sure when this drain was installed. Probably around
the time Yerrabi pond was constructed.
To-Do: Need to explore the RCP from the large grille on the right
side as it is going in a different direction. Could lead to
something great.

Name: Foxdenton
Description: 7' redbrick drain with mega inflow of treated sewage water
from local works.
Features: 8ft grilled inlet, redbrick pipe. Leads thru various rooms
to a massive inflow point from sewerage works. Has side tunnels
leading out to the sewerage works and settling ponds.
Massive stairway in one side tunnel, large pits, grilles. Beyond
the treatment inflow the drain hasnt been explored due to the
volume of water and the fact that i collects at a big horizontal
grille thats blocked with debris further downstream. From the
outlet, a 10' rectangle, the large amounts of water flood out from
the grille room about 300m upstream.
Access: #1.Turn west off Foxdenton Lane down the path on the south
side of Foxdenton Hall Park. Head into overgrown waste land,
find

drain. brook running thru it and head west to the inlet of the
 sticking Just past the inlet there is an uncapped manhole shaft
 #2. From out of the ground. Stepirons are missing so shimmy down.
 south down where Foxdenton Lane crosses the Rochdale canal, head
 reach a the eastern side of the canal for about 200m until you
 passed fenced off staircase on your left. Head down the slope,
 the side Cantankerous and follow canal to where it disapears into
 of the hill. Climb down rungs into tunnel.
 Locality: Middleton [A-Z:071 E04, AA: 88D01]
 Region: North West England
 Country: United Kingdom
 Care: Huge amounts of treated water roar in thru a decent sized
 inlet, half flooding the 8ft pipe. Downstream end is fairly fast
 behind flowing, huge amounts of water built up a metre high
 works. blocked grille. Mind for signs of workers inside treatment
 Water Level: Ankle in upper section, shin/knee in lower. Deep pit at
 base of stairway

Name: Gargantua
Alternate: Twin Tunnel
Description: Biggest drain in Toronto, also rather long.
Features: Twin 8ft rects, become twin 10ft, then twin 14ft, big
pillars, windows. Changes to a large rcp, then to a 15ft hallway,
then back to 14ft rcp, with numerous big grille inlet rooms.
Shrinks to 9ft rcp, two slides then 5ft rcp.
Access: Outfalls are on south side of York Mills Rd, 70m east of
open. intersection with Bayview Ave. Lift most righthand grille
Ave to [Mapart: 109 G22] if outfalls are locked, head up Bayview
situated St Andrews Park, pop manhole on western side of park,
upper deck, at around 100m from Bayview Ave. [Mapart: 109 F22]. For
above waterfall, go down to culvert opening in side of 401
highway, in park at the est end of Canada Dr. [Mapart: 103
E22]
Locality: York Mills
Region: OR
Country: United States of America

Water Level: Bone dry for the first 1.5km or so. Ankle after the rcp starts,
with a few shin deep sections
Found: 2005 Ziggy/Siologen
Rating: 0.0/5.0
Created: 1995-12-31 13:00:00
Modified: 2007-01-06 13:00:00

Name: Gatekeeper, The
Alternate: Keymaster, The
Description: 6.5 ft RCP with hardcore entry - a heavy 7 ft fibreglass flap.
The RCP shrinks after a few hundred metres to 6ft, then
5.5 ft, and, finally, after a few hundred metres, to 5 ft. The
general direction of the drain is southeast, passing underneath
Willoring Cres, Harris St, Stuart St, and Mulgoa Rd. MPL=600m+.
Features: Impressive navigable GPT in a 5ft side pipe with further
explorable sections underneath the carpark of Masters. The
GPT is located in the carpark, at [GPS:-33.764445, 150.681644].
Access: Outfall in Peach Tree Creek on Anakai Dr, Jamisontown, at
[GPS:-33.761546,150.677123]. This drain is guarded by a 7
ft fibreglass flap that requires at least two people and 4-6
milk crates to hold open so that one may slide underneath and
into the drain.
Access is also accessible
via two GBGs along Mulgoa Rd, with one of these at the
corner of Mulgoa Rd and Stuart St, at [GPS:-33.764085, 150.681235],
and another, presumably, at [GPS:-33.764149, 150.681483].
However, this latter one is unconfirmed topside. There are at least
two large, square grills in the Masters carpark providing
possible entry, but these appear to be very heavy.
Locality: Jamisontown
Region: NSW
Country: Australia
Care: The 7 ft flap is heavy and creates a vacuum/suction effect
when closed due to the change in air pressure. Be careful.
Eek!: Drain spiders!

Water Level: Slimey - Death
Cond: Newish, with newer sections recently completed.
Notes: Part of Peach Tree Creek - a gully and small non perennial
tributary of the Nepean River rising between Mulgoa Road
and the river west of the city, flowing generally N for about 1
mile to enter the river just south of Boundary Creek's junction.
Found: Cactua, DC & Red, 2015

Name: Ghost Was Right!
Alternate: Bat Repellent Chamber
Description: Impressive, recently cleared, watercourse beneath the M2
for a
dammed creek nearby. Possibly 15ft high and, possibly,
25ft wide.
Not a drain per se, but more tunnel-like. U2
Features: Large open space, concrete causeway (which is actually the
sewer
main), speakers with battery packs constantly giving off a
high-pitched noise - possibly a bat-deterrent. Each
battery pack
has an eerie red light, much like a PIR. If not a bat-
deterrent,
then *they* are most *certainly* onto us. *They* know what
we are
doing. *They* are watching us from undiscovered drains and
tunnels. *They* KNOW about us. Ghost was right!
Access: Downstream from Macquarie Drain. Jump over railing at the
M2
on-ramp and start working your way down the hill towards
the
southern end of watercourse entrance [GPS:-
33.774474,151.122772].
Exit here: [GPS:-33.773895,151.122884].
Locality: Macquarie Park
Region: NSW
Country: Australia
Care: Don't drown. Water course is big for a reason.
Eek!: Constant, high-pitched noises.
Water Level: Dry - Shin
Cond: Small amounts of grafitti. Otherwise good condition for
16-year-old concrete.
History: Built ~1996 when the M2 was built. Area was dense bushland
until
recent tree clearing due to the M2 Upgrade. Drain is now
visible
from the street.

Name: Glass Creek

Description: Large drain, fairly long, numerous shape changes and one of the weirdest drain chambers ever.

Features: 12' dia arched outlet, changing at times to 10' rcp, 14' redbrick and 10' redbrick. Heapsa CC graff, small stairway. Main feature is about 300m upstream of the outlet. Its a 4' dia hole in the righthand wall. Climbing thru this leads to a fairly large chamber between the outer roof of the tunnel and the building above. chamber has ledges with chairs, tables, posters and graff. Its cut down the middle by the large bulge of the arched tunnel. Numerous splits and two waterfalls are further up. Area:

East Access: Located near the northwest corner of where Frater St joins Kilby Road, in middle of reserve.[Mel:45K-2]

Locality: TC

Region: VIC

Country: Australia

Care: Theres a gas leak in the chamber, someone (supposedly) once set fire to themselves after lighting a match up in there.

Water Level: No

Nearby: Mummy.

Modified: 2004-12-10 13:00:00

Name: GOD
Alternate: Great Oversized Drain, Great Oversized Darkie.

Description: Massive, long, shape changing tunnel.
 Features: Huge outlet, long slow stairway, 15' high waterfall with
 water
 spewing over it and the ladder leading up. Becomes a
 colossal 14'
 high covered canal, varying between concrete and
 bluestone, with
 either an arched or flat ceiling that runs gunbarrel
 straight for
 neary 3kms. Numerous shape variations, including a deep
 v-trenched section and a massive u-shaped blue stone tub.
 After
 an impressively long time it becomes a 7' rectangle with a
 redbrick floor and changes back and forth with an odd dome
 ceilinged tunnel before shrinking.
 Access: Where Monash Fwy crosses over the Merri Creek climb down
 the west
 embankment just to the south of the freeway bridge. Climb
 down
 the ladder to the mouth of the tunnel. [Mel:2dB5]
 Access:
 #1: Outfall [GPS:-37.795718,145.001248]

Name: Goonies, The
Alternate: Diamond Bay Sewer Outfall.
Description: This is in the drain list cos that's what it is, however,
unless
you are insane, you wouldn't dare enter the actual tunnel,
which
is above a 40m drop, 2' dia and spewing shit into the
ocean.
Features: What makes it worthwhile, is how you get to it: you climb
down
steps cut into solid cliff face. These stop and become a
bridge,
made of drift wood and two telephone poles, that go, 15m
over a
40m drop onto rocks. The other side has a few more steps
then a
plank which leads to a ledge with a sewer viewing shaft
and a
drop shaft into the ocean.
Access: Diamond Bay [Sw:279E14/059E14, UBD:238B06, Grg:348G06,
GPS:-33.8629574692,151.283298458]. Head N down E side of
apartments in kink of Kimberley St. Look out for a lone
standing
arch near the edge of the cliff. Go through this.
Locality: Vaucluse
Region: NSW
Country: Australia
History: Is the Diamond Bay sewer relief outfall.
Found: 1999 Maddog.
Rating: 4.0/5.0

Update: 2015-05-24 14:00:00 (Ptc) - Checked out Goonies today. To
access walk around the fence at the top of the hill. It also
looks like new ropes have been put in place since I was last here.
Just be careful on the old power poles. Even worse than before.

Update: 2010-11-08 13:00:00 (Smalls) - Need to climb over fence of
new walkway to gain access to the steps. Power poles continue
to rot away, would not place life in the structural integrity of
guide ropes either.

Modified: 2015-05-18 14:00:00

Name: Gorton Falls
Description: 8ft dia rbp with some two waterfalls and numerous other odd features.
Features: Two large waterfalls, the larger is 5m high. Tunnel is infested with tree roots. Numerous small grilles, big rooms. The outlet is an impassable syphon and the most d/s 100m is a tunnel within a tunnel. Upstream of the second fall the tunnel becomes in parts an elevated aquaduct over sections of an open reservoir.
Access: Steel plate, loosely bolted down in elevated room on the western end of the dividing line in the Upper Gorton Reservoir next to the unmarked road between Green Fold and Debdale Lane.
[AA:130A3] [A-Z:111H2] This dividing line is the first elevated aquaduct in the system.
Locality: Abbey Hay.
Region: North West England
Country: United Kingdom
Care: Sewage affected. Entry ladder is extremely rusty. Floor typically slippery, be careful near waterfall edges. No exit at downstream end.
Water Level: Ankle to Shin. Waders/Wellies strongly recommended. Skanky w/f ladders
Found: 2005 Siologen
Rating: 4.5/5.0

Created: 1995-12-31 13:00:00
Modified: 2007-02-28 13:00:00

Name: Got Rich But Died Tryin'
Alternate: Get Rich or Die Tryin
Description: This drain is the upstream of Get Rich or Die Trying. It is around 175-200m upstream of it on the Showground Creek channel.
Starts as a 6ft corridor in somebody's front garden before heading under Doonmore Street and shrinking to a 4.5ft box for 10m and opening back up to a 5ft RCP for a few hundred metres, past a few slabs and street grills until a small junction room.
The drain continues S/E as a 4ft RCP with a 3ft RCP heading N/E.
(MPL/TEL) = 250m or so.
Features: Very attractive outfall if the flowers are in bloom, (This is sadly the best feature). There are a few grills and small rooms along the 5ft sections . One of the large concrete slabs in the middle of a park has been removed leaving a gaping and unfenced hole right near some kids play equipment and basically on the path! I don't see a problem?
Access: Doonmore Street outlet here: [GPS:-33.7582518,150.7040656].
Missing slab in park here: [-33.7586342,150.7044505].
Junction room and hell stoop here: [-33.7593344,150.7044961].

Or, you could start at Get Rich or Die Tryin' and if you manage to survive that in one piece, then this drain will certainly finish the job!

Unless you are mega hardcore, then I recommend you avoid these drains!

Locality: Penrith
Region: NSW
Country: Australia
Care: Access to outfall is on private property beside a pretty busy

just drop road so time your entrance carefully. Or alternatively,
into the big hole in the middle of the park.
Eek!: There is a big hole in the middle of the park.
Water Level: Dry-Death
Cond: Average
History: This was originally meant to be done on Reds "Riffed For
Her Pleasure" Expo, and was even sighted on the night by Swim
and Ratter who were crazy enough to actually reach the end of
Get Rich of Die Tryin'. The rest of us bailed out of a street
grille halfway through due to epic stoopyness haha).

Timdole and I had a looksie at it last year
but didn't venture far inside.
To-Do: Not to ever do this drain again, or find out where the
stoopy bits lead to.
Notes: This area is about to cop a big upgrade/diversion so
hopefully it will get a bit better soon.
Found: Pandaman. First Explored by DC and Stoony.

Name: Gravel Socks
Description: 6 parallel drains, each 7'h x 8'w, with regular connecting
openings. See also GobbleDox and DiodeDox. MPL=638m.
TEL=638m.

Update Hatsumi 10/2008:

Left to right - 1 to 6
From
u/s end 5 and 6 have high silt build up at entry making
roof
height more like 4ft for first 100m so
use
one, two or three for entry (1
has
highest applied liquid to sole of shoe)

Features: 14' high arch outlet, big room with twin 10' RCP's. The LH
tunnel leads to the stairway via a 12ft high mummy change. The RH
tunnel acts as an overflow pipe, and leads to a waterfall and
large grille room. A small 4-5ft pipe joins both these tunnels
just near the waterfall in the right hand tunnel.
The stairway is a long way up but is well worth the hike,
as with the Prayer Room further upstream.
Access: Follow Back Ck against the flow from the west side of the
Hartwell Tennis Club.[Mel:60C-5] [GPS:-
37.84654,145.073632]
Park here: [GPS:-37.848018, 145.073547], and stumble down
the side of the creek.
Locality: Camberwell
Region: VIC
Country: Australia
Care: Take care to look out for the crawl pipe to the Prayer
Room. You will find a small RCP way upstream on the LH side of a red
brick section. Enter. Enjoy.
Water Level: A few sections that can be avoided
Cond: Huge!
History: This drain has always been great, but since 1997 when the
Waterboard put a new 3m RCP tunnel, grilles and rooms in,
the tunnel is twice as good.

 small.

outfall, begins at 6ft high x 10ft wide concrete culvert
 before changing shape to 8ft RCP for ~200m. Further
 there is an opening that needs to be climbed (~6ft high)
 to continue underneath the railway line. Under the railway
 the shape is 5ft-square concrete for 10m both ends but
 40m of red brick arch. Shape again changes to 4.5ft RCP
 continues underneath Gribble Reserve towards a 5ft square
 with GPT and wall that needs to be navigated. Afterwards,
 drain continues south and southeast up towards Westpoint
 Centre, becoming a 4ft RCP. TEL=500m+.
 Brick arch under rail line. Several shape changes.
 GPT that needs to be navigated over/around. Most pipes are
 or ceramic.
 For outfall and downstream, park in the carpark to the
 of Blacktown Showground, off Richmond Road, during the day
 closes late afternoon). In the evening, or for the
 infall access, park near or around Gribble Reserve, in
 Place, Blacktown. Latter access is more fun - i.e. start

Outfall, at [GPS:-33.765975,150.902887].
 Opening, at [GPS:-33.767406,150.902827].
 Opening, at [GPS:-33.767835,150.902745].
 Swing grill, in footpath (i.e. safe), at
 [GPS:-33.768642,150.902902].

Locality: Blacktown
 Region: NSW
 Country: Australia
 Care: Racks hanging in GPT chamber. Watch your head!
 Water Level: Dry - Ankle
 Cond: Old and new.
 Notes: (July, 2013) - Google Maps shows the Showground and
 sporting fields to be very different. They have been landscaped and
 the entire area has become a serviced park.

Name: Halfpipe
Alternate: Haberfield halfie
Description: A drain that runs under Reg Coady reserve, through Haberfield and underneath Algie park. MPL=320ms TEL=Unknown
Features: Outfall is an extremely tidal 6ft box culvert caked with oyster shells. Eels and fish swim about close to the outfall. The drain quickly shrinks to 5ft box culvert and runs for some distance before coming to a junction section which contains an RCP. From here the drain drops to 4.5ft for a distance before returning to 5ft. Following the rectangular shape section you come to the main feature of this drain - a weird half-pipe, most likely used as an overflow diversion. A lot of natural light in this section. If you'll you continue following the RCP at the end of the half-pipe run under Algie Park - this needs to be explored further.
Access: Access the outfall from Reg Coady reserve [GPS:-33.873226, 151.136819] Plenty of parking along Martin Street which intersects with Dobroyd Parade.
Locality: Haberfield
Region: NSW
Country: Australia
Care: Not a good drain for people with back problems. Extremely visible from all directions when entering.
Eek!: Slippery mud. Sharp oyster shells. Keep an eye on the tide - only do at low tide.
Water Level: Ankle - Tidal
Cond: Untouched.

To-Do: Explore beyond the half-pipe. Explore the side pipe near the Halfie.

Modified: 2004-11-11 13:00:00

Name: Harry Lime's Drain
Alternate: Wienkanal, The Third Man Tunnel.
Description: A very famous and utterly amazing tunnel running thru
central

1949 Vienna. Was featured in the last 20 minutes of the classic
 as Carol Reed film 'The Third Man' which starred Orson Welles
 Harry Lime.
 Features: Enormous, 1.6km long, 6m high, 15m wide arched tunnel with
 a river flowing thru it. Various old stone sewer overflow
 chambers with waterfalls, side tunnels, canals, some reached via
 large gated tunnels. The largest of these has a balcony system
 and a secondary chamber with bridges, platforms etc. Four
 'emergency' exit tunnels, marked by reflective signs, with a mixture
 of old iron spiral staircases and more modern concrete steps,
 rooms, chambers. Whole system is atmospherically lit by numerous
 grilles during the day and at times also fluro lit. Keep an eye
 out for the Harry Lime tribute, not to mention the huge p.a
 loudspeakers mounted (for what reason?) in the main chamber. Try to
 find the staircase where Harry died.
 Access: Inlet: Climb down the stairs into the Weinkanal at the
 downstream intersection of Hoffmulg and Linke Weinzeille .Walk
 Climb for 200m into tunnel. In District 6.[Tasch: 64P11] Outlet:
 Stadtpark. down into Canal via any of the staircases in the
 Tunnel outlet at Johannesgasse in District 1. [Tasch:
 49012]
 Locality: Vienna City
 Region: Wien
 Country: Austria
 Care: Probably not a good idea to do this if theres a threat of
 rain due to increased river flow and nasty sewer outfall. Try
 and avoid running into the official tours. Mind not to fall
 into sewers, some of the viewing platforms feel a bit dodgy.
 Water Level: Main tunnel and overflows bone dry. Exit corridor next to
 main chamber is ankle, but avoidable
 Cond: Huge, amazing, sewer chambers are a bit smelly, but
 surprisingly clean.

Found: Well known, covered by Dark Passage and Unterwelten.

Update: 2014-12-27 13:00:00 (Ratter) - brick tunnel d/s of FoD
gets an
RCP sibling-

"The existing 3.8m diameter culvert under the Longport
Street
overpass does not have sufficient capacity to cater for
runoff
generated by the upstream catchment. Based on our
feasibility
assessment, providing an additional 2100mm diameter
circular
culvert under the Longport Street will be sufficient to
reduce 1
in 100 year ARI flood levels to an acceptable level."

https://majorprojects.affinitylive.com/public/60ff3b15393fea51f8d231d296d100ff/06_Stormwater%20Master%20Plan%20Rev-B.pdf

- and potentially "construction of an additional culvert
(or
amplification of the existing culvert) under the railway
line
near Mungo Scott building".

Name: Her Majesty's Plumbing
Alternate: Short=Her Maj Plumb.
Description: Drain w/ varying features, starts with sandstone rect,
changes to
4-5' RCP (ouch), eventually opens up to 6' brick oviform
then 5'
RCP again before hitting a flooded (GPT?) section and
smaller
RCP. Heads N towards station, then NE?. TEL=300m.
Access: #9,UE: creek where Elizabeth St becomes Burra Rd (behind
station)
[SW:257A11/035A11], [UBD:195L15], [GRG:285A15],
[GPS:-33.8092921652,151.187353617].
#0 Brick pipe at the other end which opens out next to
Hampden
Road. [GPS:-33.807666,151.183377]
Update, Ratter:
Proceeding past the under-rail exit pipe, through the 4'
RCP, one
reaches a short section of 3' canal with corrugated iron
ceiling,
followed by ~15m of 3' brick arch which opens into a creek
behind

the rail fence, cnr Brand St & Hampden Rd
[GPS:-33.807208,151.183064].

Locality: Artarmon
Region: NSW
Country: Australia
Water Level: Shoe-Shin
To-Do: Come better prepared to navigate through or clear deeper
section.
Found: 2002 Cron/Dribbles/Benski/KitPie.
Rating: 2.0/5.0
Update: 2014-03-02 13:00:00 (Ratter) - (28/02/2014)The formerly
flooded section is now completely unblocked. Some of the debris
has washed through into the 6' brick arch section [it's an
arch! not an oviform!], creating an ankle-deep pool of water at the
downstream end.

Update: 2012-12-02 13:00:00 (Ratter) - Flooded section is dammed
by rocks + garbage washed up against a pipe. We spent 20 minutes
un-damming it; there's a brick pipe at the other end which
opens out next to Hampden Road [GPS:-33.807666,151.183377].

Name: Hercules Pillars
Alternate: Pred's Tomb.
Description: Fantastic, astounding, mind bending! More features in one
drain than any other! Nuclear powered! Faster than the speed of
light!
Well anyway, its one of the best drains in Sydney.
MPL=404m. TEL=550m.
Features: *Forms: 9' square, 14' rect, 9'h x 1'6"w side branch, twin
6'6" rect, 5'h x 6'w side branch.
*Waterfalls: Five waterfalls.
*Rooms: 5, 1 per waterfall, the largest is huge, about 20'h.
*Ladders: Waterfalls have rungs beside falls, the largest has a
ladder up between twin falls. After the last waterfall,
the 9' sq

interesting form bends its way d/s with banked curves, doing
 things to your sense of balance!.
 *Pillars: Finally you arrive
 at what must have been designed by some reincarnated Nazi
 architect - the Pillars. 15 x 12' high monoliths each
 stretching and pointing up to the heavens with alternate rows offset:
 u/s-2/3/2/3/2/3-d/s. Sydney Water have installed handrails
 on some of the pillars for easy navigation. How thoughtful of
 them.
 Must send them a Xmas card. Some year.
 Access: #0: Wicks Rd, crawl under fence just N of M2 overpass on W
 side
 [Sw:255N01, UBD:194F05, Grg:283A05,
 GPS:-33.7863364277,151.134898373].
 #2,PEX: Small tunnel emerging
 on the former Pittwater Rd.
 #9,UE: Pillars: just u/s from the
 old stone Porters Ck Bridge on Riverside Drive in Lane
 Cove River
 Park. Make note of Park closing times as gate gets locked,
 or go
 overland thru council depot. [Sw:235P20, UBD:194G04,
 Grg:283B04,
 GPS:-33.783621191,151.137808285, XED, XNL].
 Locality: Macquarie Park
 Region: NSW
 Country: Australia
 Care: Absolutely positively don't go in here if it looks like
 rain. See
 the island beyond the pillars? See its height? That is
 why! In
 spades and with sauce!! This is not a joke!!!.
 Water Level: Always shoe, even in times of drought. Pillars: Ankle-Swim
 History: Used for drolf (drain golf). In 2002 dTrog moved the
 island to
 form a walkway from pillars to steps for a drolf event. In
 2003
 the walkway got washed away. This shows the power of the
 flow.
 To-Do: Try to hit a golf ball thru the Pillars in a single shot -
 Pinball (Pillball?, Pillban?).
 Notes: Given the Other name of Pred's Tomb 05/06/2004 in memory
 of
 Predator, a founding and eternal member of Sydney Cave
 Clan.

Update: 2014-04-11 14:00:00 (Rabbit) - April 2014 - there is
vehicle access to the canal (see sixviewer) and -lots- of workers
there at the moment. Couldn't find anything on the interwebs
about developments happening.

Update: 2011-09-03 14:00:00 (Littlemike) - A trash screen is
currently being installed in the canal at the main infall. It
doesn't affect access to the tunnel, but it's best avoided while
the workers are there during the day (including 5pm on a
Saturday?!)

Also, the inlet is now "straight from the bowl" as the
workers seem to be using it as a toilet (and I'm not talking about
#1).
Try not to step in the poo.

Don't let
the outfall fool you - it is packed up with mud and makes
a 5.5ft
outfall look like 3.5ft, but quickly becomes a shin-deep
pool and
turning sharply to the north thereafter. Drain seems to
become
0.0-0.5ft smaller at every junction. Unexplored after
4.5ft
section. U2.
Features: Several small junctions and shape changes. Each junction
has a
grill and accompanying step-irons.
Access: Park in or off Therese Circuit, Bella Vista and walk
around fence
into drain outfall. [GPS:-33.741258,150.979211].
Locality: Bella Vista
Region: NSW
Country: Australia
Care: Plants growing around drain outfall will make you very
itchy.
Eek!: Drain spiders.
Water Level: Dry - Shin
Cond: Structurally intact.
To-Do: See what is beyond the 4.5ft sections.

Found: 2011 Red

Name: Hunch, The
Alternate: Scott's Creek.
Description: I had a hunch that although the d/s exit into the canal
was painfully small, there'd be something more impressive u/s.
That said the first 50m is <5' concrete roof and floor with
redbrick sides then a 5.5' section takes you to a long winding 6.5'
RCP. The hunch paid off. Ends in a concreted shut GBG cnr of
Archer & Victoria Sts. MPL=661m. TEL=1km.
Features: Talk with Chatswood shoppers from gutter box. Upskirts?
Sometimes there's a weird buzzing sound coming from a 6" side pipe
high on the L wall not far up the RCP.
Access: #9,UE: Enter canal Nicholson & Macquarie Sts. Head u/s.
[Sw:256R05/081aR05, UBD:195K09/023K08, Grg:284K09,
GPS:-33.7958395864,151.185585363].
#2: Marked swing-grille halfway along Havilah St then
through 18" RCP will take you to near start of the RCP
[Sw:257A04/081bA04, UBD:195L08/023L05, XED, XNL, XWPT].
*AX: If you came in #9,UE and don't want to develop a
hunch back going out the same way, then come back out the RCP and
turn L at the junction to find an 18" RCP set kinda up in the wall
that will lead to the gutter box and grille mentioned in access
#2.

UPDATE 2009 Fenix:
Ginge and I have discovered a new entrance which
makes the whole 'hunch' not a hunch at all.
Go down Victoria Ave, turn left into Havilah St
and go down the left hand side till you see a path going up from
the road to a small entrance to Chatswood Chase shopping
centre. You'll notice about 15 foot up from the road a light metal
swing

grille in the
 path leading to the shops.
 Drop into this box and crawl a few feet thru a 2'
 pipe
 which will
 pretty much take you to close to the start of
 the 6'
 section -
 just go down to the junction and turn right.
 The 'marked swing grille' mentioned in access #2
 is no
 longer
 'marked' and has been closed off with large
 heavy
 sheets of
 rubber attached to the gutter and grille with
 metal
 braketing.
 Locality: Chatswood
 Region: NSW
 Country: Australia
 Eek!: Near gutter box is a manhole, a light manhole. It is in
 the
 middle of Archer St, opp 24h cafe and 100m from Chatswood
 Police
 Stn. Do not exit as you will make a mess.
 Water Level: Shoe
 History: Melb tags found at d/s entrance dated circa 1991.

Name: Ivans Hideout
Description: Strange extremely difficult to find little brick drain
under the now defunct Mittagong-Picton railway line. Built in the
1890's.
Features: No water, no chance of it!
Access: Follow dirt road ([GPS:-34.365154,150.480176]) east from
corner of Sackville and Colo Hilltop Roads, Hill Top, NSW. Once
you

a
valley on arrive at the old railway line head north until you are on
raised section of railway. Head to the bottom of the
the western side.

(weird it The main creek simply passes "through" the embankment
old hasn't been washed away?!) - the drain is up high where an
this stone viaduct (now defunct) once diverted flow through
culvert.

[GPS:-34.364486,150.485570]
Locality: Hill Top
Region: NSW
Country: Australia
Care: Everything is wet, fallen trees everywhere, leeches.
Water Level: Dry - Slimey
History: The Picton - Mittagong line was opened in February 1867 as
part of the Main South line.[1][2]

across The line runs north from Picton, over the Picton Viaduct,
south the Great South Road before heading west. It then heads
through a 180 metre tunnel in the Redbank Range.

(1867), Stations were constructed at Thirlmere (1885), Couridjah
(1883) Buxton (1893), Balmoral (1878), Hill Top (1878), Colo Vale
sidings and Braemar (1867). There were a number of smaller stops,
Top, the and passing loops along the line, as well. North of Hill
cutting through Big Hill was for many years the deepest in
Australia.

To-Do: Explore where the main flow exits the other side.

Name: Jamison Dark
Alternate: York Street Drainage
Description: A 5.5ft RCP drain starting off as a side-pipe in a 7ft
culvert section of the Jamison Creek canal in Penrith.

straight This drain then takes a a corner then runs
get along beneath the footpath on York Rd. Looks like it may
Features: bigger upstream too. Unexplored to the end.
grill 5.5ft RCP, a corner, few small grills and side pipes and a
Access: room. Seems to get bigger upstream but it's also around
take the ankle-shin deep by this stage too.
Jamison Walk into the Jamison Creek canal/York Rd crossing and
left tunnel, enter the 5.5ft side-pipe here:
[GPS:-33.761559,150.689335]. Plenty of parking nearby at
Park carparks.

Liftable grill
into a shin deep 6ft section on York Rd here:
[GPS:-33.767298,150.688263] (No step irons down though).
Locality: Penrith
Region: NSW
Country: Australia
Care: Lads on scooters
Eek!: Lads on scooters
Water Level: Slimey - Knee
Cond: Average
To-Do: Explore the upstream part of this drain.
Notes: Rating it garbage for now, but if access can be secured
further upstream, or any decent features found then it may deserve
better. I remember reading something about storm water
detention/harvesting or something around Jamison Park too
once.

We had just done 3 other drains and
a topside so were pretty exhausted by this stage and water
level
was rising too so we turned back after a hundred metres or
so and
just followed it topside to the grill.

the drive-through cave, buildings and car park at Jenolan
Caves.
Height varies from around 4' to 7 or 8'.
Features: 4.5' concrete rectangle sections pass under the drive-
through cave.
6' concrete section passes under the main plaza. Full of
electrical wiring and pipes, and circuit breaker cabinets.
Grilled over section with split. Left hand branch goes
upstream under the resort (around 4' high), and the right hand
branch goes under the sidewalk (around 5.5' high).
Continuing upstream there is a 7' tall concrete mummy-
shaped section.
Further upstream is a bridge, and past there is a stepped
waterfall, from where the drain continues upstream through
a 4.5' concrete rectangle section.
Access: Jenolan Caves Rd, next to the drive-through cave.
Outfall is next to the eastern cave-entry
[GPS:-33.819209,150.023817].
Another entry into canal next to the western cave-entry
[GPS:-33.819464,150.022387]

Next to the driveway of the resort [GPS:-
33.820214,150.021663]
Past the reception entry [GPS:-33.820633,150.020633]
Over the wall at the western car park [GPS:-
33.821133,150.020139]
Locality: Jenolan
Region: NSW
Country: Australia
Care: Lots of tourists around.
Eek!: Steps at the waterfall are covered in slime. Very
slippery.
Water Level: Shoe - Ankle
History: Find history.
To-Do: Continue exploring the left hand branch, and upstream past
the
waterfall.
Investigate the downstream section which passes under the
drive-through cave. Possibly may be drainage for one of
the
caves.

Name: Jupiter Falls
Alternate: Jupiter Falls System
Description: A nice collection of RCPs full of slides and other hidden surprises.
1st section MPL 50m, TEL 50m.
2nd section MPL 200m, TEL 200m.
3rd section MPL unknown, TEL unknown x2.
Features: Ankle deep 4.5' brick under-rail arch, RCPs ranging between 3' to 5', unique swing ladder in grille shaft (2nd section), 2 slides (2nd section), very steep 4m tall slide (3rd section), 4.5m tall waterfall shaft (3rd section), diversion chamber, 2' high rectangle, grille rooms.
Access: 300m south of Buller St, Jannali, next to rail line.
There's a small parking area by the roadside here.
[GPS:-34.022075,151.064294]
Alternatively, if driving, park near the end of Wattle Rd, before the bridge. [GPS:-34.022976,151.066343]
Starting from Toronto Pde, climb down by the side of the road.
The RCP is the 2nd section. For the 1st section (brick arch) go north from here about 30m. [GPS:-34.021651,151.064415]
Following the 2nd section D/S, you will emerge under the bridge at the northern end of Wattle Rd. Follow the water around to the right (listen for it) and you will see 2 more RCPs. These are the double-barreled 3rd section. Take the left, and brace yourself against the top of the RCP to climb up the slide.
Locality: Jannali
Region: NSW
Country: Australia
Care: Very slippery, be cautious near the slides and waterfall.
Eek!: A fall from the waterfall could really injure you. There are no step irons either.
If you decide to climb up the rocks to get back to the road from the bridge, avoid the bees.

Water Level: Dry - Ankle
Cond: Some Urbx Crew graff
To-Do: Take a drain-board to make exploring U/S the 3rd section
easier;
RCP 2' high rectangle section, which changes back to bearable
again after 20m or so.
Explore U/S of the 1st section which goes west under the
rail line.
Photograph.
Open the manhole covers under the bridge, probably sewers,
though.
Notes: Explorer didn't have torch at the time, and ventured up to
the edge of the top of one of the slides before realising what
it was. Returned 15 minutes later after buying a torch from
the supermarket.

Name: Katoomba Drain
Alternate: The Chiller
Description: A small old covered culvert which changes to a tin roofed
drain,
taking a few curves and becoming a waterfall at a
grillroom to
become a 5ft RCP ending at a large (knee deep) GPT.

Features: MPL=85m
side pipe Old brickwork, small stalactites, shape changes, small
deep leading to another small grillroom, decent waterfall into
grillroom (with easily swinging grill exit), interesting
GPT.
Access: Access the small sandstone culvert at the corner of Vale
and Lyne Streets Katoomba [GPS:-33.7145252, 150.3150484].

A good start is Katoomba station, then walk
down
(taking note
these
pass
to the
beneath
here...).

Continue to follow the
dirt track towards Vale Streer until you see the public
toilets.

Hidden in bushes across the path is
an open section of canal/access area which immediately
becomes a

2ft pipe small slide into a small old brick and rock room, with a
 heading up under the park, and a 3ft RCP heading
 downstream. Also a 2ft sandstone arch drain above the slide section (also
 heading back towards the park).
 Leave this
 drain, (or crawl downstream through the small pipe lol),
 an continue to follow the path and turn left into Vale
 street. The REAL drain starts on the left near the intersection of
 Vale and Lyne Streets. There is an easy emergency escape via easily
 swing able grill on Lyne Street.
 Locality: Katoomba
 Region: NSW
 Country: Australia
 Care: This drain is at the very bottom of a gully, and is
 responsible for draining a large part of the town. The entrance
 section is LOW, NEVER DO THIS ON EVEN AN OVERCAST DAY!! This section
 would flood in seconds, resulting in certain death...
 Eek!: Feral local hippie types.
 Water Level: Slimey - Waist
 Cond: Good
 To-Do: Investigate/pop steel plate at the Kingsford Smith
 Auditorium.
 Notes: The 2ft RCP's running upstream towards Kingsford Smith
 Park seem to become 1x4ft RCP in the centre of this park.

Name: Kingsford Smith
Description: Access to old sewage/water works in SE cnr of airport, via drain.
Features: Ruin, that may be remnants of early Syd water supply, built when
Tank Stream got too polluted. Supposedly, a canal/pipe was put
between Syd and what is now the Mill Pond swamp/sewage
pit. Old
airframe, junked. Vent tower with tree growing out of top.
Access: From E side of General Holmes Drive [Sw:317C11, UBD:275N11,

via Grg:405C11, GPS:-33.9446794143,151.189527764], under it
drain, to gap between road and airport fence. Hole in
fence where drain empties, crawl to cover of large concrete pipes,
then follow them in.
Locality: Kingsford Smith
Region: NSW
Country: Australia
Care: Airport security. It has been known for a helicopter to
take off and hover about the area after someone walked along the
perimeter fence, then disappeared near the area of the drain.
Notes: This hasn't been explored in years... does it even still
exist?.

* Attempt by dTrog to find it 2004 resulted in no find.

Name: Kingswood Darkie
Alternate: Kingswood Caryards Drain
Description: Begins as a 7ft culvert drain behind the Kingswood
caryards. Quickly turns to triple 7ft corridors till a large
grillroom. Shrinks to 4ft twins for 10m under the highway before
becoming a 6ft RCP heading off under Chapman Gardens Park with many
grillrooms along the way. Turns to double 6ft RCP half way
through system. Several 3, 4 and 5ft side pipes.

There is a hole cut into the right RCP at one
point leading to an unexplored parallel 5ft system.
(Hospital?)

MPL= 1.2km+. TEL= 2.0km+

See update, this drain only shrinks for
80-100m or so before opening back up to a much newer 6ft
section with some pretty nice features and rooms along the way.
The length of this drain has pretty much doubled. :-)

Features: Shape changes, many curves, junctions and grillrooms, a
 "prison" like grill section beside a road, many sidepipes, eels,
 drug paraphernalia and knives.

 One section of the drain has holes in the roof, allowing light
 to stream into it.
 Access: Jump into creek behind caryards here:
 [GPS:-33.759990,150.729203]. (Can be shin deep unless you
 not scared of blackberry plants).

 Locked grills here: [GPS:-33.760652,150.727680] and here:
 [GPS:-33.762159,150.723608]

 Unlocked grill here but requires 40m crawl down a 3ft RCP
 to the main trunk: [GPS:-33.762431,150.723564] (it becomes a twin
 4.5ft RCP upstream of here heading south under Second Ave/Jones
 St).

 "The Prison" grillroom here:
 [GPS:-33.760732,150.721853]. (There is also an untested
 manhole here too).

 Hole cut into parallel
 5ft system here: [GPS:-33.763747,150.717788]. (Main trunks
 shrink to double 5.5ft around here as well).

 There is another large grillroom in the park, connected
 to the main system via a 3ft RCP, with double 4/4'5 ft pipes
 heading off south under Second Ave/Manning St here:
 [GPS:-33.762386,150.726345]
 Locality: Kingswood
 Region: NSW
 Country: Australia
 Care: Druggies, knives and lads.
 Eek!: Druggies, knives and lads.
 Water Level: Dry - Shin
 Cond: Good
 History: This is the upstream of Werrington Creek.

To-Do: Explore the whole system to the end and confirm upstream access points.

Notes: The drain can be semi flooded at the first grillroom due to a poorly maintained trash rack inside it. Find a stick and poke a few holes in it and the drain empties out in a few minutes.

Found: 2010 DC, Cactua and Swim

Rating: 4.0/5.0

Update: 2015-12-30 13:00:00 (DC) - Explored this drain further than ever on the "Swim is is Sydney" expo and found some cool new parts!

Turns out the main trunks only shrink down to 5ft for 100-200m (with a decent rest room along the way too), before reaching a very large newish junction room with 2x6ft side pipes inside and a heap of 3ft side pipes. Room is located here: [-33.7663072,150.7144645]

RCP. One The main trunks continued on from here S/W as twin 4.5ft of the 6ft RCP's only runs 30m or so before terminating in a small grillroom here: [GPS:-33.7659181,150.7147984]

grillerooms and The other 6ft RCP takes some sharp turns at more continues for roughly 900m to another very large newish grillroom. Which I suspect is here: [GPS-33.7738635,150.7146978] (could be way off tho haha).

several This room contained a 2x3ft box culvert waterfall and more 2 and 3ft inlets. Main trunk then continued on as 4.5ft RCP.

newer There were a bunch of lift-able street grilles along these 6ft sections too but the exact locations are still to be confirmed.

and This drain has pretty much just doubled in length to 3km+ much is still currently unexplored. The new junction rooms are really nicely lit too and one even contained a Smashing Pumpkins

graffiti poster on the wall. Heap of random scribbles and local
in the newer sections too. This part is in the vicinity of
Kingswood High School.

confirmed The manhole at the prison room downstream is also
liftable from beneath if required.

Description: Canal with small red brick tunnel under rail continues u/s to 2
branches on RH side with sandstone sections.
Features: 2 branches have interesting convict style sections. Main goes under RSL with big RCPs and weird roof.
Access: #9,UE: Over fence in Frys Reserve on Warialda St
[Sw:315P17, UBD:294G01, Grg:433B01, GPS:-33.9572491924,151.134040847].
Drain runs under reserve. If you want to see short but high red brick tunnel go in from Hogben Park and head u/s.
#2,AX: Main exits in Union St.
Locality: Kogarah
Region: NSW
Country: Australia
Water Level: Shoe
Cond: Good sandstone in main has been reinforced with concrete.
To-Do: Skate small tunnels.
Nearby: *Course: == Kogarah 1/2/3 == Kogarah Rail ==<?.
Found: 2002 Nitro/Nexus.
Rating: 4.0/5.0
Created: 1995-12-31 13:00:00
Modified: 2004-09-27 14:00:00

Name: Labour Pains
Description: 5ft sq rect, numerous grills. Long dead straight drain that has an 'S' bend on upstream end. MPL=250m.
Features: Massive 6 meter deep water storage/retention chamber equipped with Ultraviolet light steralisation system.
Access: Cnr Kirkham and Chisolm Rd's. [Sw:273C20, UBD:231J12, Grg:338J12]. Jump fence into construction site. Use any of the 3ft sq grills.
Locality: Auburn
Region: NSW
Country: Australia
Care: Potential presence of 'OZONE' gas at downstream end.
Ultraviolet light sources in use. This area at time of submission is an active construction zone. Do only at night - DONT GET CAUGHT!.

Eek!: This drain is part of a recycling system. My understanding
is that this drain is turd free. Just in case. This system
may use OZONE gas technology.
Water Level: Ankle-Death
Cond: Under construction - 95% completed.
History: This stormwater drain is part of a 4 stage urban water
recycling system. The first 3 stages are waste filtration pits. Each
pit cost \$1.5m. The pits are 20m W, 40m L and 10m deep.
To-Do: Explore further into main system.
Notes: Take a socket set to undo the grills as these grills are
bolted down. Once inside, try to envision 4 MANPOWER Labourers, 2
wheelbarrows, 1 severely damaged 44 gallon drum and an
Excavator to lift drum out of grill room to be emptied elsewhere
removing 1ft of sediment and debris the entire length of the drain.
I can, I was one of the labourers. Hardcore effort!.
Found: 2006 Ghost.
Rating: 3.0/5.0
Update: 2012-04-02 14:00:00 (Blakjak) - The area above this drain
has had a new housing development built on top of it, will require
an expo there to rediscover a way in.
Created: 1995-12-31 13:00:00
Modified: 2012-04-13 14:00:00

Name: Lake Pillans Drain
Description: A short but interesting twin 7-8ft drain running under
part of the railway yards behind the Lithgow Blast Furnace. Starts
out at each end as a concrete box drain but becomes the original
sandstone arch in the middle. One tunnel is knee deep in
water, the other is half full of sand but can still be crawled
through. MPL=72m TEL=140m.
Features: Original sandstone sections in tunnel, a large grillroom
beside southern end and just a stones throw from the Blast
Furnace ruins.
Access: Best accessed from the Blast Furnace carpark (off Inch

St) ([GPS:-33.475653,150.170636]) and strolling down the
newly
built cycle path to Lake Pillans. Tunnels are here:
[GPS:-33.475129,150.172884]
Locality: Lithgow
Region: NSW
Country: Australia
Care: Lake Pillans can be busy with families and dogwalkers, who
may
find it odd seeing somebody crawling/wading up into these
tunnels.
Eek!: Avoid broken bottles in sandy section.
Water Level: Knee - Dry
Cond: Okay, except for all the sand.
History: Lake Pillans was the water supply to the Blast Furnace. It
has
now been converted into wetlands with boardwalks and
paths.
To-Do: Crawl up the 2ft pipe into the grillroom.

Modified: 2007-07-04 14:00:00

Name: Lavender Bay Drain
Description: Short but interesting drain. Massive litter trap in room.
Long
slide. Unfortunately, its only 4' dia the whole length.
TEL=150m.
Access: #9,UE: In sea wall just to E of jetty in Lavender Bay
(near rail

line) [Sw:277J07/046J07, UBD:216D15/007G13,
Grg:315J15/005G13,
[GPS:-33.8441603225,151.208230776]]. Park in Walker St
(south)
and walk down stairs. Drain is under boardwalk.
Locality: Lavender Bay
Region: NSW
Country: Australia
Water Level: Tidal, Shoe-Knee
Found: 1992 Diode.
Rating: 2.0/5.0
Created: 1995-12-31 13:00:00
Modified: 2004-08-20 14:00:00

Name: Le Cage Au Folles
Alternate: La cage aux folles; The cage of madwomen
Description: Drain originally known by the Canberra cave clan of old
that has
dropped off the radar in recent years. The name roughly
translates to "The Cage of Madwomen". MPL 1.5km approx.
Features: Froggy-esque caged dome. Nice chamber with a sky light.
Side
pipes that connect to different systems. 40-50m 3ft
flooded
rectangular section that connects to "Coin Drop" drain.
Access: Access to this drain is through a man-hole *or* via the
flooded
3ft crawl space from Coin Drop drain - which will involve
some
swimming in a very confined space. Park either behind the
Jewish
memorial centre (cnr of national circuit and Canberra
ave) or a
long the verge on National circuit. Walk onto the reserve
and
look for large caged dome sticking out. Lift manhole
closest to
dome.
Park - [GPS:-35.314587,149.128217]
Dome - [GPS:-35.314751,149.127900]
Locality: Forrest
Region: ACT
Country: Australia
Care: The man hole is quite heavy. If you close it behind you
make sure
you have the physical ability to get it back off. Due to
it's
location, there are often people walking their dogs, kids
playing, church or functions at the Jewish centre and just
the

general public around this area - best not to be seen when entering and also not to leave the man hole cover off.
Eek!: The manholes further upstream are road based.
Water Level: Dry - Shoe
Cond: Untouched.
History: NA.
To-Do: Explore the side pipes. Unblock the flooded 3ft that connects
middle of coin drop - seems to be caused by debris blocking the
the pipe.
Notes: Found by FiL in 1997. Listed by Delo 2014.
Found: October 1997 FiL
Rating: 3.0/5.0

Name: Lent And Del Have A Few Pints
Description: A newish drain running under Pyrmont. Quite a brutal experience,
requires a 30m slog through a 2-3ft pipe to make it to the outlet
room. Not for the faint hearted or people with back problems. The drain itself runs as a dual 5ft rcp from the outfall to the corner of 'Mount street walk' and 'Bowman street'. From there it follows Bowman st as a 4ft with sidepipes leading to cds/gpt units. Near the corner of bowman and Jones st you come to a junction room with a 3ft pipe that runs for about 30-40 meters before coming to another room where the pipe turns back to 5ft and (appears to from a distance) connects up to an older section of drain after (approx) 50ms.
Current MPL = 350m
Features: Awesome caged outlet that offers a nice view of Johnstons Bay,

CDS/GPT units, size changes. Potential older sections
further upstream.
Access: Lift small swing grille at Elizabeth plaza here [GPS:-
33.865636, 151.190398] and crawl/worm for 30ms through two to three
foot pipe into the outlet room. Ample free parking nearby on
Refinery drive.
Locality: Pymont
Region: NSW
Country: Australia
Care: The entry grille is very visible from the nearby apartment
blocks and restaurants. The area is popular with
walkers/exercisers. Try
 not to draw too much attention on entry exit. Careful of
broken glass or sharps when crawling through the smaller
sections.
Eek!: Small pipes, eels, lot's of tree root's penetrating the
3ft upstream. Deep GPT down sidepipe - don't drop your
glasses!
Water Level: Shin
Cond: Untouched
History: Built during the redevelopment of Pymont.
To-Do: Explore further.
Notes: Found on boxing day 2015, We found the entrance and
checked the radar. Upon noticing rain was about to hit we decided to
head to the pub for a few pints. 4 pints later and the rain had
cleared and the radar was looking good. We headed back and decided
to give it a crack.

Name: Leonay Tunnel
Alternate: River Road
Description: A short but 12+ foot high corrugated iron tunnel outlet
from Huntington Reserve into the Nepean River. Walking through
this tunnel takes you to an overgrown jungle area with several
wooden

benches. Awesome little chill out spot, to check out if in
the area. MPL=40m.

Features: Tunnel, weird little chill out bench area.

Access: Park underneath the M4 motorway bridge along River Rd:
[GPS:-33.763511,150.658424]

Follow cycling track to the east past the tunnel outfall:
[GPS:-33.761170,150.661798]

Locality: Leonay

Region: NSW

Country: Australia

Care: N/A

Eek!: N/A

Water Level: Dry - Ankle

Cond: Okay-Poor

History: Love to know. Back in '96, there was a large pond here,
its only

a small creek now.

Notes: There are a set of old stairs leading off from the seating
area

to an overgrown closed gate near some houses.

There is a near identical tunnel to this under
the highway at Wallerawang, (near Lithgow) here: -33.427189,

Modified: 2004-09-04 14:00:00

Name: Lone Pine
Alternate: Byrnes Creek
Description: This is Byrnes Creek. A creek buried beneath St Clair in
Western
Sydney. It begins as a 4ft outfall before turning 7ft at a
some grillroom and running under some riparian zones, a park,
tennis courts and a couple of other sports fields until it
shrinks away to nothing at an inlet room just west of the
St Clair Shopping Centre.
It
shrinks down to 6ft after 150m or so, then down to 3-4ft
several times but quickly turn back to 6ft so don't give up. The
short sections only last from 5-10 metres anyway, and probably
just run beneath main roads. There is a 5.5ft section in the middle
at some point too but it soon turns back to 6ft. You know you
are at the end when the trunk turns to 1ft at a gutter box room
with clay pillars in the corners.
MPL=1.2km. TEL=Unknown.

Features: Perplexingly small outfall (3-4ft), several large
grillrooms, 7ft pipes, many size changes along the way, several sidepipes
5.5ft including an unexplored twin 4.5ft and a slightly explored
grillrooms RCP, as well as smaller crawl pipes leading off to
(reminiscent of small bunkers/pillboxes according to
Ratter), water is knee deep in sections and other sections are
around a foot deep in random crap like number plates, phones,
bricks, street signs, knives etc.
Access: The 3-4ft outfalls behind the "Off Leash Dog Park" on St
Clair Avenue here: [GPS:-33.7869232,150.7817155]. Although it is
around 150m crawl up to the 7ft section..

Best access via the hatch in the grill here:
[GPS:-33.7878282,150.7839203], and even though it
"appears" to be locked, the lock is faulty and can be opened with pretty
much any standard SR or 4R shaped key. This is also the only room
with step irons for easy access.

Several manholes and grills were sighted but none were
tested. Many of the suspected ones are locked and/or bolted from
above though.

Park along St Clair
Avenue, St Clair. Near the dog park (across from the
Melville Rd intersection).
Locality: St Clair
Region: NSW
Country: Australia
Care: Be careful entering/exiting this drain as the best access
is via a grill just beside a house and very near a busy road.

Watch your head too as there is some stray
rebar sticking out of the roof in parts.
Eek!: Shin deep in parts. Passes under some very busy sports
fields and parks so probably keep sorta quiet.

Water Level: Varies from shoe to shin in different sections (2 shin deep sections, a shoe deep room or two also, but mostly just a trickle).

Cond: Good, besides the random rubble building up in some parts.

History: This was originally discovered with Swim and Cactua back in 2014 and only partially explored at the time.

To-Do: Find the Lone Pine. Explore the 5.5ft sidepipe past the first grillroom. Trace the upstream of the system west of Bennett Rd to see if it gets bigger again.

Notes: I seen a map of this system on floodplain study and it shows the drain heads both here: [GPS:-33.7928037,150.8059788] and here: [GPS:-33.7912433,150.800963]. These inlets both need to be sussed out.

Found: Expo report from when this drain was first properly explored: <http://www.expobase.cc/expos/expo/989#report> 2014 DC, Cactua & Swim. First explored 2016 Ratter, Intrepid, Aydun, Vox and DC.

Rating: 3.5/5.0

Modified: 2017-02-16 16:43:37

Name: Long Creek

Alternate: Bareena Street Dark

Description: Starts off as a semi flooded twin 4.5ft outlet with two lage CDS units before becoming a 6ft RCP heading S/W under a small reserve and couple of streets before reaching a junction room below Bareena St Park.

This room has an old swing grill and a few drain related sculptures in the park above.

The drain then continues under an apartment complex in the form of newer twin 3ft RCP's but I suspect it turns back to 6ft from

there, and then heads west towards the railway line at Cabramatta. MPL= 240m. TEL=?

Features: Semi flooded CDS units, a junction room, metal drain related

pipes, sculptures around the grille including melting steel

Access: birds, frogs, fish, crabs etc. Outlets are located here: [GPS:-33.8902383,150.952414] but are semi flooded, the drain best accessed through the grill in Bareena Street

Railway Park here: [GPS-33.8908128,150.9499423]. Access may be possible at unconfirmed. Pde here: [-33.8901203,150.9411366] but this is

Locality: Canley Vale

Region: NSW

Country: Australia

Care: Joggers and dog walkers in the Bareena Park.

Eek!: Mosquitoes! Water at the outfalls is a horrible blue/black colour and quite smelly. CDS units are chockers with trash probably causing/worsening the problem.

Water Level: Dry - Waist

Cond: Average, no graff. Polluted at outlets.

History: Really cant find much, other than by following it on SIX viewer it appears to go for some distance under the railway line and even beyond.

up on The sculptures in the park imply some form of history too but not much comes the interwebs.

To-Do: Sus out the Railway Pde underpass part, and explore the entire system end.

Notes: We were running out of time and had no gumboots or waders to do the whole drain, but it definitely has potential.

Especially if the traps are cleaned..

Found: 2015 Blakjak, Cactua and DC

Rating: 2.0/5.0

Name: Lost Dog

Alternate: Melba Cascades
 Description: A drain responsible for the channeling of storm water run off from the suburbs of Evatt and Melba into the Ginninderra creek system. Very similar to Kippax drain. Originally found by FiL in the 90s, correct records of this drain have disappeared over time. MPL=900ms
 Features: 7x 1-1.5m waterfalls spread out over the MPL 6ft RCP. Numerous small rooms. Splits into 1x 5ft and 1x 4ft at the end of the MPL.
 Access: Park at the Melba playing fields or the Melba High School (Cnr of Copland Drv and Verbrugghen St. Make your way south, (towards Ginninderra drv) down to the creek. Outfall just before bridge. [GPS:-35.215834,149.055931]
 Locality: Melba
 Region: ACT
 Country: Australia
 Care: Eastern Brown Snake hot spot during summer - due to frogs breeding near the outlet.
 Eek!: Make sure to hug the edges of the wall when accessing from the outlet. A couple of inches out from the wall provides a 1-2m deep section of water.
 Water Level: Dry - Shoe
 Cond: Barely visited - Tiny amount of graffiti at entrance
 History: Fond by FiL
 To-Do: Explore pipes at up stream split. Explore side-pipes - It is possible one of them connect to the "Evatt UFO" here [GPS:-35.208045,149.065181]
 Notes: Explored / Listed by Delo 2014

Name: M2 Twin Junction
Description: Short twin concrete spillway off Junction Rd, Winston
Hills,
built during construction of M2 Motorway in the event of
the
creek beneath overflowing. TEL=55m.
Height of both twin tunnels is 5ft. Width is a generous 7-
8ft.
U2.
Features: Lots of concrete, bongs, a burnt telephone book, other
random
garbage. Also a hole in the roof which goes up into the
hollow
structure above (pretty tight for a person to access but
possible).
Access: North-eastern end of Junction Rd, Winston Hills. Park in
northern
end of Asquith Ave. [GPS:-33.769022,150.994585]
[GPS:-33.768555,150.994282] [UBD:170,P15].

Locality: Winston Hills
Region: NSW
Country: Australia
Care: Don't trip on the random, assorted garbage. Northern end
is guarded by a railing with a short fall after it.
Water Level: Dry - Dry
History: Built during the construction of the M2 Motorway in the
mid-1990s to redirect overflowing water from the creek running
below.
To-Do: Get a video camera and put it on a pole to see what the
hollow upper level looks like ;)
Notes: To be done alongside Undercover Brother, which runs
beneath.
Found: 2010 Red
Rating: 0.5/5.0
Update: 2011-04-08 14:00:00 (Red) - Currently inaccessible from
south-end due to M2 upgrades; unless you want to jump a temporary
fence and cleared vegetation. Enter from north end via the creek
underneath - AKA Undercover Brother.

Name: Maggots Poo Shooter
Alternate: Beddie St Bender
Description: 6ft Corrugated RMP (Round Metal Pipe). Mainly metal but has some concrete and box sections too. Plenty of short slides, some pretty steep. MPL=1km or so before heading up a steep slide and shrinking down to 2-3ft and shooting off into the distance in the direction of the Jail.
Features: Pretty heavy metal swing grille on the outlet but can squeeze around it. Mainly 1800mm spiraled steel pipe sections. No side pipes, bunch of grill rooms, some pretty cool. Also, were several small "rooms" above the drain that look like the are sealed by gatics, visible through access shafts in the roof.
(Thinking

have been about it now, I shoulda climbed up into them, they may
pits going into some kind of tunnel above, or could just access
to the drain).

Could not check
the downstream of this today as there were sewer workers
right near it's inlet. Looks to run underneath/into the sewer
farm though.

Access: Outfall located here: [-33.4036446,149.5729566], Best
attacked from the corner of Commonwealth St and Morrisset St, then
heading through the small paddock next to the sewer farm
gates.

Trench opens up on your right halfway through this
paddock.

Downstream inlet is here but size/length unknown:
[-33.4027668,149.5738792]

Locality: Bathurst
Region: NSW
Country: Australia
Care: Sewer farm workers, neighboring houses, busy-ish road next
to the
paddock.

Eek!: Heavy metal swing grill on entrance. Harder to open from
inside than outside, but able to be scooted around by the slimmer
members.

Water Level: Dry-shoe.
Cond: Good, actually looks pretty new in some parts.
History: Found from intel from Maggot.
To-Do: Sus out the poo farm section of this drain.
Notes: There is a 5.5 ft outfall located further along the river
here:
[-33.4048783,149.5800376], but it is shin deep and appears
to be sewer by the surrounding toilet paper and gunk in the
water, also has a large locked pumping station located directly above
it with ladders and pipes heading down into it. Looks like there
might be a similar one here: [-33.4060483,149.5822357]

Found: Maggot: 2015. First explored: DC 2016
Rating: 3.0/5.0

Name: Magic's Linear Accelerator
 Alternate: Magic's Linear Acc.
 Description: Uncertain, either a sewage overflow or a stormwater drain.
 Like
 Fortress, but without the rooms, and much narrower. Roof
 sometimes supported mine-style by timbers!. 4 x
 backbreaking 4'h
 sections. Hardcore. MPL=1.219km.
 Access: #0,UE: Around fence and down service road parallel to F3
 Freeway,
 cnr Burdett and King Sts, past ChickenPox, and follow
 until end.
 Look around for settling tanks. Look for small cliff with
 metal
 door - that's it [Sw:215F02, UBD:133P14, Grg:192D14,
 GPS:-33.6968349816,151.118442533].
 #9,UX: Manhole [Sw:215L03, UBD:134D15, Grg:192J15,
 GPS:-33.7005042248,151.130855817, XED, XNL], then a 3.03km
 walk
 back to cars if parked near entrance. It is advisable to
 partly
 pop the manhole first.

 Update 2009 - Curly: Now has a lock on the metal door
 Locality: Hornsby
 Region: NSW
 Country: Australia
 Water Level: Ankle-Death
 Notes: This may be getting bricked up again.
 Found: 1996 Magic.
 Rating: 4.0/5.0
 Update: 2015-04-26 14:00:00 (Scarecrow) - There is a new RMS fence
 topped
 with barbed-wire at the corner of King and Burdett. Access
 along
 the service road is no longer a walk-in. Gate contains a
 multitude of padlocks for various services.

 Alternate access is from the end of the pathway at the end
 of
 Coonanbarra Rd (other side of the freeway).

 There is also Sydney Water 'Odor Reduction' work happening
 around
 Magic's. Temporary site huts are located between
 Chickenpox and
 Magic's (April 2015).

Name: Magical Fairy Cave
Description: A drain flowing into a cave of magical proportions.
MPL 50m + more upstream
Features: The natural rock walls, brick pillars, slippery waterfall
outfall
into natural bush.
Access: Access by gutterbox grille on The Outpost, near corner of
The
Palisade, Northbridge.
[GPS:-33.805537,151.212913] Or from there bush bash east
until
you find the outfall, listen for water.
Locality: Northbridge
Region: NSW
Country: Australia
Care: Moss-covered slippery rocks.
Eek!: Everyone else should be fine, but the drain doesn't like
Scarecrow; it dropped a rectangular steel grille on him
down a
shaft. Owwww...
Water Level: Slimey - Ankle
Cond: Magical
History: 2 boys once saw Curly in the drain wearing a fairy outfit,
and
one of them yelled out, 'A fairy!', and they ran to get a
camera.
Notes: There is a single gutterbox entry on the side of the road,
but if
you look 2m on the other side of the grass you'll see 2
more
which are also entry points.

Name: Maze
Alternate: Incorporates Lower Maze and Room
Description: The best known and most loved drains in Australia. Also one of the most expansive systems in the world.
Features: The Room, Lower Maze, Upper Maze, Dodgy Deals, Swipes Rooms,
junction Camberwell Junction. Dozens of large side tunnels,
redbrick rooms, old sections mixed with new. Covered canals, pipes, oviforms, rectangles. Overflows, slides, graff, staircases, shape changes galore!: Arch, Hallway, Oviform, Mummy,
diversion Covered Canal, RBP. Has canal outlet with 10' diameter

into tunnel that leads to a huge waterfall, then onto The Room,
 pipe. Huge which the canal re-enters via a 12' diameter redbrick
 Area: outlet into the Yarra. A good 3-4 hours of exploration.
 Access: East
 and #1: Head into Grace park, over to canal overpass. Climb in
 head u/s to the Lynch St diversion entrance. [Mel:45B-10]
 [GPS:-37.820362,145.027841]
 #2: For huge downstream rbp inlet follow canal d/s for 20
 minutes.[Mel:45A-10] Or: Next to flats on west side of
 Evansdale Rd, between Railway Place and Austin St, over wooden
 fence. [GPS:-37.823167,145.023002]
 Avenue #3: Hardcore entrance. Enter with the flow at the Ryeburne
 Retarding Basin. Gradually gets bigger. Fenced off.
 [Mel:45H-10] [GPS:-37.819800,145.055054] Note: may be infested with
 redback spiders.
 the #4: Outlet, northeast corner of the Swan Street bridge on
 northeast bank of the Yarra River.[Mel:45A-11]
 [GPS:-37.826252,145.022694] Note: this is either a swim-in
 or a boat-in.
 Locality: Hawthorne
 Region: VIC
 Country: Australia
 Water Level: Mostly dry, wet section at bottom of waterfall, can be
 avoided by doing the splits. The Room is usually an inch or so deep
 in water
 Cond: Amazing!
 History: Was until the early 1990's considered to be two separate
 drains: Maze and Room, both devided by the lack of a ladder down
 the huge waterfall in Lower Maze, just upstream of Room. Eventually
 Melbourne Water installed a ladder.
 Nearby: Slide and Punctual. Elgin St Bridgeroom.

 Name: Mechanic
 Alternate: Smiths Lake North
 Description: Large drain with old and new sections. Responsible for
 channeling storm water run off from surrounding suburbs into Smiths
 lake which is a compensating basin for the claisebrook main
 drain. The system runs for quite someway through some large chambers
 mainly staying as a 6ft rectangle shape for 700ms before hitting
 a junction with 2x 5ft RCPs. The left RCP heads west towards
 lake monger and the right RCP continues north following Charles
 street and is believed to join dog swamp in Yokine. MPL=700ms
 Features: 2 x large chambers with old school brick walls and weird
 bridge like roofs. Scenic grilled entry. Old school curbs. Mini
 like waterfalls. Heaps of old spark plugs laid out in a line
 someone is working on a car. First aid kit. Side-pipes.
 Access: Lift grille above ladder closest to the corner of Bourke
 and Kayle streets north Perth. Walk to the lake and look for
 the large sloping grille on the north side of the lake. Heaps
 of

parking around the lake.
[GPS:-31.932103,115.850919]
Locality: North Perth
Region: WA
Country: Australia
Care: The grille is heavy and could possibly fall in -
especially if trying to open from below. I'd recommend using some for of
wood or barricade to cover the missing the grille rather than
trying to replace it.
Eek!: Spiders, frogs, mechanical ghosts.
Water Level: Shoe - Shin
Cond: Untouched
History: Smith's Lake is a compensating basin on the Claisebrook
Main Drain, located on the corner of Bourke and Kayle Streets
in North Perth not far from Beatty Park. In the 1920s the lake was
drained to allow the area to be "developed". The former lake bed
was used for market gardens for many years though by the 1950s
many of the market gardens has been overtaken by weeds and the
area was considered an unsightly swamp. The Perth City Council
acquired the land in the area, using the former lake as an
uncontrolled tip for some time before leveling and
creating the park and surrounding housing blocks which remain today.
The small portion of the swamp land that was developed to form a
that compensating basin for the Claisebrook Main Drain is all
remains of the former wetland.
To-Do: Follow the 5ft RCPs further.
Notes: Great drain to escape the heat in. Oh yeah, if you visit
it could you put my name up - I forgot a pen!

Alternate: Macquarie University Drain
Description: 6ft RCP drain running through Macquarie University.
TEL=160m. U2.
Features: Step-irons down from upstream drain entrance. 3-4m shaft
with grill (padlocked). Several random pipes entering into the
drain from various sources but one was so rusted that it has
collapsed and looks cool (somewhere along the northern wall inside
the drain).
Access: Upstream access via four (4) liftable grates at
[GPS:-33.773105,151.1119] but watch your step. A second,
more hardcore, approach is through one of the GBGs on the
nearby street, probably this one at [GPS:-33.773051,151.11218]
and sliding through a 2ft RCP for about 15ft into the drain. A
third accessible point is possible via a grill at
[GPS:-33.772873,151.112446]; however, this grill is
presently padlocked. The easiest and safest way in is via the drain
outfall at [GPS:-33.77234,151.113321] but you will get wet!
7pm. Parking on or near university grounds is expensive before
However, parking is free on Talavera Rd after 7pm.
Locality: Macquarie Park
Region: NSW
Country: Australia
Care: Security regularly patrol university grounds. Some rusted
spikes sticking out in random places throughout the drain - most
notably near the upstream end.
Eek!: Lots of cobwebs and some giant spiders!
Water Level: Shoe - Ankle
Notes: The name 'Midnight Cinema' was chosen as this drain was
first explored when Macquarie University was having one of its
regular outdoor film screenings immediately next to drain outfall.

Name: Milson Park
 Description: Long and ancient drain dimensions vary from 7'h x 2' to 4'w and 7' sq. Also joined to the rock bored drainage tunnel for the Harbour Tunnel (Wakt Tunnel). MPL=416m. TEL=416m.
 Features: Variation! Contains 21 shape and construction changes, chamber in roof, waterfall, slide, massive entrance, big CDS unit periodic (pulsing) flow, (small wave down drain 1"h every 15-20 mins - weird). Highly eroded floor. Changes shape every 20m.
 * Wakt Tunnel: At the Slide, take the small R pipe, go up this for 30m then a further 20m. Is good, 8', with grilles open to the inside of the Harbour Tunnel. Otherwise, pop the N concrete manhole in Park.
 Access: #0,UE,NX: Concrete manhole (southern) in park between High St & McDougall St [Sw:277K06/046K06, UBD:216E14/007K11, Grg:315K14/005K11, GPS:-33.8422159508,151.212183442].
 #2: Hinged grille in side gutter 50m u/s of Little Spring grille, slightly dodgy as it opens out onto a clearway.
 #3: Street grate in dip NW cnr Little Spring St & Spring St North Sydney (actually in Little Spring St), beneath cnr of shopping centre car park. Drop into 6' brick oviform [Sw:277J04/046J04, UBD:216D12/007G07/000aJ13, Grg:315J12/005G07/000kE05, XED, XNL, XWPT]. Best to park car over grate and enter from under car.
 #9,AE: Open channel in Milson park, cnr Hipwood & Bradley Sts which has a huge vertical grille over it. The door in this may be bolted [Sw:277L06/046L06, UBD:216F14/007M12, Grg:316A14/006B12, GPS:-33.8436510413,151.214141996, XED, XNL, XWPT]. A CDS unit has been installed at this end. It often floods the outlet to its roof.
 Locality: North Sydney
 Region: NSW
 Country: Australia
 Care: Sloping ramp 45deg used to be waterfall - rope provided.

Water Level: Ankle, the 3' section, may involve crawling, so wet knees
& hands
To-Do: Kill CDS UNIT!.
Found: 1996 Mr India.
Rating: 5.0/5.0
Update: 2015-08-12 14:00:00 (Siege) - UPDATE SIEGE 2015
If you continue past the farmost upstream section up the 3
Ft
you
Pipe that Tubby1 has obnoxiously tagged 'Grille Room 600m'
wont actually come to a grille room, but end up in a huge
construction site diagonally opposite the southern end of
Monte
St Angelo School.
When I did this the first time in April, a junction room
(subsequently selfishly labelled 'CJ's Junction Room' with
local
construction marker paint) that I popped out of was
suspended (at
original underground level) by scaffolding, elevated at
least 6
(!!!) stories above the depths of the new building
foundations.
The next time I did this, there was only 2 stories drop
around
the suspended junction room manhole getting out of the
site meant
returning hands and knees the whole 600m and then back to
the
street grill, or easily but carefully jumping the gap over
to a
ledge that surrounded the deep construction site void,
shimmying
along it until you could climb the fence near the Truck
lift in
the corner with the assistance of the neighbouring ledge .
It is
likely this comparatively hardcore exit will only be
feasible
until September 2015, if not earlier.

Name: Mistaken Identity
Alternate: Western Star
Description: Twin drains ending up as triplets, with an alienated one to the right of them.
Surrounded by canals.
MPL = ~ 250m
TEL = ~ 1km (excluding canal systems before and after, otherwise multiple km)
Features: Multiple canals feeding into 2 identical main drains with debris/anti-vehicle bars and another drain to the right.
About half way through, the two main drains become a single drain for less than a metre then split into three identical tunnels again.
Access: Entry: Latitude :-33.886409, Longitude :151.016267
(Birrong) UBD 251 H3
Exit: Latitude :-33.884748, Longitude :151.015940 (Sefton) UBD 251 H2
~5 min walk from Sefton Station.
[GPS:-33.886395,151.016209]
Multiple access points from multiple canals that lead into this.
Direct access to the drains is via Birrong Pool carpark (corner Woods and Wellington Roads, Birrong) via a hole in the cyclone fence directly to the right of the palm tree.
Once through the hole, either walk, slide or run down an ~ 45 degree concrete embankment and it is to your right.
Same way out is easiest since minimal distance...
Locality: Birrong
Region: NSW
Country: Australia
Care: Locals, we bite!
Best done with company.

Dirt bikes use this area...
Eek!: MASSIVE flow into this with substancial rain!
I have seen bridges breached/flooded multiple times, from
the flow of water that's trying to go under them, from the
canals that feed into this ...
Also long sections of undisturbed concrete paths probably
equate to rapid flow
Water Level: Dry - Death
History: Birrong is Aboriginal for star.
This was built as relief work during the depression to
alleviate flooding from several parks in the area.
The drain to the right of this was added at a later date.
To-Do: GPS accurate distances.
Notes: I've shown multiple people this, with the mistaken belief
that it is Duck River.
Driveway connects to this via canal upstream.
Duck River connects to this via canal and creek
downstream.

Name: Mountain Juggernaut
Description: Collosal tunnel! Biggest in the world.
Features: 17ft high twin outfall, huge impassable lake, single main
trunk
side, comprises of a 2m deep trench with big walkways on either
trench tunnel arched and rect, huge skylight grilles and shafts,
multiple 8ft rcp side tunnels, trunk gets narrower and
shapechanges to deeper, big slide with staircase, 3 waterfalls,
10ft rect and 10ft rcp before slowly shrinking.
Access: Due to the huge pool, to see the downstream section(only
200m),
west thru jump gate opposite Redbury St off Upper Ottawa and head
wasteland, following trail to second fence and outfall.
Outfall is grilled, may need carjack [Mapart: 657 M16] For rest
of tunnel, lift manhole in grass next to Lincoln M Alexander
Parkway, opposite Millpond Pl, off Rexford Drive.
[Mapart: 657
M15]
Locality: Quinndale
Region: ON
Country: Canada
Care: Nasty illegal sanitary hookups make waders or rubber boots
a must. Stay out of the lake, its not nice!
Water Level: Bone dry if you walk on the ledges, however they have
negotiate at 'speedhumps' of a sort that make them difficult to
times. Trench is usually ankle deep, with shin sections
Cond: Amazing.
To-Do: Explore all side tunnels.

Name: No Junk Mail
Description: Large 8ft RCP drain running west underneath the northern side of Woodstock Ave. After several hundred metres the drain becomes a chamber which splits into 2x 3.5ft RCPs. Only one (1) GBG was spotted although there may be more. Drain looks like it receives all of its water from pipes connecting the GBGs on the southern side of Woodstock Ave. U2
Features: Spacious. Quite a large drain for Western Sydney, compared with others in the surrounding suburbs. Water runs from drain into another smaller underground drain which runs underneath the park, the latter of which is used as a flood plain for larger torrents.
the RCPs A large 'No Junk Mail' sign is now wedged into a join in for future visitors to enjoy! GPT at beginning of drain in park.
Access: In park off Woodstock Ave, near Rooty Hill Rd North.

St and [GPS:-33.758904,150.837312]. Park in Beatrice St or Alice

walk across Woodstock Ave to the park. Drain entrance is unobstructed and pretty easy to find. TEL=800m+.

Locality: Mount Druitt

Region: NSW

Country: Australia

Care: Broken glass, shopping trolleys, and other assorted junk scattered throughout park entrance.

Eek!: Some sunken RCPs joints. You will get your ankles/shins wet. Bad

smell at beginning of drain near park entrance.

Water Level: Shoe - Shin

Cond: Structurally sound. RCPs are holding their shape thus far with no

sign of detereoration any time soon.

History: RCPs engraved with 1998, and delivery stickers on the galvanised

iron dated to 1998.

To-Do: Explore to the end of the 2x 3.5ft RCPs to see where the drain

has its beginning.

Found: 2010 Aly, Basura, Devos, Ghost, Kazman, Raptor, Red, Toothpick,

Rating: 2.0/5.0

Name: No Means No

Alternate: Family Plannin

Description: Briefly exposed canal behind some buildings in Ashfield...might

connect eventually with the hand maiden, maybe with

ovuloid, hard

to tell.

d/s end goes to 20m of covered canal with brick lined

floor, then

immediate shrink to 3ft

u/s end 6ft covered canal maybe 30m or so then 7ft

slide/decline

into 5.5ft eliptical drain of unknown length, i went about

100m

and between my heavy bag, the weather and needing to do

other

things i didn't push on so...go good explorer.

Heavy industrial roof section near slide.

Features: None of any note.

Access: <http://g.co/maps/sa59g> behind the car on the right where

you see

some green bushes drop into canal via rungs, no fencing.

building Alternate entry/exit canal from behind family planning
wall on Liverpool road, fence can be pulled out at top of canal
weekdays and easily slip under but naturally building is occupied
during biz hours.No cameras and not too hectic.

[GPS=-33.888524,151.120811]
Locality: Ashfield

Name: Not Worth It
Description: Twin hardcore 3ft RCP drain with at least 2 adjoining
sections
before combining and becoming a 4.5ft RCP after about 100m
for
the remainder of its flow. TEL=200m. U2.
Features: Hardcore. Lots of deep puddles where pipes have naturally
sunk
deeper than they were designed to. Possibly a sewer
overflow as a
loud, running sewer can be heard inside the drain for
almost all
of the 4.5ft section but is most audible from a 1ft side-
pipe
further downstream.
Access: Upstream access at
[GPS:-33.756663,150.987922]
in Landscape St Park, downstream from Suburban Farm Drain.
Several drain/gutter openings:
#1, western edge of park on Landscape St;
#2, outside 12 Landscape St;

#3, in between 27-29 Meryll Ave;
#4, western edge of 32 Meryll Ave;
#5, somewhere on the property of 35 Meryll Ave (indicated
by the inside of the drain looking rendered like a new driveway)
before finally exiting into Harry Carr Reserve at
[GPS:-33.758198,150.986877].
Locality: Baulkham Hills
Region: NSW
Country: Australia
Care: A couple of rusty metal bars sticking out the walls but
have been snapped off by myself (Red) or bend back into the walls.
Just be careful one does not spike you in the head.
Eek!: Ankle deep puddles and built up mud for most of the 3ft
twin sections and being such a small pipe, this means that you
are most definitely going to get wet!
Water Level: Shoe - Ankle
Cond: Upstream full of mud, debris and puddles but downstream is
just clear, running water.
History: Built in the 1960s or 1970s when the entire area was re-
zoned and built up.
To-Do: Explore a 2.5ft section which heads off east about 10m
into the upstream part of the drain (this more than likely joins
two small gutter pipes up at Windsor Rd.
Found: 2010 Red
Rating: 1.0/5.0

Name: Nui Manga
Alternate: Wai-Mapihi, Aro Stream
Description: Massive 2-2.1m RCP running under Aro Valley and Te Aro,
Wellington.
Features: Massive RCP running under Wellington, numerous twists,
turns,
manhole shafts, small waterfalls.
Access: Manhole in footpath near public toilets on northern side
of Aro Rd, at Aro Park, Aro Valley, Wellington. Manhole is
decorated and labeled "Storm Water". [GPS:-41.295305,174.768196]
Locality: Aro Valley
Region: WGN

Country: New Zealand
Care: NZ is subject to serious flooding.
Water Level: Dry - Ankle
Cond: Excellent
History: This drain began it's life in 1926 when the Aro Stream
which flowed down Epuni Street and into Aro Street was confined
to a drain. Repeated flooding of the area and Wellington CBD
and the upgrade of the Wellington bypass began the upgrade of the
tunnel from a oviform brick to 2m RCP.
To-Do: Continue past Taranaki St. This should join the new
Wellington Stormwater Main which is even bigger. I could not continue
due to uncertain weather. Pop more manholes further downstream.
Notes: Nui Manga is Māori for "Big Stream".

Name: Numberplates
Alternate: A.I.B.S.
Description: This place is pristine and until last night unexplored. No
tags, no footprints. It wouldn't be surprising if no one had
been inside since construction finished in the late 80s. Why
has this not been found before? I think it is because the outfall
was in an overgrown paddock until recently when a road was
completed between Carlisle Rd John Hines Rd. 2x 6 ft rectangles
(feels more like 5.5ft because of silt) run parallel for about
200metres. They then junction with 4 RCPs. The RCPs are two pairs.
Pipes are at least 250 metres each. TEL= 1.5km. Northern pair of 5ft
each run up to Sterling Rd before separating with a dramatic
sweeping bend. Southern pair are slightly larger at 5.5ft and run
fairly straight under Eddie Ave until they too do a dramatic 90
degree

pipes bend to the north (under Grex Ave TBC?). Do the middle two
 meet up?
 Features: Unusual sweeping bends in the RCP. Junction room with
 number plates hanging on the wall. Save up your random found
 number plates and add to the gallery. Excellent echoes and
 resonance at various points. L-O-N-G delays up some sidepipes.
 Access: Walk into the outfall [here](-33.781622, 150.811749). Go!
 Locality: Minchinbury
 Region: NSW
 Country: Australia
 Care: Don't be noisy under the truck yards
 Eek!: Accidentally uncovering a car rebirthing ring?
 Water Level: Ankle to shin
 Cond: Pristine unmarked, ungrafted, untagged except the RCP/Twin
 rect junction room which now has number plates glued up in it.
 History: Oldest construction dates found were 1985. Most recent was
 1989
 To-Do: Crawl through the pipe I suspect links the northern
 Sterling Rd branch to the southern Eddie Ave branch. Follow the drain
 until the end. Find the upstream entrance. Fill the junction
 room with numberplates
 Notes: Runs under Car City Minchinbury which I assume is the
 source of all the number plates.
 Found: Intrepid 2015. First explored Intrepid and Diode Oct 2016

 pair of cast-iron grilles opposite it.
 Rockdale

Region: NSW
 Country: Australia
 Care: Not for the softcore. Although, with multiple entry points, one can enter into the drain and avoid crawling.

just UPDATE Ratter 2011: It's probably worth mentioning that
 round, downstream of the CDS unit is a murderous GPT - perfectly
 carefully murky, and at least two meters deep. You've got to step
 along the edges before climbing over the wall.
 Eek!: Don't open ANY GBGs unless you're car is parked in front
 of it and is safe to do so.

couple of UPDATE Ratter 2011: The hardcore brick arch leading to the
 pipe chamber runs adjacent to an active sewer. There are a
 drain. little steel overflow flaps, and at least one terracotta
 and a that looks right into it, wafting pure shitstench into the
 air. None of these stinky sections last more than a few metres,
 Water Level: Dry - Shoe handful of skylights provide a welcome breath of fresh
 Cond: Excellent
 History:

To-Do: Everything has been explored! Bring kneepads on future
 visits.
 Notes: If you look on Google Maps at the small park off Subway
 Rd, you can see all the pieces of the CDS unit laying around,
 ready to be installed.

Found: 21.11.2008- Bastion, Hatsumi, Scarecrow
 Rating: 5.0/5.0
 Update: 2012-01-08 13:00:00 (Ratter) - (08/01/12) Unexplorable
 from the downstream end: the GPT is blocked, flooding the drain to
 the height of the weir. Upstream entrance on Hegarty St is
 still fucked.
 in tidal TODO: Yank on the basket chain to unblock the GPT; drown
 wave of grotty garbage water.

Modified: 2012-01-28 13:00:00

Name: Officeworks
Alternate: Hornsby Hunter's Hovel
Description: Novel little Drain in Hornsby near Concourse

Has been a while since this drain was first
explored,
so details are hazy.

Traversed the
length of this drain roughly 400m TEL, so not huge but
interesting and clean

From memory
it was about 5 Ft, and from the entrance heads towards
bushland
as well as back up towards the Hornsby Concourse
Features:
- Interesting height/segment changes up and down Hunter
Street,

- Big grills outside
an estate/serviced apartment block (-33°41'58.8"S
151°06'07.8"E)

- Ends near a park, if you follow the creek line there are
some
underpasses (-33.698474, 151.107182)

- Fun technical entrance/exit due to depth -
especially if you're short (N.B. this is from memory as a
new and
impressionable explorer)

- The best feature is mainly its location, and that
there
is a drain near Hornsby concourse
Access:
Access via a deep gutter grille in Hunter Lane behind
Officeworks, potentially other access grilles along the
lane too

-33.700345, 151.100783

Exit out of an obnoxiously shaped grille in the
footpath at the T-intersection of Albert St and Water St,
next to

a telegraph pole.
-33.699561, 151.102735

Locality: Hornsby
Region: NSW
Country: Australia
Care: Access obviously, middle of Hornsby
Residents
probably
Grill may be heavy at exit

Entrance grill is a short drop (from memory) so unless you
are

tall, maybe a two person minimum explore to exit easily
Eek!: Potentially a bolt on the exit grille that needs
unscrewing,

which might rust over time

Water Level: Shoe
Cond: Mint - Untouched when explored in late 2014/early 2015
History: Unsure, looks reasonably modern.
To-Do: Find more like it in the area,

Notes: Explore with the Clan
Information here may not be 100% accurate
Found: Siege and Paz, 2014
Rating: 3.0/5.0

Modified: 2007-05-11 14:00:00

Name: Old Lithgow Powerstation
Alternate: Vampire Drain
Description: The Old Lithgow Power Station ruins. The site is trashed but a few odd bits remain, including an old 6-7ft covered canal drain.
MPL=300m
Features: There are a few small underground rooms but they are sealed off with steel plates, although one is accessible if you are very thin.
One room even contains an old Vespa motor scooter?!

The drain beneath the site has strange wooden stakes driven into the walls towards the middle, and several worn down weirs, also a few manholes and a 2ft sidepipe heading into the State Mine property across the street.
Access: Park near State Mine Museum, State Mine Gully Road.
[GPS:-33.459597,150.170, one is accessible if you are 195]

Underground plant room approx 30m north of the old broken concrete tank: [GPS:-33.460473,150.170643].

There are several more hatches on the site too ([GPS:-33.459849,150.170417] & [GPS:-33.460798,150.170381]), but they are completely flooded and one has been backfilled.

Locality: Lithgow
Region: NSW
Country: Australia
Care: Watch out for nosey State Mine workers, the power station ruins back onto private property, and a house
Water Level: Dry - Ankle
History: This tunnel was used to draw water into the old Lithgow Power Station, which powered the old Lithgow hospital, State Mine, the western railway and the Lithgow ADI. The bulk of this power

station has been demolished.
To-Do: Rescue the ancient Vespa.
Notes: The old broken concrete water tank on this site makes cool
echo sounds when clapping in it.

There
is also a 4ft drain leading into a grillroom halfway
between the old rail crossing and Powerstation/State Mine.
Found: DC and Cactua 2012
Rating: 2.0/5.0
Update: 2014-09-16 14:00:00 (DC) - Underground plant room access
here: -33.460473,150.170643. featuring rusty cable trays, water
pumping stuff and also an old motor scooter.

There are several more hatches on the site too
(-33.459849,150.170417 & -33.460798,150.170381), but all
are completely flooded and one has been backfilled.

Name: Onedollaricher

Alternate: Quasi Extension
 Description: Very cool little playground. 6ft round rcp for approx 600m. TEL=
 Easily could be 1km or more, a number of 5.5ft rcps ajoin
 main
 passage and have not been, as far as i know, explored.
 Features: Passes 7x 15ft drop shafts with ladders, one has uber
 drain
 ladder goodness. Four waterfalls, several of these have
 the rcps
 atop them, would need ladder or at min two milkcrates to
 scale
 falls. MPassage ends with boardings over drain visibly
 holding
 back tonnes of backfill in final drop shaft. From here
 ladder
 goes up to accessible rcp 5.5ft which goes to grill room >
 continues as 5ft rcp.
 Access: Under rail bridge in canal at Eastwood station. See 6ft
 round rcp
 set in wall, 8ft yellow rung ladder in wall next to it?>
 go good
 explorer. Railway Pde, roughly opp Ethel street alongside
 rail
 line. Jump in canal. Head towards underpass.
 [GPS:-33.78911001607905,151.08261108398438]
 Locality: Eastwood
 Region: NSW
 Country: Australia
 Care: Usual caution whence climbing ladders.
 Water Level: Dry - Shoe
 Cond: Awesome..most of main passage is all new rcp
 History: Loop and co had wandered into this one evening on a Quasi
 expo
 and taken a look, but it was never listed.
 UPDATE: Was originally listed as Tyr's disappointment when
 it was
 only a short, very short drain. Now it grew and is listed
 as
 above.
 To-Do: Explore all the side branches. Make it into a Swoo esque
 art
 gallery.
 Found: Pandaman 2008 Jan 17
 Rating: 3.0/5.0
 Update: 2013-03-30 13:00:00 (Red) - (October - 2012) The gap you
 need to
 navigate over to get further into this drain right near
 the
 entrance has been blocked with cooking oil, or paint, or
 something thats whitey-bluey and stinks like a chemical.
 Until
 the blockage can be dealt with, one would need a plank or
 whatnot

it was to access the drain proper. It may have changed since, but
like this earlier in 2012 as well last I checked.

Modified: 2013-03-30 13:00:00

Name: Opera House Aqueduct
Description: 10' high by 8' wide rock hewn tunnel, 1' deep in snowmelt runoff
that goes 2kms under a mountain (NW flank of Kozi. from memory)
with a cool overflow tunnel at SW end!!!.
Access: Geehi Dam turnoff is halfway between Thredbo and Khancoban
and is about 70kms from either. The area is remote and often not
visited for many weeks. The roads are dirt and not in the best
condition. The aqueduct is a 15kms walk/bike from Geehi Dam along
fairly gentle fire trail from other side of Dam wall, or descend
Mt Sentinel from the Nth flanks of Mt Tate (2nd highest
mountain in Aust), just to the N of Mt.Kosciusko, down to Opera House
Hut [NDR].
Locality: Geehi Dam
Region: NSW
Country: Australia
Care: Water is VERY COLD, best to do during April when snow melt runoff
is at lowest. Is very very remote!!. Tunnel is locked, &
fines apply if you get caught in there.
Water Level: 1ft deep (cold) snowmelt flow during winter & spring
Cond: Active.
History: Was built to duct water from the Snowies into the hydro
scheme and prevent it washing down into the Murray and off into
Victoria!
To-Do: Drive out in small 4WD and drive through tunnel. Tunnel
originally designed for a Series 1 Landrover.
Found: 1998 Mr India.

Name: Orange Darkie
Alternate: Orange Splits
Description: This is the main drain for the Orange CBD (Blackmans Swamp Ck).

This system was "Supercharged" in 2006.

under
of the
The drain has two separate branches with one heading the main CBD and the other heading under the eastern part of the city. Both meet up near each end of the system.

upgraded
several
sections
older
Mostly 7ft triple box culverts in the sections, but varies between 6.2 and 15ft, changes shapes times. Also features covered canal bits, corridor like and large RCP's, becoming a tub shaped drain in the much middle section.

RCP's,
A bunch of cool side pipes join into the system, including 2 separate 5ft and a few 3 & 4ft ones too.

CBD.
One side tunnel runs a short distance to a street grill in the CBD.

Features:
tunnels,
and
left
buzzing
Access:
MPL 1km x2, TEL 2km+
Many shape changes, very old sections, interesting side large junction rooms (one particularly large), brickwork slate bricks in the old section, 2/3 separate systems with cables, gas and water pipes running through the roof in branch, old scaffolding from the upgrade, and a loud noise in middle of drain (under a substation maybe?).
Best access is to park on William St here somewhere:
-33.2793645,149.1066712

railway line
Follow the main canal around the corner and head under the towards the large drain outlet here:
-33.2786752,149.105248

Byng Street grill:
-33.2819342,149.1023464 (locked).

Canal inlet on Kite Street here: -33.2858325,149.0996046
(4x6.2ft) but its on a main street across from the

shopping

centre and a bit too visible during the day.

Locality: Orange

Region: NSW

Country: Australia

Care: Very slippery in the tub section,

cable

Update 2016: Boiling hot water leaking from a rotting

conduit running through the roof near the tub section?

Ek!: Loud buzzing in middle junction room of drain and heaps of
wires

and cables here too, also a funny industrial oily smell in
this section.

Water Level: Slimey - Ankle. The drain is mainly dry through out as the
water

runs through a channel in the floor. Only the outlets and
small section of far left branch can be shoe at most. All else

is dry enough.

Cond: Good

History: After several large floods in the city, the drain was
"Supercharged" in 1996 and a second branch was added.

To-Do: Explore the sidepipes. There are a few through the right
branch of the system, and another under the railway bridge near
the outlet.

There is another 80ish
metre long twin 7ft RCP section just upstream of the main
drain

here: -33.2873886,149.0984341

Notes: Pic of the "official" drain map in the gallery, but it
does not

seem very accurate.

Found: 2014 DC, Cactua and LB. First explored 2015 DC, Kazman and
Stoony.

Rating: 4.5/5.0

Name: Oriface's orifice
Alternate: Wetherill Park Darkie
Description: Twin 6ft rectangular underpass running beneath the
roundabout on the corner of Victoria St & Newtown Rd, Wetherill Park.
MPL & TEL=90m.
Access: Enter canal on the canal on the corner of Victoria St &
Newtown Rd here...
[GPS:-33.844734,150.892984]
Or here...
[GPS:-33.844324,150.893719]
Locality: Wetherill Park

Region: NSW
Country: Australia
Care: Very exposed area with lots of traffic passing by. Can flood during heavy rains.
Water Level: Dry - Ankle
Notes: 1 of a series of drains running off the canal that cuts diagonally through Wetherill Park from southwest towards the northeast.
Found: 2011 - Blakjak, Oriface
Rating: 0.0/5.0
Created: 2011-06-29 14:00:00

Name: Orphan
Alternate: Mt Lawley Main Drain; Walters Brook
Description: "Walters' brook flowed out from a drain, which we walked up as lads. We walked up the underground pipe, as far as we dared. They said it ends up in Hyde park!" - Inscription on a sign at Banks reserve where Walters' Brook meets the Swan river.
MPL=2.3KM (approx) TEL=UNKNOWN
Features: A fantastic system containing loads of history and features with old and new sections combined. Coffin, Mummy, Rectangular, RBT and RCP are all shapes you'll see in this drain. RCP section is the newest section, completed in the 60s. The RCP runs from Banks reserve in Mt Lawley and stops just before the east Perth train station (end of Gardiner st to be precise) where it turns into 7/8ft concrete rectangle which runs up to Forrest Park in Highgate from there in turns into a mixture of stone mummy/coffin/rectangle/red brick where heights vary between 6 - 9ft (maybe 10 or more in some sections) and continues through Highgate to Hyde Park (supposedly).
Access: Best place to park is at the bottom of summers st (comes off east parade) on the banks of the Swan. Walk north a long the cycle path for approx 50-60ms before you hit the brook. You can either

enter here through a 5ft RCP with a very old school and
 rusted swing grille. If you do enter via the RCP you get to see a
 pretty cool waterfall room. If you want to skip the back break
 and get on with it, continue topside from the drain and cross Joel
 terrace, look for small Water Corp. service lane. Walk a
 100 or so meters down here and lift second last (from memory)
 light weight grate and enter. You only have to traverse 60
 meters of RCP to get to the goods. You'll be able to tell which one
 it is because it isn't a cast iron bar grate like the others.
 1. Park [GPS:-31.943546,115.881343]
 2. Outlet [GPS:-31.941366,115.881026]
 3. Grill [GPS:-31.939352,115.879896]
 Side note: Summer st car park is very close to the
 historical East Perth power station that is currently lying
 abandoned. It may be a great spot to conduct an expo from.
 Locality: Mt Lawley
 Region: WA
 Country: Australia
 Care: If entering through the grate in service lane try and keep
 quiet as it's directly behind someones back door. Perth people
 are paranoid.
 Eek!: Careful climbing up some of the waterfalls. RCP section is
 on a constant ascent when heading upstream - very slippery in
 some spots. Maybe lack of oxygen in some of the old sections -
 be wary.
 Water Level: Ankle - Shin (Tidal)
 Cond: No graffiti. Except from the Water Dept who have written
 street names and structural information in some sections.
 History: Walters Brook, which flows into the Swan River at Banks
 Reserve, originally flowed from a swamp on the site of Forrest Park
 on Walcott Street, Highgate. The brook still flows today, but
 is mostly underground until it reaches Banks Reserve.
 Originally named by Governor James Stirling after his older brother
 Walter.

located The brook originally flowed much further inland, and was
present-day to the north of an open swamp, near the site of the
stormwater to East Perth railway station. The Mount Lawley Main Drain is
located at Walter's Brook, and formerly supplied
Walter's Brook Engine House at East Perth Power Station.
To-Do: If you visit this drain can you put my name up. I forgot
to bring a pen. Follow it all the way to Hydey.

Name: Other Side of the Slide
Alternate: Stagnant Socks
Description: 4.5ft RCP drain exiting into the Parramatta river. Drain
becomes a chamber with manhole after 250m where it splits into two
smaller drains. Drain straight ahead is 4ft and almost
completely dry. 3-3.5ft drain off to the right is where the water is
sourced

50m and shrinks really quickly. 4ft pipe continues for about
for 50m until slide (see Features below) and then is ankle deep
filled up or so before becoming a low chamber with a low 2ft pipe
with water. MPL=350-400m. TEL=450m+. U2.
Features: No gutter box grills. Chamber with manhole after 250m with
cars going over it. The guess is that its somewhere around the
corner of Marsden St and George St. Weird slide thing blocking
water - drain rises up for a few metres like some sort of slide
and then slides down again to pools of ankle-deep stagnant water
that smells really bad.
Access: Access to drain off Marsden St, Parramatta
entrance [GPS:-33.811243,151.003069]. Park in car park near drain
and walk over to drain. Parking is not free before 10pm me
thinks.
Locality: Parramatta
Region: NSW
Country: Australia
Eek!: Stagnant water or possible sewer overflow, although more
likely the former.
Water Level: Dry - Ankle
Cond: Structurally good. Clean in most sections.
To-Do: Hardcore the 3-3.5ft side-pipe. Swim and drown in the 2ft
pipe.

Name: Padded Room, The
Description: Enormous chamber under a Private Hospital.
Features: BIIIG! Canal running down middle banked by donut-form concrete
banks, running up to 20m wide either side. Twin waterfalls
at u/s ends, big skylight grilles. Use a mailbox or petrol cap
key to switch on the bank of 5000 watt floodlights!.
Access: #0,UE: Across the road from the Private Hospital on Darcy Rd
[Sw:252E10, UBD:190K14, Grg:277E14,
GPS:-33.8036506217,150.982717844], jump in creek, this
passes under the road, via 4' recs. Follow to top of waterfalls,
jump down & you're in.
#9: Exits at rear of Hospital [Sw:252E10,
UBD:190K14, Grg:277E14, GPS:-33.8022797169,150.98214518].
Locality: Westmead
Region: NSW
Country: Australia
Care: In you don't like climbing waterfalls then take some
wirecutters with you to exit the d/s end. As of 25 Feb 05 there is a
hole on LHS (looking d/s) corner of the building. Climb up under
the stairs to use them as cover from any security.
Eek!: Trappable drain!!!
Water Level: Centre channel becomes flooded. Walk along edges
Found: 2002 Hatchet/Millsy.
Rating: 4.0/5.0
Update: 2010-05-16 14:00:00 (Sledgy) - May 2010
Grab a milk crate or something to stand on to climb back
up waterfalls as its rather tricky without. Left a small log
resting on right hand side just as you drop down to assist
in future. However may be gone by the time you get there.

Also, downstream exit is easily possible at the moment
without the need for wirecutters.

Name: Par 99
Description: Average drain with one room and a family of Eels to keep
you company at the northern portal.
Southern portal comes out in the former Cathay pacific Par
3 golf course.
TEL = 50m, made up of 2x 25m lengths with a small room in
the middle.
Northern length is 5'6"
Southern length is 5'
Features: Chamber/room that would fit 4-6 ppl at a squash.
Eels galore at northern end.
Golf balls.
Old graff.
Spiders.
Branch in the way of path 1/2way through southern length.
Access: <http://www.nearmap.com/?q=@-33.8951794,151.0130393&ll=-33.895179,151.013039&z=21&t=k&nmd=20100715>
Climb down wall into ankle deep water (here, have a
concrete pill), smash your way through the reeds and other
shrubby while holding onto the wall and enter the drain. Care for Eels.
Entry is in Rose park.
<http://www.nearmap.com/?q=@-33.8964618,151.0112093&ll=-33.896462,151.011209&z=21&t=k&nmd=20100715>
Climb out of drain up embankment. Care, keep noise to
minimum due to possible security patrols and close proximity of
neighbours
<http://www.nearmap.com/?q=@-33.8985312,151.0113320&ll=-33.898531,151.011332&z=21&t=k&nmd=20100715>
Jump gate here to exit. Care for possible security patrols
and keep quiet as to not awaken residents.
This gate has no barbed wire to circumnavigate.
Locality: Sefton
Region: NSW
Country: Australia

Care: Security in golf course and noise levels due to close proximity of neighbours.
As it's a golf course, people tend to rock up early in the morning as well.

Water Level: Shoe - Shin

Notes: Did I mention one exit falls on land that's used early in the morning ?
What about the neighbours ?
What about the Eels ?

Name: Park Drive

Description: Toronto's best drain, chock full of atmosphere and awesome features.

Features: 13ft diameter rcp with long sections of 14ft high oval. Innumerable huge waterfalls, the first 4 being twin falls around 5m high, the remaining 8 or so being single falls around 3m high.

up to All the falls empty into large deep pits and all have an intricate ladder and catwalk system that sees you climbing the falls, then effectively over them. There are numerous grille rooms, the odd side tunnel and eventually the big bore pipe gives way to an 8ft and 6ft rcp, before going on to shrink.

Tunnel is often full of mist with gushing sidepipes and weird n wonderful shapes.

Access: At the intersection of Mount Pleasant Drive and Roxburgh Dr, turn down Roxburgh then follow the trail off to the left down thru the valley, the outfall is 200m down on the left. [Mapart: 192 H76]

open. Outfall gate is very heavy, mostly requires two ppl to open.

Locality: Rosedale

Region: OR

Country: United States of America

Care: Pits are waist deep and grotty, catwalks are dodgy. Lots of ladder climbing.

Water Level: Yep, ankle to shin

Name: Pennant Hills Falls
Alternate: Penno Falls, The Great Wall of West Pennant hills, The
Great
Waterfalls of West Pennant Hills.
Description: Is a drain. but the good section has more vertical shafts
than
horizontal.

Features: 2 HUGE waterfalls (10m-12m?), biggest ever seen in a
drain, some rooms in d/s RCPs. Unfortunately RCPs are only 4'.
Access: #5,UA: Just underneath M2 on Oaks road, go to the NE side
and jump fence. [Sw:233L10, UBD:172B10, Grg:249G10,
GPS:-33.7591372824,151.041606269].
#6, Recommended: climb the large wall on your R and head E along edge of the wall
until you can see a square pit at ground level to your L. When you
see this, head S up the hill until you find a manhole with no
lid, wide open. Through this is the first waterfall shaft.
#7: Head E until you find the same pit in the ground. It may be after
a fence or two. When you see the pit, jump down and waddle
through the S RCP. You will know it by the sound of waterfalls.
#9,UA: #6 The best way, after you went through both waterfalls,
exit out d/s, and when you get to the pit, don't jump out, but
rather follow the RCP on your L (west) and it will take you to an
acute slide, and a room, keep doing west until you get to the
second room. Then head up S on that RCP, then you are out.
Locality: West Pennant Hills
Region: NSW
Country: Australia
Care: * No exaggeration on the height. The first shaft is easily
20m.

* Climbing into RCP from step irons halfway down shaft.
Water Level: May get wet climbing ladders from spray of waterfalls.
Shaft

rooms are usually sole

Name: Penrith Lakes Drain
Description: A short but interesting drainage system running into the
Penrith Lakes scheme. It has an interesting entrance, this place
is definitely some kind of large overflow/filter.

TEL: 375m+.
Features: An interesting entrance, several 5ft side pipes, a few
large grilles, manholes and rooms.
It
large begins as a 2ft box box section heading leading from a
10ft deep retention pit with several ladders running down into a
cylinders, and has room. This pit is full of strange black filter
several trash racks.
2ft section

a only lasts like 1-2 metres before becoming a 5.5ft RCP at
grillroom

One 5ft sidepipe goes to
a large junction room with a manhole then turns into a 5ft
fibreglass drain before taking another corner out of
sight.

Other 4.5ft pipes head off towards
Castlereagh Rd and have a few grill rooms along the way.

Much of this drain is yet to be explored due to its size.
Access: Park anywhere along Leland Street. This drain has its own
access road and small seating area.

Leland St: Enter pit here, near corner of Old Castlereagh Rd and
the main [GPS:-33.729851, 150.692249]. Head through the pipe into
lake. system. The main pipe runs for about 150m towards the

Locality: Penrith
Region: NSW
Country: Australia
Care: Be careful entering the pit, as its beside a busy road.

The large retention room is obviously some
kind of overflow/filtration system.
Eek!: The fibreglass section is apparently hollow sounding and
bouncy indicating it is suspended somehow?

Water Level: Dry - Ankle
Cond: Excellent
To-Do: Fully explore the side pipes upstream.
Notes: Around 70m up Leland St on the left is a street grille
leading to another unexplored 5ft RCP Heading towards Penrith, but
somehow

these drains do not seem to meet?

Name: Pinhole
 Alternate: Headwall
 Description: A brand spanker! Akin to Xylophone and Double Barrel.
 Though this system may be better than both in some regards MPL=500m~
 Features: Dual 6ft RCPs that take different paths and head through
 different rooms only to meet up further upstream. A small
 section of steps leading up into the RCPs. Dual waterfall section.
 Multiple rooms and chambers. Lots of grille's that would
 make it fun to do without torches during the day. Weird
 corrugated rubber sections further upstream. Self asphyxiation belt.
 Runs directly under the train line and causes some cool
 vibrations in certain sections. Sydney water and City of Canada Bay
 plaques above the outlets.
 Access: Lots of parking around George street which comes off
 Parramatta Rd and only a short walk from Homebush station. Head
 behind IMO Car wash and look for hole in the fence, pop through said
 hole into the canal. Outlets: [GPS:-33.864426, 151.087879] NB:
 all Multiple grilles that will provide more stealth access are
 bolted and will have to be undone from top side.
 Locality: North Strathfield
 Region: NSW
 Country: Australia
 Care: Don't get seen entering - the car wash seems to be quite
 busy and the hole you enter through is in a car park.
 Eek!: Rubber sections are slippery.
 Water Level: Dry to Shin
 Cond: Heavily graffed by Wundernuss, SKU and Tubby1 -
 Structurally, it's in top nick.
 To-Do: Have a bowling then pinhole expo
 Notes: Far upstream may still be under construction. You can see
 the 'corrugated' rubber sections on street view around here:

Name: Pool of Wisdom
Alternate: Chatty Tank
Description: Like nitroglycerine seeping out of old sticks of
gelignite,
long-unread books ooze wisdom. Willoughby City Council has
developed an innovative solution to capture, treat, and
re-use the wisdom leaking from ancient tomes at Chatswood
Library. The volatile liquid is collected in gutters beneath the
shelves and routed to a 5ML holding tank under Ferguson Lane. From
here, the raw substance can be pumped directly onto gardens and
lawns; a 3-step purification process involving ultraviolet
sterilization produces a smaller yield of refined wisdom which is
suitable for flushing toilets. Excess wisdom accumulating in the
primary storage tank is discharged to the stormwater system
through a failsafe overflow.

Features: HUUUUUGE underground tank (80m long, 8m wide, and approx. 8m deep) spanned by concrete beams, overlooked by a balcony accessible from the drain downstream; fully ventilated with gas detection system. A plethora of pumps and pipes. Bypass/intake structure with CDS units, weir (thigh-deep), and guillotine gate. Access: Easternmost (downstream) grille on north side of Ferguson Lane is unbolted [GPS:-33.794886,151.184701]. From here, head upstream through either the crawly RCP on the left or the crab-step culvert on the right; both change to 5' RCP after 30m. The former leads to the outlet chamber with balcony overlooking the tank; the latter leads to the intake/diversion wier. Potential access via westernmost (upstream) grille on north side of Ferguson Lane [GPS:-33.795403,151.183001], dropping directly into knee-deep water behind the weir; need socket wrench to unbolt grille. Locality: Chatswood Region: NSW Country: Australia Care: Beware of (vis/aud)ibility by pedestrians in lane. Eek!: Don't fall into the tank! Water Level: Dry - Death History: Completed in 2011. To-Do: Climb down into the tank (use rope/harness for safety). Bring Explorer 200s and float about. Find a way into the intake structure. Explore downstream connection to "The Hunch" drain under Chatswood Chase shopping centre. Notes: "Stormwater intake under normal condition is controlled by an intake structure that includes a penstock gate (with an actuator that opens or shuts the intake gate at the western/upstream end of the tank). Water passes through two CDS gross pollutant traps before being diverted into the primary storage tank. Another CDS gross pollutant tank is located at the eastern/downstream end of the tank which screens stormwater from the roof and the open space at the podium level. Two 60l/s tank evacuation pumps are

(when the
joins up
Creek
will shut
the
will
directly into

located at the eastern end of the tank and excess water tank is full) is pumped to the outlet structure which with the stormwater drainage system that ends up in Scotts downstream. During flood conditions, the penstock gate which will cause water in the stormwater main to by-pass primary storage tank. Overland flow entering Ferguson Lane be captured by grated inlet structures which drain the tank."

Name: Power Plant
Alternate: Chisholm
Description: A drain originally found by FiL in the 90s that channels
storm
water run off from the suburbs of Chisholm and Fadden into
the
the Monks creek canal system before dumping it into the
Isabella
control pond. MPL=1km TEL=UNKNOWN
Features: 1 x 6ft and 2x 5fts. 6ft runs straight for a approx 900ms,

before changing between at 7ft and 6ft at different intervals,
 Canberra. entering the loudest dual waterfall junction room in
 underneath Waterfall room contains 1 x 6ft and 1x 5ft that are both
 constantly flowing. 5ft heads under MacArthur and 6ft
 Fadden.
 Access: Closest/Best place to Park is at the Fadden Pine
 Plantation park (Bugden drive). Follow cycle path down towards Isabella
 drive and hop into Canal and head upstream. Outlets will be visible
 once in the canal - Take the 6ft on the left. There's a safe
 manhole to lift in the first manhole room after you navigate the
 waterfall 6ft.
 Park - [GPS:-35.409998,149.119083]
 Drain - [GPS:-35.412646,149.120097]
 Locality: Chisholm
 Region: ACT
 Country: Australia
 Care: Outlet seems to be a popular bong spot/hang out for local
 kids.
 Eek!: Be very careful trying to transfer from the 2m high 6ft to
 the 5ft at waterfall junction. Very Slippery.
 Water Level: Dry - Ankle
 Cond: Mildly graffed to
 History: Found by FiL in the 90s
 To-Do: Explore 5ft further. Find where all the water is coming
 from.
 Notes: FiL List says:
 "CHISHOLM 1.8 N N N ; UPSTREAM END OF CANAL. BETTER
 LOCATION DESCRIPTION WANTED. 81 J-11 "
 near a LTW on CCF says:
 "The Chisholm location that you have mentioned is located
 seems to power sub station and is always flooded since it all it
 be from above is a flooded bunker room....
 ...have been around for donkey years are Power Plant (the
 name seems to be sprayed painted years ago all the way up) Map
 81, Grid B13..."
 Delo says:

monks creek After much research and exploring every outlet in the
open canal I believe LTW has confused himself. Power plant
IS The Chisholm location. FiLs description was pretty much
spot on.

Anyway, one more down, one more to go.

A photograph in the gallery.

Name: Puppetmaster
Alternate: Heatherton Rd Drain
Description: 2.7 m RCP that stays big for ages. Flooded to the thighs
for ~200 m, then stays big and featureless for a long, long time.
TEL = 2.3 km.
Features: Grille, small steps, size and not much else.
Access: #1. Wade up outfall in northeast corner of the Argus St
Retarding Basin (corner Argus St and Warrigal Rd), likely requires
jumping fence behind 146 Argus St (-37.960874, 145.074528). #2.
Enter via grille in road (careful!) northeast of Powlett Rd and
Kilba St (note - location TBC) (-37.945923, 145.074000).
Locality: Cheltenham
Region: VIC
Country: Australia
Care: Avoid semitrailer to the head when exiting through grille.
Eek!: Lots of eels. Grille exit is in a gutter in full path of
traffic, though road is rarely used outside of work hours.
Water Level: Waist, then ankle-shoe after 200 m.
Cond: Excellent, aside from some silt at the entrance.
History: Thought to have been explored by Prowler and Seanile in
mid-1990s after mistaking it for Rusco's Tomb. Prowler recalls
spraypainting 'Is This Rusco's Tomb?' on the wall, but the
paint is now missing. Found again by Siologen in 2015. Explored
and exit verified by Iso and Thongs later that year.
To-Do: See if you can get out via the stoop-tunnel that leads up
to the wetlands fed by 72nd.
Found: Siologen, 2015

Name: Purgatories Travelator
Description: Another old disused Water Supply Tunnel. MPL=306m.
TEL=306m.
Features: What used to be a Canal empties into 10m deep pit, that
has a 12' RCP in it. The pits (one at each end) are grilled off,
with hatches and ladders descending into them. The pits are
surrounded by Turreted buildings with roof access. Tunnel is huge on
the roof atmosphere! When in use, this tunnel would be filled to
and would have acted as a giant siphon.
Access: #1,UE: 100m NE of Dahlia St And Maquarie Rd roundabout
[Sw:271E03, UBD:209J11, Grg:305J11, GPS:-
33.830641,150.936561] in
the middle of the large reserve. Try W turret first.
#2, If W locked, try E turret [Sw:271D02, UBD:209H10,
Grg:305H10,
GPS:-33.831474,150.939585, XED, XNL, XWPT] and scale the
canal grille up to the roof. Once on the roof climb down.
Locality: Greystanes
Region: NSW
Country: Australia
Water Level: Dry
Cond: Outer layer of tunnel is chipping off, lots of garbage and
evidence of fires and squatters.
History: The Boothtown Syphon (now the Greystanes Syphon) is a 3.15
metre reinforced concrete pipe built on the southern side of the
valley aqueduct that allowed the water supply to traverse the
the using gravity to push the water back up into the canal on
other side.
diversion The aqueduct was blocked with concrete plugs to allow
built of the water flow into the syphon. The syphon inlets were
racks and as ornate castellated concrete towers with steel trash
construction it sluice gates to control the flow. At the time of
was the longest continuous concrete work of its kind in
Australia.

http://www.trailflix.com.au/tfx_new/trails.php?id=prospect_canal&&component=history
Notes: The tunnel bridge is now a bike path.
Found: 1998 Siologen.
Rating: 4.0/5.0
Update: 2015-03-28 13:00:00 (Red) - At present, the western parapet is missing its padlock and the door can just be opened. The wire mesh forming a cage on the inside has also been cut open, making for easy access up and down the stairs or ladder, respectively. The eastern end still has a shiny golden padlock, forbidding entry down that end.

Update: 2011-06-16 14:00:00 (Red) - This is, at present, inaccessible without a makeshift plank or ladder. Beams used to cross into the towers have been dropped into the pits on the west side. The east side looks like it has an attempt but only the super skinny can get through - and walking across the beam is dangerous work on this side.

Rating: 1.0/5.0
Created: 2009-11-01 13:00:00

Name: Pyramid
Description: The Pyramid is a massive steel grille (10'h) over a
vertical deep shaft in Brennan park near the rail line. Definitely
kiddie proof. The drain is short, but has three different forms,
one of which is round corrugated iron 5'5" dia. (So is the
shaft). Shin deep pool. Very bad erosion undercutting S wall of brick
arch tunnel past pool. This drain is now a side drain in the
Swoo system.
Access: #5,UE: Via Swoo, take first LH tunnel in Swoo.
#1,AE: Down embankment from Brennan Park [Sw:277E03/045E03,
UBD:215Q11/006P05, Grg:315E11, GPS:-

Name: Queanbeyan Darkie
Description: Real good massive sick drain that runs underneath the
center of
Queanbeyan and empties into the Queanbeyan river.
MPL=900ms
Features: TLDR = Heaps. Nice waterfall at the beginning. 9ft RCP
for most
of the way. Brick and stone sections. Large chambers.
Grilled

junction room where it turns into to 5.5ft brick corridor
and
5.5ft stone corridor that splits and turns back into 7ft
RCP.
Same junction room contains 6ft RCP.
Access: [1] Park at the leagues club on Collett street (closest
intersection is Rutledge street). [2] Mark you way down to
the
banks of the QBN river drain is to the east surrounded by
a green
security fence. Ladder closest to the Kings bridge side of
the
drain. [1] [GPS:-35.353665,149.236924] [2]
[GPS:-35.353995,149.237868]
Locality: Queanbeyan
Region: ACT
Country: Australia
Care: Getting up/down from waterfall can be a little tricky. You
might
want to bring a milk crate or two if upper body strength
is
lacking.
Eek!: It appears teenagers are quite fond of smoking weed at the
opening of this drain.
Water Level: Dry - Knee
Cond: Heavily graffed
History: Found by FiL in 1997.
Rusco found the old section about 5 years before FiL.
Apparently this drain was extended in 2004 according to
some
graffiti on the wall.
To-Do: 11-11-2013: Investigate/explore 7ft at the end of the
brick
corridor. Investigate/explore Caved in rubble section from
split
near u/s junction room. Investigate/explore 6ft in grille
room.
Notes: Confirm that the boarded up RCP is in fact Kate's Tomb.
Pity it is in Queanbeyan.
Found: FiL, 1997 / Listed 2013 Delo
Rating: 4.0/5.0
Update: 2014-05-21 14:00:00 (Delo) - 22-05-2014 - (Delo/Red) 1.
Confirmed: the boarded up 6ft RCP at first upstream
junction room
leads to Kates Tomb. At the time of writing this can only
be
accessed from the Kates Tomb side and does require the
person to
be of a fairly slim build and does require some gymnastic
ability.

by 2. Some of the further upstream sections contain graffiti
fact, Panic! stating there is no exit. The ones we checked, in
did contain exits that could be used in an emergency.

Name: Red Back Breaker
Description: Long RCP that looked promising at the 5.5' outfall but
trekked and trekked at 5' then 4.5' then 4'...the typical RCP
shrinker you know you love.
Also in typical Hills RCP style, the place crawls with
redback spiderisms munching on centipedes and huntsmen and unlucky
drainers.
Features: MPL: approx 300m
Small shafts, sharp corners, concrete.
Access: Outfall in reserve on First Farm Drive, you can see it
from the road. Lots of gutter boxes along your journey, quietish
streets.
from the Nearest cross street is Wongajong Close, outfall is 20m
intersection.
[GPS:-33.723189,151.01091]
Locality: Castle Hill
Region: NSW
Country: Australia
Care: Spiderisms
Water Level: Shin - Dry
Found: Rascal 09
Rating: 0.5/5.0
Created: 2009-12-28 13:00:00

Name: Red Hill
Description: 6 to 7ft drain that runs from the base of red hill all the
way to the outfall in the curtain canal system.
Features: Caged inlet and outlet. Small bunker style grille room.
Bricked up gutter box. Weird pipe passing through the middle of
RCP. Large rectangular split rooms. Large weird chamber that's

completely black in colour. Steep slide at Red hill end.

Weird

orange black sludge seeping from the joins in the RCP.

Access: The best way to do this drain is from curtin up. Park at the bottom of Thorn Place which comes off Morgan Crescent.

Walk down to the Canal and head right. Look for cage covering the 6 ft RCP

outlet slip in through gap at side of the cage. Entry [GPS:-35.322327,149.088087] 3ft Exit/Entry (takes you straight into the large black chamber [GPS:-35.324746,149.0971]

Caged inlet at base of red hill exit/entry [GPS:-35.323724,149.099412]

Locality: Curtin

Region: ACT

Country: Australia

Care: Not many emergency exits. Orange sludge lets off a strange smell

when stepped in. Take left rectangular pipe at shape change to avoid walking in it.

Eek!: Slippery at small slide at Rectangular shape change. Steep slide

when ascending towards red hill outlet - Slip hazard.

Water Level: Slimey - Shoe

Cond: Heavily graffed

History: Oldest graffiti spotted was from 1987. Though usual Canberra suspects are present as well i.e. FiL, Panic and Mongo.

To-Do: NA. Fully explored

Notes: Explored and listed Delo 2013

Found: Pandaman

Rating: 3.0/5.0

Name: Ribbit

Description: A tributary for a small creek which flows into Excelsior/Bidgigal reserve. 5' RCP, with 6' to 8'h chambers extending up to gutterboxes and waffles. Main entrance is through a hinged garbage trap located in a small gulley, leading over a rise into an antechamber and the start of the main pipe. MPL=400m.

Features: The first 200 meters is full of frogs. Repeat full of frogs. Repeat full of frogs. Repeat full of frogs. Repeat full of frogs.

entrance, There is also a pollutant tank to one side of the main chamber accessed through a smaller, similar entrance or the

unknown. inside the tunnel itself. Depth of "liquid" in the tank
 toys, Good place to find tennis balls, single shoes, childrens
 and one time a foam human brain.
 Access: Corner of Cross St and Cary St [Sw:232M09, UBD:171B09,
 block Grg:248B09, GPS:-33.756262,151.002875], opposite the small
 on of shops. Concealed from road but visible to pedestrians
 and sidewalk. To find entrance, climb down slope into gulley,
 via lift grill to the right of the large circular tank. Exits
 Locality: gutterboxes every 70 or so meters, some climbing involved.
 Region: Baulkham Hills
 Country: Australia
 Care: Aside from being full of frogs (hence the name), this
 tunnel also plays home to various spiders (mostly Daddy Long Legs, but
 also a nasty looking species of hairy brown ones). The first time
 i explored further than the main entrance pipe i was
 accosted by an incredibly aggressive blue-tongue lizard. Conceivable home
 for snakes. All due care should be taken that would be taken
 while bushwalking.
 Eek!: If you poke the frogs they bite you, or worse, jump on
 your face. If you poke the spiders, well, i havent tried that yet. No
 trickle of noticeable chemicals or other pollutants in the tiny
 water.
 Water Level: Dry-Slimey
 Cond: Nothing broken. No graffiti. Occasional rust.
 To-Do: After 400 meters you emerge into a vertical shaft with a
 large waffle at the top, a glowstick wedged in a crack in the
 wall, and a 3 foot RCP to the right. I havent been able to locate
 the waffle topside, but am curious as to where and how far
 that 3 foot RCP goes.
 Notes: Bad place to take a date.

Found: 1991 Melb Clan.
Rating: 2.0/5.0
Update: 2011-05-17 14:00:00 (Scarecrow) - Some of the original
1853 sandstone arch still exists. It's only a few meters
though, and behind the interceptor in the sewer, past the flap.
Rascal, Scarecrow- 2011.
Update: 2010-08-10 14:00:00 (Siologen) - This drain has changed
completely. Sadly gone is the old stone arch, replaced by
new concrete. Sludgebucket has been joined on as well and both
tunnels lead to a large grille room under the Eastern
Suburbs Viaduct (opposite the gates for Blowjob 2000) A side
tunnel leads to a 6ft tall flap. Behind this is a 7ft brick oviform
sewer that runs up towards William Street before shrinking. This
dumps into an interceptor behind a wall, in turn behind the flap.

Name: Roach Cave
Alternate: Fyshwick
Description: Large 6ft RCP (maybe bigger) opening into Canal that runs
through the part of the Jerrabomberra wetlands closest to
Fyshwick. Stays 6ft for about 100ms before it hits a semi-decent chamber
than shape changes to a 5ft Creating a slight waterfall
(careful, was quite slippery on my trip there). In this first chamber
there's also a 3ft side pipe where you can see daylight from a
gutterbox about 20ms up it. 5ft goes on for quite a while and you
pass few a through more chambers with multiple small side pipes
along the way. Eventually it changes shape to a 4ft RCP. Hundreds of
Cockroaches. I don't think I've ever seen a drain with so
many.
Features: Chambers. Waterfalls. Cockroaches.
Access: Park on Mildura street where the road bends. Next to
ACTEWGL refill station. Closest street that intersects is Nyang
street. Walk down path next to ACTEWGL station and look for open
canal. Look for safety rail sticking out above the overgrown
weeds.
Entrance here: [GPS-35.324744,149.159456]

Name: Rubik's Tomb
Alternate: Private Beach
Description: Large drain catchment for the Maroubra Bay area, mostly
5'5 concrete box culverts, which shrink to 5' upstream.
Smaller RCP sections, some small chambers, shafts, GBGs, and a tidal
beach outfall. 1km+
Features: Solve the Rubik's cube puzzle to gain access. Double
split, triple split with bricked-off culvert, some rooms, lots of
GBGs, sand-filled outfall out onto Maroubra Beach. A lot of the
GBG loot like they've taken damage from artillery shells;
broken concrete and jagged rusty bars poking in every direction.
Access: Easiest access would be past the giant Rubik's Cube on
Maroubra Beach, through the outfall at a lower tide.
[GPS:-33.946414,151.258109].

(Secured grilles) NE end of Coral Sea Park, just off
[GPS:-33.947565,151.245968] (Note: these are non-existent
Google Maps)
Locality: Maroubra
Region: NSW
Country: Australia
Care: Drain is tidal.
Water Level: Shoe - Waist (Tidal)
Cond: Some parts are newer than others
History: The trunk drainage system within the upper catchment
consists of a network of underground
concrete pipes and cast in-situ concrete box culverts that
were largely installed by Randwick
larger City Council in the 1950's. These conduits flow into
Council concrete box culverts and out through
the main stormwater outlet to Maroubra Bay. According to
records the main stormwater
outlet to the Bay was constructed in 1950.
To-Do: Explore smaller branches.

Name: Ruby Chambers
Alternate: Cummos Pit of Death
Description: TEL = 1.4KM
MPL = 600m
Series of
single 5ft, rcp starting 4.5ft then splitting into two 5ft, then
high onto 5.5ft, then 6ft and including grille rooms up to 15ft

along and 20ft long, lots of ladder access from new gutter boxes
 leads Boyce and neighbouring roads. One junction at right angles
 drop to Cummo's pit of death, a weird overflow wall with a 20ft
 there is into the pit of death..although if you survive the fall
 a steel ladder to climb out again.
 1.
 Features: Lots of grille rooms with ladders, some quite large, most
 at least 15ft high. Some funky bits, and a pit of death.
 Access: 1. -33.942682,151.234781
 2.[GPS:-33.941518,151.236704] - we entered here, note cop
 shop in full view.
 3. -33.940383,151.237098
 gutterboxes along here are numerous but so are the cars.
 4. -33.94012,151.239713 think we got this far but
 gps via ios6 unreliable, became 4ft and unexplored...in a weird
 world this might join Fortress.
 5. -33.940254,151.235324
 pit of death somewhere here but no entry points confirmed.
 Locality: Maroubra
 Region: NSW
 Country: Australia
 Care: None, just don't randomly exit into the path of an
 oncoming car tyre.
 Eek!: cars, cops.
 Water Level: Dry - Shin
 Cond: Good, newer sections of rcp marked as 2003
 To-Do: push past the 4ft end to see if it connects to anything
 else.
 Notes: spiders.
 Found: 2012 Hatsumi, Bastion, Cummo, Rogue
 Rating: 2.0/5.0
 Update: 2017-02-17 08:21:18 (Ratter) - Update Access: 6seg manhole
 in walkway beside apartment at E end of Glanfield St
 [-33.940366,151.235973] leads to the room with Cummo's Pit
 of Death and a trove of drain treasure (please contribute).
 Gutter grille nearby may provide alternate access for those
 without a manhole lifter who don't mind a little wriggle.

Four steel grilles on Boyce Rd near cnr Anzac
Pde [-33.940060,151.238495] lead to the largest chamber, with
a wide concrete ledge where you can leave backpacks etc. if
you're intent on journeying upstream through the eels' kingdom.
Square side pipe here may merit further investigation.

Steel grille on Green St [-
33.941008,151.240423]
wouldn't budge when shoved from underneath, but the nearby
manhole in the footpath may be liftable. A square side
branch of the drain here seems to lead under the apartment block,
and may be worth investigating further.

Manhole in driveway of 118 Gale Rd [-33.938784,151.241602]
presumably leads into the long muddy stoop that eventually
joins Fortress.

6seg manhole in front of
red garage door on S side of Storey St between Garden St &
Garrett St [-33.937460,151.241893] is in the approximate
location of the overflow junction between Ruby Chambers and
Fortress. At this point, the stoopy mud-filled pipe is halfway bricked
up; continuing beyond it takes you via a short crawl into the
Garden St S branch of Fortress, just downstream of the rubble-
filled section (NE cnr. Garden St & Storey St).

Update: 2017-02-17 06:37:59 (Ratter) - Update Features: At the
right-angle split under Maroubra Rd, Cummo's Pit of Death
is at the end of the left-hand branch. The right-hand pipe leads
to the big rooms; following this branch to the very end will take
you to Eel Heaven, then Mud Hell, then finally to the upstream
reaches of Fortress after a total of 600m stooping / crawling /
waddling.

Modified: 2017-03-03 16:21:33

Name: Ruien (sewers)
Description: TEL: 8km
Features: poo, red bricks, "the cathedral" where nazis and allies held their parties during WWII
Access: Pop the lid at the "vleeshuis" (meathouse) close to the castle at the Schelde river. There are 2 lids, open the one closest to the old meathouse. Its in a small fence. When you get down facing the ladder, go left and hop the wall.
exit is the same.
There are some other acces points but this one is the most common one.
Locality: Antwerp centre
Region: Flemish
Country: Belgium
Care: Poo, so wear rubber boots.
Slippery from time to time.
When it rains, the water level might rise a bit. Heavy rain will overflow the sewage system, which runs through the ruien.
You dont want that.
Eek!: nothing really. Rats, spiders, snotty threads hanging from the ceiling
Water Level: Slimey - Shin
History: small parts got closed up at the 1100s. From 1600s they started to close up more, and more. Napoleon also had his hand in it somewhere along history.
Notes: Possibly one of the best systems in the world

Name: Sausage
 Alternate: Queens Sausage
 Description: A massive system that runs through the suburb of Ashfield. Smells like sausage on weekends. MPL = 1.12 km;
 Features: Large and long cavity like chamber sections, where the old foundations of previous buildings are exposed. In one section there are fluoro lights, cages and electrical and communications conduits - not to mention the back side of a staircase that pokes through the roof of the drain. Beautiful old brick sections that bend and curve with interesting architectural features.
 Side pipes galore. All in all, a really good drain.
 Access: 1. Enter through hatchets drain and head upstream. Stoop through three to four ft high box culvert for roughly 200ms. Alternatively, jump the fence next to 22 Page ave into the open canal. Head upstream - Stoop for 150ms. [GPS:-33.875971, 151.128344]
 2. Removable light weight grille halfway down driveway of 115 Alt street [GPS:-33.880103, 151.130511]
 3. Gutter box grille near 114 Bland street [GPS:-33.881087, 151.130820]
 4. Swing-able grille somewhere near 35 Cecil St [GPS:-33.884084, 151.131862]
 5. Locked access grille in Bunnings carpark [GPS:-33.877492, 151.128884].
 6. There's a small section of open drain roughly around here [GPS:-33.879004, 151.129795] It's completely caged off and looks like it's for Sydney water access. Currently it appears the only way to access this section is by jumping the fence at bunnings.
 Locality: Ashfield
 Region: NSW
 Country: Australia
 Care: Careful of the roof in the old upstream sections. Be aware of traffic when entering/exiting from GBGs.
 Eek!: You can hear people walking and talking when you stand under the staircase...
 Water Level: Slimey - Shoe

Cond: Fantastic, untouched - no graffiti.
History: The first section of this drain (after the stoop) is under
the Ashfield bunnings. This bunnings was originally the Peak
Freens biscuit factory that produced Vita-Weat cracker biscuits,
part of the old biscuit factories foundations are still visible
from inside the drain.
To-Do: Explore the promising looking side pipes. Keep following
the brick drain under Ashfield park and beyond.
Notes: Access points 2, 3 and 4 were mapped from below ground.
Need to confirm with a topside walk.

Name: Scarecrows
Description: Canal that leads to a drain, about 250m long. No other
passages,
manhole entry via Quarry Reserve (western end).
Features: Centre chamber, theres an overflow barrier in there, tiny
unexplored passage (about 2 feet high), shaft up to
manhole about 4m high.
Access: Canal entry is from Hurstville Rd (off King George's Rd)
parking

the
 Just walk
 to the
 there. There's a daycare centre on the very corner where
 canal is, large park (Quarry Resesve) across the road.
 through the gate to the left of the daycare, canals down
 right. [GPS:-33.974468,151.09807]
 get there
 fields
 (can't miss
 soccer
 Drain entrance is through Poulton Park, (Morshead Drive-
 from Greenacre Rd, off King George's Rd) there's soccer
 there, and bushwalking trails that go over the stream
 it). If the gate is open you can park in front of the
 fields, otherwise on the street.
 Approx. [GPS:-33.97683,151.097631]
 Locality: South Hurstville
 Region: NSW
 Country: Australia
 Care: Lots and lots of bats on ceiling at the drain entry! Easy
 enough
 to get past, they'll fly around you. When you get to the
 centre
 chamber theres an overflow wall, about waist high, knee
 deep with
 water. Dry when it hasn't been raining for a few weeks.
 Eek!: Slippery rocks await your entry and exit from the drain
 entry.
 Water Level: Shoe - Knee
 To-Do: Not sure if its still there, an old shack covered with
 vines,
 pretty much invisible if you're not actually looking for
 it,
 somewhere in the bush. No idea whats inside (maybe a
 hermit
 living in there?)
 Notes: Theres plenty of bushwalking to be done in the area,
 following
 the stream will take you in between a high-walled path
 with
 bridges above head, birds live in the alcoves.

 Name: Scorpion's
 Alternate: Scorpions Tomb, Scorpions Flaps.

Description: Drain at Bondi beach. Exit is at S end of beach, but no access due to big grille. TEL=500m.

Features: 8' round pipe, chamber, dual sloping large round pipes to hatch room. Giant fibreglass round hatches. Need two people to lift and clamp, rope to hold open. More sloping pipe, to large 'lake room'. The 'flaps room to lake room' affair is duplicated further up as well.

Access: #5,UE: Grilles in Bondi Beach park [Sw:299B07/069B07, UBD:257P03/026N05, Grg:378D03, [GPS:-33.892406,151.274165], one is next to the skateboard ramp, the other 300m NE. [GPS:-33.891284,151.275138]. Either or both may be padlocked - take your chance.

Locality: Bondi Beach

Region: NSW

Country: Australia

Care: Make sure hatches are securely fixed open, you would not be able to push open from the inside.

Eek!: One of the flaps has recently fallen off its hinges.

Water Level: Dry. Pools require floatation devices

To-Do: Siphon lake, go further. Explore RH 5'6' round drain from entrance.

Found: 1992 Predator/Diode.

Rating: 3.0/5.0

Update: 2014-12-27 13:00:00 (Scarecrow) - The grille next to the skate bowl is currently openable due to the chain being padlocked incorrectly (information current on Decmeber 28 2014).

second
access point
Requires a
room.

pipe. Overflow weir room with sensor equipment, fully
PLC flow control system and an automatic gate. Class 10
encased PVC pipe. Flow control pit with control equipment
second automatic gate. Grilled, large and deep slide in
middle of the second flow control pit that runs to the
megaliter collection tank. The Stormwater Storage Tank,
Seepage Water Storage Tank and Pump Room are all located
below the basement car park. The echoes in the slide room
otherworldly.

1. Grille at most western point of the reserve [GPS:-
151.200216] Requires a 1m "splits" from step irons into
rubber 4.5ft pipe. The shaft is approx 6ms deep, and the
across is taken at a height about 4m's from the bottom of
shaft. At low tide the water level was about a foot below
pipe. Pipe is slippery when wet.

2. Grille in garden bed near the lowest walking path
[GPS:-33.857371, 151.200216] Remove debris filter by
loops of the fabric and then lifting the small cage out.
irons are located underneath the debris filter. Requires a
but tight superman wriggle through two sections of 2ft
First section from grille is just over two meters and
section to the weir room is 1m.

3. Grille in garden bed, roughly 15 meters north of
two [GPS:-33.857278, 151.200627] Remove debris filter.
crawl through 2 sections of 3 foot pipe to reach the weir
Probably the least strenuous entry point.

shafts
 Most other grille's around the site just cover
 which contain 'bio-swales' for stormwater harvesting.

Dalgety
 There's a public car park located under
 the reserve that can be accessed from the roundabout on
 Road/Towns Place.

Locality: Barangaroo
 Region: NSW
 Country: Australia
 Care: Security patrol the grounds in gopher carts. Pole mounted
 camera's at all entry points to the park. As maggot

commented, it
 is a popular walking spot for bland people i.e. the type
 of
 people who would call the police if they saw you entering
 a drain
 and then write a strongly worded social media post about
 it.

Eek!: It is recommended you read the technical paper, included
 in
 history, to inform yourself about the potential hazards of
 this
 location. The big ones are: The gates will shut
 automatically if
 there is a power outage. Tugging on the sensors in the
 weir room
 will also shut the gates, or at least, raise alarms in the
 control room. From the weir room onwards the pipe is a
 class 10
 concrete sealed PVC pipe and oxygen levels maybe lower
 than
 usual. Don't stand on the grille that covers the slide as
 it
 appears to be quite flimsy and may break.

Water Level: Dry to Death
 Cond: In excellent condition. Brand new.
 History: Some stormwater fiend wrote a conference paper on this
 system

[http://www.stormwater.asn.au/images/Conference_Papers/2014_Stormwater14/D
ay2_Cahalane_Barangaroo_Headland_Park.pdf](http://www.stormwater.asn.au/images/Conference_Papers/2014_Stormwater14/D
ay2_Cahalane_Barangaroo_Headland_Park.pdf)
 - Nice graphic showing the design layout on page 10, map
 on page
 11 and few pictures of it being constructed. Great
 resource for
 informing yourself on potential hazards of the system.

To-Do: Access the tanks. Access pump room. Slide the slide - if
 you are
 game enough to attempt this, bring a shifter to undo bolts
 and a
 long rope to get back up.

Notes: Seepage and Stormwater alone will not fully meet the
park irrigation requirements due to seasonal changes in
watering patterns and fluctuations in rainfall. Tank top-up will
be provided by a combination of recycled effluent, sourced
from Barangaroo South, and potable water. Recycled effluent
will also be utilised for toilet flushing at BHP.

Name: Seekers Wang
Alternate: M2 Hangar.
Description: Seekers Wang is enormous, long, and somewhere in the
western suburbs. It contains fluid you probably shouldnt drink,
and has had many people utilize it creatively over the
years.TEL=75m.
Features: Looks like an aircraft hangar and can probably be used as
such.
Access: Bush bash. Ask Seeker for guided tour of his wang.
Somewhere near Virginia Place, [Sw:233F11, UBD:171M11, Grg:249B11].
Locality: Carlingford
Region: NSW
Country: Australia
Care: Its soooooo big!.
Eek!: Maybe TOO big!.
Water Level: Shoe-Shin
History: Seekers Wang was built when the M2 was first carved
through suburbia, and has since seen a hell of a lot of use.
Occasionally people go inside it, but Seeker isnt very comfortable with
such an activity. Mostly, people come into contact with its
exterior. It has taken a bit of damage, but nothing that should stop
you from trying Seekers Wang for yourself.

Name: Sierra Flood Retard
Alternate: Sierra Place Flood Retard Basin
Description: Short and boring twin 7ft rectangular tunnels located in
Sierra Place Reserve, Baulkham Hills. MPL=50m. TEL=100m. U2.
Features: Spacious tunnels that look 6ft until you step in the water
and realise that it's actually 7ft (that's right! Down a ledge
and into 1ft of water!). Five large churning blocks at the
end. 2-3ft pipe leading up towards the M2 sump north of the
downstream end of the drain (this is a guess, as the drains in Sierra Pl
go down to the creek separately but there is a tall pipe sticking
up out of the M2 sump which has to go somewhere).
U/S access is [GPS:-33.766136,150.961067]
D/S access is [GPS:-33.76657,150.960804]
Side-pipe access is [GPS:-33.76659,150.960726]
Access: Park in Sierra Pl and walk down through the reserve to the
drain.
Locality: Winston Hills
Region: NSW
Country: Australia
Care: Some tangled metal and random objects downstream; caught
around the churn blocks.
Water Level: Dry - Shin
Cond: Structurally intact. Small pipe full of caught garbage.

History: Upgrades to the site occurred during November 2001 which includes a change in landscaping and a new wall to help stop flooding.
To-Do: Actual drain was built during the early 1990s. Crawl into the 2-3ft pipe and see where it *really* goes (for the truly hardcore).

Name: Sparklosan's magic door of filth
Description: A door in the side of a rock wall in the national park.
Leads
leads into a 8ftft arched sandstone sewer tunnel that
leads upstream
blocked into the mountain. Runs for about 1900m, has
tunnel off side
tunnel tunnel, crystals and stalagtites. Last 500m
becomes very
big, 12ft high, smooth bored rock blasted, with
walkways and 4ft
wall.total deep trench down middle. Ends at a brick
but explorable length is unknown as we didn't have gumboots,
making. looks like another magic's linear accelerator in the
Features: Arched sandstone with nice boring pattern and with
interesting caged doorway access. Very nice shape change
towards the end.
Very impressive.
Access: Go north along the wakehurst parkway (from warringah rd),
after the second crossing of middle creek, stop and park at the
gate to the fire trail on the western side of the road (the gate
is hard to see but has a yellow arrow painted next to it).
Follow the fire trail until you see the cage to your left.
Pull cage aside to obtain access (svelte explorers only),
then open door (but remember to close it behind you)
[GPS:-33.715985,151.256442] (Gate location)

Locality: Narrabeen
Region: NSW
Country: Australia

Care: Rather gross sewer, very slow flowing. Ventilation isn't very good. Hip waders are a must.
Eek!: Live sewer.
Water Level: Ankle - Shin
To-Do: Cut rusty hasp that the lock is attached to.
Explore further upstream with gumboots
Notes: Originally thought that the flow was coming from a sewerage treatment plant or houses further upstream, but on further investigation there doesn't seem to be anything of that description for kilometers, so it may go for a long way.
Found: Sputnik and Trioxide 2007, Explored by Siologen, 2008
Rating: 2.0/5.0
Update: 2011-08-07 14:00:00 (Fl@sh) - Currently inaccessible: Gate has been repaired + locked w/ bi-lock. Also steel rod across tunnel door. Bring tools.

Modified: 2009-11-08 13:00:00

Name: Streamway To Heaven
Alternate: Woollahra Drain, Vertigo Extension.

Description: Old (circa 1800s) drain, 6 ft oviform shape with original stone creekbed floor, redbrick 6 ft horseshoe sections, 6'H x 4'W rectangle, 4ft round brick pipe below slide which leads to Vertigo Drain. MPL=200m. TEL=600m.

Features: Historical old drain with lots of shape changes, small natural waterfalls & pools, mouldy formations, old coins & other artifacts, steep slide, hardcore entry.

Access: Gutter grille in front of 10-12 Hargrave St. [Sw:298B04/067B04/010D02/001L10, UBD:236N16/004L15, Grg:346H16/013F15, GPS:-33.8831,151.23226] Open, climb in & crawl thru 1ft pipe which bring you to the top of a 3m shaft, climb down this shaft using stepirons & then go thru square 2ft hole in wall & your in the drain. Exit same way you came in or negotiate slide & exit downstream thru canal which is also the alternate entry. The canal is on Glenmore rd, opposite Trumper Park oval. If you enter from the canal, go upstream into the drain & about 200m in you will come to a room, take the 4ft brick RCP at right (Vertigo Drain continues on straight thru the oval 5ft pipe). Manhole on side of road in Sutherland St (yet to be opened), park car over it.

Locality: Woollahra
 Region: NSW
 Country: Australia
 Care: Entry is in ultra yuppified area & locals are narks. The guy who lives in number 12 Hargrave St saw us exiting the gutterboox, he seemed ok about it. Slide is very steep & slipper & is very hard to climb without rope. Downstream entry/exit involves stooping for 400m thru a 4ft pipe. Entry/exit thru gutterbox is NOT for the big boned amongst us. Sutherland St manhole is on side of the road near parked cars.

Eek!: DONT fall down the slide. DONT get seen entering/exiting gutterbox. DONT fall down shaft near gutterbox.

Water Level: Slimy/Shoe. Some avoidable pools & waterfalls
 Cond: Looks its age (100yo+).
 History: Was once a creek that was covered over in the late 1800s,

historical photos in NSW library database.
To-Do: Tie rope at top of slide to make climbing it easier. Open
&
enter/exit thru Sutherland St manhole.

Name: Surprise

Description: Wouldn't be a surprise if I told you. Do it! Best feature:
about the 3rd change, or is it the 4th? Height ranges from 8-
10'.
MPL=768m. TEL=768m.
Access: #0,UE: Depot Rd, below elevated sewer behind RSL Club
[Sw:334E03,
UBD:292M07, Grg:430G07, GPS:-33.968781445,151.064611415].
#9,AX:
Leaching Pond between golf course & river [Sw:334D06,
UBD:292L10,
Grg:430F10, GPS:-33.9756253741,151.063482093, XED, XNL,
XWPT].
Locality: Mortdale
Region: NSW
Country: Australia
Water Level: D/s end is knee deep
Notes: Do Presurprise before doing Surprise. That way it
increases the
surprise that Surprise offers.
Nearby: *Course: Presurprise == Surprise ==<Lime Kiln Bay.
Found: 1994 Diode/Mullet.
Rating: 3.0/5.0
Update: 2014-06-28 14:00:00 (Scarecrow) - Currently an unwelcome
surprise; there is a large amount of sewerage flowing
through the
drain from the round-to-rectangle shape change. Ankle deep
in
most places.
The inlet is also completely different; all the overgrowth
has
been removed for a new development which may include new
drainage. Also, the un-even ground has been covered with a
large
amount of geo-fabric making walking over some parts
difficult
since you don't know where the holes are.

Name: Surveyors Ck
Description: Small but interesting hardcore drain.
Features: Patched up sections, dead end side tunnels, debris
blockages,
grille room to flood plain at u/s end. Old.
Access: #9,UE: Just u/s of where Mulgoa Rd crosses the Surveyors
Ck
Reserve, N of Fairfield Pl [Sw:225D17, UBD:183B01,
Grg:266B01,
GPS:-33.7681109906,150.678573598].

#1,PX: Grilles [Sw:225K20, UBD:183H04, Grg:266H04,
GPS:-33.7748706941,150.693819851, XED, XNL, XWPT].
Locality: Jamisontown
Region: NSW
Country: Australia
Water Level: Knee
Found: 2004 Pandaman.
Rating: 2.0/5.0
Update: 2014-10-09 13:00:00 (DC) - I attempted this drain for the
third

time yesterday and finally got in by lifting one of the
two

manholes in the gutter sections here:
-33.775259,150.694117

This part is a 6ft eel filled, knee deep, rubble filled
RCP
shrinking to
section that only runs for 10 metres or so before
2ft each end via grillrooms.

All the grills between Birmingham and Mulgoa Rd are locked
or
bolted, and drain below appears to vary in size from 6ft
and 3ft.

These grills would however be the best access:
-33.771421,150.684852

The Mulgoa Rd outfall is a 2ft RCP that is half full of
water,
the upstream Birmingham end shrinks too quickly and seems
impractical for access.

Name: Swan Gold
Alternate: West Belconnen Pond
Description: New drain that handles the storm water run off for the
freshly
built "Belconnen Ponds" sub development in Dunlop.
Features: Large grille room with ankle deep crystal gold water. Lots
of
swans will visit you as you enter, as they are use to
being fed
from the top of the grille. A few chambers, smaller grille
rooms
and side pipes. Shapes are rectangle and circle. Size
varies from

3-4-5-5.5 ft. MPL=900ms approx.
Access: Parking available near the corner of Toft Street and Percy
Beg Circuit. Make your way across the park towards the pond.
Squeeze through the small gap between the GPT and the grille. Exit
from any concrete manholes along the way. NB: This entry method
is not viable for the bigger boned.
outlet [GPS:-35.190722,149.016787]

Locality: Dunlop
Region: ACT
Country: Australia
Care: Swans. Children.
Eek!: Some sections are quite low and long. Stretch your self
before hand.
Water Level: Dry - Ankle
Cond: Untouched.
History: Built about a year and a half ago.
To-Do: Explore further up the 4ft if you're a deranged psychopath
who wishes to suffer from back problems in old age.
Notes: Could make for a nice little outing with a set of heritage
listed abandoned farm houses about 50ms north west of the entry.
There's also another drain with GPT at the opposite end of the
pond that needs further investigation.
Found: 2014 Delo

Name: The Cage
Description: A massive caged spillway that forms part of the stormwater
pollution control system for the far northern suburbs of
Canberra. On the pond side (north) is the cage with a GPT
system.
Located on the platform looking towards the cage is a
large locked entry grate that consists of a ladder and platform
system that descends down approx 3 levels. This shaft appears to
be seprate from the main spillway cage and it needs to be
explored on it's own. On the otherside of the embankment is the
spillway/floodway exit. Interesting "polygon" shape That
takes you into the cage. Approx 30m tunnel.
Access: #1 Boat, Via polygon shaped outfall of floodway, at
[GPS:-35.193283,149.105506].
#2 Via locked grate that leads to the ladder platform
system, at [GPS:-35.192926,149.106182]
Locality: Nicholls
Region: ACT
Country: Australia
Care: Drowning hazard. High visibility.
Water Level: Dry - Boat
Cond: Good
History: Constructed in 1989. Gungahlin Pondâ€™s primary spillway
comprises a drop structure and culvert through the
embankment.
The secondary spillway, an earth and vegetated channel, is
constructed on the eastern abutment of the embankment.

To-Do: Gain access via the grate and explore the ladder and platform system to see if it leads anywhere.

Name: The Edge of Darkness
Alternate: The Kiddie Cage
Description: A newish/newishly upgraded drain (in parts) in Orange, NSW.
childcare Starts as twin 4ft boxes and heading directly under a
large centre, then RCP under the road (Spring Street) into a
off to underground GPT/filtration room. From here it splits back
and on parallel 5ft RCP's (then 5.5?) for a few hundred metres
joining up through a couple of small slide rooms and bends before
to into a single 6ft RCP following beneath the reserve behind
Coulson Park/Algona Cres. MPL=600m or so before it begins
shrink away again upstream.
Features: Decent sized grill/filtration room not too far in from the
entrance. Small slides, few curves, gets bigger.
Access: Twin 4ft box outfalls at the corner of Spring Street and
Jilba streets, Orange.
Here:
[GPS:-33.2738388,149.1165733]
Locality: Orange
Region: NSW
Country: Australia
Care: Take the left path through this drain.

Few neighboring houses and stuff, take due care etc,
the
usual basically.
Eek!: Outfall is behind a child care centre, you could look like
a
creep if you are hanging around in this on on a schoolday.
Water Level: Shoe to Dry
Cond: Right hand pipe is half full of rubble due to the GPT
system.
History: This is a link to the construction of the GPT room.

Name: The Kingswood Crashout

Alternate: Kingswood Railway Drains
Description: A small but interesting 4.5ft RCP near the railway line at Kingswood. Small, but has a weird little junction room only a few metres in leading to 5ft RCP which takes a sharp corner then is blocked off with wooden panels after a few metres. This is a cool little room with a window cut into the side letting air and light in. It looks like a bum may live in here though..

The 4.5 ft RCP turns to 3-4ft after the first gutterbox and continues off towards the railway station.

Features: TEL- 25m or so at 4/5ft, then shrinks.
side Strange little junction room, a "window", a blocked off pipe, many empty wine bottles, and an unexplored 3-4ft RCP heading off into distance.

Access: Its in the canal under the railway line, at the corner of Park

Ave and Heath Street, Kingswood. [GPS:-
33.758564,150.731161]

Locality: Kingswood

Region: NSW

Country: Australia

Care: Bums

Eek!: 3-4ft pipes.

Water Level: Dry - Dry

Cond: Poor

To-Do: To not explore the 3-4ft pipes. Oh, there is also a weird old

raised manhole shaft in the canal beneath the railway line
Ive

always wanted to peek into too.

Notes: There is another 3ft drain a few metres from this one but has a

heavy grill over it.

Kingswood
Darkie is just around the corner from this drain.

Modified: 2003-12-31 13:00:00

Name: The Motherload

Description: Huge, deep, flood interceptor for the River Frome, also doubles as a sewer overflow as well.

Features: Massive 20ft high horseshoe arch tunnel, attached to numerous 7ft stormwater/sewer tunnels and various balconied shafts, ranging between 10 and 60m in height. The Frome inlet comprises 4 massive gates emptying into a 10m high chamber, next to a huge staircase which leads up to a syphon-like overflow pond. Beyond the inlet the main tunnel continues as a 10ft high rectangle becoming an

tunnel RBP then an odd parabolic arch. Way downstream the main
it reaches another huge multi balconied chamber beyond which
splits to 6x gated 6ft round pipes.
Access: Twin triangle manholes, next to a large gatic in the path,
10m N of the entrance into St Andrews Park from cnr of Leopold
and Maurice Rd's. Covers are bolted together. Use barricades.
Climb down shaft, then go d/s to main tunnel. [A-Z:058A-4]
Locality: St Andrews
Region: South West England
Country: United Kingdom
Care: Sewage polluted, particulary u/s of Frome inlet, be
careful on ladders.
Water Level: Waders needed due to unavoidable sewage. Do at low tide.
Mostly
Ankle
Cond: Skanky.
History: Built in 1964 after years of the River Frome repeatedly
flooding Bristol.

Alternate: Most likely the up stream section of lavender bay drain -
can we add this alternative access to the known entry?
Description: Very squeezy, short and slippery but beautiful sandstone
drain.
Features: Another short historic drain with sandstone, pipes,
puddles.
Access: Gutter grille on the north west corner of Walker St and
Lavender St. [GPS:-33.842982,151.207973].
Locality: Lavender bay
Region: NSW
Country: Australia
Care: 3-4ft sections. You will get wet.
Water Level: Slimey - Ankle (Tidal)
Found: Curly
Rating: 2.0/5.0
Created: 1995-12-31 13:00:00
Modified: 2008-04-28 14:00:00

Name: The Shlong
Description: 6ft RCP heading S/W off Surveyors Creek Canal towards the
highway. Several grillrooms(one is pretty cool), and
"ends" under a large grill with a 1ft and 2ft RCP continuing on. All
grills

are currently locked.

MPL=410m

Features: Several grills and grillrooms. The middle one has its own little grassy patch under the grill cage. You could have a little nap there.

Access: Walk up the 6ft RCP off canal 80m south of Ikin St (near York Rd): [GPS:-33.775996,150.686016]

Pl and Locked grill turning 2ft in the grass strip between Gynea

Locality: Hadley Pl: [GPS:-33.778367,150.682563]

Region: South Penrith

Country: NSW

Care: Graffiti in the drain says "Proceed to certain death".

Ek!: Certain death?

Water Level: Dry - Shin

Cond: Good

To-Do: Explore the 2ft side pipe, and re-enter pipes in large grill at retention pond south of the Motorway off the path at Nindi

Cres.: [GPS:-33.779325,150.679474] and the others under large grill off the path at Wallan Ave: [GPS:-33.780494,150.678613]

Notes: This drain was named "The Shlong" before we properly completed the drain..

Swim, Cactua and I originally found the "inlets" under the massive grills at the retention ponds (though they were only 4ish foot high), we traced the system back to the 6 footer at the main canal and I named it "The Shlong" due to the fountain going off in the upstream pond..

However, after now investigating the 6ft section fully, it appears these drains do not actually connect? (underground anyway), unless its via the 2ft side pipe, which it probably is..

Modified: 2017-02-15 08:02:10

Name: The Tank Street
Alternate: Tank Street Drain
Description: A very old drain in Lithgow, with several splits and side tunnels, and many shape changes. Starts off as a 4.5ft knee deep concrete culvert before quickly turning to a red brick tunnel, then through a wooden sleeper roof section before becoming 5'5 sandstone tunnels out beneath the railway line.

Under the greyhound track the tunnel splits to two main sections. Left drain goes further under greyhound track and underneath an industrial area before eventually splitting again into 2-3ft brick arch tunnels, where the right drain goes underneath the old demolished gasworks site (and it stinks like burning plastic) before also eventually shrinking down to 3 or so ft before splitting.

This drain has green and purple crystals on the roof in the old brick section.

Features: MPL=850m+ TEL= 1km+ Many shape changes, side tunnels, splits, lots of old rusty tools, cogs and crap all through system, gets slightly bigger, old sandstone and brick tunnels, dead rabbits dumped down into a chute from the greyhound track, purple and green crystals, stoopy sections, interesting exit location.

Access: Outfall is across the road from 45 Tank St: [GPS:-33.476114,150.161202] (knee deep). Grill in greyhound track here: Off Inch St between two buildings [GPS:-33.47812,150.163225] and next to the large building on the eastern side: [GPS:-33.478268,150.163852].

Interesting exit: Large gutterbox on Union St, just south of

Donald St [GPS:-33.476672,150.162349]
Locality: Lithgow
Region: NSW
Country: Australia
Care: Roof is real dodgy in sections, air stinks like burning plastic
under the old gas factory.
Eek!: Dead rabbits.
Water Level: Knee - Shoe
Cond: Good-poor
History: Obviously lots.
To-Do: Explore the system completely.
Notes: "...this drain was definitely a group effort between the 3 of us.
Cactua and I have known of this tiny little outlet for many, many years and simply assumed it would be crap.. However after she had noticed several deep drainage grills near the old gasworks site, and also near the old Eskbank Colliery site, we decided to investigate this properly.. I had also found an interesting entry/exit in someone's driveway as well as several grillrooms, and my mate Stoney had traced a whole separate branch to another deep grill and manhole within the Greyhound track. It then became a priority! It has some hectic stoop sections tho (with many features nonetheless), otherwise id have considered rating it excellent.." -DC.

Name: The Toilet
Description: Unusual drain...6' RCP with a large plastic pollutant trap that resembles a toilet, GPT chamber with tension wiring. This falls into Patin de Glace
MPL: 160m
Features: Toilet
Access: From Patin De Glace, follow RCP on western side of canal.
GPS:-33.924733,150.996476

Locality: Bankstown
Region: NSW
Country: Australia
Care: Pit
Water Level: Ankle - Dry
Found: Curly & Rascal '10
Rating: 2.0/5.0
Created: 2010-02-13 13:00:00

Name: The Wedge
Alternate: The Edge Cinema
Description: A small drain grate leading to a small tunnel and through several large cavities into the plant rooms, kitchen, and several other main parts of a large cinema complex.
Features: Drain, large cavities, several electrical, utility, pumping and plant rooms. It also features an industrial kitchen, a massage parlour, a dance/music rehearsal room full of mirrors and obtanium, and several other rooms we are yet to explore.

active There is a glass door leading directly from the massage parlour, up the stairs into the foyer of the cinema's above..
Access: Lift grill at the bottom of fire doors here: [GPS:- 33.710213, 150.314979] (-33° 42' 36.77", +150° 18' 53.92").

who There is a 7-8ft drop to the bottom of this cavity, so we found it best to lower the first person in, then retrieves the ladder stashed just around the corner inside the cavity...

the rear Exit can be made either out the way you came in (please replace ladder), or through the fire doors at the end of the last room, into underground carpark. (These doors are under camera's both inside and out though, but they are not alarmed.).

Locality: Katoomba
Region: NSW
Country: Australia

Care: In the 2 times I have visited this location the bottom
levels have not been in use, there is musical equipment and such
in one room as well as the kitchen and massage parts, so be
careful, let alone the plant rooms..
Eek!: Avoid the 15 year old part time pimply cinema staff.

Be careful dropping into the grill, look for
cameras (it is dark down there though), and please wipe
your feet when entering the lower carpeted levels from the dusty
basement cavity..
Water Level: Shoe - Dry
Cond: Excellent
History: This runs beneath a hopefully soon to be abandoned
building directly next to another listed location: Katoomba High.
This cinema is not doing very well nowadays, so watch this
space..
To-Do: Check out the two sets of purple swinging doors in the
last room before the fire exit. Due to the confusing entry I had
completely lost my sense of direction, and assumed these led into the
active cinema part, although they are facing the wrong way.
Still, be careful.

Found: DC
Rating: 4.0/5.0
Update: 2015-09-28 14:00:00 (Tim Dole) - According to Josh the
cinema worker there is a sensor at the fire door to detect
loiterers. Additionally he witnessed 10 or so of us climbing up & out
doors to (whoops...). When I told him we could use the fire exit
leave he said not to, as he believed they were alarmed.
He was cool with us, even stating that he has snuck in
once before he worked there. Josh also said that "out of all
the times someones snuck in, this is the most impressive (as he
looked at the rope ladder). What's down there anyway?" Even so,
other workers might not be so pleased haha.

Name: The Works
Description: 10' diameter brick pipe that leads to some excellent features.
Features: Huge junction with bricked up side pipe, large stairway, leading to wall with twin pipes and second side staircase. This leads up to a huge chamber with Inhospitable flowing thru it in a canal and disappearing into an 8' pipe with a large sluice gate above it. A Bridge crosses the canal next to the sluice, leading to a second staircase down to the other end of the two twin pipes. A nearby manhole shaft has a tunnel leading of it halfway up, this leads to the winder to lower the sluice gate.
Access: On east bank of River Irk, just 50m downstream of disused rail bridge. Access from east side by going from Irkdale St to river side, crossing under rail bridge, jumping down into river and wading over to gap in opposite wall. Access from west by going down thru bushes opposite Glendower Dr off Collyhurst Rd to old railway. Jump over wall, cross railway, over wall onto aboveground sewer pipe. Follow this to bottom, jump down to area under bridge, follow d/s to edge of riverside wall. Wade into river, follow to gap. [AA: 100D4, A-Z: 83E5]
Locality: Collyhurst
Region: North West England
Country: United Kingdom
Care: Mind flow in river. Areas on west bank are nettle infested.
Water Level: River is usually shin deep, drain is mostly dry except for knee deep blockage halfway along
Cond: Formation encrusted.

Name: The Writers Room
Description: A large grillroom full off graffiti, next to the M4
Motorway at Glenmore Park.
Features: MPL/TEL=165m
Huge 10ft high grillroom, small pillars, tiny sidepipes,
twin 5.5ft box culverts going to very large sealed grill at
Glenmore Park end, and triple 4.5ft culverts heading off under the
Motorway with more grills.
The
large grillroom is basically an emergency overflow for
what I'm pretty sure is the main western sewer, and there is a
pumping station located just 20m to the east of this drain.
[GPS:-33.782063,150.685345].
This
SPS has several large hatches and harness points/confined
space signs/emergency showers ect.
Access: Best entry is to enter the triple 4.5 footers under
Motorway near Kiaka Cres: [GPS:-33.780953,150.685758].
There is a very tight exit/entry through the sewer
overflow grills next to the M4, near Kukundi Drive:
[GPS:-33.781848,150.685518].
Padlocked heavy grill at the pond, near Kukundi Drive:
[GPS:-33.782391,150.685789]
Locality: Glenmore Park
Region: NSW
Country: Australia
Care: Watch out for graffers.

This

place is full of very fresh graffiti and spraycans.
Eek!: Toy pieces.
Water Level: Dry - Ankle
Cond: Good
To-Do: Properly explore the upstream creek of this drain.

We found a few large grills and outlets
into/around the ponds upstream of here, but they were
locked.

Ill be back..
Notes: This is the upper Glenmore Park section of Surveyors
Creek.

Extincion who knows where/what it leads to?.
Nearby: Vault, Clogged Clam, Havyatts, Mass Extinction.
Found: 2004 Syme.
Rating: 2.0/5.0
Update: 2010-03-26 13:00:00 (Sledgy) - Drain actually runs under

before Murriverie Rd. This explorer got to Bonus St gutterbox heading back.

approx 200m Features:
Multiple height changes. Starts as a backbreaker for then changes to approx 4ft concrete tunnel.
tunnel After a while becomes oviform then back to rectangular again. Max height is probably about 5ft.

Also has small slide which leads to god knows where.

you up Eventually you get to a fork in the pipe. Head left takes Murriverie Rd. Right side is unknown at the moment.

metal Half way up left hand tunnel is a 2 x 2ft piece of sheet dynabolted to the ground. A seperate flow of water runs underneath. Dropped rock in it, sounded like a 3-4 ft drop given time it took for rock to hit.

To Do: Find the end of this thing.

point. Historical note: Newspapers pasted to the ceiling at one Date roughly made out to be 1930's.

Would also possibly raise rating to good.

Modified: 2016-06-29 00:46:49

Name: Thin Lizzy
Alternate: Queen Elizabeth Park Drain
Description: An interesting, but mainly stoopy drain with a large bunker like sandstone section just inside the inlets.

in Starting as a 4ft culvert behind the toilet block
Queen Elizabeth Park, going under the main street, before becoming 10ft sandstone room after around 10m and heading off under the sandstone viaduct on James Street, it then shrinks down

covered again at Glanmire Park to twin 4ft rcp's, then to a 4ft
to the culvert under the tennis courts and eventually joining up
Farmers Creek canal via a small junction room.

MPL=200m

Features: TEL=500+m
sleepers for Rusted railway track grill on entry, rotting wooden
section the roof under the Main St section, and Sandstone block
several with steel plate roof in the larger James St section,
shape changes. Small sidepipes, broken old pipes running
overhead. Reinforced sections, manholes.
Access: The best access is to slip through the gaps in the old
railway track grill behing the toilet block in Queen Elizabeth
Park.
[GPS:-33.482946,150.151859]

above looks (These
gaps are a very tight squeeze, and the concrete block
like it wants to collapse. Be very careful).

at the The Farmers Creek end of the system is here:
going [GPS:-33.479586,150.149323] Take the right 4.5ft culvert
to junction room. The left pipe shrinks to 3ft culvert before
under the hockey fields and State Debt Recovery building,
emerge near the railway station).

way, but Several heavy manholes and slabs at grillrooms along the
not recommended, some are on roads.

Locality: Lithgow
Region: NSW
Country: Australia
Care: The entry to this drain requires care.
There are
a few very unstable sections along this old drain.

The entrance is a very tight squeeze through the
bars, and a big crack in the roof above here too..

Eek!: The Queen Elizabeth park end and the Main Street itself
are going to collapse one day if they don't do some upgrades soon.

A trucks wheel fell through the roof of
this drain in the smaller downstream end in 2012:
<http://www.lithgowmercury.com.au/story/184058/got-that-sinking-feeling/>

The left unexplored branch at the
outfall also has bad cracks in the roof.
Water Level: Slimey - Ankle
Cond: Okay-Poor
To-Do: Not explore the mega stoopy branches downstream of the
room.
Notes: There are rumours of an old bunker under this park, I
wonder if this room is what they meant? It does have a bunker style
heavy steel plate roof.

Name: Titty Sprinkles?
Alternate: I got nothing.. ^That took me forever to come up with.

Description: This is a 6ft RCP drain running along under Mulgoa Rd towards the M4 Motorway just south of Penrith.

Centre It starts in the large canal behind the Penrith Trade side before taking a number of turns passing a heap of small Hooters, pipes and street grills (one directly out the front of drains at a hence the name) before splitting off into two smaller room near the Penrith Homemaker Centre.

where the One 4ft RCP continues S/W towards the motorway, other is a 3ft RCP heading S/E.

Features: MPL=600m Some curves and corners along the way, including a near 90° turn just inside the entrance, small side pipes to gutter-boxes, one very straight section with evenly spaced grills off into the distance streaming sunlight in, before taking another corner and becoming pitch black for the rest.

Access: Unexplored 3 and 4ft sections for the hardcore explorers. Located on western side of Mulgoa Rd here: [GPS:-33.767843,150.677635]

look for Park anywhere in the area and walk down into the large canal (Surveyors Creek Canal), head under the road bridge and would have the 6ft outfall on your left, the smaller outfall you passed on your way down(eastern side of bridge) is Surveyors Creek Drain**

Locality: Jamisontown

Region: NSW

Country: Australia

Care: No real care required with this one, can really only be seen by passing pedestrians on the overpass and they probably won't even notice or give a shit anyway.

Oh,
there are frogs living in this drain so watch your step.
Water Level: Dry - Shoe
Cond: Good
History: Some RCP sections have 1975 scratched into them.
To-Do: Crawl up the 3 and 4 ft pipes?
Notes: **The Surveyors Creek Drain outfall is stoopy and long.
It's best
attacked from the upstream end (that drain is backwards!).

Name: Turdgrinder, The
Alternate: Blue Mountains Main Sewer.
Description: Sewer Tunnel, nearly 30kms long, 12'h.

(DC - 2015) At the Leura Cascades hatch, the Syd
Water locks have been replaced with small, cheap Lockwood locks.

Since I'm doing an update, may as well do it properly.
The tunnel is now 39+km long and runs from the North Katoomba Cascade dams
treatment plant to the Winmalee Wastewater Plant. During
construction they broke the water table at Hazelbrook and from there down
the flow is a torrent.
Due to the system

running at near capacity by Springwood, the drop
structures and shafts on Lugano Rd and Lawson Ave at Springwood were
recently upgraded to avoid catastrophic failure. (In fact, if you
streetview Lugano Avenue you can see the work taking
place).

Here are some GPS's if you keen on
getting your sewer on:

Cascades
Dam treatment plant: -33.6919417,150.3031826

North Katoomba drop structure:
-33.6998638,150.3097755

Katoomba manhole, deep shaft
leads to 5ft active sewer culvert: -33.7088975,150.3020748

Leura Cascades access shaft:
-33.7191204,150.324651

Leura
Cascades spur tunnel/overflow gatics:
-33.7193313,150.3228056

Kedumba Park (Leura) gatics are here:
-33.7088763,150.3532608

Jamison
Creek: ventilation: -33.7154259,150.3749585

Wentworth Falls spur tunnel:
-33.7079079,150.3828938

Bullaburra RTA site:
-33.7238176,150.4053158

Lawson
"Portal" here: -33.7325343,150.4311213 (horizontal access
where they sent in the TBM's).

Hazelbrook STP (lawson carrier): -33.7159067,150.458976

Linden access shaft is here:
-33.7152742,150.5069688 (locked hatch, contains caged
ladder
access same as Leura).

Faulconbridge gatics: -33.7028874,150.5291641]

Lugano Ave drop structure:
-33.6967866,150.555144

Lugano Ave upgrade and access:
-33.697147,150.5549414
I assume
the Lawson Rd shaft is either here:
-33.6961015,150.5784658 here:
-33.6986499,150.5790961 or both.

Winmalee waste water treatment plant:
-33.67641,150.6228778
Features: At the two points accessed, the tunnel was both a 12' dia
round
bored tunnel, with a nearby 8' side tunnel (at Leura) and
a 10'
tall narrow arch tunnel, also rock bored (at
Faulconbridge). The
Leura end was accessed via a 9 storey deep shaft, with
ladders,
cage etc. The Faulconbridge end a 4 storey deep shaft.
Access: * Leura: Head down Cliff Dr until you reach a service road
on the
L, opp a road leading to "Leura Falls" on the L [Sw:NDR,
UBD-BM:020D15, Grg:NDR]. Go up service road (gate may be
unlocked) and take L road. This road leads directly to
entrance,
which is a metal hatch that should be unlocked.
*
Faulconbridge: Going E on the Great Western Hwy, turn L
onto
service driveway, 100m E of Clifton Ave [Sw:NDR, UBD-
BM:025F06,
Grg:NDR]. Gate may be open. Go down then L, over grass
towards
gates at far E end of land. Lift Gatics.

UPDATE 2009 - Spider: Hatch at Leura was locked with
a

sydney water key.
Locality: Leura
Region: NSW
Country: Australia
Care: Fully operational sewer! Beware of feeling light headed or ill.

Unlikely to flood (apparently), but be careful. Water at Faulconbridge end is fast flowing.
Water Level: Hopefully you can avoid the metre wide shit flow running down the

middle. Walk on edges
History: 2015- DC:

There are also powered lunchrooms scattered through the Grinder, be cool to find one.

These links are interesting and have maps, diagrams and plenty of info:

Name: Unworthy Parallels

Description: Short, four-way, 5ft, parallel, rectangular drains under Old Windsor Rd, beginning in Bella Vista and flowing towards Lalor Park. Main flow travels through a 5ft rectangular tunnel and is very clean with a continuous, shoe-deep stream of water. Upstream end of the three other tunnels (also 5ft) are blocked by a pit of some sort, mostly likely a collection area for water from the road above or an overflow for the creek behind in bad weather. This pit is roughly 3m high. Regardless, these three tunnels are full of thick mud in some sections as the floor is comparatively uneven in parts. MPL=70m. TEL=280m. U2.

Features: Main stream tunnel has sparkling clean water... BUT the other three have lots and lots of mud! Some of which goes up to your ankles, making it extremely difficult to navigate through. However, Toothpick managed to race through by mud-skating!

Access: Access to drain is from a reserve in the north-western end of Francesco Cres, Bella Vista; specifically at [GPS:-33.751716,150.951983]. Do not park in the reserve's car park at night as the gates are locked once sport and training programmes have finished. Drain ends with churning blocks and a small 3.5ft side-pipe heading in a south-easterly direction that has yet to be explored [GPS:-33.751886,150.951293]. Other three tunnels are only accessible from downstream end.

Locality: Bella Vista

Region: NSW

Country: Australia

Care: Access to creek from park end is through thick grass with hidden grass holes. There are numerous stakes sticking up through this mud. as well. Three of the four tunnels are full of slippery

Don't jump into the pit from the upstream end lest you
break a
leg from the 3m fall.
Eek!: Mud!
Water Level: Shoe - Shoe
To-Do: Follow Toothpick's lead and go mud-skating! Explore 3.5ft
side-pipe at the end of the drain.

Name: Veg's Silver Chain
Alternate: Cabramatta Creek
Description: A series of RCP's ranging in height from 6.5ft down to 2ft separated by rooms. The drain floor descends by about 6ft elevation all within 500m via two small waterfalls. There may be more further upstream. The drain begins in an open GPT with a steel debris perpetrator (GPT), and a tiny waterfall a few meters downstream of it. Heading upstream, you are faced with a choice of three identical 6ft RCPs.

The one on the right seems to be bone dry (all descriptions are when facing upstream) except during rain. The other two have only a shoe sole deep trickle running down the middle which can be avoided. They look roughly like this--> |Q Q O|.

All three RCPs run parallel with no connections till you arrive at the junction room beneath Shropshire St. There is a left hand kink about 50m in from the portal which makes it impossible to see very far up the drain from the GPT or from the straight section back to the GPT, and it also makes the sun light fade away very abruptly. From the kink on it is dead straight till you reach the room roughly 280m away.

This first room is about 2m long by 6m wide, and about 3m high.

Heading upstream from that first junction room you have a choice of three 5.5ft RCPs veering to the left (west), and one 6ft RCP on the far right side heading straight (north) upstream from that room. This 6ft RCP is 4ft above

the drain floor at this point, forming a waterfall with a steady but small (one inch) flow about 20cm wide. Due to the flow, the waterfall lands about a foot or two from the waterfall's lip which forces heavier objects like metal and bricks to fall almost straight down closer to the wall and are therefore out of the water flow. There are remains of some heavy obtanium like metal slag and brass tap handles and other metallic junk. On the first explore there Blakjak found a That thick sterling silver neck chain beneath the waterfall. the combined with the name of his friend (Veg) who passed on name. Intel about this drain is where this drain get's it's

These three 5.5ft RCPs to this date (2015) have never been explored. They head off to the left towards a unknown destination*, go good explorer!

Heading upstream from this room, for our convenience they have provided yellow step-irons on the right side wall adjacent to the 6ft RCP where the consummate urban explorer regardless of fitness level can negotiate the waterfall in a civilized and safe manner. Looking upstream from that that room the drain appears like this ---> |oooOE| with the E being the step-irons.

Heading upstream from that room the 6ft RCP goes on for about 230m where you will arrive at another similar shaped and sized room (if anything it's a tiny bit smaller), presumably beneath Cartwright Ave but as yet not confirmed. Upstream from there the drain shrinks to form three identical 2ft RCPs, which are also a foot or so above the drain floor, the trickle that runs down one of them forms another tiny waterfall.

These small RCPs only go for about 10-15m before the
 drain
 appears to get taller to what seems like 6ft or maybe 7ft
 square,
 and similar width.
 Those small were not explored
 as it was early into our expedition and we didn't want to
 be
 covered in spider webs and have wet pants for the rest of
 the
 day.
 This drain has manhole shafts at regular
 intervals, none as yet have been opened or their location
 at the
 surface determined.
 TEL = 800m+ MPL = 510m.
 Features: Large GPT entry with gate that provides access to
 vehicles. Small
 waterfalls, shafts, different sized RCPs, unusual rooms.
 Access: The portals and GPT are just south of Cabramatta Ave,
 Cartwright,
 in Ron Darcey Oval, adjacent to the Michael Wenden Aquatic
 and
 Recreation Centre here [GPS:-33.921959, 150.883381].

 The gate is usually locked; follow the fence on the
 opposite
 side of the gate to where it ends (25m) and the trees and
 bushes
 begin then squeeze between them. Carefully climb down to
 the GPT,
 it is a 6ft easy climb down. The GPT has dry spots to walk
 on
 which makes it easy to keep your feet dry.
 Exit is
 back out same way you came in.
 Locality: Cartwright
 Region: NSW
 Country: Australia
 Care: Serves a large catchment area upstream, floods hard and
 often,
 check BOM. Local kids access the drain, place CC stickers
 in this
 drain at your own risk!
 Eek!: As above, if you are in there when it floods you will most
 probably die. And kids.
 Water Level: Shoe - Death
 Cond: In good nick.
 History: A tributary of Cabramatta Creek which was covered over to
 form a
 drain below and parkland or open space above.
 To-Do: Fully explore this drain including the upper reaches
 beyond the 3

have only x 2ft RCPs, and the 5.5ft RCPs in the first room which
shafts been explored for a few meters. Locate where the manhole
emerge at surface level.

Modified: 2007-05-11 14:00:00

Name: Volition

Description: A strange drain system that will test your will. Those who

continue will be rewarded. Not suitable for the ones with
weak
backs and pitiful calves and quads.
MPL = ~800ms
Features: Multiple grilles. Large upstream bunker room. Mini
waterfalls. Large overflow cage in a lake (unreachable by land). Size
ranges from 5-8ft, though it gets as small as 3.5-4ft for a 100ms
or so before the main bunker room.
Access: Park at the shops on the corner of Jerrabomberra Parkway
and Coachwood ave. Enter through GPT outlets on Coachwood ave
side of the shops.
Outlets - [GPS:-35.386573,149.200838]
Overflow cage - [GPS:-35.387337,149.208752]
Locality: Jerrabomberra
Region: ACT
Country: Australia
Care: Houses over look the outlets.
Eek!: No man holes. All grilles are padlocked (at time of
writing). Lid at the bunker is welded/sealed shut. If it overflows
you're pretty much fucked.
Water Level: Dry - Shoe
Cond: A little graff at the beginning dies off the further you
go upstream
History: It use to be a creek before Jerrabomberra was built in the
80s.
To-Do: NA
Notes: NA
Found: 2014 Delo
Rating: 3.0/5.0
Created: 2014-08-21 14:00:00

Name: Vortex, The
Description: Not very long 3' RCP sections leading up to a cool shaft,
with a windowed round chamber with a by-pass shaft down the
centre of it. MPL approx. 60m or less.
Features: The chamber is quite unique. From the shaft there are
step-irons leading to a manhole high above, and the window in the
round room, which is shaped like a turbo-charger, with a vortex
passing

through the centre of it.
Access: Access is via Johnston's Creek canal. From the D/S end of
Loaf, enter the first side-pipe you see on the right-hand side
(heading D/S) of the open canal.
Is south of the Booth St bridge. [GPS:-
33.885147,151.173769].
Locality: Camperdown
Region: NSW
Country: Australia
Care: Don't slip into the vortex! Very smooth sides.
Water Level: Dry - Shoe
Cond: Pristine
History: It looks like it must have been fun to build
To-Do: Take 5 or 6 meters of rope and hang it down the vortex.
Enter via the manhole and check out the Vortex during
rain.
Notes: Was mistaken for Mr India's Vestibule on the V is for
Vestibule expo on 09-01-10.
Found: 200X- Pandaman
Rating: 2.0/5.0
Update: 2012-05-15 14:00:00 (Ratter) - GPS coordinates are
[-33.885147,151.173769].

Another "to do": enter via the manhole and check out the
Vortex during rain.

Name: Western Hassalling
Description: Extension of Hassall St drain, part of Clay Cliff Creek.
MPL 800m + various short underpass sections.
Heights varies, from approx 5' rcp at most u/s sections,
to 5.5'
square, and some 8'+ underpasses.

(Red - 2010) Upstream keeps going and does not change its
shape
for a long time. Another access point is at
[GPS:-33.822156,150.988315]. This point is within a park
underneath a large, square 1x1m grate and much safer than
the car
park entrance. This entrance, being tucked away, is also a
better
choice for the more discreet adventurer. Toothpick and
myself
(Red) explored beyond this point but exits disappeared and
the
pipe seemed to go on forever in a strict westerly
direction. A
bit further east, downstream, is another unexplored side-
pipe
heading in a south-westerly direction.

(Red - 2012) The southwestern side pipe at the junction
upstream
continues straight for a while, perhaps 100m, before
reaching a
small waterfall, just over 1m high. This pipe continues
until it
shrinks, making it difficult to proceed any further.
(Intrepid -
2012) This pipe has a PWD ??/10/35 date marking at the
end.
Access: u/s access from gutter grille on Lansdowne St West, 50m
east of
Burnett St, in front of the car park.
[GPS:-33.822292,150.990164].
d/s access via canal at end of Ollie Webb Reserve; Marsden
St

between Crimea and Lansdowne Sts. [GPS:-
33.822294,150.99876]
Alt. follow canal u/s from Hassall St drain.
Another access point is at [GPS:-33.822156,150.988315].
This point is within a park underneath a large, square 1x1m
grate and much safer than the car park entrance.
Locality: Parramatta
Region: NSW
Country: Australia
Care: Carpark is used, so beware of opening grille from
underneath. Alternatively go another 10m or so and try to open the
next grille, which is on the opposite side of the road.
Water Level: Dry - Shoe
Notes: If you enter from the u/s grille and keep following the
canal system you'll eventually get to Hassal St drain, then Why
Hasn't This Been Found, and finally Cheese grater.
Found: Pandaman 19XX-20XX
Rating: 2.0/5.0
Update: 2012-09-15 14:00:00 (Red) - The southwestern side pipe at
the junction upstream continues straight for a while, perhaps
100m, before reaching a small waterfall, just over 1m high. This
pipe continues until it shrinks, making it difficult to proceed
any further.

 walking the entire canal) [Sw:NDR, UBD-Nc:143A11, Grg:NDR,
 GPS:-32.9406839122,151.65902986].
 #0: Unnamed reserve other side
 of railway line.
 Locality: Cardiff
 Region: NSW
 Country: Australia
 Water Level: Slimy-Ankle
 Notes: Whirlaway featured an eleven-year-old heroine, Helen, who
 set out
 on her adventures in the company of her pet koala, Tirri,
 and

Whirlaway himself, who was a friendly sunbeam. A hidden lift in the cellar of her newly occupied family home carried them backwards in time, to the dawn of life in the Archaeozoic Era or 'Age of Oldest Things'. The return journey took place by a series of doors, each opening into a new geological epoch, which the party was able to explore. At each stage, new inventories of exotic creatures - trilobites and sea-lillies in the Cambrian sea, dinosaurs in the Jurassic and Cretaceous swamps and forests and dawn-horses and sabre-toothed tigers on the grassy plains of the Pliocene - unfolded for them.

* Whirlaway was a World War II casualty. Its appearance from the English publisher Hutchinson in the late 1930s coincided with the lead-up to hostilities. Under wartime conditions, few copies ever reached Australia, and the London stocks were destroyed in the Blitz.

Name: White Rabbit
Description: Twin 5' SCP's that run dead straight for 80m then become a
'Y'
intersect. The intersect has a window that opens into both
sides.
Right hand side leads to 'Cave-in' 50m upstream. MPL=100m
TEL=100m.
Features: Low quality graf.
Access: #5,UE: Over embankment opposite cnr of O'Connell and Peel
St. 30m
NW of Railway bridge across peel river. [NDR].
#5,UX: Jump
fences in either canal in vicinity of Marius St and
O'Connell
St's.
Locality: Tamworth
Region: NSW
Country: Australia
Care: Pipe at 4.7ft elevation 20m inside from entry. This pipe
cuts
across both sections. I have hit my head many a time.
Water Level: Dry

History: Ghost once owned a pure Albino White rabbit that escaped
cage and sought refuge in this location. A great deal of luck and
Pyschic intuition saves pet rabbit from certain watery death.
Rabbit later dies of Rabbit Influenza.
Found: 2006 Ghost.
Rating: 3.0/5.0

Update: 2012-10-01 14:00:00 (Siologen) - Oct 2012. Two large sewer
overflows have been installed just u/s of Collins Street.
New
overflow chamber with two syphon overflow pits. Very nasty
and
utterly surprising to see, given Syd Water has been
sealing
overflows elsewhere. Theres also a nasty turd GPT
installed near
Albion Street. Drain is now very much Straight From The
Bowl.

Name: Witness
Alternate: Claisebrook Northern Branch
Description: The most northern branch of the Claisebrook main drain.
The drain
inlet connects to Smiths lake and flows into Claise brook
before
emptying into the Swan River.

MPL=200ms - Though the total length of the drain is not
known at
this stage - it is easily over 2kms long. According to
Water
dept. docs it connects with another claisebrook branch in
Robertson park.

Features: Old and new sections. Beautiful brick. The largest chamber
to
date discovered in Perth. Dry walls you can sit on and
enjoy a
beer. Large waterfall through 4ft RCP.

Access: Park near the corner of Kayle and Emmerson st. Lift man
water
dept. manhole near the corner of aforementioned streets.

[GPS:-31.934499,115.851337]
Locality: North Perth
Region: WA
Country: Australia
Care: Lids are heavy and are rectangular in shape. Possibility
of
dropping the lid into the drain if not lifted with care.
The

manhole is directly in front of a row of houses, best to
do at
night.
Eek!: Frogs, tadpoles, jumping spiders.
Water Level: Shoe - Shin
Cond: Untouched
History: Originally a much larger lake, Smiths lake was partially
drained
in the late 1800s and was used as a market garden. Due to
a spate
of flooding in the late 1920s the drain was upgraded to
allow
better flow into the claisebrook main drain. This work was
started in 1929 and completed in 1939. It is the most
northern
branch of the Claise brook main drain.
To-Do: Explore past the 4ft rcp.
Notes: This drain, with further exploration, has the potential to
be
excellent. Rating it good for the time being.

Name: Wolli World
Alternate: Arncliffe System
Description: Small system with a micture of overgrown open channel, 5
foot
concrete tunnel and 5 foot concrete covered brick tunnels.
TEL
approx 800m MPL approx 700m. Drains Arcliffe/Wolli Creek
and

empties into Cooks River near the airport, Main access is under Princes Hwy. 100m of 5 foot high concrete drain. This section is tidal and quite muddy. Tunnel opens to a 400m overgrown open brick channel running between various caryards and factories. Goes underground under SW Sydney sewer viaduct. Forks after approx 5m. Left fork cont as 5ft concrete covered red brick drain for approx 5-10m then opens up to approx 7ft high for 20m before continuing as 5ft redbrick south. Right hand cont for approx 10m before opening out to 1.5m wide wire grate covered open channel for 10m before cont as 5ft tunnel west.

Features: 4ft long old man green eel living in first section. Interesting entrance under sewer viaduct.

Access: 1. Via canal in Cahill Park, Wolli Creek/Arncliffe (off Princes Hwy). Canal is tidal emptying into Cooks River so best done at low tide. Other access via car yards on Princes Hwy, Arncliffe or through factory land Argyle St, Arncliffe/Wolli Creek. [GPS:-33.93210447650211,151.15422070026398]

2.Other access via car yards on Princes Hwy, Arncliffe or through factory land Argyle St, Arncliffe/Wolli Creek.

3. From Gutterbox accross from the Muslim college on Cnr of Wollongong rd and Martin Av. [GPS:-33.93305695429045,151.14866852760315]

Locality: Wolli Creek/Arncliffe
Region: NSW
Country: Australia
Care: Muddy as far as sewer viaduct entrance. Rubber boot recommended.

Dont stand on King Wolli (the eel)
Mud! Tides! Spider webs!

Name: Wonderbra
 Alternate: Yennora Drainhole
 Description: Drain which looks well endowed & impressive from the outside,
 only to shrink down to become twin 4ft corrugated iron pipes,
 hence it's name.
 Features: Large opening with small churn blocks which stops boulders entering the drain. 2 X 4ft corrugated iron pipes (only explored
 for a short distance).
 Access: Easiest way is if you enter the driveway of the property on Byron
 RD just opposite Cann St, Yennora. Walk around to the north of
 the building where the entry is very visible.
 If driveway gate is closed/locked enter the open land on the
 corner of Byron Rd & Dennistoun Ave. The drain dives beneath the
 large building on the south side of that open land.
 Lots of safe parking in side streets off Byron Rd.

Actual drain entry is here...
 [GPS:-33.857903,150.975269]

Locality: Guildford
 Region: NSW
 Country: Australia
 Care: Is in enclosed land. Easiest access involves accessing private
 property. Looks like it gets hairy down there during heavy rains.
 Water Level: Dry - Knee
 Cond: New drain diverting the catchment beneath new buildings.
 To-Do: Fully explore the 2 x 4ft corrugated iron pipes, find out where
 they go.
 Notes: Although it is a very unusual set-up, it is only worth doing if
 your in the area, or bored.
 Unless off course if you are shorter than 4ft.

Description: Interesting drain with several shape changes. The outfall is twin
5ft concrete culvert that joins a room. From here, two 4-4.5ft
rectangular RCPs continue upstream to a 3.5-4ft low, but wide,
section underneath Mawson Crescent. From here, two 4-4.5ft RCPs
continue upstream to an ovular shape, reminiscent of Deep Throat
and Quasi. Continuing upstream, the drain becomes a single 5ft RCP before changing shape, yet again, to twin 5ft RCPs.
Finally,

to the drain changes shape to twin 4-4.5ft RCPs and continues
 shrink upstream. MPL=800m. TEL=Unknown.
 Features: Low chamber underneath Mawson Crescent has a nice
 sandstone stonework surrounding the twin 4-4.5ft RCPs. Some sections
 have corrugated-iron roofing.
 Access: Park near corner of Stevens and Reid Sts, Ermington. Due
 to fences and an overgrown outfall, best method of entry is
 by lowing yourself down into either of the gutter-box grills
 (GBGs), at #1 or #2 below. A milk-crate may be required to climb
 out due to no step-irons being present at either of these two
 points of entry.

#0 Outfall, at [GPS:-33.811283,151.056961].
 #1 GBG, at [GPS:-33.811254,151.056996].
 #2 GBG, at [GPS:-33.811162,151.057062].
 #3 GBG, at [GPS:-33.810749,151.057498].
 #4 GBG, at [GPS:-33.8107,151.057556].
 #5 GBG, at [GPS:-33.810241,151.058466].
 #6 GBG, at [GPS:-33.810027,151.058643].
 #7 GBG, at [GPS:-33.80975,151.059732].
 #8 GBG, at [GPS:-33.80975,151.059822].
 #9 GBG, at [GPS:-33.809288,151.06071].
 Etc.

Locality: Ermington
 Region: NSW
 Country: Australia
 Water Level: Dry - Shoe
 To-Do: Continue exploring upstream to confirm whether or not
 these access assumptions are correct (see Notes).

Notes: Google Maps suggests that this drain begins in the
 southern end of Cowells Lane Reserve, Ermington. One can follow the
 grass line indicating where the drain flows downstream to the
 explored sections of this drain. It is assumed that the grills in
 the streets and the parks along the way connect directly into
 this drain.

Name: Wrong Guess
Description: 6ft RCP later becoming 5-5.5ft underneath a park before
splitting
Features: up into two (2) 4-4.5ft upstream sections. TEL=300m+. U2.
An easy, beginners drain with several gutters allowing
light to
enter during the daytime. One does not even need a torch
for most
of this drain... providing there is nothing nasty I missed
noticing sticking out of the ceiling!
Access: Downstream access in Sophia Doyle Reserve at
[GPS:-33.758716,150.976674]
in a park on the eastern end of Sanders Rd. Several gutter
access
points exist. Some are loose enough to budge open but most
are
rusted shut. Easiest access point upstream (discovered so
far) is
in the middle of a concrete block in the park between
Hilda Rd
and Bass Dr at [GPS:-33.760103,150.977133]. Gutter
openings
(starting downstream going upstream) are:
#1, opposite 27 Sanders Rd;
#2, outside the front of 27 Sanders Rd;
#3, in front of 25 Hilda Rd;
#4, opposite 25 Hilda Rd;
#5, in park (see above);
#6, south-west corner of park on Bass Dr;
#7, west side of 23 Bass Dr;
#8, southern edge of 79 Bass Dr;
#9+, to be discovered...
Locality: Baulkham Hills
Region: NSW
Country: Australia

Water Level: Dry - Shoe
Cond: Lots of graffiti at downstream entrance but otherwise relatively clean.
History: An engraving in one of the RCPs says "21/06/77."
To-Do: Returning and finish off both 4-4.5ft upstream sections.
My guess is that the left branch goes up Bass Dr and ends shortly thereafter while the right branch continues towards Seven Hills Rd.

Name: Xsv's Dungeon
Description: Large open cavity underneath a
Mcdonalds/KFC/Shell/Pancakes on
the rocks. Suitable for chilling out if you're bored and
in the
area otherwise not really worth the visit.
Features: A bunch of brick pillars holding it up.. also a faint
petrol
smell coming from the shell as you climb down, delicious
braincell killing ;) Theres also what looks like an orange
extension cord or something coming through one side of the
wall..
electricity in a drain? weird!
Access: [GPS:-33.796703,150.98904]
Park your car in front of the grill to block view from
the
pancakes on the rocks restaurant.. at night its dark on
that side
so it should be fine. There's also another grill about 10m
away
but it has no rungs to climb down.
Locality: Northmead
Region: NSW
Country: Australia
Care: Lots of people come and go around the restaurant.. but i'm
sure
the "i dropped my keys" excuse will be fine though ;)
Water Level: Dry - Dry
To-Do: Check warehouse right next to it for access.. currently
empty and

in need of a visit.

Perhaps a pizza & trash talk night soon? :)

Name: Yabbie Tank
Alternate: Flap
Description: A drain system close to the CBD containing many yabbies.
It is
safest and recommended to do this system with 2 or more
people

requires due to the large flap (weighing approx 60 - 70kg) that
crates to be lifted to gain access. If doing it solo bring 2 milk
Features: to prop it open. MPL=350ms to Waterfall.
other Large waterfall, small chamber, side pipes, yabbies and
Access: drain fauna.
in Park along Watson st closest to the corner of Mckay Garden
follow Turner. Walk down to the Sullivans creek open canal and
flap downstream. Look for large flap blocking 5.5ft RCP. Lift
from the bottom and prop with milk crates or similar.
1. Park - [GPS:-35.273689,149.125962]
2. Drain - [GPS:-35.273671,149.125649]

Locality: Turner
Region: ACT
Country: Australia
Care: Best to do at night.
Eek!: The Flap. If it squashes you on entry it has the potential
to seriously injure you. If it closes once you are in the
system exit will be extremely difficult.

Water Level: Ankle - Shin
Cond: Completely unvisited - no graffiti - rare considering it's
location.
To-Do: Explore past the waterfall. Catch a yabbie.
Notes: Not for the faint-hearted or the bigger boned. When I was
at the waterfall section a loud sound of rushing water came out
of nowhere causing me to exit immediately. In hindsight I
believe this could have been either from the irrigation systems of
buildings near by.

Name: Yerrabi Pond Explorers Playground
Description: (1) A massive spillway that is on the south embankment of
Yerrabi pond. Climbing into the spillway takes you into a massive
under the rectangular entrance which slides downwards and flows
huge. bridge into a large GPT. Approx 40 meters long. Short but

Great atmosphere. (2) To the other side of the spillway is a large outdoor staircase that leads to a 4ft RCP. Entering into the RCP takes you into rat like tunnels that run to either side of the bridge. Every 10ms where there is a gutterbox is standing room 7ft square. Pretty fun crawling around the bridge as cars speed above you. (3) GPT outlet of the spillway near the staircase. 5ft RCP. Not explored.

Features: Outlined in description.
Access: Best place to park is here [GPS:-35.179088,149.128886]
inside the park. (1) [GPS:-35.178323,149.125593] Spillway: Jump two sets of thigh height railing and scale ladder into spillway. Exiting the Spillway is the same way you entered, unless you brought your diving gear. (2 + 3) [GPS:-35.179102,149.125795] After exiting spillway cross through one of the small openings that run underneath the bridge to the other side. Head south from here. About 40ms away from other side of bridge. You will see the GPT/Overflow. From here looking north you'll see the stairway. Climb the stairs and enter the 4ft RCP and explore under the bridge

Locality: Gungahlin
Region: ACT
Country: Australia
Care: High visibility.
Eek!: Slippery in spillway slide.
Water Level: Slimey - Dry
Cond: Good
History: Yerrabi Pond was constructed in 1994. Yerrabi Pond is formed by the Mirrabai Drive embankment across East Ginninderra Creek. The primary spillway comprises a drop structure and culvert through the embankment. The secondary spillway comprises a concrete weir and chute on the western abutment of the embankment.

To-Do: Lift lid of grill at bottom of the stairway and explore.
Found: Delo 2013
Rating: 3.0/5.0
Created: 2013-07-06 14:00:00

Name: Yodas Den
Description: Good drain, 6-7' RCP, with 8' rectangles, and a 9'h x 4'w corridor, massive CDS unit. TEL=1.7km.
Features: 40'h room, slide, 5' d/s extension.
Access: #9,AE,Extension: Coogee Beach north [Sw:%%, UBD:%%, Grg:%%].
#8,AX,Extension: Grate eastern end of oval close to Dolphin St
[Sw:%%, UBD:%%, Grg:%%].
#6,UE,Main: Under Bowling Club, Dolphin St
[Sw:298K19/078K19, UBD:257F15, Grg:377F15.
#2,AX: First GBG Courland St NW from Coogee St
[Sw:298H18/077H18, UBD:257D14, Grg:377D14, XED, XNL, XWPT].

The access point on Courland St is actually the first grille NE from Coogee St, not NW; it's across from house #6. Correct GPS coordinates are [GPS:-33.916045,151.247815].

Further u/s access is possible via steel swing grille outside 15 Farnham Ave [GPS:-33.914730,151.247808]. This leads to a tall brick shaft which drops into a 3' corrugated plastic pipe.

Those prepared to waddle 200m up the 3.5' RCP in the LH branch will be rewarded with 20m of 7' brick arch, lit up by a steel grille (heavy + padlocked) at one end [GPS:-33.916132,151.245296]. Easy access via 6seg near steps at the south end of Clyde St [GPS:-33.915931,151.245322]. Upstream is a 3' RCP, not explored.

The infall for the RH branch is at Fred Hollows Reserve [GPS:-33.913245,151.247924]. According to Nym: "goes to nice sandstone chamber section under Alison Rd, mostly flooded where boulders have washed down and dammed it up". At the u/s end of the reserve is a 5' RCP covered by a heavy flap [GPS:-33.910673,151.248127]; Hats listed it in Intel a while ago, but afaik nobody's explored it very far.

GPS coordinates for the outfall are [GPS:-
33.919228,151.259464].
Heading upstream, one encounters a monotonous 5' rect,
briefly interrupted by a 6' arch. Eventually splits to two
parallel 4.5' pipes - one concrete, one plastic. These rejoin into 5'
covered canal which opens at the bowling club.

(Ratter & Mandala, 2013/09/29)
Locality: Coogee
Region: NSW
Country: Australia
Water Level: Ankle. If CDS unit is flooded, unblock overflow pipe
Notes: Better to use #2 (GBG) as entrance. Let gravity work for
you. At the fork, if heading u/s, take the RH passage. The LH
looks and is bigger but shrinks very fast.

 Care: Walking off/Falling from upper levels. Slippery.
 Eek!: Prob BDID due to area/parking.
 Water Level: Dry - Shoe
 Cond: Unfinished
 History: Stalled construction site.
 To-Do: Grate and Griddle Cheese.

Found: Fl@sh 2010
Rating: 2.0/5.0
Created: 2010-12-09 13:00:00

Name: Afterbirth
Description: Extensive service tunnels, multi leveled playing field,
connections to Level 1 which is the service tunnels
connecting Prince of Wales Womens / Childrens and Private hospitals
together.

Features: Part two are the childrens hospital rooftops.
hidden Service Tunnels - Stairs, ladders, air con tunnels, doors
in dark corners, extensive cavities covering a large area
connected by passages and ladders. A play area that could
take hours to cover.

with views Rooftops = interconnected rooftops covering large area
panorama of to the ocean, unsw, the airport, and a broad complete
other the city. Doors and up to six other stairways connect to
buildings, plant rooms and other yet discovered joys.

Access: GPS:-33.918386,151.237653 enter from hospital road for
rooftops and tunnels, highly recommend not attempted before 9pm, in
bad weather will provide better cover = less staff out back
having smokos, later at night even better.

security -33.917961,151.238777 rooftop stairs here, mid point
the gate unlocked, head to roof, go nuts but also note that
this helipad for the rescue helicopter is just off one side of
closely. rooftop and the helicopter comes in over rooftop. very

extensive -33.917576,151.238923 larger of the two rooftops,
locked views, mid point security gate open, rooftop proper gate
there is but climable but only for those with no heights issue. -

up, a staircase at the opposing end of building with same set
side are rooftop gate here closed too / note stairs at opposing
this in sight of security office so not recommed venturing to
duty side. Even from top floor balcony at this point views are
out in fantastic. Note all floors are occupied and staff still on
through the night, stay silent on balconies. lights may be
points but patients still reside.

-33.918001,151.238745 set of stairs here rises up to
ground level and has yellow danger/caution tape across it,
descend these stairs to enter service tunnels, doors unlocked. if you
can't spend over two hours exploring here your not trying hard
enough, after crawling under machinery, climbing inside wall
spaces, looking in unlit corners of spaces and through uneventful
looking rooms i found more doors and continuous cavities than i
had time to explore.

Locality: Kensington / Randwick
Region: NSW
Country: Australia
Care: on site security, have a cover story, carry a newspaper
and look part of the scenery. having said that i crossed paths with
security once in five days of return visits to explore and
they ignored me.
once in Level one hospital service tunnels tonnes of
cameras, in fact camera overkill, for the paranoid stick to cavities
and basement tunnels.

Eek!: don't get lost, no phone reception. take a friend or tell
someone you are going. it could take a while to find your body.

Water Level: Dry - Dry
Cond: excellent
History: hats got bored. hats had fun.
To-Do: map it. good luck with that.
Notes: there are multiple entry points but the ones listed are
the most efficient and direct methods, i'd prefer people kept the
other

back up points to themselves once they found them so we have some
and i access options to rely on. i found approx 5 access points
wager there are a dozen more on site.

Name: Armamail
Alternate: Electrolux
Description: Electrolux Manufacturing facility in Orange which closed
and rolled out the last fridge in April 2016 and ending 70
years of whitegoods production in Australia.
Features: Huge sprawling facility consisting of various workshops,
offices,

some outbuildings and warehouses. Lots of forklifts, buggies,
 bits and machining equipment, fans, unsold whitegoods and other
 pieces. Most of the assembly equipment has been sold off.
 Some demolition of storage tanks (??) occurring at the back as
 part of the site remediation works for repurposing the site (see
 orange council website).
 Access: Enter from the rail line at MacNeilly Avenue. Walk along
 back of the fence till you see the storm drain. Bottom of fence is
 loose and just big enough to squeeze through although very
 tight![-33.298818, 149.103001]
 Locality: Orange
 Region: NSW
 Country: Australia
 Care: Caretaker?? Somebody spotted driving off in a white ute -
 possibly commodore or falcon. Possibly hangs out in the
 small maintenance corrugated asbestos/steel shed as we saw a TV
 that was still on and fridge with potentially fresh contents.
 Eek!: A few security cameras are scattered around the site, but
 don't seem to be active, but you never know.
 Water Level: dry
 Cond: Clean and untouched. But much of the equipment has been
 auctioned off and contents in the buildings are getting emptied out.
 History: Starting as a Munitions factory in 1942, the site was
 bought by Emmco and Elcon in 1946 which soon became Email Australia.
 division in Electrolux then took over Email when Smorgan offloaded the
 Orange appliance business after taking over Email's steel
 factory.

Name: Ashfield Telephone Exchange
Alternate: The Power plant
Description: This building used to be one of Sydney's first Telephone
exchanges. It even still has a large diesel generator with
Battery backup to maintain the phone system in the event
of a grid-wide blackout.

This building has a section in the basement level that is
steel plated that may have access to a cable tunnel.

The building has a rooftop access and is 3 levels high
with a large basement section.

There are offices that have yet to be fully explored.

Features: This building has Large rooms to small tight cavities and
Sections of 'under floor' space.

Has rooftop access via steel ladder on the second(Top)
floor

2 large 1.5 tonne pulley cranes.

All sorts of smaller rooms.

The offices section which has only partially been explored
is on the eastwestern side of the building and can be entered by
a single door just right of the side laneway access doors.

Large generator plant in the basement area. This section
even includes large power control sections and has an active
(very noisy) power feed in operation in this area.

Access: The main entrance to the building is here. 8ft High beige
doors.

GPS: -33.888342,151.125158

Reed switches on the inside top(inoperable?)
High exposure at all hours, easiest accessable LATE NIGHT.

The primary access door is here:

GPS: -33.8881576,151.1251912

There are 2 doors.
Choose the inner most door.
The outer door requires some brains but can be opened with
little chance of setting of an alarm.

locked The laneway is short but provides cover. The laneway has a
Ideal for access gate, just climb over and is still VERY Public.
night access.

its Least public access point is under the roller door here.
almost a 1ft gap. Not very public but still open to being
spotted.

GPS: -33.8880363,151.1248934

working. All these entry points allow for full buidling access.
Little or no chance of alarms. Some exit lights still

Locality: Ashfield
Region: NSW
Country: Australia
Care: Keep noise and torches at an absolute minimal. Locals are
just outside. Keep very low profile on the lower floors as can
be seen from windows. Lots of noisy broken glass and the building
has some form of LIVE TRANSFORMER SECTION in the basement.
Big doors to fall out of.

Eek!: Access this location as discreet as possible.
leading In the Administration section there is the a stairwell
down and a very old possible PIR chest height on the wall.
Needs confirmation. Police have been known to patrol this
location!

Water Level: Dry - Dry
Cond: Good - Graffed partially
History: Historic Ashfield Telephone Exchange.
To-Do: Return to explore the Adminstration section fully. Create permanent access point.

Notes: Explore rooftop.
inoperable. 2 Security systems installed, however both appear
admin YAY!!!, no cameras or PIR's - except maybe one in the
section. GO SICK!!!!

holding The main door has been pushed in significantly though
longer firm. This door has reeds above it though the appear no
can be functional. Side doors also have reeds, though the same
said.

Name: Aspirin Views
Alternate: Bayer Building
Description: Vanilla office block. Presently listed only for rooftop.
360 views but now being partly obstructed by new advertising
going up.

Features: Usual rooftop views. Uneventful stairwell. Easy access to
some floors, likely to be boring alarmed offices or vacant.

Access: 275 Alfred St N Sydney. (Sydney 275K5 or 45K5) Approach
from the rear via Little Alfred St. Rightmost fire escape door
around the back below the garage entrance tends to be left open. Take
the right fork inside and proceed up 17 storeys via the
stairwell. Proceed through machine room door at the top and out onto
roof area.
[GPS:-33.83983283537602,151.21141612529755] [UBD:7K9]

Locality: North Sydney
Region: NSW
Country: Australia
Care: There are active cameras on the back garage area, smile if you dare. This is partly avoidable by picking a path through the bins and rubbish. PIR inside the emergency exit down the left fork, normally triggers but not completely if you stay well away from it. At least two floors run late night operations, you may hear voices while in the stairwell. There is also what appears to be a (dome type) weather camera next to final ladder outside leading out of to the very top of the roof. Note its direction and stay out of its field of view. The roof is covered with numerous cellular and other transmitters - dont get yourself fried.
Water Level: Dry
Cond: good
To-Do: climb up on top of the advertising structure being created at the top.

Name: Aus Fertilisers
Alternate: B & B
Description: Abandoned research lab and industrial offices formerly occupied by Brick and Blocks, Cementech and Incitec Pivot. The name "Australian Fertilisers Ltd" was also once printed on the building before the letters got taken off.
Features: Numerous rooms containing laboratory equipment, fumigation chambers and other strange items. Offices containing old furniture. Some rooms trashed, but the labs are still in good condition. Conference room on top floor which looks like someone had held a party previously.
Access: Building is here: -34.478728, 150.907803. Pretty much a walk-in.
Locality: Port Kembla
Region: NSW
Not sure how long it will stay this way.

Country: Australia
Care: The big shed next door to the office is an active concrete works
even though outside looks disused. Keep an eye out for any activity in the area before going into the offices.
Eek!: When the top floor door outside the conference room moves from
the wind, the creaking sounds like someone walking upstairs.
Pretty freaky. Anyway I've closed the door properly so it shouldn't make that sound any more :)
Water Level: Dry
Cond: Building has been vandalised in some places. But the labs are
still in good condition for now.

Modified: 2016-10-31 22:57:56

Name: Avon Mine Machinery Workshops
Alternate: The View
Description: Two large 2 story buildings, one as an office/admin/teaching
block, and the other as the workshop.
The large machinery shed is open, 2 story, multiple room type
structure, with various pieces of old metal, tools and machine

pieces laying about.
The office block still looks new from a distance, but
inside it has been trashed by both vandals, and the elements. There
is rooftop access for those game/stupid enough.
Total length of the two buildings put together would near
75m in length.
Nearby on the same plateau is a tipped over silo. It is
quite large, and resting on it's side, is approx 3.5-4m tall.
There are also some pit mechanic bays.
Features: Awesome views of the Illawarra and the coast. These are
some of the best views you will ever see on any urbex trip. Almost
180 degree view of the farmland and coast.
Many native, and feral animals in the area. On the day of
discovery, Wallabies, snakes, and a fox were sighted.
Access: Head to the very end of Bong Bong road (followed from
Dapto). On some maps, this road heading into the hills may be
reported as Shone Ave. Once you reached the gate at the top, keep
heading up. The way is steep, and there are many side roads. Your
destination is up above all the distractions.
Locality: Horsley
Region: NSW
Country: Australia
Care: This location will not be reached by the exceptionally
unfit. The hill up to the buildings, whilst quite short (300-400m) is
quite steep.
Park your car out of sight. Country folk get suspicious.
Extra Care: This terrain and area is very prone to snakes,
They occur frequently, and often. Leave them alone, and avoid
them.
Wear long pants, i.e. thick denim jeans, and thick socks.
Eek!: Fresh air, the best views from any urbex location, nature.
Water Level: Dry - Dry
Cond: Vandalised
History: This served the Avon mine whilst it was initially
operational.
To-Do: Find out what is under the massive concrete slab between
the machinery shed and the silo on the western side of the
plateau.
Found: Find out if there was any linkage from here to the mine.
2008 Anakaine

Rating: 4.0/5.0
Created: 1995-12-31 13:00:00
Modified: 2008-04-18 14:00:00

Name: Bad Boyz Tech
Alternate: Macquarie Boys High School
Description: Large abandoned high school.

The school is in surprisingly good condition so it might be frequented by security. Windows have been boarded up in places where they once smashed but this has seemed to stopped for now.

Access has been gained to the front office, main hall, and some storage rooms outside. The other blocks appear to be locked, but need to be explored further.

Features: Big hall, two big basketball courts in the quad. looks to be 5 of 6 double story blocks, science labs, storage rooms with obtanium if you are that way inclined. There is still lots of furniture, book and files lying around. It looks almost untouched by vandals besides a couple broken windows.

Access: Enter via the small gate here: [GPS:-33.805923,151.024579]
Probably best to park on the other side of James ruse drive on Collette Parade.

Both the hall and main office can be accessed through broken windows. Some other rooms have open doors. Look for a yellow LED inside both as a sign the alarm system is disarmed. If you only see red LED be prepared that you'll set off the PIR.

Locality: Parramatta

Region: NSW

Country: Australia

Care: Power is still on and the alarm system is still working, however

it is disarmed. The Alarm panel in the main admin building says that Block 2 is armed so be careful to check the map in the in the office and avoid that block.

Eek!: Alarms are working but disarmed, this may changed if it is
locked up again. Block 2 looks to be armed, so check the alarm
system in the office before exploring. The main office also faces
houses across the road.
Water Level: Dry - Dry
Cond: Good
History: Was Macquarie Boys High School until it was closed in 2009
due to the dwindling numbers caused by the extremely bad
reputation the school developed. There was supposed to be a private
college operating here but there is no signs of that ever
happening. In 2012 UWS put a proposal to the state government to
purchase and redevelop the site.
To-Do: Explore more of the blocks.
Slide on my knees across the wooden hall floor.
Notes: Large hall with power and seating, perfect for a CC school
assembly.

Modified: 2014-11-26 13:00:00

Name: Barnes Special Hospital
Description: Amazing old Gothic style Hospital. Looks more like a huge
haunted house. Newer hospital sits next to it.
Features: Sadly its gutted and badly trashed. Numerous wings
containing dozens of rooms over 3 floors, ornate fittings, peeling
paint, mouldy carpets etc. The highlight is the clocktower. Those
brave enough can climb the mix of 100 year old wooden ladders
and internal framework up past the clockfaces will reach the
pinnacle of the tower via a very small hatchway. The view is great
and you stand inside an ornate cage set upon the dome roof.
Access: Essentially, just walk in thru the front gate from
Kingsway between the motorway loop road and the raillines on the
western side. Its pretty obvious. Once in, locate any groundfloor
window or door that isnt boarded.
Locality: Gatley [AA:169H03]
Region: North West England
Country: United Kingdom
Care: Climbing the clocktower is dodgy! Large sections of the
newer hospital have been arsoned.
Found: 2004 Darkplaces

Name: Barrack House
Alternate: BarackObamasRooferama
Description: Rooftop with cool views of Martin Place
Features: Bit of a jungle, multiple levels to play, connects to
building next door. Heritage building, just all round good times,
good times.
Access: GPS:-33.867478,151.206172
lift from lift foyer from tiled section of Barrack street, take
to top floor, this is a service level, the door along the

corridor in a straight line from lift facing you is the
roof door, this is unlocked and open and is used also, from
what i can tell, as a smokers spot.

there is a another exit door across other side of roof but
if this closes behind you its stairs to ground floor and then
out through secured grounds under cctv..doable but not the
best option.
Locality: CBD
Region: NSW
Country: Australia
Care: active building hoity toity types, at least make an
effort to look modestly normal where possible or you will stick out.
Eek!: security response likely to stupidity and poor stealth.
Water Level: Dry - Dry
Cond: excellent
History: tried google, couldn't find shit but its an old cool
building.
Found: Hatsumi
Rating: 3.0/5.0
Created: 2010-05-19 14:00:00

Name: Barragoola
Description: Old manly Ferry. Similar to Karrabee.
Features: The Generator room and Southern wheelhouse. Generator
room still has genertors and eltrical switch boards. Southern
wheelhouse has telemotor controls.
Access: Balls head Dr. Old coal loader use southern stairs.
Baragoola behind the cape Don. Climb across the mooring lines or the
boat may be sitting up against the warf. Acess to Generator
room is to the south down the stairs and thru the watertight door.
Handle to door is at the top of the stairs. Talk to Cape Don cave
clan members. May be able to arange a ladder to make life
easier
Locality: Waverton
Region: NSW
Country: Australia

Care: Genertor room has know floorboards. People live on Cape
Don so no torches. The owner also lives in view from the South. Care
taker comes on friday days.
Water Level: Dry - Dry
To-Do: Get in the Engine room.

Name: Bathurst Dairy Farmers
Alternate: Milky Discharge
Description: Abandoned Dairy Farmers factory in Bathurst. Several
buildings,

four stories in places. Partially fire damaged.
Features: Remnants of machinery. A round window. Some kind of
torture chamber full of cages. A fire damaged lonely chair.
Access: Building is on corner of Bentinck and Howick Sts. Access
via quiet side st (Princes st) under largish gap in temporary
fencing. [GPS:-33.419948,149.582886]

All buildings explored were a walk in.
Locality: Bathurst
Region: NSW
Country: Australia
Care: Some of the buildings are fire damaged. Try not to fall
through the floor.

Squatters have been
known to inhabit this building. No evidence of squatters
was found on this visit.
Water Level: Dry - Dry
Cond: Fire Damaged - partially fucked
History: Was originally the site of Bathurst's first Convict
Hospital, which burnt down three months after construction in 1878.

The Dairy Farmers building was built in
1901 and was originally run by Bathurst Dairy Company as a
butter factory. The building was used for a short time as a wool
scour, before being purchased by Dairy Farmers Co
To-Do: Explore the other smaller buildings.

Name: Battersea Power Station
Description: The remains of the most famous power station in the world,
a well

the known London landmark, made famous thru its featuring on
 cover of the Pink Floyd Lp 'Animals'.
 Features: Only the structure itself remains. The main Hall is
 roofless and stripped, with trees and shrubs growing between the marble
 pillars. the admin and switching sections are more
 complete but harder to access. The 4 Chimney towers are climbable via
 scaffolding and the rooftops of the turbine halls
 accessable, as is the scaffolding surrounding the lower section of the
 south-west chimney. The view is very impressive.
 Access: From Battersea Park Rd go down steps(to Stewarts Rd)
 opposite the power station and climb down onto the railline(be careful
 for live rails!), follow along to the low fence. Climb in,
 head towards station. Guard was patrolling once an hour roughly
 between 10 mins to and 10 mins past the hour. Climb over
 fence surrounding the front of the station and head in via the
 doorway beneath the south east chimney. [Collins:130B7]
 Locality: Battersea
 Region: LND
 Country: United Kingdom
 Care: Be wary of security, be careful on scaffolding. Various
 structurally unsound sections.
 Cond: Unfortunatley in a state of near ruin, but definatley
 worth seeing.
 History: Built 1937, used for Pink Floyd cover in 1977. Shut down
 in 1980. In limbo till 1999 when it was decided they'd adaptively
 reuse it. Now slowly in the process of being refurbished.
 To-Do: Go back!
 Found: 2004 Siologen/Oriface

Name: Big Yellow Rod Thing
Alternate: French Fry, Cheese Stick, Jeff's Knob
Description: Massively tall, hollow steel yellow rod, rising diagonally
around
 8-9 stories high. Essentially a useless architectural
flourish
 for the Tullamarine Freeway.
Features: Internal balconey and staircase system, mounted on a
suitably odd
 angle.

Access: Via door at bottom of yellow rod that leans over the Tulla
Fwy near Flemington Rd. Use allen key to undo bolts holding
hatch in place. Leave as found.[Mel:2aE-1] [GPS:-
37.783249,144.940163] At
the end (NW) of Manningham St.
Locality: Parkville
Region: VIC
Country: Australia
Care: Being seen. Its not advisable to try and scale its
exterior.
Notes: Siologen calls it the "French Fry".

Douggo says:

AKA the Cheese stick.

if you do get there, stand at the bottom on the stairs and
look straight up. With most people a cool optical illusion
occurs where the whole cheese-stick appears to stand up before
your very eyes.

That effect alone makes it a 7 :)

Climbing the outside (cars beep at you so not good) makes
it an 8 :)

Locals called it Jeff's Nob after Premier Jeff Kennett who
okayed the job.

Name: Bonds Factory
Description: From the intel:
Looks like the Bonds Factory in Wentworthville is scheduled to close shortly, as part of Pacific Brands' relocation overseas.
<http://parramatta-advertiser.whereilive.com.au/news/story/workers-sacked-at-wentworthville-factory/>

The below link notes the closure date as being in March, but I can't find anything online to verify. Anyone got more info?
<http://parramattas.blogspot.com/2010/02/wentworthville-bonds-factory-to-close.html>

Site is waiting for DA approval.
Features: Large empty factory spaces and offices. Research lab.
Maintenance: tunnel. A few sewing and spinning machines. Large extractor turbine. Old concrete storage sheds.
Access: Entry via the nursing home grounds, which you can walk in via the Dunmore St entry. Walk towards the partially collapsed fence so no one inside the nursing home gets suspicious. Climb over fence into the grounds of factory.
[GPS:-33.805865,150.958098]
Exit by going out one of the fire doors at front of factory (onto Dunmore St). Or go back to the fence.
[GPS:-33.805018,150.959240]
Locality: Wentworthville
Region: NSW
Country: Australia
Care: Family house in nursing home overlooking the fence of the

factory. Stay away from the nursing home buildings as there could be cameras.

Eek!: Update Bastion 2015: Part of the top warehouse, and part of the driveways are used to store trucks and building equipment, so possibly best done during weekends.

Water Level: Dry - Dry

Cond: Very Good

History: In 1923, American George Bond established Australia's first cotton spinning and weaving operation at Pendle Hill and started making lisle stockings from Australian cotton.

development of "From its inception, the factory influenced the including neighbouring suburbs of Wentworthville and Pendle Hill, the construction of the Pendle Hill railway station and the expansion of retail and residential development to support the large Bonds workforce," the report says.

the Bonds went on to become the best known underwear brand in Australian history with the Chesty Bonds mascot selling iconic Aussie cotton singlet.

Hill Pacific Brands acquired Bonds in 1987 and sold the Pendle site in 2012.

<http://www.dailytelegraph.com.au/newslocal/parramatta/birthplace-of-bonds-to-be-redeveloped-to-keep-brands-australian-history-intact-at-pendle-hill/story-fngr8huy-1227268078227>

Name: Boot Camp
Alternate: Taree District Forestry Commission HQ
Description: A number of warehouses, outbuildings and cabins previously
used as base camp for most forestry work done in the Tapin Tops
area.
Features: Bizarrely sits at odds with the wilderness surrounding it,
these buildings would provide an excellent place to camp or
simply explore on your way through to the Cells Mines. Exposed in
that it is near the road, secluded in that the several hours I
spent up in the mountains I only saw 3 other people.
Access: Take Murray Rd here: [GPS:-31.868483,152.365544]. This
becomes Bulga Rd continue until you see a LH turn onto Wherrol
Flat Rd here: [GPS:-31.843623,152.310269]. This is where it can
get tricky so look for signs. Take a left turn onto Big Run Rd
here: [GPS:-31.770864,152.22991]. This morphs into Dingo Tops
Forest Rd. Keep going, you will see Boot Camp on the RH side
about here: [GPS:-31.702019,152.163069]. Go good explorer. Camping
area with facilities is just further along the road here:
[GPS:-31.665911,152.142824].

Locality: Dingo Forest
Region: NSW
Country: Australia
Care: Funnel web holes. Be aware that once a decade an NPWS officer might drive past so watch out for him.
Eek!: See care + watch out for Yowie
Water Level: Dry - Dry
Cond: very good
History: Former Forestry HQ. Tapin Tops was previously known as Dingo Tops.
To-Do: Find out when it was abandoned and if it ever gets used for example, during bushfires
Notes: This is easily achievable in a regular car - no 4WD required
Found: Intrepid 2013
Rating: 2.0/5.0
Created: 2013-04-20 14:00:00

Name: Border's Edge Reservoir
Alternate: Scarecrow's Reservoir
Description: 20m x 50m disused reservoir cut into the rock and some accompanying buildings.
Features: Very dodgy ladder into reservoir, water tank, and some other buildings.
Access: Near Burragorang Lookout, on Burragorang Rd, Nattai. Look for a small building followed by a clearing on your left when driving out to the lookout. [GPS:-34.068951,150.440748].
any Best to park at the lookout and walk back without drawing attention to yourself. Check to make sure the gates won't be locked if going late in the afternoon.
Locality: Nattai
Region: NSW
Country: Australia
Care: This is just over the border of the water catchment area. Very, very large fines.
Eek!: Ladder into the reservoir is very dodgy; some of the wooden rungs are duct-taped on.
large Part of the reservoir has been burnt out resulting in very large

the and very heavy wooden beams hanging down, and also some of
tin roofing missing. Do not walk across the top of the
roof.
Water Level: Dry - Dry
Cond: Disused, burnt out
History: Find out.
Notes: First found by Scarecrow in 2008 when working in the area
(fenced off compound near there is a weather station/weather
monitoring station).

Found: A recent return visit prompted it to be listed.

Name: Boyd tower
Description: 19m (62ft) tall stone masonry tower. Originally built at a
lighthouse, it was repurposed to be a whaling lookout for
many years. 5 storys tall with ladders, though the bottom level
has had its ladders removed
Access: End of Boyds Tower Rd off Edrom Rd (-37.102811,
149.953088) Park,
and follow the track. To climb it, a 4m ladder is
required, along with either a screw driver or 'tools'.
Locality: Edrom
Region: NSW
Country: Australia
Water Level: Dry
To-Do: Have a look at the nearby Davidson whaling centre at
-37.1114619,149.9136807 (end of Boyd Rd)
Notes: Boyds Tower, originally designed as a lighthouse by
Benjamin Boyd, was built in 1847.
Boyd was
a well known entrepreneur of the time who also built
nearby Boydtown - he also had interests in both he whaling and
shipping industries as well as owning vast grazing properties on
the Monaro and in the Riverina.

tower
whales
the

protection,
particularly to

Following the failure of Boyd's financial empire, Boyd's was taken over by the Davidson family who used it to spot for their whaling operations at Kiah Inlet. During season, tower was manned daily and when a whale was observed, boat were alerted with a gunshot. Twenty metres tall, the tower surrounded by the sea on three sides. This constant the elements results in erosion of the tower. For maintenance work is required every ten years - safeguard the mortar.

Boyd's
enjoy

It was not until 1973 that the area was declared a National Park with Tower being added to that Park in 1976. Visitors can now magnificent views in this historic area.

Name: Brambles

Alternate: Brambles Maintenance Centre
 Description: Formerly the Newcastle maintenance workshops for the
 rental company Brambles. Site has been closed for a few years and
 is mainly used as a hangout for local kids and as a storage
 for large rolls of steel cables from the workshop which now
 takes up part of the site. The site has a two story office building
 as well as the maintenance shed with a small two level
 office inside.
 Features: Big rolls of steel cable, odd pieces left over from
 maintenance on large equipment, maintenance manuals, a small number of
 old lathes and machineing equipment
 Access: Big holes in fence, walk right on in.

 Access off Elizabeth St

 [GPS:-32.907123,151.766483]
 Locality: Carrington
 Region: NSW
 Country: Australia
 Care: One side is easily seen from current occupied building,
 but it is wide open, other side that is hidden there are lots of
 wall sheets that are loose to allow easy access. Office building
 is in direct sight too. Best done late afternoon or weekends so
 you can access every thing. Watch out for rusty nails and local
 drunks.
 Eek!: Busted up bottles everywhere
 Water Level: Dry - Dry
 Cond: Trashed
 History: Was once the maintenance centre for Brambles now
 abandoned/used for storage
 To-Do: Done all, not that much to see

Name: Browns Creek
Description: Some sort of treatment works perhaps. Pipes leading to and from river. Two adjacent structures, each two stories high.
Features: Lots of pipes, some submarine. Some running from upstream and some from land. Trashy local kids graff. Very nice abandoned rail line nearby. Jetty with fishing and photographic potential.
Access: Park at the corner of Pitt and Nelson Streets, somewhere near here 31.906575,152.476198. Walk towards the river. If you miss it, you are not explorer material.
Locality: Taree
Region: NSW
Country: Australia
Care: Some of the local youth are way less than friendly. Don't fall in the river when climbing on the jetty.
Water Level: Boat - Dry
History: Unknown, but I believe the structure has something to do with the sewage treatment works upstream.
To-Do: Take a rope to reach damaged stairs to climb to the second floor. Find out exactly what its former function was. Trace the route of the pipes.
Notes: Do this in conjunction with the rail line and two other nearby locations (listings soon). Garbage listing is for when viewed as a standalone site, which it probably wouldn't be.

Name: Canada Malting Co. Plant
Alternate: The Malt Plant
Description: Most famous abandonment in Toronto, a former 'town
regular', now
visited far less often since it was sealed. Awesome design
and a
very interesting place to visit.
Features: Striking and original architecture, maze like quantity of

rooftops, staircase, levels, balconies, rooms, conveyor floors,
of left nooks and crannies. Amazing rooftop views, an assortment
from its over machinery, rotten lower levels, the leftover hoarde
and long time resident 'Stan'. Its a fun building to access
indeed explore.
Access: Head west from the most southern end of Bathurst St, near
the Airport Ferry, head over to the 12ft high gate in the rear
yard and either climb it or squeeze thru. Head into main
courtyard. If its not already in place, borrow a Lake Liferescue ladder
and a skid/pallet from the outer yard and use both to climb up
to the balcony on the southwestern end of the inner courtyard.
Otherwise, go around to the eastern side, southern end of
the plant and negotiate the myriad of fences and anti climb
devices. Its a fun challenge to try and bypass all the obstacles
the city have put in place. [Mapart: 193S70]

Name: Cape Don
Alternate: The
Description: Unseaworthy ship that has been seized by Waterways for
forced sale. Now being restored by the MV Cape Don Society. Tours
can be organised by contacting them.
Features: Huge engine and tool rooms, three levels of sleeping
quarters toilets, recreation rooms, kitchens and mess halls. Also
communications room, bridge, cargo hold etc.
Access: From the W half of Balls Head Drive [Sw:277D06/045D06,
UBD:215P14/006M12, GPS:-33.8433196228,151.194502021],
enter via the driveway to the Waverton coal loader (the roof of
Halloween Halls). Walk to Nth end and down staircase, thru open
gate, walk south along clifftop till you reach the staircase made
from scaffolding. Gangplank leads up to the bridge.

Alternatively, you could walk south through the one open coal loader tunnel, turn right when you reach the other side, then climb down the stairs to the steel walkway & follow that north till you come to the gangplank leading up to the bridge. You will need to gain prior permission to board. Do NOT try to infiltrate it as there are people aboard 24/7 & you will get caught. Last people who were caught infiltrating it had maritime police called & they were charged.

Locality: Waverton
Region: NSW
Country: Australia
Care: Is now active, & being restored. There are people on board 24/7.
Cond: Getting better.
History: Chequered. Was used as Lighthouse supply ship, then ran into trouble when some looney bought her.
To-Do: Join the society.
Found: 2000 Pandaman.
Rating: 5.0/5.0
Update: 2013-07-14 14:00:00 (Blakjak) - This is NOT gone & should never have been moved to gone.doc.
Location is now listed as active with restrictions.

Update: 2012-05-26 14:00:00 (Hatsumi) - On the 28th May 1962 ship no 68 was christened MV CAPE DON and launched.
this weekend a safe in the captains quarters was cracked in the hope of uncovering long lost treasures and gold bars but only some chinese medicines were found.
not sure why this is in gone, if you ask nicely they don't mind visitors, and if you pay the \$30 annual member fee you can come down and help with restoration including paying a nominal fee to stay the night on friday night and have a cooked breakfast before helping out with some restorations...beautiful ship, for those who haven't been i'd recommend a trip, Blakjak has some contact, as do i but not so much the free time to take people down.

Name: Clockwork Orange
Alternate: Orange Base Hospital
Description: This is the old Orange Base Hospital site which covers 3
blocks.
The main Hospital building is 5 stories tall + utility
tunnels.
Features: Many hospital buildings, old hospital equipment, a decent
network of utility and service tunnels and rooms, endless
rooftops, with some leading into the other buildings.

Besides a few broken windows and some graff, its
almost like all that's missing from the site are the hospital beds?
Access: Main Hospital block is here: -33.276449,149.098978

It is surrounded by busy streets, but best

access is hole in fence on Sale St here:
-33.27631,149.0979105
then duck and follow the retaining wall along Dalton St to
the
loading area. Unlocked door here: -33.2761664,149.0988117

The other abandoned hospital blocks are
here: -33.2762831,149.09724 and here:
-33.276727,149.1007966

*Update: That door is now boarded up,
however, still head towards it. Then turn around and head
through
the hole in the wall behind you (or the gate around the
corner).
Caution This room is missing it's hatch over one of the
utility
tunnel entrances, so watch your step in there.. There are
two
main sets of tunnels on the site we have found. The other
set is
located in a small gardeny courtyard..

Locality: Orange
Region: NSW
Country: Australia
Care: Very visible from neighbours and cars, especially getting
through
the fence. Its in a very busy location. Quieter of a
Sunday have
noticed. Lots of broken glass and jagged bits inside to
stab you
too.
Eek!: Top stories are very visible from the town itself, be
cautious
around the windows of upper floors or the tower.
Water Level: Dry -Shin
Cond: Good.

^Update: Poor.
History: To supplement and replace the original Orange District
Hospital
(demolished in 1959), Orange Base Hospital opened on 9
November
1933 and was the first "base" hospital - a hospital
designed to
support a large regional area as well as the immediate
township -
in New South Wales. By 2003 the Orange Base Hospital site,
located a few blocks from the CBD had become congested and
outdated. Analysis by the government found redevelopment
of the

including site would be difficult due to a number of constraints,
during difficulty in maintaining hospital capacity and capability
the any works and likely community opposition, especially if
psychiatric facilities at Bloomfield were relocated to the
redeveloped site. By contrast, the Bloomfield property was
preferred as it was far less constrained and already in
use as a health facility, on land already owned by the Department
of Health, adjacent to vacant Crown land which provided room
for expansion. The site would allow integration with the
psychiatric facilities already in operation while allowing the
existing Base Hospital to continue to operate during construction.

A two day operation from 15-16 March 2011 saw
all patients transferred to the new Orange Health service

To-Do: https://en.wikipedia.org/wiki/Orange_Health_Service
Access all the buildings on the site!
Notes: This place is to be demolished soon, they have been
fighting to demolish it since 2011 and it has now just been approved.

 Locality: Coalcliff
 Region: NSW
 Country: Australia
 Care: The active train line passes through the site. Be aware of
 also go peak-times for passenger intercity trains. Freight trains
 way to through here. Don't be seen. There is a clear view all the
 and a Coalcliff train station one way, approx 450m to the east,
 see if decent view to the tunnel entrance to the west so you can
 sight. a train is coming and have plenty of time to get out of
 Eek!: Various holes, rusted/unstable walkways, protruding wires
 and steel and some of the buildings are falling apart. Looks
 to be fire damage in some areas. Some sections look like they've
 been stripped of copper.
 Water Level: Dry - Slimey
 Cond: Disused, not trashed
 History: The Illawarra Coke Company (ICC) is located in Coalcliff
 and Corrimal, in the Illawarra region of New South Wales,
 Australia where historically coal was mined on the slopes of the
 Illawarra escarpment. After the mines were closed, coke making still
 occurs on these sites. The company is the only independent
 producer of metallurgical and foundry coke in Australia and has been
 for privately owned since 1996. It produces premium grade coke
 overseas metallurgical processing and foundry to Australian and
 base metals producers for lead and zinc smelting and iron

are production for steelmaking. The company's two cokeworks
adjacent to all major transport links.
http://en.wikipedia.org/wiki/Illawarra_Coke_Company

Coalcliff After 99 years of history and hard graft, work at the
Cokeworks has come to a halt. More:
<http://www.illawarramercury.com.au/story/1619814/end-of-era-as-coalcliff-cokeworks-closes/>

Coke Yesterday's (October 20, 2013) announcement by Illawarra
Company that the Coalcliff Cokeworks will close in the
first half of 2013 brings to an end 99 years of coke-making there.

1878 when While the working life of the Coalcliff site started in
a colliery opened on January 11, the cokeworks was not
commissioned until 1914.

in Opening with 50 ovens, the first coke was produced on site
December 1914.

by Before the mid-1950s the cokeworks and colliery were owned
separate interests but in 1954 Kembla Coal and Coke (KCC)
bought them both.

the A few years later KCC added an extra eight ovens to bring
total to 58 - all of which were still in use this year.

- In 1984, the Illawarra Coke Company - a subsidiary of KCC
bought the Corrimal Cokeworks, bringing it together with
Coalcliff for the first time.

and Twelve years later, in March 1996, ICC Holdings purchased
Illawarra Coke Company, and took charge of both Coalcliff
Corrimal. More:

Name: Coke Zero
Alternate: Coke No More, Lanayru Mining Facility, Corrimal Cokeworks, Minstrel Show.
Description: The disused Illawarra Coke Company cokeworks in Corrimal.
Features: Coke ovens, conveyors, admin buildings, truck wash, boiling water pits, chimneys, coal silo, coal loading vehicle on wide tracks
(Air Blast Receiver) and shit-tonnes of coal dust.
Access: Railway St (off Memorial Drive), Corrimal NSW, behind Corrimal train station. Park in a residential street at least a block or two away and use discretion when entering and exiting. [GPS:-34.375085,150.904434]
directly There's enough of a gap to slide under the double gate opposite High St.
seems Alternatively you could try along the rail corridor; there to be a gap or two in the fence.

Locality: Corrimal
Region: NSW
Country: Australia
Care: Right next to a train station and in the midst of a residential area. Be discreet and quick when entering and exiting, and don't linger around after exiting covered in coal dust and holding your tripod.
highly All upper areas (chimneys, high external walkways etc) are visible from around the area.
chimneys Good during the day, but best done at night if climbing is your thing. Also note, the lower ladders to some of the chimneys have been removed.

Eek!: Some of the conveyor walkways are quite rusty. Please use caution if using them. One particular walkway goes over the open top of a coal silo. Falling into here may result in drowning in coal dust.

Water Level: Dry - Dry

Cond: As left. Few broken windows, some machinery removed.

History: The Corrimal Cokeworks officially opened on September 5, 1912.

first In 1984, the Illawarra Coke Company bought the Corrimal Cokeworks, bringing it together with Coalcliff for the time.

and Twelve years later, in March 1996, ICC Holdings purchased Illawarra Coke Company, and took charge of both Coalcliff and Corrimal.

for some, The location of the Corrimal plant has been a sore spot with residents complaining of pollution.

the Oct. 17, 2013 [article]: After more than 100 years of coke production, the Corrimal Cokeworks is closing its doors.

the The Illawarra Coke Company (ICC) told employees today that cokeworks, the oldest continuous coke-making operation in the world, would cease production next year.

Coalcliff The closure comes just months after ICC closed its Cokeworks in June.

of The company blamed the latest closure, planned for the end March or early April next year, on prolonged weakness in the global coke market, which shows no signs of improvement.

More: <http://www.illawarramercury.com.au/story/1847021/corrimal-cokeworks-to-shut-its-doors/>

closed, April 14, 2014 [article]: THE Corrimal coke works has ending the long tradition of the mineral's production in the Wollongong area.

Name: Consumption
 Alternate: Queen Victoria Memorial Hospital

Description: Sprawling single storey hospital consisting of many buildings patchworked together by hallways as needed. Buildings range from semi modern to turn of the century homestead in design. Old sanatorium for the treatment of consumption/tuberculosis. Reported to be seriously haunted.

Features: The old homestead and its wrap around queenslander verandah. The Morgue, located at the back of the chapel. Has a 2 body cooler. The views from the rooms when the sun is streaming in during autumn and the trees are losing their leaves in all different colours. That there is still very little vandalism that has taken place at the time of writing (April 2008) Close to 100 rooms over the whole complex. Several different buildings.

Access: Tableland Road, Wentworth Falls, NSW. Blue mountains region. Immediately after you pass the Welcome to Wentworth Falls sign on the Great Western Highway heading up in to the mountains from Sydney you will come upon Tableland road heading west (left). Follow this road until you reach the main hospital area. You will see a sign, directing traffic to Main entrance, or Ambulance Entrance. Take the ambulance entrance (right). Park near the gates up the right hand side road. Go through fence, and head in through the kitchen. Alternate exit is via the old homestead onto the grounds. [GPS:-33.760851,150.376321]

Update 12/2008 : All holes in fence were patched up with (barbed)wire and chainlink fencing. Easiest way in was to jump the gate mentioned in the access description - to the immediate right of the gate there was no barbed wire on top of fence.

2013 (Bastion) - As Siologen, Rabbit and I were wondering the

premises, we ran into the caretaker. He very nicely told us to leave.

He also told us that the land had been sold, and that the new owners had crank up security, placing new cameras (didn't see any, but hey, he found us), saying that they are now charging people with trespassing on a regular basis and that the police had the keys and were coming quite regularly. He also informed us that the place was soon to be half demolished, half preserved (the old building) and transformed into a Buddhist temple/retreat. From what he knows it will happen rather quickly.

If you want to organized a visit you can contact him. Send me a PM and I will give you his mobile number. He seemed quite open to have people over for pictures.

Locality: Wentworth Falls
Region: NSW
Country: Australia
Care: The neighbouring building down the left hand track is occupied and sees frequent car activity despite being in the middle of nowhere. I feel from the people in cars watching our exit that our presence had been duly noted, although didn't seem an issue as we were both carrying a camera.

Update 12/2008: various signs about the place stating 'beware guard dog' a kennel was sighted, but there did not appear to be any dog.

EEK!: Some outer buildings in severe disrepair. Not recommended to enter these.

Some fire doors are one way, unless you feel like breaking out, make sure any door you close can be opened from both sides.

Water Level: Dry - Dry
Cond: little vandalism, general disrepair

History: It was reported that there were 4,000 deaths each year from tuberculosis in Australasia and as a consequence of the report the Sanatorium was constructed at Wentworth Falls in 1903. Goodlet contributed funds to this institution. It was noted that the establishment of sanatoria for well to do people was usually done by private enterprise. Wentworth Falls was to aid the poor. When it was constructed it was called The First Sanatorium for the Scientific Treatment of Tuberculosis, perhaps reflecting the development of medicine and specialist scientific treatment of tuberculosis

To-Do: There are many still locked areas... unlock them.

Notes: Local Rumors/stuff: This place is apparently as haunted as they come. The rumors centre around the returned servicemen who had contracted tuberculosis who died here. Also that this was the refuge for the poor with TB. Sightings Similarly, there is at least half a book dedicated to these of the Yowie(s) in this region of an evening/night. All of the reports centre around violent creatures... so make sure the bullbar is installed on the car if you are coming of an evening.

Found: Best done during the day.

Rating: 2008, Anakaine, Squeepish

Update: 5.0/5.0

here with 2012-03-31 13:00:00 (Red) - At night, noticed a camera flashing red light at the entry [GPS:-33.758848,150.376281] and on the telegraph pole where you jump the fence here [GPS:-33.760079,150.375106]. There is another camera on another tree along the eastern part of the property. Infrared night vision camera here [GPS:-33.760525,150.375361]. Another camera guarding a roller door here [GPS:-33.760772,150.375514]. Very loud music was heard coming out from inside of this newer building on-site. Several cars travelling up and down the dirt

roads to lookouts and/or other secret make-out and hoon locations.
{Edit Fl@sh: Last time I was here I encountered someone working and playing loud music in same building Red mentions. He was seen exiting the site in a white van later.}

Update: 2010-03-14 13:00:00 (Fl@sh) - Apparently for sale.
Holes in fence still ok. Boarding removed from entry next to Chapel.
Snakes. BIG snakes.

Scarecrow. A
Rating: 4.0/5.0
Update: 2014-04-08 14:00:00 (Ghost) - GONE - Site Redeveloped

Update: 2011-05-07 14:00:00 (Red) - Access to second level and
beyond is no longer accessible. Padlocks on everything now. However,
if you can jump one of the gates in a siding that runs cuts the
middle of the lower level to the (now) lake, a padlock has been
removed allowing entry to a basement level with pipes and
machinery. Access to upper levels still possible up a dodgy ladder
and through the second level wall crawl space - although it's
quite risky and perhaps not worth it on this ageing site.

Update: 2010-12-17 13:00:00 (Red) - Jumping the construction fence
here [GPS:-33.886015,151.199652] is good at night as one is in
the shadows of the trees and far enough down from the houses
to the east that one should not get noticed. Several drain pits
on site now, all of which connect to Raptor and Phobic's recent
discovery. Access to upper levels is now boarded up bar
one: after jumping the fence, walk through the right large
doorway (the more eastern one) and up the stairs through the
open/unlocked door. This door might become locked in the
future and it might have been luck that it was left open when it
was. Homeless person might be living here too. Several noises
coming from one of the levels which sounded like a person
shuffling and moving bottles.

Update: 2016-02-24 02:05:55 (Žižek) - Update Description:
Apparently it used to be a bakery back in the day, and indeed the
FIELDERS BREAD sign on the roof can still be seen from outer space.
Rumours that it was used for limousine hire and furniture
manufacture at some point. Abandoned for years, graffed-
out by the usual suspects. Cavernous proportions, and the pieces
on the walls lend it a moody atmosphere. Has rails going through
it up to the entrance, which suggest efficient transportation of
heavy goods towards the light rail. Good for a movie set or a
modest party. Won't hang around too much longer- there are plans
to turn it into a Dan Murphy's by the second half of the year.
Update: 2016-02-24 01:58:18 (Žižek) - Update Access: #3 the tree
and the ventilating system are your friends to climb in
through the window at (GPS:-33.875310, 151.154199). Don't attempt if
you're not a confident climber. As far as I know, this is the
only remaining entrance.

Name: Dead Biscuit
Alternate: Mt Paris Dam
Description: Disused slab and buttress dam, completely drained and left
for the ferns to implant themselves upon the structure and
rivers to course through the giant gaps in the dam wall's forefront.
Additional 7' rockblasted diversion tunnel at the base of
an icy cold waterfall. Best place to camp or have a Clan Party!
PhotoprOn opportunities in abundance.
Features: Spot the glow worms in the diversion tunnel
Access: Drive east along the A3, after Branhholm there'll be a
turnoff to Mt Paris Dam Rd, follow for 13km, park and follow the fire
trail [GPS:-41.218178,147.857952]
Locality: Ringarooma
Region: TAS
Country: Australia
Water Level: Waist - Dry
Cond: Disused
History: 02/07/2008

The Heritage Council has permanently registered the Mount
Paris Dam in the Tasmanian Heritage Register. The dam is located
about

nine kilometres east of Ringarooma in the Break O'Day municipality.

Heritage Tasmania consulted with Forestry Tasmania and additional information about the dam assisted in the valuable listing of the place. Registration occurred for a number of reasons.

Tin mining was an important feature of life in north-east Tasmania, and made a strong contribution to the Tasmanian economy during the late 19th and early 20th centuries. The Mount Paris Mining Company built the dam in 1936 to supply water for hydraulic tin mining.

Geoffrey Davey CBE and Sir John Proud engineered the dam in the early stages of their careers. Both went on to become notable figures in Australian engineering history. They were honoured nationally and internationally for their engineering contributions. Davey was also known for his service to the Catholic Church in Australia, and in 1960 was awarded a papal knighthood in recognition of his work with the Sydney Archdiocese. Proud was a Trustee of the Australian Museum, sat on the Senate of Sydney University and was knighted in 1978.

The Mount Paris Dam is highly valued by the local community. Not only is it an impressive structure, it is unique and many locals were involved in its construction. The dam was built almost entirely by hand. The only mechanical assistance was provided by petrol-driven concrete mixers and some tip trucks which delivered blue metal and sand to the site. It stands as testimony to the skill and effort of its builders. The dam is the only one of its design in Tasmania and is a good example of a slab-and-buttress dam.

The dam operated until 1961 when the mine closed. It was drained in 1970.

Notes: If camping, please clean up after yourself. This is a
pristine location!

Name: Deathstar, The
Description: Huge circular chamber with a massive, hollow centre
support
pillar. Its uncannily similar to the interior of the Death
Star,
as seen in the film 'Return of The Jedi'
Features: Huge space, easily 6m high with walkways running out from
the
centre shaft. The shaft itself contains a ladder system
and
connection to an overflow. Over the years the interior has
been
plastered in graff and the structure seemingly hasnt been
used
for sewage containment in years.
Access: Via locked vertical shaft in paddock near where bike track
meets
the Eastern Fwy near Melbourne Water. [MEL:31K-12,
GPS:-37.784186,145.060619]. May need boltcutters. Once in
climb
down ladder to bottom door, then down ladder into main
structure.
Locality: Kew East
Region: VIC
Country: Australia
Water Level: Bone dry, covered in dry mud
Found: .
Rating: 0.0/5.0
Update: 2009-12-21 13:00:00 (Loki) - Chopschops not required.

Created: 1995-12-31 13:00:00
Modified: 2009-12-22 13:00:00

Name: Devil's Gate
 Alternate: Clap-trap
 Description: A double-curvature concrete arch dam, with a crest length of 134m, and height of 84m.
 Features: The many dodgy ladders and the catwalk which passes across the lower mid-section of the dam, which joins both sides of ladders. Exhaust tunnels, and other small rooms.
 Access: About 30 minutes south of Devonport, TAS. From Barrington Rd, turn onto Devil's Gate Rd, and park at the end near the gate, or somewhere less visible down a dirt track in the bush. [GPS:-41.350091,146.264747]
 Locality: Barrington
 Region: TAS
 Country: Australia
 Care: Surrounding fence is uber-secure, and requires skillful climbing to find a way over. Only for those with a head for heights.
 Eek!: Most of the ladders don't have cages. The ladders near the bottom waterline are totally twisted from a gigantic force of water.
 Water Level: Watch out for flooding! The water will spill over the top. Slimey - Death
 Cond: Graffers have made their mark around.
 History: One of the thinnest concrete arch dams in the world. The narrowness of the gorge and the computer-aided design of its double-curvature shape enabled engineers to minimise the volume of concrete and hence the cost of the dam.

Name: End OF The Line
Alternate: Chullora Scrap Yard
Description: The Place Where They Are Crushing The Old Sydney S-set
Trains (aka ridgies). Here is your chance to say goodbye to the
last of Sydney's real steel trains before they are all replaced by
plastic lifeless spaceships.
The best time seems to be on the weekends during the day
when workers aren't around.
Transport Sydney has announced they need to keep some of
these trains in service till 2015 so the crushing of these
trains should be a slow process over the next couple years.
Features: s-set trains (ridgies)
much) lots of graffiti (some very high quality and some not so
train smashing machine
piles of scrap metal
Access: [GPS:-33.884926,151.063192] turn down davidson road off
the hume hwy, this street becomes Marlene Crescent, places to enter
from

here are:

Marlene Reserve (over the fence),

the sra gate (standard boundary key, or hole in the fence
to the right of the gate)

unit block to the left of SRA gate (has multiple man/woman
sized holes in the wire fence)

once on SRA land walk west up the "hill". from here you
can look down on the trains , you will find a very clear path
leading down the hill to the trains , once down there find a hole in
the fence or just climb over.

Locality: Chullora
Region: NSW
Country: Australia
Care: Don't leave any valuables in your car

if entering through the gate/ park you may notice a sra
vehicle or some staff hanging about, usually these are signal
operators if you wait they will go away

when coming down the hill you will have to cross some
tracks to get to the scrap trains, these tracks are live freight
lines so look both ways

freight security - these guys stay near the freights and
arent too much of an issue (if ur standing on the hill you will
see a white bulding sorta behind the trains, this is where he
hangs out mostly)

machine security - there is a guy guarding the machinery,
a friend of mine went and spoke to him and he said hes not
rail corp hes from the company that has been hired to scrap the
trains, hes not worried about tresspassers or graffiti
writers as long as they stay away from his machines

into a graffiti writers - your more then likely going to bump
fighting writer here , it shouldnt be a problem now , all the
trouble over this spot seems to have died off , in the event of
you out you are friends of the US and SFK crews , this should get
woes of most trouble with writers (if they ask specific names
and gore are your answers)
Water Level: Dry - Ankle
To-Do: have a poke around for Chullora Bunker while you're
there :)
Notes: Head south down Roberts Rd and turn into Norfolk , Ford or
Naughton Streets, these will take you to Wentworth Street.
From here you can see the other ridgys that have been pulled
out of service (it seems they are pulling all the valuable stuff
out before taking them around to chullora to be scrapped).
and These trains are being guarded, they have sensors cameras
do! the what seems to be a fast direct line to the police (do not
'I'm just a photographer' line will not work here).

Name: Epping Brickworks
Alternate: TyRs Brickworks.
Description: Huge brickworks that closed down in late 2003, 2 massive
kilns and 4+ smaller ones, lots off cool looking machinery.
Features: Big.
Access: Midson Rd [Sw:254G01, UBD:192P05, Grg:280J05]. Jump over
the brick display fences in the display area (dodgy), then
down the stairs, around the fenced area and you're in.
UPDATE Feb 09 Hatsumi: Access still possible. Choose a
rainy day, heavier the better which ensures minimal staff
on site. Walked in
didn't say from Midson road and passed some workers who
a word as

we went into brickwork.
[GPS:-33.784203,151.072783]
Locality: Epping
Region: NSW
Country: Australia
Care: Areas are in use for planning housing development and for trucks
filling in the quarry.
Cond: A small amount of graf and not trashed (so lets keep it that
way).
Found: 2005 TyR.
Rating: 3.0/5.0
Update: 2010-07-19 14:00:00 (Red) - I was here on 28/05/2010 and the
Brickworks is still intact. However, the entire south side
is now new houses and the north is muddy and flat with several bulldozers. Access may still be possible at the end of
Skenes Ave where the new wooden housing area fence meets the metal construction fence (there is a sizable gap). West side of
the Brickworks looks like its about the collapse, along with
6 year stairs leading up to the second level. Fridge upstairs has old water in it!
Update: 2007-08-28 14:00:00 (Aeon_floss) - Access: Main entry to site is lit up and exposed. Walk along Midson road and jump the fence near the north end off the site using trees as cover.
Walk down dirt quarry ramp to buildings. Jumping fence too early will find you on top of a 6M drop.
Caution: Site offices in use, possibly alarmed.

Name: Fairview Training Center
Alternate: Annapurna's Ghost Town
Description: An asylum/mental hospital which was a fully sustainable
community
between 1908-2000. Mentally handicapped people lived here
full-time. About 300 acres, about 50 buildings.
Features: Dorms, office buildings, basketball court, pool, variety
of
buildings with different architectures. Water tower,
smokestack,
fire escape slides (whee!), warehouse, mess hall, several
buildings with no obvious purpose. About half the
buildings are
easily accessed through an open window or door, and the
other
half can be opened with a screwdriver or adjustable wrench
(everything's boarded up, but not well).
Immediately adjacent to the property is Pringle View
Community,
which was made from some of the buildings, including the
greenhouses and the (apparently burned out) fuel storage
building. Also a cafe and the cafe girl was very nice and
helpful, even showing me a booklet on the history of
Fairview.
She warned me about trespassing, but supported me on my
photography quest.

Access: GPS coordinates: 44.8978981°N 123.0137063°W. Massive
 property with zero security, not even fences. Park and walk on.
 Avoid the thorny vines.
 Locality: Salem, Oregon
 Region: OR
 Country: United States of America
 Care: Camera Clan members will require a couple days to
 photograph everything. Provisions may be required.
 Eek!: Also, rain and wet ground are very common in Oregon.
 Water Level: Ghosts. Best warded off with a campfire and s'mores.
 Cond: Shoe - Dry
 History: Derelict
 were Fully sustainable community where mentally disabled people
 taken to be separated from society for their entire lives.
 Both staff and patients lived on site, which was complete with
 a farm.
 To-Do: Read about it on Wikipedia.
 Camp overnight and find some ghosts.
 Directly across Interstate 5 (about 5 minute drive) is an
 industrial area complete with some silos.
 About 11 miles north on Interstate 5 is a large building
 with an active smokestack. Infiltration-minded explorers may be
 keen.

Name: Fantasy Glades
 Description: Abandoned theme park built by "Little People" aka Midgets
 in Port Macquarie
 Features: Cinderella Castle - a large pink castle with life-size
 mannequins behind glass depicting the story of Cinderella
 full of Witch's Cottage - a later addition, this wooden house was
 fun 'booby traps'
 Miniature Chapel - a tiny church.
 Old Woman's Shoe - this large red shoe (approx 3 metres
 tall) was designed to represent the nursery rhyme There was an Old
 Woman

Who Lived in a Shoe in which children could play

Access: 44 Parklands Close, Port Macquarie
Park at the bottom of the street.
You'll see the driveway on the left hand side. Follow
driveway and there's a hole in the gate.
Pretty simple.
Locality: Port Macquarie
Region: NSW
Country: Australia
Care: Surrounded by houses. Pretty open when wandering around.
Eek!: Private property.
Water Level: Dry - Dry
History: All info taken from www.fantasyglades.com

In the 1960's a family of "Little People" George and
Rosemary Whitaker, along with their children James and
Lynette,
and Rosemary's parents, Aub and Lin Gribble, set out on a
journey from Sydney to Port Macquarie in NSW Australia
with a
dream to create their very own children's Fairy Tale Theme
Park. It seemed natural that the main attractions of the
theme
park would be centred on the well known Brothers Grimm
fairy
tales like "Snow White and the Seven Dwarf's" and others
as
George had, had a long working history with the stage
production
of these stories. To create their dream George and
Rosemary
purchased 2 hectares of natural bushland at Parklands
Close in
Port Macquarie.

Construction began on their project in 1967 and it was
decided to
call the theme park "Fantasy Glades"
Fantasy - being the theme and - Glades - being the
setting.

The first buildings to be constructed were Snow White's
Cottage
and a miniature church (the church being only a shell at
this
time) Snow Whites Cottage contained: dining room, the
Seven

upstairs Dwarf's bedroom complete with seven little beds and
made by was Snow Whites bedroom. The furnishings were all hand
Rosemary's father Aub.

1968 Fantasy Glades opened to the public on the 20th of August
and was an immediate success.

journey A family of "Little People" known as George and Rosemary
dream to Whitaker, along with their children James and Lynette, and
Rosemary's parents, Aub and Lin Gribble, were the original
owners and creators of Fantasy Glades. They set out on a

create their very own children's Fairy Tale Theme Park.

hectares of To create their dream George and Rosemary purchased 2
natural bushland at Parklands Close in Port Macquarie.

1967, Three years after opening Fantasy Glades theme park in
November 1970 saw the tragic loss of Rosemary and George's
3 year old daughter Lynette. A beautiful stained glass
window was made by David Saunders of Sydney and installed in the
church in her memory depicting the Bible verse of Psalm: 23. Some
say that Lynette's presence has been seen and felt by many in the
church for many years after her passing.

adopt a In December 1971 George and Rosemary travelled to USA to
home beautiful little boy and girl and brought them safely back
to Port Macquarie. The following year they adopted another
completed beautiful child, a baby girl from South Australia this
the Whitaker family.

the help In 1977 tragically George passed away suddenly but with
and support of Rosemary's parents she continued to operate
Fantasy Glades, by this time two wild life parks had
opened in Port Macquarie so Rosemary decided to donate her wild life
to" The Sea Acre's Sanctuary" and the existing areas were

fairy
popular
one of

transformed into beautifully landscaped picnic areas. The
tale aspect of the park continued to grow more and more
so Rosemary added The Three Bears House which was built by
her employee's.

Stephen
with

In 1980 Rosemary re-married a young man from Sydney,
Hobbs. Stephen worked side by side with Rosemary bringing
him many creative ideas which contributed greatly to the
continued success of Fantasy Glades.

many fond
time
July
Brian

In 1986 after 18 years of hard work and the building of
and happy memories, Rosemary and her family decided it was
to move on and retire from Fantasy Glades. On the 25th of
1986 Fantasy Glades was sold to George and Pat Spry and
Hutchison a family company, they continued to successfully
operate Fantasy Glades until such time as its closure in

2002.

Field Of Dreams
Mungo Scott Mill
Buildings, siolos, machinery, and associated industrial
awsomeness related to the production of bread. If Helter
and Millmaster had a foursome with Decadence and
this would be the spawn.
Unfortunately known.doc doesn't afford the space to list
awsomeness contained within this locale. Machinery, more
and walkways than ever known to man, levels within levels,
of rooftops, retro electricity devices, weights, control
wood stairways.....too much to contemplate. No need for
directions, just have fun, play safe, tonnes to explore.

buildings and silos all with extra delicious goodness to
 enjoy. Take
 a picnic.
 Access: Acc#1 Where bridge passes over rail line at rear of
 property (cnr Edward and Old Canterbury) walk down and through giant
 hole in fence behind building and onto train line and walk to
 canal side of mill Ok...just before canal dips under property
 climb up to fence. No need to climb over, look under, big gap easy
 to slip through right here. That whole side of building next to
 rail line has giant sliding door, like a hangar door. Slide this
 open about a foot and see flimsy loltastic pin in latch -
 remove pin, open door enough to squeeze in, or more if it pleases you,
 then go nuts. Close door and re insert pin, there are many
 other exits now and this looks better left as you found it. Acc#2 poss
 - follow same as 1 but from rail line see base of silos two
 open windows, window on right can enter here, not checked but
 reason to believe ladders we climbed further up inside went to
 internal base of silo where this window is.
 [GPS:-33.894027801028656,151.14248871803284]
 UPDATE Red 2010:
 (Red - 2010) There is a hole in the fence at
 [GPS:-33.894619,151.142513] which makes easier access than
 going around and opening the sliding door to property. Where the
 gate meets the fence next to it just squeeze through.
 Access to southern building and thus walkways for both of
 the largest silo stacks can be reached by bending (or removing
 and being sure to put back) a grate at the north-eastern
 corner of the building from the inside of the compound at
 [GPS:-33.894087,151.142831].
 UPDATE Bastion 08/2012
 Hole in the fence at corner of Old Canterbury and Edwards
 st has

been fixed, even though you can still crawl under the
 lantana and find your way.
 Brand new lock at the gate to the parking on Edwards st.

Locality: Summer Hill
 Region: NSW
 Country: Australia
 Care: Well, we saw no seccers, seems all workers are in front of
 property near Smith street in admin buildings. We saw no
 cameras, no PIR's, actually nothing. Use common sense, lets keep
 this place a gem for all to enjoy, stay back from windows,
 don't use bright lights and flash photography - lot's of internal
 lights were on anyway. Take care, older buildings had some shifty
 wooden floors, usual care in old building. Some floors had random
 foot sized holes where pipes or machines or removed, basically
 pay attention to where you are walking. First explored about
 4pm on a rainy day, best done after knock-off time.

UPDATE Sledgy 04/03/2011:
 Drove past the site yesterday while out and about and
 noticed the "allied mills" signage from the admin buildings have now
 been replaced with one word "POLICE"..... that sucks.

drive way, Additional security fencing has been installed on main
 some security fencing/barbed wire installed at hanger doors and
 train lovely daymaker style lights are now brightening up the
 lines at the drive way to the side door.

Water Level: Dry
 Cond: Exceptionally excellent, no graff or single piece of
 broken stuff or rubbish - keep it that way !!!

History: Made bread n stuff, now it doesn't - Allied Mills former
 mill, google is your friend.

To-Do: Keep an eye on the mascot Fielders mill and dream the
 dream that we eventually have two such awesome playgrounds to enjoy.

Name: Fingal lighthouse house
Description: Historic sandstone house where the original lighthouse
workers
lived. Many rooms & outhouse. Roof is gone after a fire.

Features: Old sandstone house, lighthouse, lookouts.
 Access: Park at fingal bay carpark -32.742105, 152.171030. Cross
 the fingal spit -32.741503, 152.187433 then follow the track
 up to the lighthouse/house -32.746883, 152.201455. CHECK TIDES
 before going, multiple people have been washed off the spit. You
 will currently have a 4 hour gap which is safe. The walk is
 around 2kms each way, so bring water.
 Locality: Port Stephens
 Region: NSW
 Country: Australia
 Care: Check tide charts
 Water Level: dry-neck
 History: The keeper's house is located about 13 metres (43 ft)
 north of the tower.[2] It is the only example in Australia of a
 terrace of lighthouse keepers' quarters.[12] It was probably
 completed slightly later than the lighthouse, as building materials
 were continuing to be sent from Sydney after the official
 opening.[6]

 The terrace comprises three one
 keeper and story cottages, a six room cottage for the principal
 the same two three room cottages for the assistants, all sharing
 a roof. Each of the cottages had a kitchen, a storeroom and
 a privy. The building was constructed of the same imported
 sandstone as the lighthouse, dressed outside and plastered
 inside. The roof was originally made of slate, replaced in
 1901 with terracotta, with five chimneys along the ridge and a
 bay window and gables along the front. A low terrace was built
 at the rear from random stone.[12] Photographs from the 1950s
 also show a rear addition with a skillion roof infilling part of the
 verandah.[6]

 Water was originally
 supplied from two underground rainwater tanks, each 7,650
 imperial gallons (34,800 l; 9,190 US gal).[12] The
 residency was

infiltration served by a single septic system, discharged via an
bed to the north east of the property.[6]

by As mentioned above, the keeper's house was gutted
vandal fire in September 1991. In early 1992 a fence was
installed and the chimneys and gables were stabilised by
new brickwork.[12]

Name: Fort Ballance
Alternate: Gordon Point Battery
Description: A fantastic example of a WW2 Battery. A really nice fort.

Features: 4 gun circles, underground storage facility, bunker complete with fireplace and chimneys (wtf?), ladders, staircases, beautiful architecture and (sealed) lower levels.
Access: Follow Massey Rd to Fort Ballance Road (unmarked). There is a Mahanga Bay depot here. Follow For Ballance Road up escarpment to plateau.
Locality: Scorching Bay
Region: WGN
Country: New Zealand
Water Level: Dry - Dry
Cond: Heavily graffed
History: Work started on the fort in 1885 and by 1888 it had two 7" RML guns, a 6" BLHP gun, two 6pdr QF Nordenfelt guns as well as associated magazines, engine rooms and Barracks. The magazine for the North 6" BLHP gun has two levels with the lower one used for the storage of the shells and cartridges which were lifted up to the main level by block and tackle. The rings for the tackle remain attached to the ceiling above the hatches. Another 6" BLHP gun later replaced the south 7" RML gun with modification of the gunpit to suit.
Found: 2008 Pandaman
Rating: 5.0/5.0
Update: 2014-02-09 13:00:00 (Kazman) - Really great location, but it's covered in graff, which gave me the uneasy feeling of running

into graffers while in action and thus follow up trouble.
I think the best time to do this location is early morning
or
late evening when no one's around. Aim for the Wellington
peak
hours and you should be fine.

Modified: 2014-03-30 13:00:00

Name: Fort Falcon
Alternate: real name: Eurama Estate
Description: Sandstone mansion/castle constructed in 1882 by Architect
G.A.
Mansfield. About a dozen rooms, some two storey, a 3-4
storey
tall tower, about 8 chimneys, stacks of history. Mostly
destroyed
by fires in 1968, but walls and tiles are all still
intact. Upper
levels no longer have floors.
Sandstone wall and buildings are located 200M West of
mansion,
right next to train line. 4 small buildings still intact.
The
owner used to have a private train platform on the other
side of
the sandstone wall.

There is also a totally trashed red-brick house located
with the
Western buildings, but this adds absolutely nothing to the
site,
really and appears to be 1960's construction.

A huge metal shed, of warehouse proportions, is located
about 20M
away from the mansion and appears to house large machinery
or
something. Wire on windows has signs 'Danger: Electric
fence'.
This may have something to do with the planned development
for
the site, or may be a council shed or something...

There are remains for a few other sandstone buildings, a
trashed
greenhouse and a pool dug into a huge sandstone boulder
scattered about the clearing aswell.
Features: UPDATE Dori-Dori 2009:
"A huge metal shed, of warehouse proportions, is

located about
 20M away from the mansion and appears to house
 large
 machinery or
 something. Wire on windows has signs 'Danger:

 is now accessible...
 Access:
 station,
 Take Sir Henrys Parade in Faulconbridge, at the train-
 you should be travelling up the mountains parallel to the
 Train-tracks, on the opposite side to the Great Western
 Highway.
 Follow Sir Henrys all the way to the end, sticking next to
 the
 train tracks all the way, don't take any forks to the
 left. This
 road will require walking or a 4WD for the last section.
 You will
 reach a clearing at the top of a hill at the end, the
 sandstone
 wall and Western buildings are very obvious and to your
 right,
 the mansion is 200M to your left. Can't miss it.
 Alternatively, take the Great Western Highway past
 Faulconbridge
 station and you will see the sandstone wall on your left,
 on the
 other side of the train tracks. There is a U-turn bay you
 can
 park at 200M after the wall. Jump the train tracks and
 follow
 them back down the mountains to the sandstone wall.

Officeworks building. Constructed of grey besser-block.
Multiple rooms and multiple entry points. BDAN.
Features: Unexepected size (100sq meters+). Unexplainable level of
extreme warmth!. Where did all the water go?
Access: Lift any of the gutterbox-styled swing grilles in the
front carpark outside the Officeworks building. Grilles are
located 1

directly near footpath next to TNT courier site fence, the other
 in line with the first is about 8m back from footpath in
 gardenbed. 2006 UBD -- [252:Q3]
 [GPS:-33.88819437497483,151.07488632202148]
 Locality: Strathfield South
 Region: NSW
 Country: Australia
 Care: Camera mounted on nearby Officeworks building. Service
 station attendant at nearby service station.
 Water Level: Dry - Knee
 Cond: Clean
 History: The original building on the site was a car dealership
 until mid-2007. Became an abandoned location but was never
 explored. Early 2008 construction of Officeworks building and
 modest sized underground retention chamber to trap water run-off
 from building car-park.
 To-Do: Lift iron-plate cover near grille nearest footpath
 alongside the highway.
 Found: 2009 - Ghost Apr 5

Update: 2010-07-29 14:00:00 (Lb) - GOING.

workers moved in last week, currently emptying out
everything and then (i assume) starting on asbestos, could be gone
soon.... or not, it is gosford.....

Update: 2010-04-22 14:00:00 (Lb) - more stealth entry to complex
via hole in fence in alleyway/carpark on georgiana terrace (opp
primary school)

entry to frogys via closest set of stairs at rear of the
building, should be a hole in the door there.
can get into the bottom floor of frogys via the stairs
next to the snack bar.

access to old council chambers to the right of entry hole
and thru broken door. access to roof via internal stairs.

access to old youth club unknown unless hole is cut on
bakers street, although shouldn't be too hard to get in.

Name: Garden of Lost Souls
 Alternate: Tarban Creek Lunatic Asylum. (Gladesville Mental Hospital)
 Description: Semi abandoned 170 year old psychiatric hospital on
 extensive overgrown grounds hiding all manner of things
 Features: 170 year old semi abandoned psychiatric hospital. There is
 lots of abandoned goodness to be found for the intrepid
 explorer, including what looks like an abandoned ruined chapel
 hidden behind some over grown lantana. There are some abandoned
 stone cottages, great extensive overgrown convict built 12foot
 high stone walls, ornate staircases to nowhere. Some of the
 main buildings are very old and totally abandoned but locked up
 and would need someone with good infiltration skills to get
 in, others are semi abandoned, with sections still occupied
 and others are active admin buildings. Its a huge site, maybe
 75% the size of Rozelle hospital.
 Access: Main access through gates at bottom of Punt Rd
 Gladesville. Alt Victoria Rd Gladesville. Ample parking on site
 GPS:-33.838104,151.129764
 Locality: Gladesville
 Region: NSW
 Country: Australia
 Care: No sign of CCTV or seccers but there must be some. Note,
 this site is still partially occupied by NSW Health, and
 various state health committees, The whole site is heritage listed
 Water Level: Dry - Dry
 Cond: Good to crumbling
 History: http://en.wikipedia.org/wiki/Gladesville_Mental_Hospital
 To-Do: Access some of the main buildings, bring a camera
 Notes: Also; Gladesville Tunnel- In the grounds of Gladesville
 Hospital - Small access car tunnel that goes under Victoria Rd.
 Used to be used when hospital was on both sides of Victoria Rd. Other
 side is now housing estate.

 Scarecrow, H

Rating: 3.0/5.0
 Update: 2016-01-02 13:00:00 (Hatsumi) - Jan 2016 - old building
 which had bath and sink in foundations now covered in scaff, you can
 climb under scaff and enter through window into basement but
 eventually PIR goes off. In fact PIR goes off in other buildings too,
 quite well placed as I didn't see them before they went off.
 However, no response seen and happily continued to walk the site
 with no sign of security..possibly just deterrent. Other buildings
 on site nicely boarded up, seemed to be a higher amount of
 vehicles on site than previously.

Update: 2011-05-28 14:00:00 (Wolfman) - Old gardeners cottage,
 nurses dorms and courtyard in front of original 1836 hospital
 wing barred by temporary fencing. Easy to get around or
 under/over. Basement entrance to original building barred by thick
 wire grate held on by thin wire ties. Easy to remove but put back if
 accessing building this way. Old two story stone building
 on hill here:-33.839832,151.134182 away from main complex
 accessible from unlocked window or roller door. Inside pristine with
 remains of old hospital wards in situ. Look around and try all
 windows to find unlocked one. Also check doors to see if any
 unlocked. PIRs inside most easterly wing but no response from seccers
 after 30 minutes.

Update: 2009-10-06 13:00:00 (Aeon_floss) - Basement / plant room
 of "Giant Steps" building is accessible by lifting iron
 grille at the side of the building.
 Old ward section with the dodgy floors that can be entered
 from basement is locked off from the rest of the building.
 caution: location has lots of active sections that are
 not

abandoned. Entering active sections through unlocked
buildings
off) not advisable. Active PIR's (but no response when set

Plant room accessible through unlocked roller door has
response) operational PIR in main hall(did not provoke alarm or

Don't drink the RealBrisClan milk.

Update: 2009-07-27 14:00:00 (Hatsumi) - 2009 July - some smaller
single storey dwellings, old nurses housing, doors are open so
just walk in.
on One of the main buildings, access from one of the in roads
with site, see u-shaped building, disused fountain in courtyard
this main doors bordered by two large stone pillars.To right of
wall, easy walk into garden bed and see large hole in foundation
corridor access, walk into jail/bunker style foundation rooms and
or take stairs up to rest of building. Some floor sections
unstable, take care.

Name: Garrawarra Centre
Description: Old disused Tuberculosis hospital next to active nursing
home.
Features: Multiple buildings, some trashed, some not so trashed.
are Most if not all buildings on the east side of the driveway
you come not in use anymore minus the first house to your left as
down the driveway.
Access: Located on the Princes Hwy 3.1km from the exit on the
Princes Motorway [GPS:-34.162644,150.969991].
I parked on the road, unsure of the best place to park.
are Most if not all buildings on the east side of the driveway
you come not in use anymore minus the first house to your left as

down the driveway.
Walk behind/to the left of this house and follow the track
to
find disused buildings.

Multiple holes in all fences, just walk around the
perimeter and
you'll find an easy way in.

Locality: Waterfall
Region: NSW
Country: Australia
Care: Security buggy patrols the active part of the site, unsure
about
whether or not the inactive part is patrolled.

Eek!: Be careful of dodgy flooring and residents/workers.
Water Level: Shoe - Dry
History: Garawarra was one of three Tuberculosis hospitals around
Sydney.
The other two were at Thirlmere and Wentworth Falls
(Consumption). People were sent there against their will
and
isolated from the rest of society. Prior to the
development of
Streptomycin the only treatments were fresh air and
exercise -
so almost everyone died. Even after the antibiotic was
available
there wasn't enough to go around,.so it was given to young
girls
firstly. Older women who had already had children were
deemed to
have 'served their purpose' and were refused.

To-Do: Few small buildings unexplored, not sure which ones
though.

Found: 2013 Pandaman
Rating: 3.0/5.0
Update: 2016-01-25 06:31:35 (Vox) - Update Notes: Dropped in today
16/1/25 . North eastern most buildings now compromised.

Holes
everywhere, busted windows and quite a bit of graff. We
slipped
in unnoticed (only 3ppl) and took photos for an hour or
so. Later
asked a worker for directions to the old cemetery. Quite
difficult to find and over 1km from the site. We found it
ok.
There are around 2500 graves there!!

Name: Hartfords Mill
Description: Large brick building with corner towers and a huge brick
chimney.
Features: Extensivly damaged by locals. Main floors offer little
more than broken glass and buckled flooring. However, the annexe
section accessable only via little hidden doorways at the front of
the building is excellent. Large pit-like structure framed by
rusty, ornate walkways, staircases and ladders, the bottom of
which is full of of rotten timber and debris. Balconies stacked at
one end lead up to the only roof access, givenm the destruction of
the main staircase. Great views over normally at Manchester
from the roof. Access to insides of chimney via a short tunnel
Access: Walk thru gates on Block Lane just south of Railway
overpass. Go in any of the numerous open doors. [A-Z:72-A3, AA:89H01]
Locality: Oldham-Werneth
Region: North West England
Country: United Kingdom
Care: Holes in floors, burnt out staircases etc. Is located in
dodgy, scally infested area. You may run into kids inside.
Notes: This site is sheduled for demolition.

Name: Hatsumi's Urinary Tract
Alternate: Incontinence, Manly Water Works
Description: Former water park consisting of triplet 5' RCPs, finishing in an ankle deep GPT, explorable both internally and externally.

Have a fun and surreal adventure through the guts of an insane earthworm.
Features: 3 twisting slides of doom - the 'Twisted Cobra', 'Slippery python' and the 'Insane Earthworm', access ramp, pool of sludge, plant room, surreal world between the levels, employee fridge complete with abandoned lunches and two shrunken bananas.
Access: Located near corner of Commonwealth Pde and West Esplanade, Manly
GPS:-33.798976, 151.280974

From the beach, walk towards toilet block next to Manly Art Gallery. The main gates to the park will be to your left. There's currently a large hole in the fence.

Alternatively, climb down the rocks at Federation Point, underneath the Pavilion and up into the water

park. - This route is untested and may be incredibly stupid/impossible. Have fun and check the tides!

Locality: Manly
Region: NSW
Country: Australia
Care: Best done at night.
You are highly visible to the flats on Commonwealth pde, especially on the access ramp.

Your torchlight will be visible to people outside the waterslides.

Eek!: Mummified bananas!
the insane earthworm!

Water Level: Ankle deep in wading pool
Cond: Reasonable condition. Slides no longer work as originally intended.
No graffiti but some smashed glass in places.

History: Opened in 1981, featured in the 1983 film BMX Bandits.

Spent a three decades putting people in the mood according to this 1983 ad https://www.youtube.com/watch?v=nfBJ_OrPMnc

The manager was finally evicted in 2015 but not before chaining himself to the fence.

To-Do: Investigate the opening to the ocean.
Inspect the mummified bananas.
Ride one of the office chairs down the slide.

Found: Aydun, Maggot, Mandala, Oriface, Scarecrow, (motivated by Hatsumi).

Rating: 4.0/5.0
Update: 2016-05-08 02:46:50 (The Edge) - Update Access: The fence has been fixed. But there is another hole in fence behind toilet.

Crawl through the bushes and palms up to the rock while holding onto the palm fronds (they're quite strong) and this leads to first ramp. The climb is a bit slippery and there's chance of being spotted. This was around 7am sunday so less people around.

Name: Hearn Thermal Generating Station
Alternate: R.L. Hearn
Description: Large coal fired powerstation, famous around Toronto as
its easy to access and has been abandoned for a long time.
Features: Very large structure, built in the mid 1960s. Turbine hall
is currently intact, complete with all turbines and
associated equipment. Boilerhouse is gutted but is nevertheless
impressive. Multiple rooftops and switching areas, impressive but
supposedly sealed chimney stack; intact coal chute and hopper
structures.
Access: Station is situated on Unwin Ave, about 800m east of
intersection with Cherry Street. Access is via any section of chainlink
fence deemed safely climable, preferable on eastern end as
security is located at western end. Once in grounds, most doors are
open or missing. [Mapart: 120 U23]
Locality: Port of Toronto

Region: ON
Country: Canada
Care: Security onsite, they do the odd patrol but are very ineffective.
Try not to linger outside in ground too long.
To-Do: Reaccess chimney stack.

Name: Helter Skelter
Alternate: Port Kembla Copper, The Southern Smelter.
Description: Huge, intact copper smelter in Woolongong, near BHP
Steelworks.
Features: Huge smelter building (approx 8 stories) and more assorted
a structures, gantries, pipes and conveyers than you can aim
camera at. Biggest smoke stack you're ever likely to see.
Radioactive laboratory, electrolysis refining facilities.
Access: #1,UE: Park at the end of Electrolytic St [Sw:NDR, UBD-
Wg:042D12, Grg:NDR]. Walk back toward main road till you view E
perimeter fence through the large holes in the Electrolytic St
fence. About 20m along perimeter fence is a tyre and the barbed wire
has been pushed down (kinda) out of the way. Climb fence here and
keeping to fence line, head towards the stack. NOTE: Seccer camera
on spotlight WON'T see you if you keep to fence line.
without #2,UX: W end of Electrolytic St fence has small section
barbed wire, but it's very close to the main road.
Locality: Port Kembla

Region: NSW
 Country: Australia
 Care: Security gatehouse on Darcy Rd (northside). A few workers
 are still about even on w/ends and at night. Port Kembla
 police station and courthouse are on the same block as the
 smelter. Neighbours are getting suss. Please, no tags, no major
 obtainium and no wanton destruction at least till site is truly
 abandoned. Security is minimal at present, lets keep it that way.
 Eek!: Copper poisoning risk. ALWAYS wear gloves onsite. The
 radiation signs on the lab doors are not for show. If you can see
 the red lights that's bad mm-kay.
 Cond: Immaculate.
 History: "The decision was made to cease operations at PKC on 28th
 July due to crippling market conditions. Since then the smelter
 and refinery have shut down. While most employees have been
 made redundant and L site, some staff have stayed to prepare
 the plant for Care and Maintenance. This has involved site cleanups,
 mothballing of equipment and sale of L over materials."
 (media release 7/10/03) Main stack was capped in Oct 2003.
 To-Do: Explore N and E of main smelter - pref on a public
 holiday.
 Notes: Quote: "Best find of the 21st century.." - Pred.
 Found: 2003 FeNiX/spuTnik.
 Rating: 5.0/5.0
 Update: 2016-12-29 02:41:40 (The Edge) - Update Notes: This is now
 a storage yard for brand new cars. Some buildings are still
 left after demolition of the chimney stack and the main
 buildings but not sure how explorable they are.
 Update: 2013-06-13 14:00:00 (Scarecrow) - Going at a steady rate.
 Photos from Queen's Birthday long weekend on this blog;
<http://loripiquemal.com/p841677823>
 Update: 2011-07-10 14:00:00 (Smalls) - Very sad day for those who
 have seen or who wanted to see the awesomeness that is helter.
 The

acid plant is gone and the maze of pipes have been taken away .
The main smelter room , similar to white bay turbine hall is still there . I talked to the worker at the gate about the demolition of the stack and it has been scheduled for the coming months as soon as the other building have been flattened .
If you still wish to see this place your time frame is Sunday's or public holidays - photos to come

Update: 2011-02-21 13:00:00 (Smalls) - Scheduled hours of demolition . 7 am to 6 pm mon - fri , 8 am - 1 pm sat , and no work on Sundays or public holidays . Demolition timeframe 16 months .
During periods of high wind and rain demolition will cease due to environmental impacts . Get there and see it soon

Update: 2011-01-27 13:00:00 (Anakaine) - 27/01/11
Demolition will be starting very soon - Have had Site safety signage, contractor sign in books, and site demolition guides being printed at work the last few days. Asked how soon it was going, they said almost immediately work was starting.

Update: 2010-12-31 13:00:00 (Smalls) - Demolition soon hurry up.
Security have 3 points that they need to patrol during their rounds, one of which is here (-34.48188596994651, 150.9066742658615) and the second is 100 metres past the entrance to military road and the third ?? (perhaps near the stack)
Cops were called after a neighbour spotted a copper stripper jumping the fence , would advise you to make a prompt exit if you see one as they are not quiet, have almost no stealth and attract a lot of attention.

Update: 2007-08-26 14:00:00 () - some brick buildings/walls have been knocked down or are in the process of being knocked down wear a grade 2 mask ffs!
gloves are essential and use of dust overalls are strongly advisable!
a hard hat helps

security still mans the front gate as a minimum...

Region: NSW

Country: Australia

Care: Polluted to the max.

Found: 2002 Siologen.

Rating: 3.0/5.0

Update: 2016-01-31 04:43:08 (Vox) - Update History: During the early 70s "Brickies" was the place to drag race your car on Fri & Sat nights. The road in was straight and longer than a quarter mile. As it was a private road the cops couldn't stop the racing. They just waited at the end of the road and nailed everyone for defects as they left. Fun memories :)

Update: 2016-01-31 04:23:45 (Red) - Update Features: Empty brick hut, at -33.839687,151.071350.

Heavy vehicle storage building with workshop and bathroom, at -33.839846,151.072542.

Building, with shaft and rusted pumping equipment, at -33.840014,151.072712.

Update: 2016-01-31 04:20:58 (Red) - Update History: In 1910, the Minister responsible for Public Works, put forward a proposal to build a brickworks to supply the Department of Public Works. This had arisen from a monopoly control of brickyards by the Metropolitan Brick Company, which fixed prices and controlled distribution. The Minister's inquiry into the feasibility had found that the annual requirement for Public Works was 36,000,000 bricks and 75,000 tons of metal (stone) and a saving of 50% on public construction costs could be made if the government set up their own brickworks. In 1911 9.5 hectares of land was resumed from the State Abattoir for the State Brickworks. By 1925, the site constructing comprised 23.5 hectares. There were difficulties in

the first kiln at the Brickworks, caused by the refusal of private manufacturers to sell their bricks for this purpose. Bricks made during the early years of the site were transported by barge to a depot in Blackwattle Bay from where they were loaded for road transport to building sites.

During the period 1927 - 1930 the Brickworks showed a declining profit margin and in 1930 - 1933 there was an increasing deficit. At the same time the output of the works dropped from 60,300,000 bricks in 1927 to 11,000,000 in 1933. A change in government saw the Brickworks sold to Brickworks Limited in 1936, but production still declined. The site was closed in 1940 and in 1942 was taken over by the Naval Armament Depot to be used as a munitions store. After World War II the Government passed an act to enable the re-establishment of the State Brickworks at Homebush Bay. Resistance was met again by private manufacturers and the Government was forced to produce its own machinery to replace that which had become unserviceable. Post-war a building boom increased the demand for bricks, with a peak in production reached in 1969. During the 1970s the facility operated at a loss, but a process of rationalisation made the operation profitable again in the late 1970s. The brickworks ceased trading as a government enterprise in June 1988, although sandstone was still removed under royalties until 1992. The Clay pit ceased clay excavation much earlier and operated as a municipal waste depot from the 1960s.

Following cessation of the quarrying activity, the Brickpit developed in a freshwater wetland. When bidding for the 2000 Sydney Olympic and Paralympic Games a number of possible uses for the brickpit were put forward, however, once the Green and Golden Bell Frog was

found, the site was developed as water storage and frog habitat.

- Sydney Olympic Park Authority
(SOPA).

Update: 2016-01-31 04:18:01 (Red) - Update Access: A black dome camera at the top of a pole watches this gate here, at -33.839473,151.071517. The camera may also be able to see this gate here, at -33.839370,151.071896.

Easiest access to the jump the fence here, at -33.839904,151.070164 and walk down the path to the south-south-west.

Name: Homestar's Hideout
Alternate: Thornleigh Malt Works
Description: Disused malt works with several large explorable buildings,
silos, a rail siding, and heaps of interesting spaces.
Features: Silos to climb, malt hoppers, rail siding, kilns, wank station,
offices, rooftops, a Homestar Runner mural, death arena, interesting smells.
Access: Park in Lockerbie Rd. Walk up Lymoore Ave and follow the walking
path next to rail corridor. Squeeze through gate over rail siding
here [GPS:-33.723221, 151.086142] or walk further along the
track towards Pioneer Ave to find a large hole in the fence. All
buildings are walk-ins.
Locality: Thornleigh
Region: NSW
Country: Australia
Care: A walking track runs between the site and the rail corridor which
has a good view of most of the site. Be careful not to get seen.
Eek!: Same for climbing the silos/roofs during the day
Water Level: Security drives through the site every so often.
Cond: Dry - Death
Moderately trashed.

History: [copypasta] Beer is considered the Australian national
beverage by many and it derives much of its distinctive taste from
the malt that is created at the plant of Barrett Burston
Malting Company Pty Ltd, Thornleigh.
The single railway line completed in 1886 from Strathfield
to Hornsby created the opportunity for industry to be
established in a selected area of Thornleigh. The land to the west of the
line was available at low cost and had nearby developing
residential suburbs to provide staff.
Mr William George Chilvers [1860s -1937], an English
master malter who was a fourth generation leader in the trade,
started the first important large scale business on this land when
he built the malting plant immediately beside the railway
line. Mr Chilvers applied for and received assistance in adding a
railway line siding giving access for bulk delivery of barley
grain from the farms of western New South Wales. The business was
registered as The New South Wales Malting Company and has operated on
the same site since 1913.
The malting process converts the heart of the barley grain
into maltose sugars that give the distinctive taste to beer.
The breweries add the malt in various proportions to create
popular flavours. The Kent Brewery on The Broadway, Sydney was the
major purchaser of malt from Thornleigh in the first half of the
20th Century.

Update: 2015-07-10 14:00:00 (Hatsumi) - I won't bore you with
links but you can google it yourself in those moments between your
cock becoming flaccid after your jacked off to some Russian
wedding stripper party orgy.

local Essentially a number of politicians are trying to gain
quarry prostate massages by supporting the idea of filling the
they with spoil from x,y and z road projects. At a rough guess
would suggest 18 trucks per hour 24 hours per day for two years
small be needed to fill the quarry. semi accurate quote 'a
narrow road annoyance for grand gain' - if you have been down the
residents will the leads to the quarry you'll know that the local
reclamation be fucked if that is the plan. Whilst there is some
a day of land for public use the locals will suffer with 24 hour
point where noise levels to get (and this is conservatively) to a
class the land can be turned into a white picket fence middle
picnic dream.

water Considering most plant life within the first 10m of the
'burying' lever is dead and crispy one would think that simply
the top the problem and putting a nice plaque and some swings on
will not 'cure' what ails this site.

assume

noted
other

Anyhoo...some fresh pumping equipment installed and...I
pumping...something from the water. Fresh tyre tracks
that despite the numerous gates traffic had in fact been
quite recently to the lowest levels of the quarry proper.
Access otherwise remains the same....just scramble around
fences and through handy pre made holes.
Did I mention the ye olde cemetery and adjoining yet a bit
track away solitary tomb stone?
And then there is the corrugated drain with Tubby tags
also runs a long concrete floodway..has anyone officially
where that goes and what the deal is? And what is at the
end of the floodway?
Quite a nice way to spend the day this place.

 Joadja
 NSW
 Australia
 Site is now privately owned and the owner lives on this
 site.
 Getting into the site - Tours were put on hold cos of the
 instability of some of the structures.
 Private property, camping grounds available.
 Long and extensive. Originally a oil shale refinery built
 1860's. Main products were oil, wax and kerosene. The
 that owned the site and managed the business went into
 liquidation in 1905 and by 1915 was a ghost town. Close to
 people lived here and was totally self sufficient as
 Mittagong was a 2 day trip. It was then sold up to a
 investor and remained that way till 1992 when it went up
 auction again who are now the current owners.
 Underneath the retorts of the refinery there are numerous
 high tunnels made from brick that run the length of the
 retorts. There are also some mines that are probably worth
 that the shale was dug from.
 2008 (Bastion) - The tour are now back in business. For
 you can have a roughly 2 hours guided tour with someone
 a bit what it was all about. Better to book in advance. In
 something like 6 months, self tour should be possible, for
 cheaper, minus the historian.
 Contact are: Mark C.
 Longobardi, 4878 5129,
 joadjatown@bigpond.com

Update Vox 2011: New owners as of a couple of weeks ago. They said they're trying to find a way of stopping people from just walking in. Tours will be restarting once these folks get settled. I have an email address for them if anyone wants it.

Found: 1992 Bullwagon.
 Rating: 4.0/5.0
 Update: 2016-03-15 07:31:34 (Vox) - Update History: [See this link] (https://www.youtube.com/watch?v=PNuXvnoZIxw&ebc=ANyPxKoULrqDGkCV2pdbmei2C9hi0ZzqTAC9hFRmUF4LubirM3mljhfILNu_7OhyxiLBnfRnEiuEGBMFs0sZ4Hlr2cSqGDRuYg)

Update: 2013-04-16 14:00:00 (Vox) - The owners are now charging a \$15 entry fee for Adults. This entitles you to a guided tour. Camping can be negotiated without additional cost if you ask nicely and do the right thing. Please phone ahead 48785129 and check with Valero (Val) before turning up.

They are now bottling "Joadja Creek Spring Water" and will soon be making "Joadja Whiskey". The yet to be assembled still equipment was already there during our last visit.1

Update: 2012-03-24 13:00:00 (Vox) - New owners are fixing the place up to run ghost tours and stuff.

<http://www.smh.com.au/travel/ghosts-and-the-machines-20120308-1ultg.html>

They're nice folks ... pls don't let yourself into their property. Ring and ask permission first !

Update: 2010-10-14 13:00:00 (Neptune) - Several building have been burnt down in eastern section of Joadja. Train bridge has been demolished since 2009. Can attend without tour. Ghosts are defiantly present. Sirens can be heard from the old train along with voices and ghostly wind.

Neptune.

Name: Jünger
Alternate: Scheyville National Park

Description: A collection of ex-army buildings currently being restored by NPWS as a museum to the history of the place. Don't worry, it's a way off yet though, plenty to explore in the meantime. Lots of historical detritus.

Features: Lurvely robin's egg blue buildings. These are mostly locked (chapel, schoolrooms etc.). Many crumbling wooden nissen huts (accessible) and old outbuildings. There's an indoor squash court with upstairs observation deck, adjacent to two outdoor tennis courts. At least three water tanks and/or towers (probably climbable, ladders were spied), plus HUGE aircraft hangar size mess halls and big kitchen. Note foundations of shitty substandard shacks used to house migrants during the 'Fifties. Groovy kilns/ovens/incinerators with scary dioxin warnings. Don't stick your head in these, kiddies.

Access: Via driveway (signposted and everything!) at the NPWS entrance off Scheyville Rd, Scheyville. There is also an entrance from Old Pitt Town Rd but this is gated and may be locked.

Locality: Scheyville
 Region: NSW
 Country: Australia
 Care: You will drive past the caretaker's property on the way into the site, but the property is owned by NPWS and isn't restricted access, so as long as you don't look like a hoodlum you'll be left alone. There are security warnings for some of the blue buildings (which are locked anyway), but most of the site is completely open.

Eek!: Aforementioned dioxin warnings on incinerators. Don't eat the dirt. As this WAS a military training site I would be aware of funny pineapple shaped rocks, too.... NO SHIT - ask me the story.....

Water Level: Dry - Dry
 Cond: Dilapidated - Ramshackle
 History: Variously utilised to house POW's, train parachutists, inter

migrants during the fifties and train officers for 'Nam.

See

http://www.trinity.syd.catholic.edu.au/home/hsi_www/Scheyville/Infomation.html

for more info....

To-Do: There's a frigging huge mushroom shaped and currently used(?)

water tower to get into too... but that requires serious contemplation....

Notes: Bring your squash racquet and scare the roosting pigeons.....;p

Name: Kandos Cement Works

Alternate: Disneyland

Description: Cement Australia cement works. Large site with lots of buildings,

gantrys, catwalks, machinery, silos etc.

Features: Everything caked with dried cement. Towers to climb, gantrys to

run across, large earth moving machines, conveyors, some underground sections, plant and generator rooms etc.

Access: 1 Jamieson St, Kandos, NSW. [GPS:-32.866179,149.975363]

Park your car near or around White Cres. (Main part of

town

beside the park and public toilets) and walk to the end of
 Jamieson St to the site.
 Once past the large gates follow the fence line around to
 the right (west of the buildings) and hop the fence where
 there are two gates. Keep skirting around the back edge of the site,
 past the substation towards the train lines. From this point
 climb over another gate and follow the road towards the large
 shed.
 Of course, you could go in your own way.
 Locality: Kandos
 Region: NSW
 Country: Australia
 Care: Skeleton crew possibly onsite. Avoid them by skirting
 around the edges of the site, and stay away from the admin buildings
 near the front.
 Eek!: Places to fall from etc. At least one CCTV camera on the
 ground level (unconfirmed if operational, but there is power
 still to the whole site).
 Water Level: Dry - Dry
 Cond: Coated in concrete
 History: During the year prior to the outbreak of the war, the
 local market value of German cement sold in Australia was
 approximately \$500,000 (250,000 pounds). This competition was entirely
 eliminated with the establishment of the Kandos cement
 company.
 1915 April 1, Candos changed to Kandos
 1915 Town name Kandos registered with the Register General
 ropeway 1915 November November, Kandos Quarry, 5 1/4 km by aerial
 and 11.3km by road in a westerly direction from the works,
 the commenced operations. Its function to supply limestone to
 1 factory for cement manufacture. Limestone was won from No.
 breaking Quarry by explosives, barring down the face and manually
 delivery into and shovelling the stone into horse drawn skips for
 holding a hopper above No. 1 Ropeway discharge point, this hopper
 100 tonnes.

Modified: 2015-05-18 14:00:00

Name: Kaua'i Jewel
Alternate: The Coco Palms Resort
Description: On the east coast of Hawaii's oldest island, an abandoned hotel is slowly being reclaimed by nature. It was a landmark for 40 years, a success story immortalized in classic American movie culture. The Coco Palms Resort was the result of hard work by the Guslanders, a couple who offered an enjoyable Hawaiian experience on beautiful grounds featuring a coconut grove and lagoon.

The resort enjoyed worldwide fame when it was featured in several mid-century films, most notably the Elvis Presley classic Blue Hawaii. It thrived for decades as a popular hotspot among royalty and stars, but when Hurricane Iniki struck Kaua'i in 1992 the hotel was critically damaged.

Twenty-plus years later, most businesses and residents in Kaua'i have moved on. But at the Coco Palms, it's still 1992: A perfect storm of obstacles has kept the dilapidated structure in a seemingly-inescapable purgatory.

(https://en.wikipedia.org/wiki/Coco_Palms_Resort)

Features: Buildings and rooms. There's also a nice coconut grove and lagoon

on site.

Access: Site is surrounded in fencing but contains a lot of holes. (22.049294°N 159.33586°W)

Name: Lithgow Blast Furnace
Alternate: Hoskins Blast Furnace
Description: The ruins of Australia's first blast furnace and Ironworks
factory.

There are a heap of
small underground rooms scattered around and several old
7ft red
brick arch tunnels at both the front and rear of this
place.
MPL=75m TEL=250m
Features: Old brick tunnels, building and furnace ruins, large lumps
of
slag splattered around the site from when it blew up, also
a
nearby "dam" and coke oven ruins.
Access: Park in the carpark off Inch St: here:
[GPS:-33.475493,150.170610]

Air
tunnel entrance here: [GPS:-33.475290,150.170288]

Rear tunnels here: [GPS:-33.474838,150.169768]
and here: [GPS:-33.474576,150.169575]

Coke oven ruins here: [GPS:-33.472005,150.176903], (A
fair
way off, but there used be 80 of them and they ran right
up to
Lake Pillans. Nearly all have been buried).
Locality: Lithgow
Region: NSW
Country: Australia

Care: Beware stepping into holes in ground, also some of the tunnels are in poor condition and are/have collapsed in places.
Eek!: Hobo's (dunno if there are any, I can just picture it)..
Water Level: Dry - Knee
Cond: Poor
History: This was the first Blast furnace/Ironworks in Australia.

It was owned and operated by Charles Hoskins who also owned several local mines and built the local Anglican Church.

Disgruntled by cheap iron imports, striking workers and lack of government assistance, he deliberately blew up the blast furnace and caused a riot by doing so.

<http://www.lithgow-tourism.com/blasthist.htm>

Here is how it used to look:
<http://mw2.google.com/mw-panoramio/photos/medium/10053540.jpg>
To-Do: This is a great spot for a BBQ.
Notes: Some drone footage of the place, they don't really show the tunnels around the back though.

Name: Lithgow Locos
Alternate: Lithgow Locker Room
Description: A small abandoned office/sleepover building, located on the grounds of the active (not for too much longer though) Lithgow railway depot.

Located directly across from the semi buried and "ON FIRE" Blast Furnace coke

ovens, watch your step and take a gas mask.
Features: This building contains 6 or so rooms, including one decent
sized locker room, a toilet and showering room with no water
connected, broken heaters, and another small room or two. Has its own
old abandoned wooden shed next door too.

The ground 20 or so metres away from this building is
on fire and has been for many years, and many to come..
Access: Turn into the Lake Pillans Wetlands access road, just
before the rail bridge on Inch Street here: [-
33.4715268,150.1735783].

Admire the short brick
tunnel on your left here: [-33.4722964,150.1740718]

Follow the dirt road through the gate to the
your left alongside the rail line, till you see the building on
right and the smoke on your left. Here:
[-33.4719116,150.1771832] Park out front of the shed.
Nobody cares as long as you are not looking dodgy.

This road is "in theory" private, but is just
really used for heavy vehicles, dog walkers, interesting short
cut to other side of town etc.

Maybe
don't go there at night as they may assume you are doing
graffiti due to all the trains laid up only metres away. No need to
turn around to leave either as the road rejoins the main road
just around the corner.

Locality: Lithgow
Region: NSW
Country: Australia
Care: May be confused as a copper thief or graffiti writer if
seen there at night.

Eek!: May fall through the ground and burn alive if you step in the wrong place, or get hit by a train.

Water Level: Dry-Fire

Cond: Trashed-ish

History: This is one of two spots in town where the train drivers could have a shower, sleep and wash/dry their clothes inbetween shifts.

To-Do: The other place looks much older, but may still be active. I will check it out one day soon. Check out the other place nearby. (The old brick train station looking building on Bells Line of Rd at bottom of hill/across from the main Railcorp entrance).

Notes: This location kinda sux.

across Only giving it a full star due to the old "on fire" coke ovens the road.

Modified: 2017-02-16 16:38:16

Name: Lithgow No.2 Dam

Description: A large arch dam. Lithgows water supply. 26.5 metres high, and 71 metres long.

Features: A walkway over the dam, and also an abseiling ring thing is bolted into the top of the dam. (Right beside the walkway gate).

Access: [GPS:-33.454789,150.205593]

Station. Turn off Bell's Line of Road at Clarence Zig Zag/Top Point

Follow the dirt Old Bell's Line of Road out to Newnes. After roughly 2km you come to an intersection at a small swamp. Turn left here.

Follow this road down past several new sewer manholes/pipes

until you reach the Dam.
Locality: Lithgow
Region: NSW
Country: Australia
Care: Very high and very slippery dam.
Eek!: Take note of the "sewer" pipe (Clarence Transfer Scheme)
dumping into the dam. (Lithgows water supply..)

(2015 DC): The pipe just burned in the fires, (who would install a PVC pipe in the bush anyway??)..
Water Level: Slimey - Death
Cond: Average
History: "Lithgow Dam #2 was built by the Public Works Department in 1907 as a water supply dam to service Lithgow. In 1914 the dam was raised by 3 feet (0.91 m) to increase storage capacity. It is on Farmers Creek located about 5.5 km north-east of Lithgow and about 0.5 km upstream of Lithgow Dam #1. It is a concrete arch dam with a free overfall spillway and a straight gravity section on the right abutment. The dam is a maximum 26.5 m high and the crest length is 71 m. The angle of the arch is 92°."
To-Do: Cross this dam and find the carved concrete stairs which lead to the base of this dam. (There is an great walking trail between this dam and the decommissioned (broken) Lithgow No.1 dam too).

Abseil this dam.

Name: Living Enrichment Center
Description: Abandoned megachurch and retreat center. Large main complex with interesting architecture. Very open buildings to allow sunlight in. The levels are uneven, with a lot of balconies providing

chiseled interesting views. A fire place with a weird cross
forested above it. Surprisingly little graffiti. 95 acres in
have area. Some smaller buildings have been torn down and just
the cement slabs left. Random gazebo in the middle of the
complex. It's really austere/industrial looking for a
church.
Access: Found at 29500 SW Grahams Ferry Rd,
GPS:45.305941,-122.803559
There is a housing complex just a few meters up the road,
park there and walk to the front entrance. Not much traffic or
a fence, so just walk in the front.
Locality: Wilsonville, Oregon
Region: OR
Country: United States of America
Care: It rains a lot in Oregon. Be prepared.
Water Level: Shoe - Dry
History: New Thought megachurch that was closed when the minister's
husband was found guilty of money laundering and using
church money for personal stuff. Supposedly there are tunnels
underneath it leading to a (now demolished) mental
hospital, and therefore LEC is haunted. I failed to find tunnels or a
ghost :(
To-Do: Find the tunnels. Photograph a ghost.
Found: 2011 Annapurna
Rating: 5.0/5.0

another section, accessible via smaller door inset in roller door,
on eastern corner of building).
GPS for building four
[GPS:-33.892668,151.19568] enter through demountable
offices, and keep going through all the doors until you find one that
gives you access into the large shed.
Oh yeh, there's
also another smaller building closest to the street.
Access through a window here [GPS:-33.892216,151.195533] Can exit
through the door after.
Locality: Darlington
Region: NSW
Country: Australia
Care: Take care not to be seen by rail workers when on site, or
pedestrians when getting in or out or near the front of
the buildings.
There are apartments right next door
as well.

Eek!: Don't impale yourself if climbing over any of the fences!

Water Level: Dry - Dry

History: Originally, they were called the Test Laboratory. Towards the end, they were called Scientific Services which came under Railway Services Group.

To-Do: Have a look at the sheds on the eastern side, near the railway line.

Notes: If you open a door, make sure you close it!!! This place is really good, but don't think it's a Very Good rating.

Found: 11-03-2010 Scarecrow

Rating: 3.5/5.0

Update: 2017-01-28 08:48:16 (Scarecrow) - Update Status: Going.

Buildings being redeveloped. Area is getting more use from rail employees as it's being used for parking.

Update: 2013-04-27 14:00:00 (Scarecrow) - April 2013. All access gates to the two buildings along Wilson St are now all locked with a building contractor's padlocks. Work is being done, everything is more secure, automatic lights have been installed around the site, a security system has been installed; alarms, PIRs etc.

Update: 2012-06-16 14:00:00 (Rabbit) - (Rabbit 2012) Building 2 is now accessible via the front double doors facing the street here [GPS:-33.892098,151.195963]. They're now unlocked, just push them in. Make sure you are not seen by the houses across the road or any pedestrians and close them behind you. There is also an open window here [GPS:-33.8922,151.196119]. Building 2 is scattered with needles and some black boxes, please tread with care!!

here Building 4 can be accessed by pushing in the roller door

face [GPS:-33.89276,151.195696]. I would recommend bringing a mask of some kind for building 4.

lead There is an alternate exit where the front fence meets the apartment block next door, next to the base of stairs that

to the second floor of building 1 here
[GPS:-33.892257,151.195381]. You -could- probably enter
here but
someone's
only if you can't find any other way in, as it involves
balcony.
Update: 2011-03-18 13:00:00 (Red) - Crow has done great job on
detail,
but to be slightly more specific, there is an easy way in
for
those more stealthy. Just slide under fence here in the
shadows -
[GPS:-33.891885,151.196425] - and just walk into site.
Back gate
has to be climbed but gate into rear of building can be
easily
carded if you don't want to get caught between the spikes
and the
bars above.

Name: Manning's Wards
Alternate: Rozelle Hospital
Description: A series of three buildings, + annexes, previously wards
of Rozelle Hospital.
Features: 1st building hasn't been visited yet.
2nd building is still full of hospital stuff. Beds.
Chairs.
Wheelchairs. Sofa. Books. Shelves etc...
3rd building has been trashed by either cats or possums.
Haven't seen any possum, but I have seen cats... So I might think
this

act of vandalism is to be credited to those so called fur friends.

Access: Central Avenue, Rozelle Hospital, Lilyfield, approximately 75m west of north-west corner of retaining wall of Kirkbride Block.

The 3 buildings have all there windows and doors boarded, so please, re board them when finished, especially the second building which is EXCELLENT due to its very good shape, and all the object still in it.

(Rascal - 2010) Three (or four?) storey Dormitory & Cafeteria building accessible from second storey window. Climb little tree by W side of the building and in through window onto fire escape.

(Ghost - 2012) Access: [GPS:-33.865993,151.157581]. Boards are held in place by Wood screws, Tech Screws and Hex bolts. Climb through window here into internal toilets.

Only gets you into the Toilets and Entrance area. [GPS:-33.866157,151.157571]. Climb through broken window here: [GPS:-33.865075,151.160690]. Be mindful of glass. Exit toilets into internal courtyard, enter ward via second door to the right. Exit building here:[GPS:-33.865338,151.160519], 1 floor level up.

Locality: Rozelle - Lilyfield
Region: NSW
Country: Australia
Care: Security patrol the area. Better done during the day (best light, and avoid torch light which can be seen through the window by the road -where the seekers drive by-)

(Rascal - 2010) Floor is disintegrating on top floor, watch out!
Eek!: Possible Asbestos.
3rd building (Ward 15 from memory) ricks of cats poo.

Water Level: Dry - Dry
Cond: Wards 15 trashed, Wards 14 Excellent.
History: Those buildings were parts of the Rozelle Hospital, built in 1885, contracted by Dr. Frederick Norton Manning and the Colonial Architect, Mr. James Barnet.

the Most of the old hospital is now used by Sydney College of
Art, however a few buildings are unused, and let to decay.
Even if they are listed as heritage (Registered on the
21/03/1978)
The wards closed down quite recently, possibly in 1997,
but I was not able so far to find that info.
Here is the history of Rozelle Hospital:
<http://www.cs.nsw.gov.au/mhealth/rozelle/rozhistory.html>
And here the heritage information on ward 14 and 15:

<http://www.aussieheritage.com.au/listings/nsw/Lilyfield/Ward14and15/8180>

To-Do: Enter the first building (the one with more than one
level...)

Name: Marangaroo Trout Farm
Alternate: Marangaroo No.2 Dam
Description: An old abandoned trout farm, across the highway from the
Lithgow jail. It is right next to an old abandoned brothel,

"Chantilly's".

It has two large
viaducts, one is old sandstone, and was the old single
track rail
line through the abandoned Marangaroo rail tunnels
(Marangarootoo).

The other one is
brick and is the current western rail line.

This is also the site of the Marangaroo No.2 dam,
which
is pretty cool too.

Features:
viaducts
Old buildings (most accessible), BBQ area, two large
over the creek/pond with rusty old pumping equipment still
in
place, a rusty old jetty, brown and rainbow trout, a
decent dam
with the old equipment still there, large tanks for
breeding the
fingerlings, and a brothel featuring an old train
carriage.

Access:
Turn left of the G.W.H into Hughes lane:
[GPS:-33.431586,150.109528], then follow the track around
to the
left past the old brothel ([GPS:-33.431998,150.109733]),
park
here: [GPS:-33.437104,150.111771].

Walk down the track past the gate to the viaducts and
trout farm,
[GPS:-33.438292,150.111959],

To
reach the dam wall, follow the creek downstream 500m:
[GPS:-33.442449,150.109985]
Locality: Marangaroo
Region: NSW
Country: Australia
Care: Watch out for nose neighbours, there is a house on other
side of

the viaducts.
Eek!: Watch of for the super-max jail just across the highway..
Water Level: Dry - Boat
Cond: Old, but very good/untouched.
History: An old dam, trout farm, and pumping station for the steam
trains.
To-Do: Catch a fish.
Found: 2012 DC and Cactua
Rating: 3.0/5.0

Created: 2014-02-16 13:00:00
Modified: 2017-02-16 16:47:19

Name: Marrickville Hospital
Description: Site of the old Marrickville Hospital dating back to the 1920's.
Features: Multiple buildings, 5 in total, not all accessible.
The usual peeling paint and weather damage you would expect from a site like this. Main notable feature thus far is an old autopsy table in the operating theatre. May be other cool features once all buildings are explored.
Access: Toward the end of Hospital Lane (-33.908029,151.153129)
you will see a chain link fence that has been cut away from its structure.
Enter through here. Directly to your right you will see an open door to a storage area. Not much to see here.
If fence has been repaired you will have to find another way into the property, climbing over the fence perhaps.
From here, against the wall you will see where part of a "window" has been ripped out. Its really obvious, you can't miss it.
Climb in here and bingo! Go explore!!
Locality: Marrickville
Region: NSW
Country: Australia
Care: The usual don't be too obvious type of stuff. Site does get used in various areas and the car park gets used frequently by the church across the road. Do not get seen. BDAN.
Eek!: Active alarm in the part of building 3 that has been used by an Aboriginal community centre. To the left of the main entry, if you enter from Lillydale Street.
Water Level: Boat - Death
Cond: Abandoned.
History: The land on which the hospital now stands was first granted to Thomas Moore in October 1803 and acquired by Robert Wardell around 1830 as part of large holding.² Following his death in

for 1834 the estate was subdivided into smaller farms largely
 market gardening³.
 The development of the Marrickville area, however did not
 commence until the 1860s with the Municipality being
 gazetted in 1861. The period from 1861 to around 1890 saw the major
 subdivision of the area and the present street pattern
 development.⁴
 Significant developments in the area were the introduction
 of the reticulated water system from 1879 to mid 1880s and the
 start of the sewerage scheme in the early 1890s.⁵ These encouraged
 the opening up of the area so that by the end of the banking
 crisis in 1896 when confidence was growing there was significant
 progress in the locality, particularly in the area of
 manufacturing.⁶
 With the development of the area there was a call for the
 establishment of a hospital to serve the growing
 community. The first community hospital in the district was established in
 1894 at Croydon (later known as the Western Suburbs Hospital),
 while the first community hospital to be built in Sydney was at
 Balmain and opened in 1887.⁷ The move for the establishment of a
 hospital took place at a public meeting held on 1.3.1895 at the
 Marrickville Town Hall chaired by the Mayor, Alderman
 Moorehouse, where it was resolved 'that it is desirable that a Cottage
 Hospital be established in the borough of Marrickville'. A
 committee was formed and it was decided to call for
 subscriptions.
 Mr. F.E. McLean M.L.A. was elected President, Mr. J.B.
 Trivett Honorary Secretary and Major W.P. James Honorary
 Treasurer.⁸
 In April 1896 a site committee was formed, chaired by
 Major James, to select a suitable site and they reported in May
 that a number of sites had been found including;
 • A block in Lilydale St.
 • A block in Francis St.
 • A block in Clavert St.
 • A block on the corner of Petersham and Mainhall Rds.⁹
 In October of that year the committee recommended the
 acquisition

of 150' of land fronting Lilydale Road at a cost of £1.10
 per
 foot frontage.¹⁰ The block had a 120' depth and was part
 of a
 larger site that was owned by Alexander Howlinson,
 nurseryman,
 and used as a market garden and which was bounded by
 Marrickville
 and Livingstone Road, Lilydale and Stanley Streets.¹¹
 The site was acquired with a frontage of 154'6" (Lots 6-10
 Lilydale St) and provisional trustees were appointed. They
 asked
 the Government to register the site under the Hospitals
 Act which
 meant that the Government would supply £ for £ grants for
 money
 raised by public subscription.
 Howlinson retained part of the property on the corner of
 Marrickville and Livingstone Roads and subdivided the
 remainder
 for housing. The properties along Livingstone and
 Marrickville
 Roads, being the more significant streets, were more
 substantial
 and were developed largely in the late 1880s and early
 1890s.
 Three houses from that period survive in the Hospital
 grounds
 facing Livingstone Road.
 To-Do: Gain access to all buildings and get to the operating
 theatre.
 Notes: Development proposal, including building layouts found
 here:
www.yoursaymarrickville.com.au/document/show/107
 Main multi story building originally explored by Siolo,
 Curly &
 Hats before obscenely loud alarm went off.
 Boiler House explored by Sledgy & Hatsumi sometime in
 2011. Not
 too much to report here.
 Found: Siolo, Curly & Hatsumi...listed by Sledgy & Hatsumi - 2012
 Rating: 2.0/5.0
 Update: 2015-10-13 13:00:00 (Lb) - Access to "main multi story
 building"
 currently available.
 Enter thru hole in fence on Livingstone Road next to multi
 story
 building, walk through garden and on roof(?) of old
 building to
 the opposite side of multi story building.
 See scaffolding.

Climb scaffolding.
Window at the top currently unlocked, some windows broken
on
journey up the scaf could also be used for entry.
Lots of pigeons and pigeon shit inside. Seriously, more
pigeons
than I've ever seen anywhere before.

Name: MIHEXHAM
 Alternate: M.I. STEEL
 Description: 2 long empty warehouses, 3 smaller admin type buildings
 with lots of surrounding vegetation.
 machinery Large derelict warehouse and manufacturing facility at the
 southern end of the Hexham bridge. Easy access. Some
 still intact.
 Features: Photo clan views of Hexham Bridge
 Old internal beam crane
 photograph. Has Nice shadows, windows, signage, graff and junk to
 a centre piece of a burnt out later model Magna; nothing
 says classy like a burnt out Magna.
 Access: [GPS:-32.824414,151.685338]

Concrete blocks make for no vehicular access but no fence exists.

Park up on grass opposite, room for 2-3 cars. This is also an access road for an auction house and other businesses.

Locality: Hexham
 Region: NSW
 Country: Australia
 Care: Pterodactyls nest here.
 Eek!: Rape dungeon, body dumping ground.

Surely has asbestos hazards. Has a large tank full of something very unpleasant - climb the ladder and have a look but don't fall in.

Water Level: Dry - Dry
 Cond: Tin warehouse sheds and fibro buildings
 History: Former M.I. Steel plant.
 To-Do: Climb old Hexham Bridge.

See if newer Hexham bridge has internal access.

Notes: Paint big clan logo on outside.
 Phelonius, Double-listed as Swift and Loveless by Vox, Sids, Kazman and Intrepid, March 2014. Listing combined as update.

Name: MiniGong
Alternate: Toowoomba Maltings
Description: Heritage listed maltings, not as big as Mittagong by any means but similar setup and plenty of remaining plant and tools.
Features: 6 or so large, timber drying rooms, amazing old timber/dust smell.
Conveyor belts and hoppers in pretty good condition.
Kilns in sub-basements .
Some graffiti and vandalism downstairs.
Access: #1 Open window/s on northern side of building (-27.542103, 151.942737). Avoid approaching from Jellicoe St, as neighbours have been known to be nosy. Less obvious parking on North St and walking south across the creek, there's an old boiler half buried in the creek too.
Locality: Toowoomba
Region: QLD
Country: Australia
Care: Rotten floors, collapsing roofs/floors, stoned teens
Eek!: Nosy neighbours, adjacent buildings are active and you can unassumingly walk out into active storage yards in a few places.

History: Comprises a complex of buildings erected in several stages, in 1899, 1907, and the 1960s at Black Gully, Toowoomba for the purpose of turning barley into malt
Closed in 2011
To-Do: Some newer concrete sections have been amalgamated into a newer active shed, must go say hi to the current tenants and have a gander. Silos have been removed but tower of some sort remains.
Found: Unknown, based on visits in 2016 by NoPro.

Name: Mitchener Psychiatric
Description: Oldest building (abandoned) on active mental hospital formerly WWI hospital. Fire damage to some floors.
Features: 4 of 5 stories of hospital goodness. Gorgeous basement, connecting to steam tunnels (linking to active buildings on site), lots of undisturbed artifacts from years of use, lovely

view from top.

Access: #1: South side doors generally unlocked, in view of security building windows. #2: Steam tunnel hatch ~150 yards SE of building. Checkerplate with no handle or hinge, need screwdriver to lift. Head NW once in tunnel, goes straight into building, Lat: 52.272277177 Long: 113.787499522 - Addr: 40th ave & 52nd St

Locality: Red Deer

Region: OR

Country: United States of America

Care: Watchful seccers (no alarm system last update), lots of asbestos in the depths.

Eek!: FIRE DAMAGE to 4th floor and attic. Do not die!

Cond: Bad fire damage to upper 2 floors, structure is stable.

History: Built 94 years ago in 1912, the Michener Center was originally Alberta's first Women's college. In 1917, it became a War Hospital for soldiers until 1922, at which time it became the main building for the Michener Mental Hospital which was then built up around the site. Fire destroyed the attic and part of the top floor when lightning struck it in June 2003. December 2005 saw money from the Alberta Govenment with a plan to restore the building, so get to it whilst you can!

To-Do: Explore more!

Nearby: Connected steam tunnels, give access to central plant (no motion detectors, door alarms present), possibly other buildings.

Name: Munmorah Power Station
Alternate: Munmorah PS
Description: From wikipedia:
closure of Delta Electricity announced on the 3rd July 2012 the
Munmorah power station after 45 years of operation due to
decreasing energy demand. Units 3 & 4 had been maintained
on standby but have not been in production since August 2010.
Munmorah was disconnected from the grid in May 2014 and
completely de-commissioned. Plans are underway to demolish
the station and it's out buildings and sell off the 500 acres
of surrounding land for housing.
Features: Outer perimeter: One coal conveyor that runs to the power
station. Water channel/canal running alongside power
rooms, where water was pumped to cool the generators/turbines.
Inner perimeter: Guard house, office block, labs, change
turbine hall, chimney stacks and all sorts of machinery.
Access: Drive past the Munmorah power station sign on Central
coast highway heading east until you see the Buff point sign
road shoulder and park after the sign. Walk through the trees
to open clearing and keep walking towards footy oval at Koala park
while walking along the trees.
opens up. Once at the footy park, walk around the fence till it
fence of Then walk across the footy park to the outer perimeter

over. the power station where barb fence has collapsed and climb
parallel Find and walk along coal conveyor through the marsh and
walking to with the creek till it slopes down to the main canal.
office Make sure all tradies/security has cleared the site by
around the visitor parking on other side of bridge and observing
corner activity at front of power station near the main gate.
(buff Run back and crawl under the main gate and run towards the
may point sign). Do not park near power station grounds - that
perimeter tip off security.
open [GPS:-33.212860,151.535623] - entry point of outer
window fence.
other [GPS:-33.212548,151.539783] - entry point of office and
Locality: Colongra
Region: NSW
Country: Australia
Care: Entry through the window is a bit high and tight from the
floor as you climb through. Very tricky getting back down to
ground level. Active phone lines within the power station at
reception. Avoid the outer perimeter gate as it has an active camera.
random times Security patrols the station perimeter in a truck at
appeared but doesn't enter unless something looks suspicious (one
for around 6pm). The truck/ute will park in the visitor area
through about 5 minutes before entering. When security enters
guardhouse (not gate, a siren rings. Random rings can be heard in
The sure if that's security ringing in before they approach).
and patrol lasts 30 minutes but have been known to stay longer
call for backup if they spot something.

Tradies operate on Saturday till after 4:30pm.
DO NOT ENTER/EXIT via the open garage doors at the turbine
hall
after the main building where the open window is as those
could
be boobytrapped - these contain motion cameras with large
floodlights and are potentially active.

Also need to add any similar floodlight cameras
found/spotted on
site should be avoided.
Eek!: Ticks or other nasties may be present in long marsh grass
after
coal conveyor.
Water Level: Ankle - Dry
Cond: Good but getting cleaned out
History: From wikipedia:
The station was constructed with 4 English Electric 350 MW
turbo-alternators. Munmorah had a total capacity of 1,400
MW.
Steam was supplied at a pressure of 2,500 psi and a
temperature
of 460 °C. One unit was completed in 1967, another in
1968, and
the remaining two in 1969. Units 3 and 4 had fabric
filters
fitted in the 1980s, and this reduced load to 320 MW each.
Units
1 and 2 were relegated to emergency use from 1992.

Notes: Explored 2015 Curly, Fish, Theedge. Thanks to Tyggriffic
(Uega)

Name: Musheons Water-Head
Alternate: Dexter's Training Ground
Description: 8 or 9 storey building with rooftop, and lots of history.
Features: Upper soaked floors with fungus growing from the carpet,
loading
dock, rooftop views, typewriters and other things
scattered
throughout some floors, lots of funky looking retro junk,
pidgeon-haunted rooftop corridors with adjoining bathrooms
(pretty cool), wrought iron water tank inside upper-most

sprinkler structure (totally full of water; over 40000L) for system, old wooden stairs and banisters. Heaps of stuff to photograph.

Access: 422-424 Kent St (directly opposite Druitt Pl). Through the small door inset into the bigger roller door.
[GPS:-33.87236,151.20515]

Locality: Sydney CBD
Region: NSW
Country: Australia
Care: Staircases are old and could throw you off-balance due to the off angles.

Eek!: Steep staircase in the upper-most structure on the rooftop could collapse; one person at a time, and don't step in the middle of the treads.

Water Level: Dry - Slimey
History: There seems to be quite a bit, lots of different businesses have occupied the building. Will find out and update.

1930's. In The Kindergarten Union first started Playways in the Union the 1960's it moved to Clarence Street, Sydney. When the Childhood decided to close Playways the staff, who were all Early trained opened Play House Toy Shop in 1989.
<http://www.playhousetoys.com.au/resources.htm>

their Radio 2EA occupied the top floor of the building, with first broadcast going out on June 9th 1975, being a 2 hour broadcast spoken in Greek.

http://crc.nsw.gov.au/__data/assets/pdf_file/0017/13508/No_41_Jun_1985.pdf

Notes: http://en.wikipedia.org/wiki/Special_Broadcasting_Service
Elevator has power, but doors won't open. Some lights on, many. Torch needed for stairwells.
Make sure you close the smaller door in the roller door properly when leaving. Do this by making sure the flange of the frame sits either side of the big roller door, then pull the smaller door snugly into place.

Found: Dec 2010, Dexter & Scarecrow.
Rating: 3.0/5.0

Update: 2013-08-20 14:00:00 (Ghost) - Access: All entry points
completely secured. Cannot squeeze through any gaps at all. Security
do check as paper leaflets found at entry points

Update: 2012-11-10 13:00:00 (Red) - Still accessible for those who
are thin enough. Simply kick the smaller door in the roller
door in so that the chain is stretched to its limits and squeeze
in the gap that is made.

Update: 2011-05-01 14:00:00 (Fl@sh) - Small door locked tight +
secured by chain and padlock.

Update: 2010-12-10 13:00:00 (Sledgy) - Do not use the wooden
ladder thats lying down on the roof.
It wont hold your weight.
Trust me.

Rating: 0.0/5.0
Created: 2014-08-31 14:00:00

Name: No More Pentair
Alternate: Pentair Manufacturing Plant, Exploranium
Description: Former Pentair research and manufacturing facility. This is one I bumped into by accident just as I left Yennora when I was in the area on other business.

house Unfortunately not much left except a site office, change
extensive and a couple of office buildings. Was once a rather facility according to the map.

Features: Changehouse and old showers with lockers still full of junk and helmets.
interesting Large filing cabinets moved outside with lots of schematics, documentation and forms.
Two office buildings.
One guardhouse and funny traffic lights that indicate whether radiation has been detected in vehicle.
Access: Access point under wire fence
[GPS:-33.859142,150.958339]
Once through, run across to the canal and over the bridge.
Then run to the changehouse to start the tour.

Locality: Yennora
Region: NSW
Country: Australia
Care: Access point is fairly busy with cars. Might need to do a dawn or

dusk trip. Some sort of large diesel/gas generator placed outside the changehouse.

Water Level: Dry - Dry
Cond: Good - getting demolished
History: There is hardly any news article of this place - http://au.valves.pentair.com/water/about_us/news/?id=tcm:285-34348
To-Do: Need to climb into office buildings. Windows are open but very high.
Found: 2015 - Theedge

Name: Noralyn Phosphate Plant
Description: Massive phosphate plant. One main building with silos, a second large building connected to it via a conveyor belt, and some smaller outbuildings. Several control rooms.
Features: Intact machinery, control rooms, silos, amazing view
Access: 3301 Noralyn Mine Rd, Bartow, Florida. Don't drive in the front.
When you reach the entrance road, continue driving around the mine on the US highway. You should see the mine clearly from the road as you do this. The road goes around the mine to the back, where you see several train tracks and a dirt road. Drive up the dirt road and hide your car in the bushes before continuing on foot along the tracks. [GPS:27.845888,-81.864861]
Locality: Bartow, Florida
Region: FL
Country: United States of America
Care: Active site directly adjacent to it. Don't be seen. Be reasonably quiet because the sound will carry if the wind is right.
Eek!: Dodgy flooring. Watch EVERY step you take. DO NOT be there after dark. Apparently there are wild boar, and they like to maul people at night.
Water Level: Dry - Dry
Cond: Good with dodgy bits

Modified: 2016-11-05 07:12:45

Name: North Illawarra Relay station
Description: Low frequency radio repeater station.
35-40m high tower with half a dozen yagi antennas looking
out
over the escarpment between Wollongong and Sydney.
Features: 2 lookout platforms
The best view of the Illawarra afforded from any of the
lookouts
along the coastline. A single panorama could include both
Sydney
and Wollongong.
Old surface strip mine located slightly north of the site.
Not
really anything interesting here. Can be accessed via bush
trails. Check out google maps to see the tracks to take.
Access: Head south on old Princes Highway (Not F6. Head down F6
towards
Wollongong, take Helensburgh exit, turn right at first
roundabout. This is the old Princes highway). Head along
old
Princes Highway until you pass Boomerang Golf Course on
your
left. Another few hundred meters of road will reveal a
right hand
swing in the road, proceeded immediately by a dirt road to
the
left. Take this dirt road.
small You will know you have the right track by the presence of
concrete blocks placed on the right hand side of the road.
This road has 3 left hand sideroads. You want to take the
second
one. The first leads to a TV repeating station. Bad
Explorer. The
second leads to a Telephone Comms Tower. Also bad
Explorer.

Locality: Maddens Plains
Region: NSW
Country: Australia

Care: The TV tower is likely to have service personnel drop by
from time to time.
The tower is bloody high. It has a fall guard, but you may
want to consider taking a climbing harness and a set of
prussics with approaching with
D clips. The escarpment is subject to high winds
little warning, you do not want to be caught up here.
Water Level: Dry - Dry
Cond: Excellent, brand new. 2007
To-Do: 360 Pano photo from top in low wind situation.

Name: Not That Place!
Alternate: Wynleigh Nursing Home
Description: A single level nursing home, with about 20 rooms or so.
Features: The place is almost intact, no graph, nothing broken. Just empty
cupboards and
bed curtains as well.
Access: The nursing home is 1 house away from the corner of
Chalmers Rd
and Barker Rd, almost across from Elwyn St.
in No it is not the old brick house construction site covered
white plastic sheets.
Jump the front gate (white wooden fence/gate).
DO NOT go by the back entrance on Barker Rd, as it is the
neighbour backyard/parking space!!! (and the neighbour
likes to
smoke his cigarettes on a chair in the backyard!!!)
The window on the left of the main door is not locked,
remove the
window net, open the window (please replace the net
properly).
[GPS:-33.877308,151.082219]
A door is also unlocked if you go around the building on
the
right of the main entrance. You will see a single door on
top of
a wheelchair ramp access. [GPS:-33.877185,151.082034]
Locality: Strathfield
Region: NSW
Country: Australia
Care: Be careful at all time as you are highly visible on either
side
of the property by the neighbours. The front entrance is
really
exposed to the street.
The house at the corner of Barker St share its backyard
with the
nursing home, with direct view into several windows of the
nursing home.
Water Level: Dry - Dry
Cond: Perfect
History: Use to be a Nursing home. Now an empty one...
Notes: Look for the birds in the cage, the teddy bear, the
dragonfly,
the shark and the Piano.

Name: NSW Maritime Homebush Bay Depot
Alternate: Triangle Transport
Description: Depot once used by NSW Maritime. Then subsequently used by
a company called "Triangle Transport" before being left
abandoned.
UrbanGrowth to Now it is being sold off by the NSW developer arm
the highest bidder to be announced next month.
Features: A group of abandoned sheds and buildings, mostly empty but
some old signage, work scrawls on a chalkboard can be found and
junk lying about. Not much graffiti and fairly clean apart from
some copper stripping.
Two sheds,
middle building/shed to rear of property and front sheds
are accessible. The main buildings at the top right corner
mostly are locked up.
One shed has a
reception office with lads mags all over the desk.
Apart from that nothing interesting. A good place
to run around and test your Urbex ninja skills as the
place is highly visible from a few of the apartments.
Access: There was a hole in the gate at the front next to the
footpath but it was fixed recently. Otherwise go round the back
next to the power pole and climb over the barbed wire??
Highly visible area. Make sure you don't get
spotted going in by the cyclists or the park ranger. Also next to
Boral which is very active during the day.

Name: Old Ropes Creek Station
Description: Abandoned train station
Features: The pedestrian bridge is still up with decent views of the area,
inside the guards office is pretty stripped out although
there are some cool looking levers still there. Should check it
out only if in the area, nothing too exciting.
Access: Jump the fence anywhere around it.
[GPS:-33.727687,150.780938]
Locality: Ropes Crossing
Region: NSW
Country: Australia
Care: Watch out when jumping the fence, it's really bendy. Oh
and beware of the rocks around the north side of the site.. i
sprained my ankle by slipping on them when landing, ouch!
Water Level: Dry - Dry
History: Used to be a part of the old St. Marys Munitions Factory
site.
Train line was built in 1942 and closed down in 1986.
To-Do: See if there's any other remains around the area from the
WW2 days.
Found: 2009 xsv
Rating: 2.0/5.0
Update: 2015-11-09 13:00:00 (Tim Dole) - Not sure if it's worth
mentioning or not, but this site has been 'renovated' into
a family friendly park. The original platform remains,
slightly remodelled. The original signal leavers are still
accessible, they are housed inside a locked room, but the gate
currently doesn't have a padlock so easy access.

Update: 2012-09-29 14:00:00 (Drainbiz) - The former building on the platform burnt down early 2012, the levers still remain in place, rusting away. Now has an exterior fence (temporary) and another fence right around the edge of the platform (permanent). Development proposal on fence mentions demolishing all but the concrete platform, and turning it into a park-type reserve. Should probably be moved to gone if Dunheved station was, they are in similar states of (dis)repair.

Modified: 2015-11-30 13:00:00

Name: Old St Vincents Private Hospital
Alternate: Gormans Hill Nursing Home
Description: This is the old South Bathurst Private Hospital. It spent a stint as a Catholic Nursing home before closing down a few years ago.

Old 2 Story hospital, several buildings all pretty big. Heavily trashed in parts. A fire went through here a month or so ago but it's still standing and a great explore.

Features: Several old hospital buildings, all accessible and connected by long corridors, many many rooms and halls, plenty of random stuff still lying around but much has been burned. Massive hospital vibe still. Has its own indoor pool too! One of the rooms has a vertical 5ft RCP running through it, and the room next door has a large, very solid steel "safe" looking thing.. I have a hunch it may be the crematorium or morgue.. There are motorbike skid marks up some of the corridors?!

Access: Located on Ufold Street/Eric Sargeant Drive here [GPS:-33.429382,149.5934111]. The big fenced off buildings at the

dog-leg in the road where the street "changes names".

This site is a walk in. Simply head through
the gap in the fence at the gate and peel back the poorly
nailed
plywood on one of the windows.
Locality: South Bathurst
Region: NSW
Country: Australia
Care: Neighbors pretty close on one side of the site, but not a
problem
if you just use the main gate on the dog-leg corner.

Very quiet road too.
Eek!: Floors a bit weak in some rooms, holes burned through the
floors
in others. Roof may collapse in parts.

Watch out for broken glass/nails etc.
Water Level: Dry to shoe.
Cond: Okay in parts, pretty badly trashed and burned in others.
History: Used to be the old Bathurst Private Hospital, since then
it
became a catholic nursing home. There used to be another
large
building here too but it was knocked down and they are
putting
houses there. Maybe the whole site will go soon?
To-Do: Find the utility tunnels/basement cavities. They can be
seen
through some of the large holes burned in the floor. Also,
find
out where that vertical RCP leads too.
Found: 2015 DC. First explored 2016 DC
Rating: 4.5/5.0

Modified: 2017-02-16 16:55:47

Name: Old Sydney Town
Description: Abandoned convict amusement town near Gosford.
Features: 25+ cottages, a tunnel (inaccessible), a windmill, a kiln,
massive open church like structure, a carriage, a
playground and
heaps, heaps more.
* Plus: Small 20m convict boat that resides at the bottom
of Old
Sydney Town.

Access: Drive N along F3, when nearing Gosford take the Pacific Hwy, Sommersby exit, following the Australian Reptile Park signs all the way [Sw:504E14, UBD-CC:085M05, Grg:NDR]. Jump over green fence at the front.

Reptile 2013 (Kazman) - Easy access is through end of carpark of doing Park, Go through the bush, look for a concrete slab. If concrete this at night be careful of ditches. Once passed the pathway. slab go through towards the left hand side and find the You're in.

(essentially Things to be careful about are the reception hall you're walking around the main hall/storage area. Also if you walk towards the right and step over the short razor wire fence (it's very easy) you'll be in the Reptile Park, do this at your own risk.

Locality: Kariong
 Region: NSW
 Country: Australia
 Care: Caretaker and residents. Caretaker resides at the bottom of the town, in a cottage that is usually lite up (near the kiln cottage) please avoid area. Residents reside over the lake and use O.S.T to access their property, so use stealth mode around the place, avoid being out in the open at any time. Now it is used as a wedding reception venue, so if there are heaps of cars in the carpark you may want to come back another time.

Reception hall is in the middle of the entire complex.

Recommendation is to do at night.

Eek!: Big dog's next door to reptile park that bark loudly.
 Cond: Perfect, un-touched, PLEASE LEAVE IT THAT WAY. Don't break windows or anything else on site.

Photos: www.oldsydneytown.com.au.
 History: Opened sometime after 1972 for commercial operation.
 Closed 27th Jan 2003.

Found: 2003 Millsy.

Rating: 5.0/5.0
Update: 2014-04-21 14:00:00 (Kazman) - (April, 2014)The main entry
to the park, next to the reception area is now burnt down. The
reception hall is damaged and wide open in many areas.
The park is accessible through the rubble, but you'll
still run the risk of running into someone this way, just to be safe
use the access I provided a couple years ago and then you can
use this way to come out by walking through the giant burnt
space and then walk parallel to the reception hall. Also pick your
times to do this site, early morning public holidays would mean
less likelihood of you running into anyone.
The antique carriages (those that survived the fire) are
still there next to the rubble, among some other stuff still
buried in the rubble, the reception hall still has all its
equipment, it seems that the owners no longer care about anything
barrel bolts Doors to many buildings were either kicked in or the
pliers were screwed in (easy to unscrew though, take a pair of
last with you). No wonder the grounds keeper was so pissed off
to the time. The door to the windmill is wide open and the door
in. building where the grounds keeper was staying is kicked
previously When we exited the site we ran into that loud dog
you've mentioned above, he was on the other side of the fence and
day greeted us with a single "woof" as if to say "I know what
suggested been up to, and next time your arse is mine, have a good
entry you now". Be careful of the dog, if you use the access I
dog may because that's pretty close to the building where the
lives.

Update: 2011-01-22 13:00:00 (Red) - No more caretaker. Cottage
near kiln

lake'
of
property
sort of
is dead and empty. Not sure about the 'residents by the
thing. This entire place was empty all over with no signs
light except from a building in the north-west of the
with 5-10 trucks parked next to it. It looks like some
truck depot.

are
which
and no
apart as
with the
ship.
Old Sydney Town has not been looked after and many areas
falling apart and have tape around particular buildings
have dodgy stairs and dodgy floors. No signs of vandalism
graffiti, although this place is just naturally falling
it gets weathered. The docked ship is rotting away along
gangway so please take care if attempting to access the
ship.

No sign of an active 'reception hall.'

Rating: 3.0/5.0
Update: 2008-01-05 13:00:00 (Straykat) - ***Buildings to the north bounded by chainlink fencing are an old sewage treatment facility for the hostel, circa unknown but old hard red clay brickwork on big holding tanks (à la Roosters Egg) suggests early 20th Century. Groovy early electrics, an old style pumphouse and numerous dangerous pits below the feet. Look carefully before you tread. Pumphouse has many flooded lower levels, visible due to fairly clear water. Big brick tanks are filled with big bits of gravel for filtration purposes and are therefore traversable. Definitely worth a look.

and a
Access:

Orange Abattoirs
Bindaree Beef
A large abandoned 3 story abattoir just north of Orange.
building alone is huge, with 2 separate abandoned houses
admin block, a mess hall and lunchrooms, rest rooms, first
room and a heap of office blocks/garages/change
rooms/kitchens/showers etc.
Multi story main building featuring ramps, roof cavities
rooftops, service tunnels, a flooded sub level section,
substations, water treatment plants, its own railway
drainage, many unusual cavities, basements, ladders and
machinery, massive cool rooms, lifts, and lots of the site
with meat hook racks. Also an admin blocks full of office
equipment, many separate buildings, two abandoned houses
garage.
Main building is here: [-33.2359416,149.1091919]

Main access road and gate is here:
[-33.2380953,149.1041869] but very visible from the street
and
parking here would be sus.

Best
access is to park on Clergate Rd here: [-
33.2302587,149.1036773]
and just follow the active railway cutting back to the
site.
Locality: Orange
Region: NSW
Country: Australia
Care: Lots of random holes in the ground so tread carefully,
also, look
out for trains as the railway runs right beside the plant.

Also, a large wall in one room has half
fallen down and caught on a pipe. Avoid the crooked light
blue
wall.
Eek!: Crazy cows on the site..
Water Level: Dry - Knee
Cond: Fairly good, besides the fallen wall.
History: The plant opened up in the 1920's, and by the 60's had
become one
of the largest meatworks in NSW.

It was mainly used for packing meat but received a 30
million
dollar upgrade in 2002, including a large modern slaughter
floor.

However the place was closed just
a year later, mainly due to a shortage local cattle making
the
size of the place unviable.
To-Do: Explore the place during the day, I'm sure we missed a
heap of
stuff.
Found: 2015 Darkclarky, Cactua and Ellipsis.

Name: Portland Cement Factory
Description: A complete Cement factory with its sillos, its power
station, its
quarries, trucks, laboratories, and even the houses of the
former
workers. Several building on a vast piece of land
surrounded on
one side by the town, on the other by the flooded
quarries.
Features: Trucks. Engine. Cement (!). Sillos. Many buildings. Many
houses.
A whole collection of bins. Lakes to swim if you are
brave. The
whole place has no graph, and most of the things are not
broken
into pieces... So respect the place...
Access: Once in Portland, look for the main road (High Street).
You
cannot miss it: big tall brick chimney, surrounded by
abandoned
buildings times many. (on one side the abandoned houses of
the
former workers, on the other the factory itself). Walk
around the
fence, find your hole, or climb over... If you make your
own,
patch it the best you can, the fence seems to be looked
after...
[GPS:-33.35286392304671,149.98397827148438]
Locality: Portland
Region: NSW
Country: Australia
Care: A lot of the whole place is on open ground, quite visible
from
the main road, and the main pat of town... So act with
care...
Water Level: Slimey - Dry
Cond: Pretty good

History: Use to make cement, no doesn't. One old local told us it closed down in 1989, and that the cement that was used for the Harbour Bridge came from there:)

UPDATE
Intrepid 2015
Main building boarded up early June 2015. Entire site can still be accessed but requires some climbing and wriggling. The bonnet of the red Ford is now up. The floor immediately after entering the labs has rotted to the point one of our party fell through (what is it with my expos and people falling?)

To-Do: See all the buildings. Find a way to access the top of the sillos (good luck) and access the top walkway above in the building directly across the Sillos.

Notes: Quite nice for photography.

Update: 2015-05-02 14:00:00 (The Edge) - Some funny money arrives in Portland. Greater fool?

<http://www.lithgowmercury.com.au/story/3050379/someone-still-loves-them/?cs=1464>

IN the madness that is the Sydney property market, ruins that should have been demolished decades earlier bring ridiculous prices.

In regional centres where the madness has not yet taken over one would have to wonder why anyone would bother with a euphemistically named 'renovator's delight'.

But it does happen.

Late last year when the new owners were addressing a public meeting on initial plans for redevelopment of Portland Cement Works the company representatives said the heritage restrictions made it necessary to invite expressions of interest in old company cottages in Williwa Street before any application to

Lithgow Council to demolish them.

cautioned Anyone in the audience who may have been tempted was the old dwellings virtually require total rebuild.

The cottages are uninhabitable hovels and have been an embarrassment to Portland for years.

for But there have been various interests that have campaigned their heritage protection and preservation.

the The initial reaction from the largely local audience at those meeting was that 'no one in their right mind would take on'.

How wrong they were.
See your ad here

expressions The company, AWJ Civil, confirmed yesterday that six of interest had been received.

Company director Martin O'Connell said there had been six formal EOIs, 'each warranting some consideration pending council's comments'.

of what He said the company's report was now with council but confidentiality agreements prevented specific disclosure was being proposed.

demolition Mr O'Connell said AWJ Civil is on track to commence of the old loco shed and 'bachelors cottage' by the end of this month.

These demolitions have already been approved.

this Another community consultation session is also planned for month, tentatively around May 21.

of The company can then outline demolition extents, progress recent months and further development opportunities and options seeking community input.

and "Hopefully we can make an announcement of site branding

framing at that time," he said

Name: Queen Victoria Memorial Home
Alternate: Consumption 1.0
Description: Old Tuberculosis hospital, that was recently used for public aged care, yet even more recently sold and is currently being developed for aged care.

Features: Pool, multiple wards and storage areas, caretakers house, fire fighting water tanks and the usual stuff you would expect to find in a hospital/aged care home.

Access: Corner of Stonequarry Creek Road and Thirlmere Way
Picton/thirlmere NSW 2571

Drive into the grounds and park somewhere inconspicuous. Street on internal grounds is one way (anti-clockwise). [GPS:-34.188908,150.587647]

Locality: Picton/Thirlmere
Region: NSW
Country: Australia
Care: Part of the site is active. Should be blatantly obvious which building. Appears that some of the buildings are freshly abandoned

(Early September this year) and a few used by military cadets for storage.

Water Level: Dry - Death
Cond: Between freshly abandoned to long forgotten
History: Original use was as the first Tuberculosis Sanatorium in Australia, opened in 1897.

Open plan site was sold and transition to the new, not for profit owners, RSL LifeCare, was done over the period of this year.

New ward is currently used for aged care.
Old wards/rest of site are apparently up for development and left pretty much empty or used for storage.

Card carrying (or similar) members will yield best results.

To-Do: Pools closed !
Access buildings that were not available to card carrying members.
Notes: A LOT of the buildings are card carrying (or similar devices)
members access only.
Some buildings may still be used for storage.
Don't fuck with the big concrete water tanks (serious, they're
for fire fighting purposes only)

Country: Australia
Care: This place is in Redfern, and from the syringes and burned spoon
we found is used by local for not very legal activities.
While exploring we found an old guy hidden in a dark corner, he was
hiding because scared we were some dumb punk who will cause him
trouble... So be careful, do not explore alone...
Eek!: Syringes... careful where you walk...
Water Level: Slimey - Dry
Cond: Pretty good
History: The Hon. PATRICIA FORSYTHE [12.09 a.m.]: Today as I read the
Sydney Morning Herald article about some of the great and powerful men of Sydney and their desire to save St
Vincent's Hospital it occurred to me that one of the great hospitals of
Sydney, the Rachel Forster Hospital, will not have that support
because it has principally been a hospital for women. It was

built for women, for the advancement of women, and to serve women doctors. Honourable members cannot allow the demise of that hospital without fighting for its retention. To understand why it is necessary to retain the Rachel Forster Hospital is to understand its history. In 1922 the hospital was founded by six women who, in those days, could not complete their training in Australia because it was not considered proper for them to treat patients in a public hospital. They had to complete their training overseas. Having done so, they built the hospital and named it after Lady Forster, the wife of the Governor general. The hospital has a long history of providing health services for women in New South Wales, but in the 1920s and 1930s it opened a venereal diseases clinic which was run by Dr Dalyell and combined medical care with intensive family counselling. A rheumatism clinic established by Dr Mary Bertram in the 1930s gave sophisticated treatment to children. In the 1940s the Diabetes Association was founded by the Vice-President of the Rachel Forster Hospital, Ms Ruby Board. Miss Board was the driving force behind the establishment of emergency diabetic clinics in five Sydney hospitals. In 1955 Dr Marjorie Dalgarno began a mammography clinic and breast research unit at Rachel Forster Hospital, the first unit of its kind in New South Wales. An arthritis clinic which was established in the 1960s specialised in bone and hip replacement. At Rachel Forster Hospital 75 of the 89 beds are devoted to arthritic and orthopaedic care. Facilities at the hospital include a hydrotherapy pool and care is provided by a team of physiotherapists, a social worker and an exceptionally dedicated team of visiting medical officers. Rachel Forster has a low infection rate in hip replacements and bone and

joint surgery. If Rachel Forster is to be transferred to the Royal Prince Alfred Hospital, as has been suggested, that low infection rate will not be maintained. Rachel Forster Hospital buildings are old but the hospital provides orthopaedic services for women. I and many other women would be devastated if the services and beds which are provided at that hospital are lost. Rachel Forster Hospital is the last public hospital that specialises in bone and joint treatment in Sydney since Ryde specialist unit was closed to public patients earlier this year. Rachel Forster Hospital is currently responsible for 1,200 of the 1,800 orthopaedic operations that are performed each year. People waiting for elective surgery will simply go on to waiting lists if Rachel Forster Hospital, a most important institution for elderly people needing joint surgery, closes. I am delighted that my colleague the honourable member for North Shore has taken such a high profile on this matter. I hope that all women members of the Legislative Council realise that this matter goes beyond party politics. Rachel Forster Hospital has a special place in the history of the treatment of women. It cannot be allowed to pass out of this State's history. If great and famous men of Sydney are willing to fight for St Vincents, the women of are willing to fight for Rachel Forster. That wonderful hospital has played such an important part in the history of New South Wales that it cannot be allowed to simply die because of the decision of one doctor - a Minister - and of the Government. The decision to move to the inner west will result in the loss of a purpose built intensive care unit.

To-Do: Find maps, and check if Yes or Not there was a morgue on this

hospital... Damn it!!!

Name: Ratter's Stash
Alternate: Usyd Meth Lab
Description: Seldom-used storage space under the floor of the Pharmacy building at the University of Sydney.
Features: Boxes and boxes and BOXES of old chemicals and laboratory glassware and students' reports. Lots of interesting junk. Unfortunately not quite standing height.

torch The location itself has fluoro lights, but you'll need a
for entry/exit.
Access: South of Science Rd, between the northwest corner of the
Quad and the east edge of the Pharmacy building, is a little leafy courtyard. At the southwest corner of the courtyard is a
door [GPS:-33.8857323,151.1880532]. To the lower-right of the
door, down in a little trench alongside the adjacent buildings,
is a hole that leads to the space under the building.
Enter under-building space. Directly ahead of you is an illuminated square hole in the ceiling with cables leading
into it. This is the entrance to the location. Scramble
over/around the pipes on the left, then hoist yerself up.

Exit: back the way you came.
Locality: Camperdown
Region: NSW
Country: Australia
Care: This is immediately beneath an active building. Don't make too much noise.

Pipes and cables near the entrance are not load-bearing.
Watch where you put your feet, especially while descending.

Don't break the glassware. Don't eat the chemicals.
Eek!: Entry to this location is via a courtyard, which in turn is reached via the buildings surrounding it, which apparently get locked around 6:30pm on weekdays. If you emerge to find yourself trapped in the courtyard, call campus security on 9351 3333 and tell 'em something believable. Or you could try climbing onto the roof (see below).
Water Level: Dry - Dry
Cond: Old and dusty
To-Do: Just before you climb up into the storage space, there's a concrete slab in the floor, with an ancient piece of wood propping it open a crack and a faint breeze wafting out.
Find out what's under there.

On the roof above the access point is a series of ladders and walkways leading up to the Pharmacy / Bank building rooftop. Get up it!

Name: Red Light District
Alternate: XXXX Brewery
Description: Heritage-listed brick building on Milton Rd known as the
XXXX
Brewery is a land and landmark XXXX Brewery on Milton
Road
featuring the XXXX red neon sign mounted on the top of the
building. Brisbane's best topside.
Heritage-listed Brisbane landmark on Milton Road
Features: Rooftop area w/ the XXXX red neon sign, original
brewhouses w/
copper stills, grain/hop stores, grinding mills,
fermentation and
maturation vessels, rooms with a labyrinth of pipes,
filtering
area, laboratories - basically everything you'd expect to
find in
a brewery. All of this equipment ranged from in use and in
decent
condition, to completely inactive and in disrepair.
Access: Access to the main brewery building is via a loading dock
area in
the South-West corner of the site located here
[GPS:-27.468295,153.004641].
Where the South-West corner of the brick building meets
Milton
Rd, follow the bitumen drive way on the left hand side
marked "St
Francis Theological College Entrance" until you find
yourself on
the outside of brewery site perimeter fence, looking in
towards

between on the diagonally to the and
the loading dock area. N.B.Don't walk up the driveway
the brewery side of the fence line as you'll be spotted by
security cameras.
After climbing under/over the fence, make your way
towards the loading dock and walk up the gantry/staircase
level above. Open up the door on the side facing Milton Rd
voila, you're in. Exit via same way.
Locality: Milton
Region: QLD
Country: Australia
Care: Look through the roller door on Milton Rd to make sure the
loading dock area is clear before entering.
Eek!: Site is semi-active, we've occasionally spotted workers
using the building as a thoroughfare to reach the more active side
of the brewery. Keep voices low, look around corners before
entering rooms etc. Some sections are more active then others.

Care: Mind for squatters
To-Do: Try and get into similar but better tower blocks nearby.
Found: 2005 Siologen
Rating: 2.5/5.0
Created: 1995-12-31 13:00:00
Modified: 2003-12-31 13:00:00

Name: Roofless Deception
Alternate: Another Departing Bastion Special

Description: Multi storey abandoned office block, double stairwells, ambient lighting. Would make a great sublet or squat. Numerous offices, mostly empty.

Features: Rooms. Ambient lighting for photography. Lift room, yet accessed roof level. Giant old school safe on near to top level.

Not much else unless you get onto roof. Two adjoining buildings.

Access: 163 clarence street next to red cross building, look for open glass doors, through door back left of room, and through here again door down left side. Floors have dual staircases, one will take you to lift room.

Locality: [GPS:-33.865948,151.20514] Sydney CBD

Region: NSW

Country: Australia

Care: basement level carpark enters into shared active red cross carpark. Has exit door, we left via here discreetly. Bdid torches at night a no no.

Eek!: No signs of squatting but at night may be different.

Water Level: Slimey - Dry

Cond: Bit water damaged, otherwise good.

History: Dunno. Was offices, now they aren't. To be demolished for appartments and shops eventually.

To-Do: Get on roof and take pics.

Found: 2009 Bastion & Hatsumi Jun 17

Rating: 2.0/5.0

Update: 2010-05-20 14:00:00 (Hatsumi) - this has been boarded up etc...

but it acess has been pretty much out of the question for a while

2010 remains empty. I still expect red cross will move end of

the and some major development take place covering that end of block.

 Name: Sans Pool
 Alternate: Sans Souci Baths
 Description: Disused swimming pool entry building and change rooms.
 Features: Changing rooms, original signs and advertising, old
 relics,
 ticket booth/entry gates, small gym.
 Access: Water St, Sans Souci. Enter through a broken window on the
 eastern side of the building. [GPS:-34.00216,151.125404]
 Locality: Sans Souci
 Region: NSW
 Country: Australia
 Care: Water Police building directly next door.
 Best done at day.
 Water Level: Dry - Dry
 Cond: Disused but not entirely trashed.
 History: 1930-31 The dilapidated swimming baths were demolished and
 rebuilt with a sharkproof swimming enclosure, art deco
 baths,
 dressing sheds and diving boards. Material dredged from
 the
 Georges River was used to reclaim an area of Sans Souci
 Park,
 which was bounded by a sea wall.

 1933 Sans Souci Park was dedicated for Public Recreation.
 A new
 bathing pavilion and dressing rooms were constructed.
 Council
 carried out land reclamation, constructed a promenade, sea
 wall,
 retaining walls, and steps in the vicinity of the
 pavilion.

 2002 Council called for Expressions of Interest to
 redevelop the

former bathers pavilion into a restaurant. Tenders were
called in
2004.

Name: SAO No More
Alternate: Say Oh Oh Oh!
Description: The old SAO tower still standing, only to be climbed!
There's
also a rooftop level which definitely shows its age and
pretty
much abandoned. One of the restaurants from downstairs has
dumped
a bunch of crap in one of the rooms.. please don't touch
anything! Seriously.
Features: Tall tower, pretty views, enough said!
Access: Park on George St, North Strathfield. Walk up near the
tower,
you'll see a carpark directly under it. Walk in whichever
entrance you choose (stairs are easiest), then once up to
the top
level you have two options.
stairs
A - The easy way. On the western end, locate the set of
going up, if the door is unlocked (usually locked with a
padlock).. go inside, turn right, out the window.. walk
carefully
towards the tower :)
of the
B - The slightly harder way. Walk towards the northern end
carpark top level. Locate the stairs going up. If door
unlocked
(if locked, cards help :P), head on up and slide the top
door
open. It's noisy!
[GPS:-33.863211,151.088677]
UPDATE RABBIT 2013:
Alternate entry here: -33.86205,151.088839 up stairs and
through
unlocked window and access rooftop via south west room
once
inside.

of Access stairs either via bakehouse lane or go to top floor
carpark and head to north east exit which comes out onto
bakehouse lane.
Access was gained here by ClanGirls 2013.
Locality: North Strathfield
Region: NSW
Country: Australia
Care: Noisy corrugated iron roof, tread with care as some parts
are really old. There's an active trainline next to it as well
as a fitness first building with gym members always there,
don't use torches and do it when the sun is going down.
UPDATE RABBIT 2013:
Caution: There is a dance studio directly opposite stairs.
Wear shoes with plenty of grip! Have fun on the dodgy ladders.
Eek!: The tower itself has been rusting for quite a while. It's
probably safe, but I'd still be very careful if I were
you.

Name: SMEGGS
 Alternate: SCEGGS Moss Vale Girls School
 Description: SCEGGS girls school in moss vale. Closed some time in 1974
 (although there were some paperwork I found from the 80's
 or
 90's). Property was bought back in 2012 but buildings left
 abandoned. Hall is fairly trashed. One building (probably
 staff/facilities block) has a couple of rooms with fire
 damage.
 Features: A few buildings on site including a school hall, classroom
 block,
 science labs and some smaller buildings.
 Access: Jump fence on suttor road moss vale. Then walk up to
 school but
 avoid the road [-34.532311,150.3830722]
 Locality: Moss Vale
 Region: NSW
 Country: Australia
 Care: Local kids know this place. Can see this place go downhill
 very
 fast so my initial rating of 3 will obviously suffer as a
 result.
 Probably will more see this as a 2 in the next 6 months.
 Eek!: Fire damage in building next to hall (office/amenities
 block).
 Rumour has it was started in Sept/Oct 2016 so had to rush
 to get
 here and check.
 Classroom block at the back has
 water damage and roof collapsing.

Water Level: Dry
Cond: Little graffiti but some rooms trashed and fire damage in couple of rooms.
History: THE sleeping beauty that is the former SCEGGS school at Moss Vale needs a prince with a \$10 million kiss to reawaken it.

The Church of England girls school, which was established in the Southern Highlands in 1906 to attract, as one historian put it, "more delicate girls who could benefit from the bracing country air", has been closed for nearly 40 years.

"It's still a stunning 38-hectare property with well-designed buildings that were built to last," Robertson real estate agent Carl Hilder said.

Former students of the campus include Jill Wran, wife of former NSW premier Neville Wran, and wildlife and botanical artist Helen Maloney.

The property, with its rich history of education for privileged girls, was also the site of a horrifying event in 1962.

One of the state's most notorious killers, Leonard Keith Lawson, burst into the school chapel and took several schoolgirls hostage. The siege occurred less than 24 hours after Lawson had raped and murdered a Manly teenager in his flat at Collaroy after luring her there on the pretence of painting her portrait.

In a struggle at the school as he was trying to escape police, Lawson's gun discharged, killing 15-year-old Wendy Sue Luscombe, who had been sitting in one of the pews.

Lawson was sentenced to life in prison and died in Grafton

jail in 2003, aged 76.

well
a joint
Property.
"The
tragedy shattered the community because Wendy's family was
known and she was an only child," said Mr Hilder, who has
listing on the property with Bill Bridges from Ballard

The school closed in 1974 due to
financial difficulties.

The 190
students at the time were guaranteed places at SCEGGS in
Wollongong and Darlinghurst.

proceeded and
Twelve years ago palm sugar producer Steven Lam bought the
property for his country retreat but the plan never
he is ready to move on for offers above \$10 million.

Bowral,
Mr Hilder said the buildings on the property,
which date back to 1930 when the school relocated from
were a bit dusty but still in good condition.

Name: The Eldon
Alternate: The Elrington Guesthouse
Description: A large, heritage listed 4 storey building (plus basement
level),
cut back into the sandstone on Lurline St, Katoomba. Nice
views
out over Kingsford Smith Park across valley to Leura. Was
used as
an inter-war era guesthouse and has a lot of history.
Several
buildings, attached by corridors and basement levels.
Features: Many, many rooms (63 in fact), ballrooms, kitchens,
fireplaces,
old wooden staircases, amazing views, lots of sandstone, a
basement level with some small utility tunnels and
cavities. Some
of the rooms have obviously have been used for Satanic
rituals
and such.
Access: Located at 9, Lurline St, Katoomba.
-33.7134748,150.3125569

Best accessed from the this alleyway on
Katoomba St: -33.7135417,150.3118327 then jumping back
fence and
sneaking around and crawling into the basement

window here: -33.7135551,150.3124604
Locality: Katoomba
Region: NSW
Country: Australia
Care: Broken glass, rotten wood in parts, possibility of
squatters and Satanists. Huge bloodstain in one of the hallways too.
Eek!: The place is being watched closely by the neighbours,
trying to keep out squatters and vandals.

The lady in the block of flats next door is always
checking on the place out her windows and will call the cops, have
seen her floating around nearly every time I've attempted to visit
the place.

Water Level: Dry - Slimey
Cond: Rough, the place is on its last legs in parts.

Name: The Faculty Fuck Den
Alternate: Thespian Bongers
Description: Attic spaces and some kind of small storage room in the
university Teaching Faculty building.
First room is full of shit old dead props but boxes of
books of old plays and such.
Features: Room full of crap, didn't go through it, plenty of copies
of books by Tennessee Williams and other writers, some old
masks,

bits n pieces. Actually plenty of old books but I didn't
spend time looking, about four or five boxes worth and some
other stuff.
Access: Go into Old Teachers College building
[GPS:-33.886654,151.186208], security on site is shit
hopeless, I spent the last week going just about anywhere I wanted,
just look like a student (which is shit easy) and just go for it.
Head to top floor, the whole top floor goes in a large
circle as building has big quadrangle in middle.
staircase Keep fucking around until you find a small six foot
is bi with a dwarf sized door at the top. This is ya shit. Door
locked but unlocked - handy.
door Close door behind you, light switch is immediately above
itself inside.
up in From this firs room there are small wooden stairs leading
area, but attic space, this goes above a hall below. Modest sized
- also not much else to do but walk on the rafters and get about
space another small set of wooden stairs go up into more attic
roof in but ultimately just goes length of building inside the
various directions.
and you Recommend trying around 5pm when the place chills a bit
for ages could go unnoticed - I went at 7pm and I walked building
with not a soul anywhere.
Locality: Camperdown
Region: NSW
Country: Australia
Care: Walk on beams, keep quiet. Best not to fall through roof,
likely to end badly.
Eek!: Asbestos signs, but then isn't there always?
Water Level: Dry - Dry
Cond: Old

Alternate access next floor up through window. Requires
hardcore characteristics. Be careful.

Locality: Clifton
Region: NSW
Country: Australia
Care: Residents on either side of property. Don't be seen when
walking on top floor southern and northern sides of building. You
may be seen through windows.
Watch your torches.

Eek!: Random holes in floorboards.
Water Level: Dry - Dry
Cond: Guttled and graffed
History: The Imperial was licensed by thirty year old Wollongong
baker, Alexander Osborne in April 1884. From the day it opened
its doors the bar was a sanctuary for coalminers. The Imperial was
Clifton's second public house, joining the Clifton Inn
which had been the village's original watering hole since 1879.

The Imperial Hotel was purchased at auction in 1910 by
Reschs Brewery Limited. It was then demolished and replaced by a
large two-storey brick structure. The architect of the new hotel
was Mr Redgen of Sydney and work on the building began in 1911. A
savage storm ripped the roof off the hotel in 1913 causing an
estimated two thousand pounds worth of damage.

The Hotel remained essentially unchanged until the 1970's,
when the front timber balcony was replaced with an awning, the
bar extended, and a concrete balcony was constructed
overlooking the ocean. (Illawarra Mercury 26/12/2001, 11/2/2000; City of
Wollongong Heritage Study 1991; Roberts, 1991).

To-Do: Squat in sea view room... would be awesome at sunrise.

Access: #1, Go to the floor 4A of the carpark on Quay St, via the
external stairwell closest to the toll booth.
Access the floor that is directly above a wire meshed
section on
the Western side of the building.
Climb over wall just immediatley above the brown sloping
tiled
roof. Climb down wall.
If Access #1 and #2 are locked, to access plant room you
must
card door at access #2.
#2, Enter the carpark on Thomas St, go to level 3 of the
carpark.
Walk to the eastern side of carpark, see
large horizontal ventilation ducting. Look for the blue
door
marked "PELITON", it is unlocked. The door is
directly next to a open section that overlooks the angled
brown
tiled roof.
GPS:-33.88167,151.203144
Locality: Sydney
Region: NSW
Country: Australia
Care: Onsite 24hr manned Toll at bottom of carpark on Quay st.
Easily
visible from nearby buildings. Active

apartment overlooking both carparks.

Eek!: Do not climb down wall onto the northern face of the tiled roof.
Water Level: Dry - Dry
Cond: Good
Notes: If locked, card door at access point #2 and leave door at access point #1 unlocked and slightly ajar.

Name: The Sound of Mucus
Alternate: The Purple Onion, Ken's of Kensington
Description: The sauna's alive with the sound of mucus

It squirms with the sperm of a thousand men

Through the walls they fill their arse with a throbbing member

And the unknown man shall come in his glory

Features: Indoor pool, spa, sauna, 70's smokers lounge, canteen, roman bathhouse themed steam room, glass floor on second story (perfect for up-towels), torture chamber complete with St Andrew's Cross and dungeon door, used condoms, bang rooms, a cage, suspicious stains and so many glory holes!

Access: Located at 81-85 Anzac Pde Kensington
Access via the gentleman's entrance in the rear. Find the unmarked wooden gate between 59A and 61 Boronia St. Walk up the garden path. Beware of the voyeuristic neighbours who have a full view of the yard from their enormous windows. The door at the bottom of the stairs is unlocked and can be pulled open. The alternative is to deal with the padlock on the front door (Anzac pde entrance)

Locality: Kensington
Region: NSW
Country: Australia
Care: Nosy neighbours
Eek!: This building has a high sperm count
Water Level: Dried out.
Cond: Impeccable condition
History: This place is oozing with history.

Originally known as the Purple Onion, it opened
is 1963 as Sydney's first gay bar. This was at a time when
homosexuality was still illegal in Australia. Cross
dressing was
legal as long as you wore men's underwear.

Beatrice (David) Williams took over in
1965 and staged glitzy, lavish drag shows. Including
legendary
show, The Sound of Mucus. How fabulous! Less fabulous was
the
local police's penchant for violently arresting drag
queens and
punters as they left the venue. (These same police could
often be
found, off-duty, in the club enjoying a show...).

In 1972 it was converted into a
gay sauna, with the stage being replaced by a swimming
pool. It
was known as Ken's Karate Klub and also Kensington Karate
Klasses, in an attempt to explain all the vinyl 'crash
mats' and
any strange noises that escaped. Later on, it was known as
Ken's
of Kensington (being right next to other gay haunt,
Peter's of
Kensington).

In
2010, transport minister David Campbell was famously outed
when
Channel 7 broadcast footage of him leaving the venue.

Name: The Toothless Horse
Alternate: Tooth and Cie Malthouse
Description: 2 massive buildings and a house on a nice grassy hill with
a river in a middle.
Features: The first big building at the entrance is composed of an
alignment of several structures attach together.
The first one contains on its lower level piles of wooden
doors, broken chairs,
bathtub, and all collection of various object (piano,
lights, cabinet, games) Up a level, a nice perspective
with many pillars,
the and then the higher level with a nice view to
entrance.
up, The next attachment is almost empty. If you look
you will see
a set of stairs hanging in the air, stopping at
a close door.
the These stairs will give you access to the top of
sillos. you
locked can access those stairs by climbing over the
door (through
building. the roof) on the top of the first part of the
to the The following attachment is the sillos. Access
top, cf
side above, access to the bottom of the sillos by
window at
ground level.
Access Then comes a long room of sandstone and pillars.
to its
roof by the dodgy stairs.
Then comes to warehouse full of equipment,
rusted

conveyor belt,
 big gears, and all industrial stuff. The two are
 separated by the
 remain of a train line, with a turning point
 leading to
 an
 industrial scale by the side of the building
 (railroad
 side).

 Before crossing the Bridge, remains of two
 structures,
 only the
 beams remains.

 Cross the bridge (the first one near the
 entrance). A
 small
 building stands, the bush toilet.

 Up the hill stands the second massive building.
 Careful of the stairs, some steps are ready to
 give way
 under the
 inattentive explorer.
 Access to the far top gives a wonderful view.
 Nice
 round window
 on on side.
 On the lowest level stands a big bucket on a
 rail. Have
 fun, you
 can climb in:)

 Finally, on the same level of the hill, facing
 the
 round window
 is the house. Little gazebo in the garden, sofa
 on the
 veranda,
 lovely stove in the kitchen, if you bring your
 ping
 pong balls,
 you can enjoy a game.
 Access: From the Old Hume High Way going south, at the entrance of
 Mittagong, turn left onto Ferguson Crescent. Pass the
 Train Line,
 and park on the field on the left. Retrace your path
 walking,
 pass the wobbling wooden bridge and there on your left an
 old
 road opens. take it, walk about 25 meters you are at the
 entrance. No fence to climb, no sign of trespassing...
 [GPS:-34.447521,150.459512]

Locality: Mittagong
 Region: NSW
 Country: Australia
 Care: Some floor are a bit rotten, and could give way.
 Especially when you reach the upper level. Some stairs are very dodgy
 (look at the support timber if you have a doubt)
 Eek!: Some rotten steps, especially one in the man building (the
 one with the name of the company set in stone)... The chest
 wet indication is if you are brave enough to dive into the
 pools:)
 Water Level: Dry - Waist
 Cond: Quite untouched and almsot no graphs. Keep it that way.
 History: Use to belong to the Tooth & Company Ltd. Established in
 1835,
 1905 Tooth & Co was incorporated in New South Wales in 1888. In
 the Company acquired the Mittagong Maltings. The Malthouse
 & Tank for Messrs Tooth & Company at Mittagong was built in 1914
 (if we trust the stone of the Company on the main building).
 Architect: Mr. Timothy Honnor F.R.I.B.A. Builders: Robt. Wall and
 Sons In 1983 Tooth and Cie was acquired by Carlton & United
 Breweries. No mention of when the building was abandoned. Nor of what is
 plan for its future.
 Additional Info by Scarecrow: The main building (the one
 up the hill) was under redevelopment for housing (you
 will notice on the
 lowest level the new layer of bricks, some beams
 are pretty new,
 iron staircase with no steps, etc) The project
 was abandon.
 Also, there was a 3rd building on the site taht
 was destroyed by
 fire in 1965
 To-Do: Find access to the pictures of the active site that are in
 the archive of the PowerHouse Museum.
 Notes: Perfect place for a romantic date, with the river in the
 middle

Found: Bastion, 08-2008
Rating: 5.0/5.0
Update: 2015-02-21 13:00:00 (Vox) - A few local kids warned there are three homeless folks in residence at present in the buildings nearest the train line. Be careful if visiting alone/at night etc. Heard them, and saw a couple of them briefly from a distance. There's also a really nice café & craft place called "Sturt Gallery" about one block closer to Mittagong inside Frensham Private School. Many items worth >\$1K... a little highbrow, but a very pleasant place to stop in for coffee :)

Update: 2011-02-18 13:00:00 (Hatsumi) -

Created: 2008-08-28 14:00:00
Modified: 2015-05-18 14:00:00

Name: The Widow Maker
Description: This is a long abandoned and severely left to rot 4 story water slide ride with two steep 5ft fiberglass slides/pipes. It's located behind Panthers/Cables in Penrith, one slide is a steep, multi turn corkscrew shape. The other will break your neck.

Features: This place is so overgrown, it's literally hidden in its own little jungle!
A very, very rusty 4 story tower leading up to a deck with twin 5ft slides. Some steps completely rusted through.

Ladders, shit to climb, and pipes to crawl through.

The right pipe takes a sharp multi turn corkscrew descent before throwing you out into a lantana bush, left pipe has been removed near the top and leads

top with to a 3 story fall. Both slides are poorly blocked at the tin sheeting.

Also has its old
pumping gear room/first aid building next door, but this
part was a bit too visible to attempt during the daytime.
Access: Water slide is located here: [GPS:-33.756917,150.673730]

To get to it, park in parking area at Tench
Reserve on the Nepean River here: [GPS:-
33.758768,150.669079]

Walk 170m along Jamison Road till you
find the locked heavy duty white gate on your left here:
[GPS:-33.7589241,150.6711468]

the Head through gate, and follow the path around the back of
water ski park till you see the overgrown area with the
leftover pipe sections scattered around, head through the hole in
gate.
Locality: Penrith
Region: NSW
Country: Australia
Care: The top of tower is visible from Cables/Panthers. There
are a few brick pits scattered around where tension cables were
connected too, some quite deep so definitely watch your step..
Eek!: **Left slide leads to a guaranteed broken neck**

Some of the steps leading up the tower are
completely rusted through so be VERY careful where you
step.

Some of the fiberglass pipes are
looking pretty dodgy also but I made it halfway up the
corkscrew without any issues, although there are some sharp/jagged
edges at bottom of the corkscrew pipe where it has been damaged.

The place is a jungle, heaps of spider webs
and probably snakes too.
Water Level: Dry - Dry

Cond: Poor, this can definately not be salvaged.
To-Do: Actually slide down this thing from the top! Access the
pumping rooms next door too.

Modified: 2006-08-24 14:00:00

Name: Toronto Power Co. Hydro Power Plant
Alternate: ToPCo
Description: Amazing old plant, built in the 1890's in a neo classical
fashion.
Features: It looks like an Art Gallery rather than a power station,
its rear half housing a deep intake forebay, fed by the
Niagara river, with archways out to the external river penstock
pond; its front half houses the generators, control rooms and other
ancillerey areas. Beneath the Generator Hall is the
basement, switching gear, transformers and the generator bases.
Beneath this lower level is the 8 storey deep wheel pit which sits
as a rather scary testament to the detrimental effects of
rust.
Access: The plant sits aside the Niagara River, 100m north along
Niagara

window on Parkway from Dufferin Isle Rd. Entry is via a broken
present, the river side at the most upstream end. However at
may be renovation works are in progress so numerous other ways
found to enter. [Mapart: 748 Y48]
Locality: Niagara Falls
Region: ON
Country: Canada
Care: Theres a security guard onsite during renovations. The
Wheel Pit is potentially dangerous, most carwalks have rusted thru
and the staircases are slowly following suit. Be VERY careful!
Water Level: Lower levels of Wheel Pit vary, ankle to knee
Cond: Upper parts are in very good condition, the wheel pit
however is very unsound, rust having utterly devastated pretty much
everything.
To-Do: Hope the plans to convert it into something useful fall
through!
Found: Do Confluence... one day.

hostel, High visibility from the apartments on either side of the
Water Level: though once in the courtyard it's fairly private.
History: Dry - Dry
from As of November 2011, Google maps shows cars parked in the
grass in driveway, but the building now appears obviously abandoned
up a the street. There's graff all over the front facade. The
To-Do: the courtyard is still maintained. Construction fence went
floor. Find out what is behind the sealed door on the second
it. A Someone has liquid nailed the frame and stuck the door to
ceiling couple rooms over there are some suspiciously missing
Found: tiles where they probably climbed out.
Rating: 2011 Majestic, Red, Raptor
Update: 3.0/5.0
hostel 2016-02-02 10:03:32 (Majestic) - Update Status: Gone. The
building has been demolished and there's now half an apartment
already constructed on the old site.
Update: 2012-11-11 13:00:00 (Majestic) - Front facade has been
repainted to cover the graff. The window glass has also been painted
from the inside to cover graff. Still no sign of being
demolished or rebuilt.

Name: Uncle August's Hideout
Alternate: Former Irwin and Sheehan Packaging Site
Description: Medium sized packaging plant and office building with
"weird" contraption inside which was formerly used by Irwin and
Sheehan.

Currently owned by Crown Group
who are planning to develop the site into apartments.

Name taken from George Grosz's "Remember
Uncle August the Unhappy inventor" to reflect the fact
that like the machine, I also no clue what this painting represents.
Features: Big machine in room as you turn left after entering. Large
and more modern warehouse spaces to the right. Office with
1930-40's decor, but they are pretty trashed now.
Access: On 20 O'Dea Avenue Waterloo. -33.9034629,151.2099472

To access, gently pry open the left side of the
double fire doors located on the right of the roller door
and behind the white demountable office which has been ripped
from its hinges. Make sure you bang it back once you leave or
enter so no one knows.

Locality: Waterloo
Region: NSW
Country: Australia
Care: Area is quite busy during the day. Recommend doing on
Sunday morning or night. Not sure about activity on other days.

Eek!: Evidence of possible squatters (??) and tagging near the
entry point.

Cond: Good.
History: Irwin and Sheehan has had a long occupation of this site
until

Sydney's drive for urban renewal via residential
development forced them to move on.

Name: Unknownst
Alternate: The Coal Room
Description: MPL = 30M TEL = 30M - not including escape tunnel which
may go further. A strange room/tunnel thing with old machinery
still attached to the roof. Seems to be part of old colliery
that existed in area but its function is unknown, hence the
name.
Features: Old machinery attached to roof, a bike, some odds and
ends, lizards, escape tunnel (read 2ft high heading upwards)
is a crawlable possible for the hardcore amongst us....who
knows where it goes ?!
Access: Upwards yonder hill above entry to Your Taxes, follow bush
track up to old road that has wooden beam across it, a little
further up see concrete structure sticking out of hill. Thence see
bricked up entry with small iron gate (open when we
visited) Go good explorer !!
[GPS: -34.271297,150.954262]
Locality: Wombarra
Region: NSW
Country: Australia
Care: New house built in area just above structure, read, 40m
away.
Entry is from bush and they won't know you're there...we
didn't know they were there either until walking further up from
entry. Make sure to return whence you came. Eek!: Escape tunnel
may be confined for some distance....be aware of air quality if
you're hardcore enough to attempt

Water Level: Dry - Slimey
Cond: Excellent.....machinery not so
To-Do: Be a nutter and check around bend in escape
tunnel.....collect
lizard for pet.

Name: US Courthouse and Post Office
Description: An abandoned courthouse undergoing restoration. Mostly
guttled,

but signs say they are restoring it because it has
 historic value.
 Four stories plus a basement. Literally next door to a
 well-known urbex location.

Features: Best stuff on the top floor: two old-timey courtrooms and
 a library. Construction evident; hopefully they'll add more
 cool stuff as the restoration continues. Rooftop easily
 accessible. The courtrooms are really cool. Straight out of a movie,
 with a little touch of abandoned added on for fun :)

Access: So easy I feel silly explaining it.
 Corner of Julia and Monroe St, Jacksonville.
 Multiple broken windows provide easy access, but if you
 can't be bothered, there's a stairwell going down to the basement
 to an entrance which has no door. Seriously. Nothing. You
 just walk in.
 You do have to jump a fence before getting to the broken
 windows or open doorway, sadly.

Locality: Jacksonville, Florida
 Region: FL
 Country: United States of America
 Care: Some large holes which will let you fall all the way
 through the building if you climb over the guardrails and jump.
 Eek!: Americans. Oh God, so scary.

Water Level: Dry - Dry
 Cond: abandoned/being restored
 History: Appears to have been abandoned because they built a
 bigger, better version next door. Signs claim they are restoring
 it, but since I only got here yesterday, I don't know how quickly
 they are going about it.

To-Do: Get into the Ambassador Hotel, which is directly next
 door. It's a more famous urbex location, and that's where we were
 originally going when we spotted this. At the time, the Hotel was
 completely boarded up. I'll try again later, to see if
 any helpful graffers have opened it for me

Notes: I took some video. I'll edit it, upload it, and include
 the link here.

Name: Vincent Tower
Alternate: St Vincents Hospital
Description: Hospital building, wards fairly empty, wicked rooftop 360 view.
Features: 13? levels, wards, reception, theatre, bed, crutches, labs, lights, various random medical tools/utensils etc....
Access: Tricky. The window was smashed recently making entry harder & it's boarded. Security now patrols to the door. Near intersection of Burton & West st there is a door at the rear of this building which you cannot see but look for a light walkway between two buildings, the other is active. Entry #1 from barcom road below, over green fence, walk under the pedestrian walkway, along back wall of substation, hole in wall where you will arrive on ground level then up three small flights of stairs to door. Entry #2 over fence right on burton st, onto air con duct which is starting to crumble and advise is one person on it at a time, up stairs to door. #3 get someone inside, open blue door at side of building right under the cross.

[GPS:-33.87988439374242,151.22204840183258]

UPDATE: Hole in the whole seems to have been patched up by wooden plank. Avoid breaking it in fear to find more security on site. From top of the walking path, climb down the wall, go

over pipes
on your right. Then straight to stairs and up
you go.
Locality: Darlinghurst
Region: NSW
Country: Australia
Care: Security patrol N.B 30/12 7.17pm, 31/12 no patrol around
this
time.
LEVEL 14 or was it 15? alarmed, upon opening
door an
alarm sound
went off, we left immediately.
Another (active) building is connected to this
one via
a walkway
which you can see from outside. However
'Construction
site'
notices hang on several floors nearing the
middle which
hook up
with a stair well to the bottom exiting at the
construction site
N.B has not been done/used and probably not best
to!

UPDATE: Feb 2009: no security patrol observed on
the
few times
this was done. However, signs of passage has
been
observed.
Eek!: Smaller groups preferable, sound travels in empty hospital
buildings; you can hear people on the street
quite
clearly, quiet
on the lower levels in case patrol happens.
Water Level: Dry - Dry
Cond: Excellent, fairly empty, rooftop view.
History: Built around the 50's but unable to find much info on it
as yet.
To-Do: There is a room with boxes of shirts on level 12 I think,
have a
shirt throwing fight with them. It's fun.
Notes: Awesome view of the fireworks on NYE.

Name: Wangi Wangi Power Station
Description: Massive disused structure, twice the size of White Bay.
Features: Totally gutted, enormous Boiler house, 18 stories high. Equally large Turbine Hall, huge long conveyor tunnel under rooftop. 200m long roof, with lift rooms. 3 climbable chimneys 70m+, with nice easy tiered ladder system and circular platform at top.
Access to roofs of Boiler house, Turbine Hall, Admin and Dust Extractor.
Access: Wangi Point Rd, [Sw:NDR, UBD-Nc:176P04, Grg:NDR, GPS:-33.0662915881,151.574507025]. Follow fence around to back of Power Station land, Squeeze under fence. Walk towards canal, either find bridge, or wade thru it (its only ankle deep), climb fence on other side of canal. Walk around to other E side of building to base of S chimney. Remove bricks from under fence and squeeze under.
Locality: Wangi Wangi
Region: NSW
Country: Australia

Care: * Security reside there & inspect site. Terry the Guard
Dog lives inside the Main Power station, but he is shit scared of
anyone he sees in there. He can't get onto floors above ground
level. * Be careful of loose floor plates on balcony at top of
chimney. * Admin building is well alarmed with PIR's and reed
switches. * Security are hardcore, will try to run you down with
car. * A PIR with alarm and floodlight has been set up on the
middle landing of the lower staircase (just beyond the locked
gate) when the PIR is activated the alarm and light goes off until
movement ceases. Its purely deterrent and is not connected to
anything.
Cond: Totally gutted but completely free of graff or civilian
vandalism. In a worse state than White Bay but not as bad
as Balmain was.
History:
http://en.wikipedia.org/wiki/Wangi_Power_Station,_New_South_Wales

Found: 2001 Oriface.
Rating: 5.0/5.0
Update: 2015-09-06 14:00:00 (The Edge) - Do not recommend going in
via Donnelly road as it is hard to see whether the
the maintenance/grounds worker/caretaker will appear and check
station fences. All the fences along donnelly road from the fire
and up to where the colliery starts are now checked regularly
there are no holes as far as I can see.
on Better and more obscure access is around the water tower
corner of Donnelly Road and Wangi Wangi Road (see the
pic). From here, walk down to the colliery gate where the
transmission lines start and squeeze under the gate. Then take long walk down
along the tree line till you get to the creek and the concrete
blocks. Hop on these blocks to get to the other side of the creek.

been The hole in inner perimeter fence near the shed has also
untwist repaired with a woven wire patch but may be possible to
another it and get in. This is about as far as I got as I had
place to check.

Update: 2014-04-21 14:00:00 (Kazman) - (April 2014) Checked this
site out but didn't go in, could not see any evidence of dogs
around the perimeter. Best access is still around the back fence.

Update: 2011-11-26 13:00:00 (Batou) - Dogs now in use within
perimeter fence.
Can access station by kayaking up cooling water canal.

Take a small light craft with shallow draft as you will need to
go through a hole in a fence, over several floating litter
traps, over a small wall and finally over a foot bridge. Canal
that branches off to the right is too shallow to navigate. Go
under the part of the station that is built over the canal,
right to the end of canal. Assess through Swiss cheese wall.
Admin PIR was set off walking along the ground floor towards the
end. No dogs seen inside the building.

bushland and "walled like a medieval city", its
"Ward 21".
prisoner almost to death with a slops bucket in Long Bay
William 'the Mutilator' MacDonald, Australia's Most Feared
Killer, was moved to Morisset Psychiatric Centre for the
criminally insane in 1964. In 1980 McDonald was found sane
to be released back into mainstream prison society and has
been in the protective custody section of Cessnock prison
known as 'old Bill'. He has spent so much time locked up
is convinced that freedom would kill him. In December 2000
declined to attend a court hearing set down to grant him a
when he would be eligible for parole.
Services formerly housed within Ward 21 were transferred

Dog Squad Bay Gaol. The facility was being used by the NSW Police
as a training site in 1993. Other expressions of interest
regarding the facility were received from the NSW Fire
Brigade,
Department of Sport, Recreation and Racing and the Toronto
YMCA.
Discussions were held with various Government bodies in
relation
to the use of the Ward 21 buildings. The Health Service
has also
discussed with the Department of Conservation and Land
Management
a land claim lodged by the Aboriginal community.

* 2005:

Update: 2014-04-21 14:00:00 (Kazman) - (April, 2014)Site is just
walls
and a pool now, great location for a camp-out or laser-
tag. At
first I went through the active mental hospital to get to
this
site and was greeted with some abandoned buildings
(although most
buildings are still active) shit loads of kangaroos and
mentally
ill people stirring at me.

Update: 2009-10-15 13:00:00 (Goretex) - Copper thieves have taken
a small
digger in and pulled down 90% of the walls, The place
looks like
a bomb has hit it literally, No longer can you trawl the
dark
musty halls and fall through rotting floor boards as the
roof is
all but a memory.

If its metal, its gone or they'll come back for it.

Still good to go see for nostalgia and some photography,
especially at night. Around 3 rooms are still intact.

The pool is still good with "lilypads of slime"

so if Kangaroos and other animals call this place home at night,
you camp, keep your food in your tent or car!

(very Vehicle access in dry months can include lowered vehicles
slowly), wet months however will require 4wd access.

to 1M A few other trails leading into this place have ruts close
deep.

base of spillway. Go to S most set of white hatches. Use spike-
like tool to pop mechanism, Climb down into enormous cavity. At
bottom, go thru triangle shaped tunnel to hatch. Open and make sure
you close it behind.
#9,AX: Either back the way you came (close
topside hatch either way) or find ladder shaft inside dam
and make your way up through all 50 levels to lift hut at top.
Keep an eye out for reed switches and PIRs.
*Update Nov 2006: Dam no
longer accessible to public, can only be seen from viewing
platform. Entry point requires even more trespassing than
before.
Security patrol VERY regularly, checking gates, etc.
Locality: Warragamba
Region: NSW
Country: Australia

Care: Round hatch in closing gap gallery has switch, hatch was open
 21/03/93. Power station has IR sensor at top of stairwell from
 surface. This sets off a standard alarm immediately, then about
 30 sec later, a totally earth-shattering klaxon that is probably
 heard for miles. Oops!. Security do drive overs.
 Notes: Maps: Recommended: 1:25000: Penrith, Warragamba.
 Orthophoto: Warragamba U5545-6. Also have some plans of dam internal
 tunnels, though these don't seem to correspond well with observed
 tunnels.
 Log:
 * 07/03/1993 Preliminary scout: Diode as tourist.
 *
 21/03/1993 Diode & Predator: Into Power Station.
 * 2001
 Siologen/Mr India/Trioxide/Fishie/Maddog into actual dam.

Name: Water World
Alternate: Seaforth TAFE
Description: 3 Storey TAFE site currently unoccupied, but still owned and
"protected" by the Teachers Union.

Features: Huge assortment of gear left behind.
Science labs with store rooms full of electronics &
chemistry
gear/animals in jars etc, Photography labs/darkrooms with
enlargers and JOBO processors, Art Studios, Classrooms,
stacked
Library (trashed) too much to list! All explorable to a
soundtrack of constant torrential running water (unless
this has
been stopped). Crib is flooded Yo.

Access: Cnr Sydney Rd/Frenchs Forest Rd/Kempbridge Ave.
Park in Kempbridge Ave, see hole in fence. If not go up to
Sydney
Rd. See small library. Jump fence behind this.
#1. Nth side of build has door halfway along with smashed
glass.
Unlocked.
#2 East (Kempbridge) side in "inner Quadrangle" door
unlocked.
#3 West (FF Rd) side see small set of stairs leading into
main
build (kinda behind a wall, but before main entry),
unlocked
(leads).
Failing these try any of the smashed windows on any level.

of
2010 UPDATE: previous lower accesses have been recently
boarded/locked, as with most broken windows. Still plenty
access.
[GPS:-33.796713,151.25044]

Locality: Seaforth
Region: NSW
Country: Australia
Care: Neighbours. High vis area.
Doesn't seem to be alarmed anymore.
Has been fully explored by a few for hours n hours. No
signs of
seccers in daytime. BDID. NO TORCHES. Would be easily seen
from
main roads and surrounding houses/shops.

Eek!: Getting busted with obtainables. Not recommended.
Water Level: Dry - Ankle
Cond: Trashed-Excellent.
History: Opened in 1962. Closed 1999.
Much sort after land for redevelopment. The picket and
bans that
Federation
and Unions NSW preventing any redevelopment, still remain.

Name: Weiry Rabbit
Alternate: Mowamba Weir and aqueduct
Description: Weir and aqueduct on Mowamba River
Features: -Small hut filled with useless junk.
-6' high by 10' wide, 20m long chamber parallel to river, depth unknown. Sandy bank along river where you can view inside chamber through bars, access via hatch above.
-very noisy aqueduct
Access: Heading south-east along The Snowy River Way, turn right here

[GPS:-36.468474,148.633422] before crossing the bridge
over
Mowamba River.
Access to chamber here [GPS:-36.469475,148.631941]
There is a fat padlock on the hatch which is at the base
of the
first ladder on the western side of the weir.
Small hut is here [GPS:-36.469311,148.631995]. Door is
unlocked.
Locality: Jindabyne
Region: NSW
Country: Australia
Care: Do not fall into river or risk death.
Eek!: Second ladder on western side of weir is dangerously close
to the
aqueduct and slippery when snowing, one slip on the ladder
runs
and risk death.
Ensure gate to paddock is closed to avoid a very angry
horse.
Water Level: Dry - Death
History: Water from the Mowamba River is diverted to Jindabyne dam
via the
Mowamba weir and aqueduct. The Mowamba Weir and aqueduct
is part
of the Snowy Mountains Scheme.
On the 28th August 2002, the Mowamba Weir was "turned out"
allowing environmental water to over top the weir.
Environmental
2006,
water releases occurred until January 2006. Since January
occurred
environmental water releases to the Snowy River have
dam wall
from Jindabyne Dam as the infrastructure upgrades to the
had been completed.
To-Do: Unlock the padlock and go into chamber, see if inside of
weir is
accessible from here.
Notes: I was unable to take many photos as my camera was fogging
up due
to it snowing while I was here.

Update: 2007-12-25 13:00:00 (Trioxide) - I would add to the
location details that if you follow a road with the main mine
carpark,
main wash-house etc you are on the wrong road and need the next
road (heading north) to the east.
Also to note is that the track appears locked by a metal
gate and
remove the huge locks - this is cosmetic only as you can simply

land as chain. Not sure of the real legality of driving on this
Authorized there are many signs that say "Walkers / Riders and
Vehicles only"
of You need to follow this track until you come to a junction
many bush tracks and follow Track "10C" from here.

Through any gap you can find - they are regularly patched up.
Alternate way in is near pedestrian overpass on Victoria Rd. Most common
routes are:
bash *Hardcore: Go thru fence on L end of cooling pond, bush
4m round the back of pond to a small tree. Climb tree up onto
thru hole, high wall. At L end of wall pull back corrugated iron,
coal climb onto vertical girders, climb down, go up steps to
floor!). loader, head up coal loader (walk on conveyor frames-not
old cafe Climb over fence at top.
change *Softcore: Go to far L end of turbine hall, up steps to
you will building. Climb thru window above wooden steps. Ways in
hall to all the time. Very actively used these days. Once inside
need to go across turbine hall roof to get from turbine
boiler house (or vice versa).
Locality: Rozelle
Region: NSW
Country: Australia
Care: On site security who watches out the window. All asbestos
and operating constituents removed, danger is now getting
caught. The

ants. floor of the conveyor bridge has been honeycombed by white
Commonly Very unsafe. Walk up actual conveyor belt, its stronger.
Clan in use for filming, very active Security who *HATE* Cave
Personnel, so if you get caught, for your own sake:
"you've never heard of us".
History: Built in 1912, secondary boiler house demolished in late
60's, which is why a whole section of the turbine hall is
sheared off. Shut down in 1986. Decommissioned in 1996. Sold to HFSA in
2000. Seccer instated. Used for filming purposes often. Will
eventually be refurbished for other purposes meaning a transfer to
"Gone".

Update: 2011-04-26 14:00:00 (What) - New 10Ft Palisade Security
Fence erected around perimeter.

Update: 2010-11-15 13:00:00 (Cryogenic) - There have been several
PIRs installed recently, all external to the building.
point, hard One on South wall of Turbine Hall (pointing at entry
up once to avoid without going down cutting & then climbing back
the inside); two on wall of admin building - one pointing up
would stairs to Victoria Rd, one pointing South (i.e. where you
entry probably be coming from); and one on the other side of the
transformer alley point on the wall of the Switch house (near the
walkway between the switch/turbine buildings pointing towards the
to control room.

responding The good news is that security does not appear to be
the to them - the alarms went off approximately 4-5 times in
Upon space of 45 minutes while we were inside the building.

security exiting, we watched to check the response time of the
the guard and the alarms were switched off remotely, without
security guard making a patrol.

Otherwise, no changes to access since Sledgy's last
update.

Update: 2009-10-04 13:00:00 (Diode) - Surprise! There's a cooling
water tunnel that runs the length of the turbine hall, under the
lowest floor. Access via hole in floor at water-gate control
motors at Sth end of Turb.Hall. See gallery pic 'more than meets
the eye'. Tunnel is BIG, part-filled with water. Needs wetsuit or
boats to explore. It obviously extends to the Nth and Sth from the
building as well, and both ends must join the Bay. So
there may be much more to explore, especially to the Sth - if
there's airspace in the extensions.

(Feasibility Study for Community Hubs - Supporting
Parramatta City Council, May 2008,

http://www.parracity.nsw.gov.au/__data/assets/pdf_file/0003/19470/Feasibility_Study_for_Community_Hubs_Supporting_Document_Final_May_2008.pdf)

To-Do: Find direct access to the helipad! Explore rest of rear warehouse, legitimately.

Notes: This site contains a large warehouse-style building used for

light industrial purposes, which is consistent with the current

Light Industrial zoning of the land. The site is approximately

20,100 sqm and is surrounded by open space, residential and

heritage properties. This site has documented constraints associated with flooding and is located in a sensitive

heritage setting given its proximity to Hambledon Cottage, Experiment Farm

and Elizabeth Farm all of which have National heritage significance.

Notwithstanding these issues, given the size and proximity of the

site to the Parramatta CBD, a significant opportunity is presented for redevelopment to residential. The use and configuration of the existing industrial building is

incongruous with its setting and form, and the relationship of the

site to its surroundings could be vastly improved. Given the

sensitivity of this setting, the site should not be rezoned in the

first instance until detailed planning guidelines are developed

for the site. This work could commence as soon as the current

process of amendments has been delivered. (Parramatta City Council, 2006,

http://www.parracity.nsw.gov.au/__data/assets/pdf_file/0004/9076/Part_4.3.3.pdf)

Found: 2012 Devos / Raptor / Red

Rating: 4.0/5.0

Update: 2012-09-15 14:00:00 (Red) - Door at the south-western corner of

the property, at the rear, is alarmed, presumably because it

connects along a long corridor to the active half of this site.

This alarm rings throughout both the front and the rear sections

and the security response is (presumably) fast, due to an

unidentified car pulling into the driveway minutes
thereafter.

Rooftops

=====

Name: Umbrella Building
Alternate: Legal and General Building
Description: Have always known this as the "Legal And General" Building since my high school years. Most familiar feature was the umbrella on the side of the building next to the Telstra exchange.

Over time the company left the building and the signage was removed. Not sure who else occupied the building, but now it is being used as the sales office for the new "Landmark" apartments despite all the demolition going around on the bottom floors.

Features: Great rooftop with views of North Sydney out to Sydney CBD and harbour bridge.
Apart from that not much. All floors gutted.

Access: From nicholson street find through the gap in the temp fencing, and go into the hole that goes up 1st set of fire stairs -33.824134, 151.196485.
Once at top of fire stairs, find next set of fire stairs by turning left and enter the red fire door. This goes to the rooftop.

Locality: -33.823762, 151.196209
St Leonards
Region: NSW
Country: Australia
Care: Demolition going on. Lots of signs with "Live wires" so be careful. Need to walk up 10 floors of fire stairs.

Do not enter the main lobby area. Be real quiet on the top floor and do not enter through the curtain (that is the selling agent office for new Landmark apartments). Lobby and top floor looks live and is still used by the selling agent. Best just head for the rooftop.
Rooftop also has warning about Hutchison/Orange microwave antennas and safe walking distance but when I walked out I didn't see any.

Eek!: Saw a lady looking out on the Landmark top floor window
just as I exited??? Sunday around 8:30 am. Maybe she's one of the
selling agents up there for a special viewing appointment.
Couldn't tell if I was spotted as it was too far up to see.
To-Do: Do the other buildings marked for demolition.
Redo
building once Landmark top floor office disappears.

Tunnels

=====

=====

Name: 14th Arrondissement Quarry
Alternate: The Catacombs
Description: Rather like describing every house in a suburb, but here
goes.
380kms of tunnels, created in the 17th-18th centuries to
maintain the integrity of the massive limestone mine/quarry that
Paris was built from in the 1600s, interweaving under the 14th
District (Arrondissment) of Paris. These days they are mostly
purposeless save as a wonderland for Cataphiles, the explorers who
traverse them.
Features: Its an underground city of sorts. Tunnels of every shape
and size, averaging between 7-8ft high. They weave and wander
inexplicably and to see most of the sites you'll need at
least 12 hours. Theres the famous Ossaries, the bone chambers
full of 500 year old human remains; the old Telecom tunnels,
kilometres of them; the German Bunker, a huge maze like complex with
old toilets, signs, kitchens, staircases, pressure doors,
graffiti and other remnants; the tomb of Philibert, the gravestone
of the first Cataphile, a Parisian man who wandered in, had an
explore,

got lost, died and whose body wasn't found until eleven
years later; the reservoir tunnels, a grid of tunnels under a
large water reservoir; dozens of graffiti and party rooms. If
you go down on a weekend you guaranteed to find a party happening
somewhere in the quarries. A lot of cataphiles spend half
their waking life down in the quarries, there is graffiti
everywhere, mixed with dates etched onto every tunnel wall stating
completion time, ranging from the mid-late 1700's to the late 1800's.
Access: There are reputedly only seven entrances to the 14th.
Here's three: #1: The easiest way is via Petite Ceinture, an abandoned
hole in an old railway yard on the south side of Pl. de Rungis. Head to
the back of the yard and turn right into the big square tunnel.
Follow it till it opens out then becomes an arch. About 200m into
the arch there is a big hole in the floor on the right hand side.
climb down into the Quarry. [PdP:143(14)S19]-Rail Yard,
[PdP:143(14)S18]-Tunnel entrance. #2: Manhole in pavement
of Boulevard du Montparnasse. #3: Manhole on
Locality: 14th District
Region: Île-de-France
Country: France
Care: #1: Don't explore without a Cataphile guiding you or a map.
YOU WILL GET LOST OTHERWISE!!! This isn't like anything else on
this list, it's fucking gargantuan in scale and given its scope
and the lack of exits, it is dangerous to explore by yourself
unless your experienced. #2: It's suggested you wear a helmet and
overalls. Treat the Quarries like you would a cave system. The
tunnel ceiling height rises and falls constantly. You will also
get very dirty. #3: Take supplies. Food, sleeping bag, torches,
batteries etc. A favorite of cataphiles is a carbine lantern. #4:
It's

illegal to go into the Quarries. Police have been known to
 explorers down into the quarries and arrest them. Be
 #5: You will almost certainly meet people down the
 of them are cool, but be aware. #6: Quarry Manhole covers
 very heavy. Fortunately they slide and this is a great
 when opening and closing them. #7: You will often come
 tunnels that are smoke filled. Its a habit of Cataphiles
 Potassium Nitrate and other harmless smoke bombs, one of
 smells of spearmint. They do it for the atmosphere created
 exploring in smoke. Be aware of this. #8: Obtanium from
 Ossaries is VERY illegal and equates to grave robbery.
 under Paris is very different to exploring anything on
 list.
 Mostly dry... So theres about 40 kilometres of wet tunnel.
 from damp to knee deep. Take Gum boots/wellies
 Old, vast, Graff riddled, wet, amazing.
 Paris was built from the limestone mined from the 13th,
 16th Quarries. 200 years or so later sections of Paris
 collapse because of the massive open space 20m beneath it.
 A
 decree was made that tunnels were to be built to reinforce
 quarry. The decree stated that each landowner had to
 to the process, thus the difference in tunnel style all
 quarry. The Ossaries were created when cemetaries became
 full.
 Go back, explore more!
 Early 1800s-Philibert
 0.0/5.0
 2014-12-31 13:00:00 (Intrepid) - The entrances through PC
 currently closed or modified as of about 2 weeks ago. The
 portal is bricked up and the eastern portal has a series

fences to climb and a gate at the portal. Best to use a manhole.

Modified: 2015-05-18 14:00:00

Name: Airport Link Railway Tunnels
Description: Airport Link City Rail Tunnel, 8kms long, with stations and vent shafts. Mostly a single two track tunnel, but contains twin tunnels in places. TEL=8.0km
Features: Big lit up tunnel, vent shafts just before & after Green Square station (see 'Green Squairvent North and South' in KD).
Access: In 2007 it was over the tall fence behind the tennis courts at north east side of Prince Alfred Park (take patch from the north side of junction between George and Cleveland Streets) On the other side of the fence there's a sloping ledge... follow it down to track-side level. Exit same way, or via 1 of the station platforms, but need to check for station staff.

courts *Current access (2013). Follow the fenceline between the and rail corridor from the north in Prince Alfred Park.
Nothing to climb.

[GPS:-33.888297,151.203107]
Locality: Strawberry Hills
Region: NSW
Country: Australia
Care: Area is still well graffed in 2011. No cameras in 2007, none seen from passing train now. Those wishing to push through the stations past Green Square will need to exercise care.
Dunno how wise visiting the Airport stations would be. Do after train service obviously...

2013 Update. There is a CCTV camera facing the portal. The camera is located on the corner of the old rail building by the train line.
Eek!: Tunnels safety alcoves are rather badly spaced.

Water Level: Dry - Dry
Cond: Annoyingly blue metal laden.
History: Opened in 21 May 2000.
To-Do: Do more of it, get past Green Square station.
Notes: This should have been entered into KD back in 2007 when
Siolo first explored it.

Name: Ardglen Tunnel
Alternate: Glenard Tunnel
Description: 488m single-track LIVE rail egg shaped tunnel. Main North
Line,
from Sydney to Armidale via Tamworth & Werris Creek.
has workers alcoves for refuge every 15m, but no yellow
safety lights. Beware of trains. In daily use.
Features: Historic steam era tunnel, similar to & built at the same
time as the Illawarra tunnels (Cawley, Helensburgh, etc). Part of
the former northern mainline to Brisbane, (line now terminates
at Armidale).
Access: Take the (left if heading north) turn off onto Main St
from The New England Hwy at Ardglen here...
[GPS:-31.730727,150.783792]
Then follow this road for 400m & then then turn left onto
High St (which soon becomes a dirt road). Follow this road past
the level railway crossing. 400m past the railway crossing, after
you pass 2 homesteads on your left, you can park the cars there &
then climb down the (very steep yet safe) embankment to the
railway line. Portal is 40m south from here & visible from the top
of the embankment from here...
[GPS:-31.739071,150.79078]
You could also find another way down if you wish, there
are many to pick from.
Locality: Ardglen, NSW
Region: NSW
Country: Australia
Care: Nearby homesteads may or may not be occupied. Live rail
lines, in daily use. No warning lights. Use care.
!!! Beware of trains. In daily use !!!

Eek!: As above, in daily use by Countrylink Explorer trains to
Moree & Armidale, & freight trains. No yellow warning lights for
your view approaching trains. Track through tunnel is parabolic &
through it is impeded by the elevation. Take care!
Water Level: Dry - Dry
Cond: In use steam era tunnel, part of the Main North Line.
History: Opened in 13-Aug-1877, been in use ever since.
Read more about it here...

Name: Bacongrinder
Alternate: Fletcher Park tunnel.
Description: 4'-6' hand-cut sandstone tunnel.
Features: Awesome shape and construction material changes. Nice
chamber and pit.
Access: #1,UA: Fletcher Park [Sw:NDR, UBD-Nc:146C06/-Nc:002H08,
Grg:NDR].
Jump fence, scale cliff face on the R of tunnel.
#2,PX: Twin mesh grilles in Hospital Car park.
Locality: Newcastle
Region: NSW
Country: Australia
Care: Cliff face is EXTREMELY UNSTABLE - sandstone is soft and
footholds crumbles easily.
* Watchout for large window behind you in adjoining
building when exiting u/s.
Eek!: Bowing roof under Cop shop pissing out water (cracked
main?).
Water Level: Shoe
Cond: Dodgy - partial collapse in areas, silted in side
branches.
To-Do: Find out history of tunnel!!!.
Found: 2001 Bullwagon.
Rating: 3.0/5.0
Update: 2009-09-14 14:00:00 (Goretex) - Cliff face has had some
large sections fall and others that move while you are on them
(We didn't stick around to test how long they would remain
stable with it crumbling under our feet). If you plan on
accessing it this way, I would do so with the aid of a harness and rope

attached above on the handrail. If you fall here, You are
landing on a bunch of very unforgiving jagged rocks. Please let
someone local know if you plan on doing this and arrange a check
up call/sms on exit, DO NOT ATTEMPT SOLO!

Name: Bishop, The
Description: Old 5'h tunnel that used to house the counterweight that
allowed trams to safely travel up and down a steep section of
Darling St. Now a drain. The tunnel runs between the embankment and
intersection of Darling and Nicholson Sts. TEL=115m.
Features: Rails and mini GPTs.
Access: #8,UE: Two wrought iron doors in small grassy embankment,
end of Darling St [Sw:277D12/055D12, UBD:235P04/010N08,
Grg:345D04/008H08, [GPS:-33.8570726847,151.195866061]].
Use manhole key to open, climb down into room, and squirm thru
10m of 2' dia pipe to get to the tunnel. Lying on a skateboard
helps. The return journey on skateboard is goodah!!!.
Locality: Balmain
Region: NSW
Country: Australia
Care: Tunnel is now a drain and all gutter boxes on that part of
Darling St feed into it. Avoid using it during or
immediately after rain, as access pipe will not be useable. Very

claustrophobic.
Water Level: If you don't use a skateboard, you will get soaked while
squirming through the pipe
Photos: On display at nearby Commercial Hotel.
Notes: Development plans for the site will wipe the current
access
leaving the only access the manholes in the middle of
Darling St.
Do it while you can.
Found: 1998 Siologen/Ogre.
Rating: 4.0/5.0
Update: 2017-01-14 00:46:46 (Scarecrow) - Update Access: The end
of
Darling St has been redeveloped to allow buses a larger
area to
turn in. Iron doors and grassy embankment no longer exist.

New grilles and gutter boxes may provide access.
Update: 2010-03-25 13:00:00 (Rascal) - Area underneath hatch has
been
backfilled. Enter via gutterbox on Darling St, cnr of
Weston St
and squirm through pipe.
& Alt. entry via 8 seg manhole in road at cnr of Darling St
side of Nicholson St or iron manhole in road near Thornton Park
Darling St.
Never use these manholes as exits.
Update: 2007-07-08 14:00:00 (Trioxide) - New, locked hatch has
been
installed.
Created: 1995-12-31 13:00:00
Modified: 2010-03-26 13:00:00

Name: Blowjob 2000
Alternate: BJ, BJ2000, BJ2K.
Description: Termination tunnel siding. TEL=150m.
Features: Dead end tunnel used for trains that terminate at Martin
Place
Station. Graffed but rarely used for designed purposes. If
you
stand at the alcove in the Sth tunnel, the passing trains
blast
hurricane strength winds at you as they go by, then exert
the
same in reverse, sucking air out of the siding into the
live

tunnel.
Access: Under spiked fence on west side John Young Cres to the S
of rail viaduct [Sw:277N18/029N18/056N18, UBD:236H10/003Q04,
Grg:346C10/004E04, [GPS:-33.8703480146,151.217682729]]. Up
LH tunnel for 30m on the R side and you will find an alcove
with staircase leading to the tunnel.
Locality: Woolloomooloo
Region: NSW
Country: Australia
Care: * Keep an eye on the orange LED warning lights: they go
out 10-15 seconds before a train hits you. Head directly to the
nearest alcove, don't lie down between the tracks.
and * Never do tunnels whilst scheduled trains are running,
remember that outside scheduled times, trains may still
run. * Help preserve location exploration status. Do not get
seen by drivers, as they will do the same as they did with the
Bondi portal - cameras & sensors.
seen by * Hold on to brace bars when standing in alcove. Watch for
Bondi terminated trains in actual siding.
portal - cameras & sensors.

Name: Blub Blub
Alternate: Bumborah Pt Water Cooling Tunnel.
Description: Cooling water tunnel to Bunnerong Power Station
(demolished).
Features: Major concrete installation on waterline just E of tidal
wave barrier near the Botany Bulk Liquids Storage area. Large
rooms (20'h x 40'w) half full of seawater at sea entrance.
Massive
dia grilles made of railway lines (for good reason!). Three 6'

shafts in perfect condition, about 30m deep, no steps.

Tunnel length about 1km by map. Diameter unknown.

Access: Sea exit installation: [Sw:337R05, UBD:296L09, Grg:436F09]. Two shaft covers in reserve behind Bumborah Point. Water at bottom rises and falls with sea, causing air to whoosh thru gaps in lid.

* Tunnel: When the seas dry up, or scuba when sea VERY still. Can squeeze thru grille at sea exit, or thru cyclone fence gap and drop 4m into room behind grille. Tunnel entrance under water.

* Side room: via large 7' x 5' grille, on W side of main sea exit. Need crowbar to lift and slide it along. Ladder down into room. Underwater tunnel 20m long joins to main sea exit, where there is an underwater wooden grille. Inside room is 2nd massive steel grille, no access, don't know where room on other side goes.

Locality: Bumborah Point

Region: NSW

Country: Australia

Care: DO NOT risk being sucked into tunnel by surges from swell. If you lift shaft covers, MUST replace, or you'll kill someone, as falling in is certain death. Covers are rectangular, concrete, takes two people to lift. Care dropping them in.

Water Level: Dive

Cond: All completely under water, even at lowest tide. Tunnel probably still in good condition for full length, but shaft at Power Station end filled with rubble.

To-Do: Lift manhole covers near power station end shaft.

Notes: Gone Acc:

#1: On Military Rd, shaft cover outside fence opposite flower shop. Water at bottom rises & falls.

#2: Shaft at site of old generator building, at base of S end of wall (cliff) below Bunnerong Power station Switch building. This shaft full of rubble. Sound of water moving.

* This has never actually been explored.

Found: 1992 Diode.
Rating: 2.0/5.0
Update: 2012-08-03 14:00:00 (Blakjak) - Somebody has recently used
a
crow-bar to slide open the metal lid covering the shaft
into the
side room mentioned in KD, it has been put back but not
all teh
way, looks easy for maybe 4-5 people to open enough to
enter with
a crow-bar. Need rope ladder to decend 4m shaft, 3ft deep
in sea
water in room.

Name: Box Vale Tunnel
Description: MPL = 84 metres, TEL = approximately 10kms bushwalking.
Standard gauge tunnel cut through sandstone on the Box Vale
Colliery branch line. Tunnel is 84 metres long.
Features: Also nearby is 40 Foot Falls track. Assuming that the
literal names used on the tramway continue there is a waterfall of
about 40 feet at the end. Find out in summer.
Access: First and longest walk is to turn right off Old Hume Hwy
here onto Box Vale Rd here: GPS:-34.439103,150.412181.
Park at clearly defined carpark and follow track. It took
1hr and 7 minutes to walk in this way and 45 minutes back out
following firetrails which we had noticed on the way in. The second
and quicker way in is to turn right onto Wombeyan Caves Rd
GPS:-34.435577,150.404662, then almost immediately turn
right onto Kells Creek Rd, GPS:-34.429518,150.401572. Finally
turn right onto Morris Rd GPS:-34.426424,150.403632.
Follow Morris Rd to the end and join trail at Box Vale
Fire Trail. The tunnel is just 30 minutes walk from here.
Tunnel is here:
[GPS:-34.4175,150.4296]
Locality: Mittagong
Region: NSW
Country: Australia
Care: Some washouts along the cuttings - beware of falling
rocks. Some creek crossings.
Water Level: Shoe - Dry
Cond: Very good.
History: Constructed in 1888 and closed in 1896. The line was built
to carry coal mined in Nattai Gorge seven km to the main
southern Line at Mittagong. The line also passes through several
cuttings and over embankment formations. The cuttings each have
literal names e.g. Boulder cutting, Fern cutting, Casuarina
cutting and

so on. It ends at an incline by which coal was brought up from the gorge.
tons of 'The Colliery probably had its heyday in 1888, when 100
strike. The coal per week were shipped to Melbourne during a coal
1996. last part of the line was opened as a walking track in
construction Design and finance were by Nowra Lands Office. The
Mount was done by wards of the State from Toombong School, the
Community Alexandra Committee and people employed under the

Found: 2002 Bullwagon/dTrog.
Rating: 2.0/5.0
Update: 2015-12-29 13:00:00 (DC) - 30/12/15 Hatch on northern end
of western tunnel is currently open. We actually had a C/C
approved lock on us too but door/latch was a bit bent and will not
close enough to put on the lock. With a few tools I'm sure this
could be straightened and locked.

Update: 2015-12-29 13:00:00 (Intrepid) - Southern portals are now
clearly visible from the new road through the new industrial
development off Wonderland Drive. Probably doesn't matter but exercise
some caution.

Update: 2011-01-04 13:00:00 (Red) - Neither tunnel is open now.
Doors are welded shut. Can see inside from the south end of the west
tunnel through the welded grate but cannot be accessed without
tools.

merely Welding on the south-west corner is pretty weak and would
require a crowbar and little strength to bust off. A C/C
certified padlock with several key copies for members
would probably go unnoticed and look fairly legitimate...
although probably not worth the effort for such a site.

Name: Chocolate Goldmine, The
Alternate: The Sump.
Description: Disused (?) sewer relief tunnel. MPL=250m.
Features: Two disused (mostly) sewers. Access is via one of two deep shafts, one being nearly 80m deep, with balconies and ladders to the bottom, the other, also with balconies etc is around 50m deep. At the bottom of these shafts is a 6' RCP that leads to a large T shaped chamber, with ocean outlet tunnels to the E and the old main sewer tunnel running to the W. This tunnel is bowl shaped, 9'h & leads to a tall vent shaft. Here it gets wetter and continues on straight a long way before reaching a second shaft with dodgy balconies and ladders. Beyond this the air gets gassy and the water dirty. Huge roaring sound ahead. The "T" chamber also has balconies and a vent shaft. The light beaming down the shafts in the main tunnel and chamber during the day looks awesome!.
Access: Fishermans Rd. Go beyond carpark, ignoring the Commonwealth

Tresspassing signs, as everybody does.
#8,UE,Good: Follow road until end. You will see two stacks
and a relic of the defence site, the engine shed. The only good
entrance to is near the engine shed, in the form of a 6
seg pizza manhole, currently turned upsidedown next to the hole it
is supposed to cover [Sw:338Q01, UBD:297L05, Grg:438A05,
[GPS:-33.9669792492,151.265267279]].
#3,Dodgy: Follow instructions for Anzac bunker to the main
tower.
The manhole nearby is this entrance. Recommended for those
with cancer.
*It is advisable to open both manholes, using one shaft as
an emergency exit.
Locality: Malabar
Region: NSW
Country: Australia
Care: Ladders and balconies #3 shaft are dodgy, as are piles of
rubble everywhere. Ladders and balconies in #8 shaft are ok,
however, the manhole rungs are rusty. Don't fall in water in
chamber.
Unfriendly gas?.
Water Level: Tidal, Ankle-Death
Notes: Manhole next to Bunker Tower has reportedly been resealed.

Name: Clifton Hill Station Railway Tunnel
Description: Remains of the steeply inclined Clifton Hill Diagonal Rail
Cart tunnel, since converted to bomb shelters.
Features: One large tunnel, subdivided into a slightly smaller
tunnel with narrow passageways down ether side. Steps installed entire

length. Larger tunnel divided into 5x50m long sections.

Numerous rooms and passageways, most relating to the station.

Access: Over hoarding at junction of Princes Lane and Sion Hill.

Down steps to either of two gated passageways. If gates locked

climb down to bricked up start of main tunnel, climb thru hole

in wall. [A-Z:66B03]

Locality: Clifton

Region: South West England

Country: United Kingdom

History: Built as a way for affluent Clifton Passengers to ascend and descend the Avon Valley Gorge. At the top is the Gorge

Bridge, and at the bottom used to run a railway. Converted into

shelters in . Now disused but Heritage Listed.

Name: Dust Vault
 Alternate: North Sydney Brick & Tile Company Tunnel
 Description: A horse-drawn rail tunnel formerly joining two properties owned by the North Sydney Brick & Tile Company along Reserve Road, St Leonards. Eastern end of tunnel is abandoned with a small room at the end. Moving beyond this room is not possible due to access being blocked by wood and concrete (beyond this is an active wine cellar anyway). Western end is a wine cellar. MPL=20 m. TEL=50 m +.

Features: Fluorescent tubing, old computer parts, chipboard, and other miscellaneous and assorted junk.

Access: Park near 14 Reserve Road, St Leonards, on the northern side of the North Shore Private Hospital car-park. Jump gate, at [GPS:-33.819077,151.189336] or walk around the climbing gym from the Frederick St entrance. Descend ramp and go through gate to your right, descending down the stairs. Remove gate to tunnel (cable tied), but be sure to replace cable ties on exiting this location, at [GPS:-33.819193,151.189426]. Crawl over pile of dirt and debris. Enjoy what remains.

Locality: St Leonards
 Region: NSW
 Country: Australia
 Care: 'Some' asbestos (not much) in debris pile blocking the entry to this tunnel. If concerned, bring a level 3 mask with filter (advised).

Eek!: The ceiling looks like it is going to cave-in at some stage in the distant* future.

* May happen sooner than expected. Use discretion.

Water Level: Dry - Dry
 Cond: Old, decrepit.
 History: The pipe clays and shales derived from the various shales of the Wainamatta Group of geological formations in the Gore Hill area

were proved to be well suited to brick-making. Sandstock bricks became first made on the Gore Hill Estate in 1828, and this area developed on the major site for the brick-making industry that the North Shore in response to the rapid urban development that occurred there between 1880 and 1913.

dry The pioneer brick-maker was John Gibson who established a press steam plant and by the late 1880s he produced most of the bricks used for construction of the North Shore Railway. With the completion of this work in 1889, the works closed until they were purchased and reopened with upgraded plant by David Wilson in 1898. Wilson moved his operations to the corner of Herbert and Frederick Streets in 1912 and within a few years he was turning out 30,000 bricks per day. Wilson's Brick & Tile Works continued in operation until 1930.

St In 1880, Messrs JB Magney and HO Weynton, brickmasters at Peters, brought their brick-making plant to Gore Hill and set it up in an existing yard. They moved their operations to a site in Carlotta Street in 1886 and ownership was transferred to the Land Company of Australasia Ltd, evidently with Magney & Weynton as the controlling partners. By 1890 the company's Gore Hill Brickworks was claimed to be the biggest in New South Wales and contained the largest Hoffman kiln in the southern hemisphere.

over by The small Oswin Brickworks in Herbert Street were taken 300 ER Lancely in the early 1880s, who initially turned out bricks a day. Lancely joined Magney & Weynton as a partner in 1892, but the Land Company was a victim of the 1890s depression and it failed in 1893. The trio established the North Sydney

making Brick & Tile Company in 1894 to continue their brick-
venture, though its bricks were stamped 'MWL', indicating
that the partnership was still active.

brick Lanceley expanded the business in 1903, opening up a new
kiln (No. 2 yard) in Herbert Street. When George Whiting's
property, Valetta, was purchased in 1913, the land enabled
expansion of the No. 1 or 'Old Yard'. A further 22 acres
developed purchased near St Leonards railway station in 1900 was
as the 'new' of No. 2 Yard, which enabled the firm to
increase its production to 80,000 bricks per day. The firm
became a limited company in 1912.

the Another major brick-maker was Butcher Brothers. In 1900
Artarmon resident Charles Butcher and his brother-in-law,
Frederick Thomas Kirby, set up a brick yard in Hotham
Parade on an 11 acre portion of the Broughton Estate. It initially
had with six open kilns and in 1902 a patent kiln was constructed
that doubled capacity. The young Samuel Butcher joined the firm
at an early stage and eventually the two brothers took over the
business and in March 1913 they incorporated the company
Butcher Brothers. By 1915 the firm employed 100 men and 30 horses
and carts, who turned out 1.5 million bricks per month.

joined In December 1923 the Gore Hill and Artarmon brick-makers
the Excelsior Brick Company Limited, which had been
established in 1920 to control the sales of participating brick-
makers. As a consequence, Edward D Lanceley and Frank Butcher joined
the Excelsior board. As elsewhere, the local brick-makers were
hard hit by the Depression. In response to a trade war among
brick-makers during the Depression, Edward Lanceley was
one of the 'inner circle' of the Brick Masters' Association who
met on 10 January 1933 to establish the Brick Committee to
regulate the brick market. Following closure of the State
Brickworks at Homebush, Sydney's brick-makers established
Brickworks Limited in June 1934 to purchase the plant and,
in

October 1934, members of the Council of Brick
Manufacturers agreed to a 10-year binding agreement to promote bricks
and to regulate prices. Butcher Brothers, North Sydney Brick &
Tile Company and the Northern Suburbs Brick Company signed a
local agreement for the 'North Sydney' area.

Their recovery in other areas of Sydney was assisted by a
craze for light coloured Texture bricks. The North Sydney Brick
& Tile Company invested heavily in plant to manufacture these
bricks, but there was an initial rejection of these 'vulgar
bricks' by North Shore residents. The Council of Brick
Manufacturers helped Herbert Lanceley to sell his Textured bricks at a
reduced price, but they had become popular by 1939 and one million
cream bricks were ordered from the Gore Hill works for the new
Concord Hospital.

The brick works generated a steady flow of goods for the
North Shore Railway, which brought in coal to fire the kilns and
hailed out the bricks to markets across the metropolitan area and
further afield. Regular goods trains ran from Hornsby to
St Leonards to handle the traffic. At St Leonards, the
locomotive shunted wagons onto the North Sydney Brick & Tile Company
siding in the No. 2 yard, from where they were transferred by
horses over the company's tracks through a tunnel under Reserve
Road to the No. 1 yard.

The North Sydney Brick & Tile Company ceased brick-making
during World War II, when the firm's machinery was devoted to the
manufacture of goods for the armed forces. The company
established new brickworks at Baulkham Hills and the Gore
Hill plant was closed in 1958-59. Butcher Brothers ceased
brick-making at Artarmon in 1950.

Name: Eye Of The Needle
Description: An old Cable Tunnel with a narrow entry that parallels
disused rail tunnel under Railway Square.
An interconnection of gaps in reality.
The 'needle' is not the entry gate to Heaven, though that
be narrow enough to exclude the stout.
Verily, it is the _next_ trial that is the true test of
worthiness.

lower, He who taketh the middle path, neither the higher or the
shall succeed.
Providing he shall have fasted beforehand, and leadeth
into the gap with one arm raised unto the challenge before him, and
the other held below.
Incantations of the holy grunting shall bring favour from
the Gods of Tight Places, as will the wearing of abstemious
amounts of clothing.
Once into the fabled land, ye shall find a black veil upon
a beautious virgin wall, which would be well annoited with
the secret symbols and tags of the pilgrims, should any among
them have had the fucking wisdom to bring the fucking spray
cans. Replace the veil over the texts, that the harsh attentions
of authorities may be confounded, while yet other travellers
on their quests shall uncover the teachings if they seek
wisely. Those without the knack of parting the waters had better
keep a dry pair of shoes and socks back at the chariot.
Features: The sheer surreality.
Access: * Park in Mary Ann (E) or Harris Sts. Walk to Ultimo Rd.
Just before old railway bridge, turn R & head towards
pedestrian tunnel leading to Central [Sw:297G05/027G05/065G05,
UBD:256B01/015D01, Grg:375G01/019D01,
[GPS:-33.885416967,151.203507859]]. See tunnel. See stairs
heading up. Go over fence to under those stairs. Behind
the stair case is a metal hatch in the ground. Lifting this will see
you into the knee-deep-in-water. Good explorer.
* Corner Lee & Little Regent Sts [Sw:297G04/027G04/065G04,
UBD:236B16/003D15/000gG14, Grg:345G16/003D15,
[GPS:-33.8831717896,151.202895443], XED, XNL, XWPT], see
track below. Climb down there. Head along tunnel until you see
concrete pillars (LHS). Top of enbankment there is a gated arch
tunnel. Take the centre of the 3 holes, and squeeze your way in. A
bit of

bellying and squeezing should see you under it. Otherwise
(don't mess with padlock) go in the other way.

UPDATE BLAKJAK 2014: The old cyclone fence and gate has
been replaced with a new heavy-duty steel fence, boundary locks
on gate.

Locality: Central
Region: NSW
Country: Australia
Water Level: Knee-Waist
To-Do: Explore basement via possibly alarmed doors.
Found: 1998 Diode/Predator.
Rating: 4.0/5.0
Update: 2015-04-13 14:00:00 (Ratter) - (This is ooooooollld news but
it's not in the k.d entry yet...)

Above the ladder near the end of the cable tunnel is a
wooden door. This opens onto a narrow cavity, which in turn
permits access to a plant room in the basement of Wembley Snooker
Centre, 841 George St [GPS:-33.883598, 151.202857], via a small
spring-loaded door which will lock itself behind you
unless you take care to prop it with something. The first door on the
right in the plant room leads to the main stairs, which exit
onto George St - verify that the front door is unlocked before
you un-prop the first door, otherwise you might have to find
another way out.

Update: 2015-04-11 14:00:00 (Axel) - DANGER- the original steel
braces supporting the cable trays have begun rusting through,
where they are mounted to wall. One nearly took me out last night and
some others are ready to go, if it wasn't for the vertical
threaded rods it got tangled in I wouldn't be writing this. Cable
tray is still secure as there are newer braces carrying the
weight(or so it seems).

Update: 2014-04-08 14:00:00 (Wolfman) - Now we know what all that
shit in the tunnel was for. Fucking hipsters ruin everything! LOL:

<http://www.smh.com.au/entertainment/art-and-design/tunnel-vision-makes-all-the-underworld-a-stage-20140409-36cu2.html>

Update: 2014-04-04 13:00:00 (Blakjak) - 4m rope recommended to
descend the steep eastern portal escarpment.
Now underground section (basement) to explore in the train
tunnel opposite the EOTN entry stairs, it is below the Mercure
hotel. This might be temporary as there are signs of recent
construction (temp wire fences, gravel, etc).
display, faux Northern (ABC) end has weird musical instruments on
'suped up' Wurlitzers, weird gramophones, a piano that has been
also be with electronic actuators on some keys...this display may
temporary.
SRA Northern gate (behind ABC) now has 2 padlocks, a standard
SRA) boundary lock inside the tunnel, and a new (non standard
padlock which we do not have a key to outside of the gate.
to do Presumably this new (blue and silver) lock has something
with the musical equipment.

Update: 2011-04-13 14:00:00 (What) - more info on the camera
facing the Ultimo Rail Tunnel
can be used as a SIP extension within a PABX environment.
The purpose of the audio is to allow broadcast warnings, and
in some instances 2 - way communications. The Audio recording
function is there to be used as required (Not confirmed if the
record function is used).

"Integrated microphone and speaker, Line-In/Line-Out,
lip-synchronous audio, two-way speaker, audio recording "

Update: 2010-11-23 13:00:00 (What) - New Mobotix Industrial M12
Day/Night

tunnel
audio
Megapixel IP Network Camera Installed in the pedestrian
leading to Central facing the EOTN Entry. Note has Video &
recording with a Motion sensor inbuilt. (Very high quality

Name: F6 Turnaround
Description: Tunnel located under the area where the toll gates used to
be on
the F6 between Sydney and Wollongong.
High enough to accommodate semi trailers, only wide enough
for
one vehicle at a time.
MPL: 60m - 4 lanes + 2 siding areas + median strip wide
Access: After waterfall, when you first begin the 110km/h zone,
observe
the rest area on the other side of the barricade on your
left
(southbound)
When heading northbound, observe area at the end of the F6
where
fruit vendors often are. Big rest area on your left.
Follow the small roads from within these rest areas North,
and
they will curve under the road into the tunnel.
Eastern entry/exit: [GPS:-34.149386,150.991122]
Western entry/exit: [GPS:-34.149214,150.990612]
Locality: Waterfall
Region: NSW
Country: Australia
Care: Watch you don't get hit when pulling over. Psycho drivers
and
trucks.
Water Level: Dry - Ankle
History: Used to turn around vehicles that were unable to pay toll,
or
were prohibited from traveling the expressway. Also used
by staff
to cross freeway.
Notes: Floods to ankle depth when wet.

Found: 2007 Anakaine
Rating: 0.0/5.0
Update: 2012-01-13 13:00:00 (Red) - New fence stops fruit vendors
from setting up shop which makes the description a bit more
vague. Heading southbound, pull over in the wide service lane
just after the GPS coordinates and walk down the road behind where
you park to the tunnel.

Modified: 2012-01-15 13:00:00

Name: Falkirk Tunnel
Description: 700m long rockblasted tunnel on the Union Canal.
Features: A good scale as to whether public access locations are
worthwhile this tunnel is really big and impressive, but is also an
infrequent public thoroughfare. Between 10 and 15ft high,
a mix of rockblasted and brick arch with a walkway running
alongside the canal channel. Is flood lit in sections.
Access: Head down to climb down to canal walkway and
head Tunnel marked on map.
Locality: Falkirk, a town outside Glasgow.
Region: Scotland
Country: United Kingdom
Water Level: Puddles, waterspouts from ceiling
Rating: 2.5/5.0
Created: 1995-12-31 13:00:00
Modified: 2007-06-02 14:00:00

Name: Fantacan
Alternate: Conduit, Saturation, Thongs' Death Tunnel
Description: 3.5 m tall pipeline tunnel that runs under the Monash
Freeway (M1). TEL = 130 m.
Features: Redbrick retaining wall, massive pipeline through middle.

Access: #1 Open gatic closest to freeway in pipe reserve off
 Bellbrook Dr (-37.950789, 145.213123). #2 Gatic on other side of
 freeway (east of Gladstone Rd) will also drop you into the tunnel, but
 the one above the ladder is partially concreted over and covered
 in vegetation (-37.950668, 145.211665). #3 With ropes and
 abseiling gear, open gatic closest to Bellbrook Dr; drops into the
 more spacious, more graffiti'd parallel tunnel ('Cokecan') -
 with no stepirons.
 Locality: Dandenong North
 Region: VIC
 Country: Australia
 Care: Keep quiet as entrance is quite close to houses. Air
 quality may not be the best.
 Water Level: Slimey
 Cond: Excellent, no markings except for builders tags (which
 date construction to September 1972). Well-preserved graffiti
 from the 70s located in parallel Cokecan tunnel.
 History: Looks like it hadn't been popped since the 80s. Named
 after the cans of Fanta from the 70s littering the floor, as well as
 Thongs' bright orange hatchback (which was used to
 transport us there). A few weeks later, the better parallel tunnel
 (disused, lacks a pipeline) was cracked open and abseiled into by
 Nick, Rowan, Iso and Thongs and named 'Cokecan' after the Coke
 cans strewn about the floor.
 To-Do: Clear drainage ditch to enable access to Cokecan tunnel
 from Fantacan main tunnel.
 Found: Iso & Thongs, 2016
 Rating: 3.5/5.0
 Created: 2016-10-05 12:48:04

Name: Frankenstein
 Alternate: Rascals Carrier, Bradfield Carrier (actual name)
 Description: 457m long rock blasted tunnel, containing a 228mm
 vitrified clay

pipe for the sewer.
The tunnel itself varies in height from around 5.5' to 6'.
5m deep shaft at it's southern end, 35m deep shaft at the
northern end.

Features: Entry shaft with mystical concrete portal into the rock-
blasted section. A few original wooden sleepers remain from tracks
of small steel wagons that were used to remove spoil.
Wide sections at regular intervals.
Sewer pipe traversing the length of the rock-blasted
passage.

Small crustaceans all over the ground, some frogs, worms
of some description.

Access: Fiddens Wharf Rd, opposite Knox St, Killara.
Upstream end through a raised manhole shaft over a small
drop (tricky to lift manhole lid).
Approximately 40m west of Knox St in the bush
[GPS:-33.781264,151.14477] (GPS is a rough guide only).

Downstream end is at the bottom of a 35m deep shaft,
accessed through Jinkers Green, just off Charles St. The manhole is
located near the overhanging branches of a large tree.
[GPS:-33.777237,151.146135] (GPS is a rough guide only).

Don't use this end. Bad air.

Locality: Killara
Region: NSW
Country: Australia
Care: Lifting the manhole near Knox St is a bit tricky. Hard to
attain balance and leverage.

Muddy in some places.

Eek!: Sewer. Bad air if you go all the way north. You'll notice
when the air gets worse.

Water Level: Slimey - Shoe
Cond: Original
History: The Bradfield Carrier was constructed between May 1960 and
May 1961. The shaft was sunk by drilling and blasting, the
spoil loaded into small steel wagons which were pushed along the
tunnel to the base of the shaft, hoisted up, then pushed along a
short length of rail track and tipped down the steep bank of the
adjoining creek.

Sydney Water Heritage detail:

<http://www.sydneywater.com.au/SW/water-the-environment/what-we-re-doing/Heritage-search/heritage-detail/index.htm?heritageid=4570960&FromPage=searchresults>

To-Do: Get exact GPS coordinates.
Test the air with a gas meter before proceeding to the very end.

Notes: Heritage document first seen by Rascal in 2010. After several trips with Scarecrow only the northern end was found. What we didn't know was that we actually found the southern end as well, in 2010. We even lifted the manhole. Big oversight.

Name: Gatemouth Brown
Alternate: Clarence Tunnel, Zig Zag Tunnel No. 1
Description: 500m long sandstone rail tunnel constructed in 1866-69 and superseded in 1910.
Features: Highest rail tunnel in Australia. Also one of the oldest.
Access: Zig Zag Railway station here: [GPS:-33.476442,150.223222].
Park here: [GPS:-33.478026,150.220501], and walk west
along the tracks.
Eastern Portal: [GPS:-33.478362,150.218229].
Western Portal: [GPS:-33.477425,150.212903].
Locality: Clarence
Region: NSW
Country: Australia
Care: Houses near Western portal. Carpark is used as a meeting place
for 4WD Clubs and dirt bikers.
Eek!: Some asbestos sheeting - but almost always wet.
Water Level: Dry - Dry
Cond: As good as it gets - pristine
History: Sandstone rail tunnel completed in 1869 as part of the main
western line. Sits at the top of the Great Zig Zag,
immediately to the west of Zig Zag Railway station. This tunnel was
superceded by the Ten Tunnels Deviation (aka Rat Holes) in
1910.
Phosgen munitions were stored here during WW2.
To-Do: 1. Find the remnants of the other demolished Clarence
stations - the existing one is the second station which was left
derelict until the third station was closed and demolished in 1974.
Where was the first? Where was the third? And what dates were
each of these operational?
views or 2. Follow the tracks to the east to discover any good
alternative access points to Rat Holes
3. Locate the site of the funicular railway used for the
construction of Ten Tunnels Deviation (Rat Holes)
Notes: This is an easy walk in tunnel. Great for photos and in
pristine

operational condition. Rumour has it that Zig Zag will become again in July 2013 and also incorporate the nearby Newnes Junction.

 Care: Only explore after 11pm (1230am w/e) when light rail
 stops.
 Found: 2004 Pandaman.
 Rating: 2.0/5.0
 Update: 2011-06-12 14:00:00 (Red) - Access possible as at 12-13
 June
 2011. Jubilee Park tunnel entrance has camera blocked by
 passenger shelter (it is watching passengers after all).
 Walked
 straight in from western end of tunnel with no issues
 experienced
 - although it was late on a Sunday night before a public
 holiday.
 Lights were off. No signs of security or anything out of
 the
 (in)ordinary.
 Update: 2010-12-17 13:00:00 (Red) - Camera at western end of
 tunnel is
 not directly above or attached to the tunnel itself but is
 5-10
 metres out from the tunnel on the southern platform.
 Unseen
 access may still be possible by closely walking around
 perimeter
 fence at the north-eastern corner of the station to avoid
 being
 seen by this camera. I did not see any other cameras
 facing the
 tunnel itself although I could have been mistaken.
 Update: 2010-02-01 13:00:00 (Ghost) - Eek: Camera's at tram
 stations at
 both ends of tunnel.
 dog
 Security patrols area. Tunnel also used for Security
 training.

mushroom pots are gone, and around half of the metal
been dismantled awaiting removal. Most of the dumped
gone, and one demountable building has been removed. It
that when there is a group of cars at the top of the road
being cleaned up. Access to the tunnel is through a
open door. If that is locked, the entire gate swings open,
crawl under. You will need a torch, as the lights seem to
disconnected. Active power still, as I accidentally turned
extractor fan on looking for the light switch. USE CAUTION
wiring is dodgy... Further update: copper thieves have
through & ripped down the working lights. Also as I was
the tunnel (with permission from one of the workers) a van
past & tried to photograph me, I presume a resident or the
owners. Best parking is now at Knapsack st
(-33.7651541,150.6356246) as the road is blocked with

May 2016-Tunnel is now locked, access may be

possible by jumping 2 fences & squeezing under the hinged
main door. Also signs warning of cameras have been added, and
quite likely seeing as at least 2 thefts (all the copper one
night, the forklift another night) have occurred.

Update: 2015-08-19 14:00:00 (Tim Dole) - Currently under
investigation for illegal practices such as self wiring and squatting,
as a result it may be easier to access from the 'bottom' end
[GPS:-33.7680773613,150.634116747], or it might be even
harder to access in the near future.

Description: 2.4m diameter tunnel used for carrying dual sewerage pipes

of 60m.
beneath the Brisbane River for a total of 600m at a depth
Features: Deep tunnel under the river, walkway in centre of tunnel,
tunnel & access shaft lights, sump
Access: #1 (North) Via access shaft on the cnr of Riverview Tce &
Kingsford Smith Dr, Hamilton
#2 (South) Via access shaft in empty block between houses
on
Cowper St, Bulimba
Locality: Hamilton & Bulimba
Region: QLD
Country: Australia
Care: Sections of walkway can be unstable
Eek!: Bring down the portable gasometer and exit the tunnel at
the first indication of gases
Water Level: Shoe - Shin
History: First tunnel constructed under the Brisbane River. Work
commenced in 1948 however with a dig rate of only 9 meters each week
it wasn't completed until 1955
"The four experienced miners at the tunnel face work in a
roaring, wet, grey fog. They guide two long rock-drills
fixed to a wheeled hydraulic mounting, the 'Jumbo.' River water
seeps down the brightly-lit walls enclosing the 10ft. diameter
tunnel. The men leave the tunnel when gelignite plugged into the
drill-holes is exploded electrically from above."
To-Do: For the best experience do a round-trip by entering on one
side of the river, walking through the tunnel to and exiting
via the opposite side. Wear your shit covered vollies with pride
on the ferry back over to the car.

Name: Hotdog
Description: Arched 7ft H tunnel carrying the Sydney water feeder
pipeline
from Woronora dam. Runs under Bundanoon Rd. MPL=150m.
Features: Funnelweb spiders at entry. Mini Railway service tracks.
Access: Cnr Kelton Pl and Bundanoon Rd, [Sw:353D15, UBD:331K07,
Grg:488K07]. On the RHS side of Bundanoon Rd, after the
houses
end, is a waterboard service track. Head down here for
about
200m. Follow fence to the end, and on the opposite side of
the
pipe the fence has a hole in it. Walk back up length of
pipe to
find tunnel. Tunnel is blocked by bars. Padlock is rusted,
but
left open. Make sure to put it back after your visit!.

Western end of tunnel: [GPS:-34.040981,151.017083].
Eastern end of tunnel: [GPS:-34.041041,151.019576].

UPDATE 2009 H2o:
someone has bent the bars on the end of the
tunnel and
if u go
out there and walk to your left up the hill it
takes
you to
kelton pl :)

Locality: Woronora Heights
Region: NSW
Country: Australia
Eek!: Spiders. Lots of spiders.
Water Level: Slimey
History: Urban Legend says that there was a 9 year old girl who
drowned in
here when the place was being constructed as she was
exploring
the works. A barrow of concrete fell and trapped her
overnight,
in a deepening pool of water created by the mud. On a cold
winters night you can hear her shivering and screams. Nah,
just
shitting you!.

Found: 2007 Anakaine/Neptune.
Rating: 3.0/5.0
Update: 2011-11-13 13:00:00 (Red) - Bent bars off Kelton Pl are still bent but are now covered by mesh. Opposite end of tunnel still accessible - just open the door (rusted shut but openable with a small amount of strength).

Name: Ivory Tunnels
Description: Maintenance staircase w/ adjoining pump room & smoke extractor fans for the Ivory St Road Tunnel
Features: Staircase, well preserved pump room, cool indigenous graf by former occupants
Access: Via locked door inside fenced structure in the park above
Locality: Fortitude Valley
Region: QLD
Country: Australia
Eek!: Watch out for the local residents in the park
Water Level: Dry - Dry
Found: 2009 Dsankt & Ekweleks
Rating: 2.0/5.0
Created: 2015-06-03 14:00:00

Name: Jamesy's Naughty Corner
Description: A pointless empty concrete room, similar to "Hatchet's Hole".
Features: Child-sized gate. Fenced-off "playpen" area with the "naughty corner" below. Rusty stepirons. Bundle of power cables you have to step over. The smell of mud. An adjacent room you can get excited about before you stick your head in it and realize it's tiny and leads nowhere.
Access: Top of stairs between south end of Jenkins St and Hickson Rd
iron [GPS:-33.862914,151.203277]; open small gate in wrought-fence, lift rectangular concrete lid (using a standard manhole

lifter).
Locality: Millers Point
Region: NSW
Country: Australia
Care: Entrance is across the road from a block of apartments.
It's probably unwise to jump on the power cables.
Water Level: Muddy
To-Do: Throw misbehaving children down there.
Found: Aydun, Delo, Maggot, Ratter, Scarecrow (2016)
Rating: 1.5/5.0
Created: 2016-03-14 10:11:06

Name: John Street Tunnel
Alternate: Lb's Tunnel
Description: Originally a 124m double-track tunnel used for the Rozelle
- Darling Harbour Goods Line, was disused for "days" in 1996
before being converted for use on the Dulwich Hill Light Rail
Line. The cutting between the original tunnel's eastern portal and
the Harris Street Bridge was connected by a partial covering
to support development above and now houses the (active) John
Street Square Light Rail Station.

MPL=150m
TEL=300m
Access: Walk off platform at Fish Market station
walk [GPS:-33.870860,151.192190] and along tracks to tunnel, or
off platform at John Street Square station
[GPS:-33.867476,151.192217] and straight into tunnel.

or find your own way to the bottom of the cliff and to the
tunnel portal [GPS:-33.868848,151.191104]
Locality: Pyrmont
Region: NSW
Country: Australia
Care: Part of "tunnel" is active Light Rail station equipped
with cameras, although they are seemingly easy to avoid.

BDAN - Light Rail may actually be running up to an hour
after "last service"

Water Level: Slimey - Dry
Notes: Can continue along the tracks to the unlisted (and
unexplored?)
Casino tunnel (partially in use 24/7)
Found: Pandaman 2015
Rating: 2.0/5.0
Created: 2015-11-19 13:00:00

Name: Kelvinbridge To Stobcross
Description: 3 train tunnels with short open sections.
Features: A small lake, lots of plants and debris, overhead viewing
junction platforms, ends up joining the live tunnel in a nice
section going out of Exhibition Station. Nice waterfall
spouting from holes in ceiling above lake.
Access: Tunnel mouth is under the staircase leading up to Eldon St
at the corner with Park Rd. Is locked, need to squeeze under
gate.
[A-Z:82C1]
Locality: Kelvingrove
Region: Scotland
Country: United Kingdom
Care: Dont get seen by trains in live tunnel.
Water Level: Knee deep for 20-30 metres
Cond: Moss covered, debris strewn, damp.
To-Do: Explore live tunnels.
Found: 1995 Milk Crate Gang
Rating: 3.5/5.0

Name: Labyrinth
Description: SRA Cable tunnel that leads into the basement of an SRA
building.
TEL=300m.
Features: Lots of big cables, nooks and crannies, as well as access
to building. Big room with cables on floor in pit. 6' with
ramps that take it to 9'.
Access: #1, UE Mushroom shaped vent next to rail lines, near gates,
on crook of Sth side of Cooper St (near Chapman St)
[Sw:274P18,
UBD:233F10, Grg:341F10, [GPS:-33.867377,151.091311]]. Lift
off (2

people) and lower yourself in.
#2,EX: Via door on far side of pit room.
Locality: Strathfield
Region: NSW
Country: Australia
Care: Do only at night, keep an eye out for RailCrap personnel.
Replace vent.
Water Level: Dry
Notes: Take a few milkcrates to get yourself out of there.
Found: 1999 Trioxide.
Rating: 4.0/5.0
Created: 1995-12-31 13:00:00
Modified: 2004-09-04 14:00:00

Name: Lavender Bay Rail Tunnel
Description: LIVE double-rail tunnel occupied by single track.
TEL=309m.
Access: * Walk around gate S end of Monroe St then walk along
tracks
* For more non-exposed access via Sawmillers Reserve.
* [Sw:277G07/045G07, UBD:216B15/007D14, Grg:315G15/005D14,

 Name: London Rd
 Description: Trashed semi underground platform, long train tunnel.
 Features: Wrecked platform, of little interest. Tunnel is double
 track,
 over 1.4km long, with a stream running thru it. Remains of
 burnt
 out car, two large steam vent chambers with pillars and
 high up
 grilles, bases strewn with debris.
 Access: On Dalmarnock Road, just north past Bridgeton Station
 there is a
 railway access road that cuts back towards the
 intersection of
 London and Dalmarnock Rds. This leads to the station
 under
 London Rd, the tunnel being at the west end of the
 station.
 [A-z:104B1]
 Locality: Barrowfeild
 Region: Scotland

Modified: 2005-08-09 14:00:00

Name: Long Island Rail Tunnels
Description: 1 x disused 250m double-track train tunnel, and 1 x live 263m double-track train tunnel. TEL=513m.
Features: Concrete floor, old bits of storage junk, locked gates at either end of disused tunnel.
Access: Follow road alongside railway from 1st wharf towards the rail bridge. When railway line disappears from site, head towards it, over, through or under the gate. You will see the disused tunnel first [Sw:137P12, UBD:056J08/-CC:114J08, Grg:076D08, [GPS:-33.5404360125,151.229391067]]. Over the rise to the W is the live one.
Locality: Brooklyn
Region: NSW
Country: Australia
Care: *Live: Trains. You get 20 seconds warning when indicator lights go out. Be wary of freight trains, as cars are not lit up, and a train may consist of a number of empty flat cars joined together.
doesn't see *Both: A hermit lives in the shed nearby. Be sure he they run you, as he will call police. He has two dobermans, but are inside announcing your arrival. The N end of the tunnels close to occupied houses, so make little noise.
Notes: The disused tunnel fed the original railway bridge, which was replaced in the 1940s due to structural faults.
underneath. Not * The Railway Bridge also has a short crawl-way good enough to appear as a location in its own right.
Found by Mr India.
locks 2008 (Anakaine) - 2/11/2008
Locked up hard with evidence of previously cut nearby.

approach No sign of the hermit and his dobermans on
from Brooklyn
end.

machinery, and 2 well maintained boats, several bits of
one
council truck located inside tunnel.

Nearby: Boronia #5: 74m disused double track train tunnel, now
railway access road tunnel. Massive cracks in structure. Active
railway line now runs alongside, just outside the tunnel. One
wonders how long before it collapses, one does. When it does collapse
it will push the live track off the cliff. Accident waiting to
happen.

*Acc: Hawkesbury Cr [Sw:137H16, UBD:056C12/-CC:114C12, XED, XNL,
 XWPT]. Park at nearby Reserve. At end of Hawkesbury Cr,
cross train tracks, follow service road up hill, taking 1st and
2nd R.

*Nearby are Boronia #4 (74m) & #3 (141m). From #5 walk along the
track towards Sydney.

Name: Lower Bay
Description: Long abandoned subway platform beneath Bay Station on the
TTC
Features: Bloor Danforth Line. Associated access tunnels.
operational Dusty and decrepit platform, very similar to its
to upper sibling, well lit and serviced by tunnels going both
alcoves and Museum and Yonge stations. The tunnels have numerous
the side passages, airvent chambers, storage areas and erm,
Access: occaisional passing train.
said to The platform itself is directly below the operational Bay
do a platform. [Mapart: 192 K74] Theres is a door down that is
me openable but its much more fun to use it as an exit and

tunnel run from Museum to get in. Go to Museum station
 [Mapart: 192 K73], then when the coast is clear walk off the north
 end of the eastern platform (Union Station/Finch bound side) and
 head directly for the right hand tunnel.
 Locality: Downtown/Yorkville.
 Region: OR
 Country: United States of America
 Care: Trains run every 5 mins even at the quietest times. Do not
 get seen going off the platform or youll end up with the TTC
 Police after you. Keep away from the 3rd rail, which fortunatly
 is covered with timber boarding and mind for trains. They
 very rarely pass down the Lower Bay tunnels, but if one does,
 get out of the way! Lie down on the side of the tunnel or if
 theres a random alcove nearby, get into it. And please note that
 the trains runneing through the upper tunnels are very noisy
 and you may mistakenly think they are in the Lower tunnel with
 you. Platform is used for storage and occaisionally as a film
 set.
 Water Level: Shin deep sections in alcoves between Lower Bay and Yonge,
 avoidable
 Found: 1999 Ninjalicious

Description: Air conditioning for the railway station bearing the same name.
Access: Large grille near the SW corner of Hyde park
[Sw:297K01/028K01/066K01, UBD:236E13/003J09/000hC02, Grg:345K13/003J09/000eC02/000fC02, [GPS:-33.8765051501,151.210116586]], next to the bus stops, set into the grass. Requires a hook type tool as the plate is too

large for a stick.
*Another grille: [Sw:277K20/026K20/056K20,
UBD:236E12/003J08/000fC15, Grg:345K12/003J08/000dC15,
[GPS:-33.8745956737,151.2102646], XED, XNL, XWPT], untried
as
yet?.

UPDATE Scarecrow/Hatsumi 2009: 2009 Hats / Scarecrow from
sw
corner of park, down ladder access still fine.
However
once
inside you will see a dwarf sized door in the
wall
through which
is a ladder down to a corridor with at least six
doors
leading of
it. At then end of this corridor is a camera
pointed
back in
direction of ladder, safe to climb down, but
best to go
no
further unless using as escape route. Only tried
two
doors
nearest bottom of ladder, both locked.

Locality: Sydney CBD
Region: NSW
Country: Australia
Care: Leads into cleaning rooms and into the station overhead
ceiling
ducts.
Found: 2003 Mr India.
Rating: 3.0/5.0
Created: 1995-12-31 13:00:00
Modified: 2004-09-02 14:00:00

Name: Narrowneck Tunnel
Alternate: Mt Rennie Tunnel
Description: A 300m long, hand dug tram tunnel running underneath the
Narrowneck Ridge in Katoomba.

The tunnel is mainly 4-5ft high and knee-waist deep in red
water
for the first 50m or so (eastern end) and in a few other
sections, with a dry 7ft cavernous section in the middle.

It was used to transport coal and shale from the Glen
Shale

mines, under Narrowneck to the incline railway at Katoomba Coal Mine (which is now Scenic World). It is pretty well known to locals/bushwalkers/geocachers/history buffs/cave clan members etc.

There was also another 400m long tram tunnel running under Malaita point nearby which was called "Daylight Tunnel", but this has been blocked off and is currently used as a tourist display and avalanche.

Narrowneck Both these tunnels are often confused as being "The Tunnel"

MPL=300m*
TEL=3km+

Features: Old timber roof supports, a cavern section in middle of tunnel, red water, glow worms and a geocache. Also, pretty close to Scenic World which has a bunch of other cool features including an abandoned roller coaster called the "Orphan Rocker" and a bunch of touristy mine stuff.

Access: Eastern/Jamison Valley portal: [GPS:-33.730441,150.289589]
Western/Megalong Valley portal: [GPS:-33.7299177,150.2853043]

side of The eastern portal is located just a few metres to the the Federal Pass track, between the golden stairs and the landslide. It's pretty easy to find, as there is red ochre stained water seeping out of a tunnel and across the track.

Entrance is just metres from the main track.

at The most interesting way to visit this tunnel is to park Scenic World, check out the views and abandoned "Orphan Rocker" rollercoaster which is located in a small brick tunnel behind the multistorey carpark, take the Furber Steps down to the old Katoomba Coal mine and have a look around at the various

the
will be
"features", then follow the Federal Pass track for roughly 1km around Malaita Point, past the landslide until you see orange/red water trickling out across the track. Tunnel on your right.

take
follow the
the
Tunnel will
Golden Stairs/Narrowneck access: Park in parking area on Glenraphael Dr here: [GPS:-33.7343779,150.2824438] and Golden Stairs track down into the (Jamison) valley and Federal Pass track N/W for roughly 1km until you reach orange/red stained water trickling across the track. be on the left.

I have not accessed the western/Megalong Valley end of the tunnel, but this link seems to show the way:

<http://www.youtube.com/watch?v=sLorLzDcOWk>

(They incorrectly call this tunnel "Daylight")..

Locality: Katoomba
Region: NSW
Country: Australia
Care: Low roof, sharp bits of shale jutting out so watch your head, knee-waist deep in parts, slippery rocks, bats, orange/red muddy water, crawl entrance, steep cliffs, take water, fairly isolated location with low/no phone reception. Also possibly leeches and snakes.

Eek!: Tourists and bushwalkers.

Water Level: Shin - Waist
Cond: Poor
History: Some history and a map here:

http://infobluemountains.net.au/rail/ksr/kat_tram.htm

To-Do: Find the other tunnels in the area.

somewhere
found
(There were apparently two more, smaller tram tunnels between Mt Rennie and Daylight tunnels but we have not

around them, there are a few small flooded mine shafts scattered
though).

Also meant to be 34 more old tunnels at Ruined Castle.

Name: Northern Beaches Rail Tunnel

Alternate: Short=Northern Beaches Rail Tnl.

Description: Unfinished single-track rail tunnel branching from North Sydney station with the intention of providing a rail link to the

Northern Beaches. Abandoned 1926. TEL=315m.

Features: Old rusted light fittings.

Access: *Euroka St [Sw:277F05/045F05, UBD:216A13/007B09, Grg:315F13/005B09, [GPS:-33.8398194703,151.201178425]]. Up stairs, over gate onto railway line. Walk thru E-most tunnel (citybound). When the tunnel splits, take the RH branch.

Do a U-turn at the next branch.

UBD:216C13/007E09, *North Sydney station [Sw:277H05/045H05, Grg:315H13/005E09/000kA09, XED, XNL, XWPT], off N (western) end of platform 2.

Locality: North Sydney

Region: NSW

Country: Australia

Care: * Keep an eye on the orange LED warning lights: they go out 10-15 seconds before a train hits you. Head directly to the nearest alcove, don't lie down between the tracks.

and * Never do tunnels whilst scheduled trains are running, remember that outside scheduled times, trains may still run.

seen by * Help preserve location exploration status. Do not get drivers, as they will do the same as they did with the Bondi portal - cameras & sensors.

Photos: * Seccers usually monitor parked trains. Plan available on Cave Clan site.

Notes: Tunnel is gated, but may be only locked with a piece of wire.

Found: 1986 dTrog.

Rating: 4.0/5.0

Update: 2011-06-12 14:00:00 (Red) - Raptor and myself attempted trackwork on a public holiday (trackwork was on the SHB and not here, hence no trains running but). Security or train driver spotted sitting in a camping chair next to driver's compartment of parked train at north-western tunnel beginning. After trying to sneak up closer he responded to the sound (presumably by standing up and freezing, although it was hard to tell if he was facing us because he was a silhouette because of the lights

promptly
did see
the need

behind him. It is unknown if he saw or heard us but we got out of there before the issue could accelerate. If he or hear us, then we may have just reaffirmed to RailCorp for security in these tunnels.

Update:
actual

2010-05-04 14:00:00 (Scarecrow) - (SRA?) seccers partol tunnels when trains have finished running.

Name: OnPCo Overflow Pipes
 Description: Two steel pipes, one 7ft the other 10ft in diameter that acted as
 overflows for the penstock pipes at OnPCo Hydro Plant
 Features: Located at the base of the plants outfall sluice, near the
 base
 of the Niagara Horseshoe Falls. Exceptionally steep,
 leading up
 to surge tanks situated at the top of the gorge cliffs.
 Access: Same as for the Power station; Situated beneath the
 Horseshoe
 Falls [Mapart: 748 X38] its only accessable via its
 service road
 which also doubles as the access road for The Maid Of The
 Mist.
 Either make your down to the road thru the Maid of The
 Mist
 Centre or directly from the access road which is just
 north of
 the centre, off Niagara Pkwy [Mapart: 738 W38]. Head down
 service
 road, take the right at the fork and continue down. Upon
 reaching
 the plant, climb over the fence to the left and head down
 to the
 rocks, then follow along the front of the base of the
 plant.
 Locality: Niagara Falls
 Region: ON
 Country: Canada

Care: Dont slip when climbing up the pipes.
Water Level: Trickle, but you'll likely get wet getting to them, from the falls mist

Name: Penstock Tunnel, The
Description: A pneumatically drilled tunnel through a mountain. MPL: 850m. Ranges from 5.5' high sections to 10'+
Features: Drilled through solid dolerite rock, so no support beams needed. Stairway at the end of the tunnel. Ankle deep mud in sections.
Access: Park at the end of Corin St, West Launceston. Walk across the suspension bridge towards the power station, and take the path up the hill, until you reach a flat section with grilles inset. Over the fence down where all the vegetation is, listen for running water. [GPS:-41.459108,147.110569]
towards You can exit at the U/S end, and bush bash up the hill

back the lookout area and walk back over the mountain, or go
through the tunnel. U/S entry- [GPS:-41.45785,147.10061]
Locality: Launceston
Region: TAS
Country: Australia
Care: Best to do during warm-hot days.
Water Level: Shoe - Shin
History: The tunnel was drilled to a length of 850-metres at a 1 to
110 grade. The tunnel was cut through the hill side instead of
being piped around and it took 16 months to complete using
pneumatic drills. Dolerite is so hard it took one week of eighteen
8-hour shifts cutting from both ends of the tunnel to cut just
2.5 metres however the average speed of the drilling was about
5 metres a week. Was commenced in 1893.
To-Do: Go for a swim in the pens after emerging from the inlet to
wash off all the mud and refresh.
Notes: Look for the tag up spot near the U/S end. Tags written
with mud.

Name: Pre metro
Description: TEL: +/- 8km
50% is in use, 50% is just sitting there
Features: a lot of concrete, the pit
Access: go to the metro station called "schijnpoort" (near the antwerp sport palace) and make your way to the trams going to "linkeroever". You need to walk with the traffic here. If you go lower, to -2, then walk against the traffic.
Its a very short walk to the intersection, about 70m or so. There is a door which can be opened and your in.

You could also abseil into the pit. There is a gap at the far end of the fence, next to the highway.

The exit is far more easy. As soon as you've passed the pit, at the next station make your way to the top, and open the door. It only opens from the inside.
Locality: antwerp / borgerhout
Region: Flemish
Country: Belgium

Care: Since my last visit, a lot of graffiti has been sprayed +
bumping in to 8 other explorers just shows how popular this place
is getting. Security might be tightend.
Cameras on the platforms.
Water Level: Dry - Dry
History: It was planned at the beginning of the 1970s to build a
completely underground network with a length by 15 km and
22 stations. However, due to financial difficulties only 11
stations have been built. The network is now operated by De Lijn.
Opera, The first 1.3 km section opened on 25 May 1975 between
1980, 1990, Meir and Groenplaats. Further sections were opened in
1996 and 2006. The newest station is at Schijnpoort in the
northeast of the system.

UPDATE Flash 2009: #2 entry easiest at present. Delivery
(pic in Gallery) access: Enter from rear
Service Block
#89. Take first R down driveway after 40m. Enter
doors to vast cavity. Various doors in cavity
to service
tunnels etc.

UPDATE Scarecrow/Hatsumi 2009: 2009 Hats and
Using Flashs' map
From the letter 'a' in Missenden Road see small
down side
of building. First door on left use to enter
down to
service tunnels.
At base of stairs go straight ahead and tunnel
to the
right. Along right side look for turn which is
cafeteria
and follow to end. You are now above eating
right and
walk straight to lifts. See small stairs into
lift
area, go up into here.
Door to your right takes you to machinery and
Anyway go straight ahead from top of stairs to
blue doors,
but look right and go in through red fire door

stairwell. Take
stairs to bottom and take right hand side
passage to
fire door.
Through here into open maintenance area with
some cars
parked.
Turn left and walk straight to double doors
marked
Plant Room.
Through here go across to left hand side wall to
blue
single
door. Now we are in a cavity but it appears to
go
nowhere. Turn
left inside and go to end and see dwarf door in
wall.
Enter here
and make your way to the far right. Look up and
see
opening at
top of wall. Climb up here into cavity and
across to
other side.
Now turn left and hello we are in basement
servicey
cavity. First
door on left to more passages we didnt enter. Go
across
expansive
space to opposite side and to your left, stairs
go
down. Follow
wall to the right until you reach door, you are
passing
the sauna
steam area, keep going. Through this door into
new
plant room. Go
nuts good explorer, lots of doors, more
cavities, we
only went
one way so choose your own adventure.
So many options in this maze you could spend a
day
working out
how it all connect.
b/ bottom of first stairs turn left into service
tunnel, turn
left again then at next junction turn right.
Down to
medi

graveyard of hospital equipment..fire door at
end of this area
goes to stairwell to other areas.
c/ bottom of first stairs go left into tunnel
then first right
takes you eventually to driveway out other side
of missenden
road.
d/bottom of first stairs go left then stay left
all way and end
up at maintenance area with lil trucks they use
to drive around
in, take door across to the right which goes
outside, immediately
to your right see door other side of handrail in
wall, through
here to old boiler room and passage that leads
to a ladder down
to some weird pit or ladder up to a hatch that
hasn't been
opened.
e/ go good explorer

Locality: Newtown
Region: NSW
Country: Australia
Care: Be quiet! Don't get caught.
To-Do: Find future access points:
#1 The stairwell at West end of new section goes to sub-
basement.
(requires access to hospital).
#2 The delivery ramp at the back of the hospital that goes
down to the basement, has two doors that lead into cavities,
unfortunately they are highly visible.

 Name: Screamer
 Alternate: What!

Description: Pipe tunnel, near Mini-Dipper. Same type entrance gate, size, has more pipes, and emits a TOTALLY deafening scream, as in high pressure gas through constriction. Or it did back in 1994. Now is a 250m long version of Mini Dipper, but with manhole shaft rather than gates at far end. TEL=250m.
Access: 50m W of W end of Mini-Dipper [Sw:274F14, UBD:232N06, Grg:340H06]. Heads under Western Freeway. Usually locked.
Locality: Homebush West
Region: NSW
Country: Australia
Water Level: Fills up to thigh deep on occasion
Notes: Currently thigh deep.
Found: 1994 Diode.
Rating: 2.0/5.0
Update: 2010-03-12 13:00:00 (Ghost) - Locked with large chain and multiple fuckoff padlocks. Water now removed and part of tunnel now has a wooden hoarding to one side of it. Engine noises can be heard up tunnel. Also demountables onsite

Name: Shooter
Alternate: Dombarton Snow Shute.
Description: Railway tunnel with a view.
Access: Go to Big Red (Farmborough Rd) [NDR], and follow tracks another 15mins and you will actually pass through two of them, the second one is the best.
Locality: Dombarton
Region: NSW
Country: Australia
Care: You NEED a 4WD to access it. Gravel roads. ALSO check train times before you go there as there isn't any room to hide if a train comes.
To-Do: Trip the falling rock-detecting units!.
Found: 2002 Trainman/Millsy.
Rating: 2.0/5.0
Created: 1995-12-31 13:00:00
Modified: 2002-10-06 14:00:00

Name: Sick
Alternate: SCG Hospital Tunnels
Description: A massive and complex maze of intertwining tunnels that run through the basements of Sir Charles Gairdner Hospital. These tunnels are rumored to run under Kings Park and connect up with Royal Perth Hospital some 5kms away.
Features: Pipe central. Massive walkways, stairs and viewing platforms. All areas are well lit. Small cavities that connect up to other sections of the tunnel. Round tunnels, square tunnels and rooms with massive bits of mechanical equipment. You could spend a couple of days in here and not see it all.
Access: (1) From hospital ave enter main building (marked with an 'E' out the front) and walk to the end of the corridor. At the end of corridor turn right and take the lift down to the lowest basement level. If you turn left at corridor walk all way to the end and take blue door lifts to the lowest basement level.
Once in the service corridor enter any open bright red door with the safety warning reading "Before entering the tunnel system please inform your supervisor or the shift engineer".
enter (2) From back of main building go up delivery ramp and through bright red doors.
(1). [GPS:-31.967136,115.816344]
(2). [GPS:-31.966251,115.815091]
Locality: Nedlands
Region: WA
Country: Australia
Care: This one of Perth's busiest hospitals - therefore it is 24 hour 7 days a week. Multiple security staff there at all times.
PIRs and Cameras in service corridor. No such technology in the tunnels themselves.

Eek!: Low headroom in some of the tunnels. Don't touch anything
if you can help it - you may burn yourself.
Water Level: Dry - Dry
Cond: Perfect
To-Do: Explore more sections.
Notes: No tags.

Name: Siege's Cable Tunnel
Description: Reasonably deep cable tunnel leading from the corner of
the road near Pred's Bridge and Curlys to just uphill of the
narrowing channel between Mulltdox and the railway underpass section
(which resembles Roosters Egg).
Access via what have been described as square heavy
gatics, which are often left partially or fully open.
Currently in a state of refurbishment and are surrounded
by poorly constructed temp fencing.
Once inside, permanent scaff leads down a shaft about 2-3
stories deep (very rough estimate)
The actual tunnel appears to be segregated by wood
partitions (1/3 partitioned - 2/3 open)
MPL/TEL 100-120m and Height of 5 feet (from memory, but
could be 4.5/4)
Alternative to the Piss bay at Curly's (or the bridge) for
crossing the Gore Hill freeway.
Features: Good scaff to clamber, the shafts are pretty deep,
definitely Rope-able. Interesting if you're a fan of the Dox System
Access: Entrance [GPS:-33.813456,151.191832]
(literally on corner of Punch Street and Lamb Road, open
mulch patch near brick retaining wall)
Exit (to Mulletdox) [GPS:-33.812458,151.192408]

of (halfway between Mulletdox Channel and walkway at the back
 of Artarmon Reserve)
 Plenty of parking near the Cycleway on Punch St/Lambs Rd
 Also dedicated parking for Artarmon Reserve on Mulletdox
 side
 Locality: Artarmon
 Region: NSW
 Country: Australia
 Care: Fall Hazard in shaft, be careful if wet and slippery.
 Gatic entrance could pose further problems in and out.
 Eek!: Tradies have left ends open, water has pooled at bottom of
 Dox
 end, may be gross but can be avoided by walking on top of
 pipes
 over water.
 Water Level: Ankle - Waist
 Cond: Untouched

Name: Soldiers Pinch Tunnel
Alternate: Zombies Pinch Tunnel
Description: A 20ft high, 50m long concrete arch tunnel under the
Highway between Mt Victoria and Blackheath.

This tunnel is where the newer highway crosses over the
old 2 lane highway. Its not very exciting, but you may as well
check it out if your passing by.

This tunnel was used in the 2014 Aussie zombie movie called
"Wyrmwood". It is sometimes used to hold raves in, and is
also frequented by graffers.

Features: The original 2 lane highway, lots of old broken speakers
and stereos, large pieces and hundreds of empty spray cans.

Access: Park at sports field on unnamed road, just south of

Victoria Falls Rd: [GPS:-33.600429,150.265796] or drive down dirt
road as far as you can. Tunnel is approx 900m south of the sports
fields,

 dusty. Car exhaust et al. The first 50m of the L tunnel has been
 converted into a shooting range by Police. Aggressive homeless guy
 found living there in 2002.
 * Security on SHB.
 * Nice new sharp pointy metal fence at SHB end.
 * Northern portals have locked gate.
 * Camera overlooking northern entry at SHB walkway.

History: Former tram tunnels once used to take trams to & from the
 former platforms 1 & 2 at Wynyard (till this day Wynyard train
 station still doesn't have a platform 1 & 2) for the Northern tram
 lines over the SHB (they didn't continue south into the city
 proper & didn't connect to the rest of the tram system). The tram
 line was closed in 1959. Parts of them were later used as access
 tunnels for the car-park under the (former) Menzis Hotel in
 Wynyard. And although many people have been through there, & it has
 been cleaned up, old cigarette packets, tram tickets, soft-
 drink cans, & other 'memorabilia' from it's time of operation (1930s-
 1959) could still be found in there as late as 2011.

Name: The Stonewall
Alternate: Market city foundations, Paddy's Cavities
Description: The space between the foundation walls of Market City and the surrounding sandstone bedrock. TEL=50m, MPL=50m

Some interesting things in the carpark of Paddy's Markets.
Two
grotty little cavities between the cinderblock and the sandstone,
and one air exhaust plenum that runs along a wall.

FIRST CAVITY:

other end About metre wide, with one tight spot. Opens out at the
chair. into a little room with a bunch of pipes and a grubby
time we There's a doorway here with a gate that was unlocked last
checked. TEL 50m?

SECOND CAVITY:
Much narrower, and you gotta dodge protruding
cables/pipes. Runs
conceivably behind the air conditioning plant room - there might
narrow be access, but we turned back where the cavity gets so
mud, you'd have to chimney up and climb across. Stinky pools of
not very interesting. TEL 100m?

LEVEL B2 AIR EXHAUST PLENUM
A concrete corridor with a fan at one end and grilles
along the wall. Runs the length of the carpark. TEL 80m?
Features: Stormwater pipework, Big Chamber at the end, surreality.
Odd looking rock slab. 4 storey rockclimb
double level platforms with intersting rock climbing face
at 2nd story level.
Access: Enter Market City(Paddy's markets mall), Take elevator to
the bottom basement carpark level (B3 button). [UBD 3:E12]

#1, Look for the exposed rock section at Northern wall of
carpark, next to Elevators. Enter the hole in
fence section closest to Elevators.
**Exposed section has numerous exposed support columns.

#2, Go to LEVEL (B3), Look for a large black water
tank(stormwater sump) surrounded by mesh fencing in
carpark. Enter
hole in fence. There are zipties holding mesh in place...
[GPS:-33.879481,151.201559]

Ratter's description:

Name: Trioxide's Tunnel
Alternate: Metropolitan Goods Line Tunnel at Lilyfield
Description: Former deep sandstone railway cutting capped over with a
concrete arch to form a 20m high X 250m long tunnel beneath the
City West Link between James St & Derbyshire Rd in
Lilyfield/Leichhardt.
TEL = 250m
Features: Cavernous tunnel built in 2001 to replace 4 over-bridges
(James St, Norton St, Henry St, & Derbyshire Rd) with a concrete
cap taking the City West link above the railway. Signal box &
signal, cavities behind half demolished walls.
Access: From Charles St, walk east-bound along the small bush
track that's between the City West Link Rd and the train tracks.
You'll see a big hole in the fence after about 20m.
[GPS:-33.874967,151.154736]
Locality: Lilyfield
Region: NSW
Country: Australia
Care: UPDATE SCARECROW 2013: December 2013.

cameras The western end has a new Light Rail station built, with
already installed.

tunnel, There are new metal walkways along the ground through the
along with more lighting.

(Damn There has been a seccer sitting in his car in the site
Graphers) opposite the north end of Francis St.
Location is close to becoming active again, but should
still be fine to do after Light Rail operating hours.

Water Level: Dry - Dry

Cond: In very good condition, lots of graff around.

History: The railway line was built in the 1920s, the deep cutting
was only capped over in concrete to form a tunnel in 2001 when
the City West Link was extended to meet up with Dobroyd Rd.
Abandoned in 2007 when the Rozelle Railway Yard closed, making it
one of the least used tunnels in the history of NSW railways.

There have been plans to extend the tram line to Leichhardt &/or
Ashfield which would mean trams would use the former goods line &
this tunnel, but these plans have been shelved & nothing has
come of it...yet.

Found: 2001-2008 Pandaman

Rating: 2.0/5.0

Update: 2014-04-05 13:00:00 (Red) - Now active due to light rail
extensions to Dulwich Hill, beginning Thursday, 27 March
2014.
Use discretion, similar to that of Glebe Rail Tunnel.

Update: 2011-01-21 13:00:00 (Ghost) - Relay box has now been
demolished and replaced with a half foot black PVC tube. The entire
track section has been completely been refurbished. Workers
lights have been installed in tunnel roof.

though Care: Work is being performed here. Shift ends at 6pm,
there maybe workers outside hours.

Name: Twin Pits I
Description: Two impressive 5m sq pits about 6m apart with heavy steel
bar
grills on top. One is 12m deep with shear concrete walls
and two
8'h tunnels off the bottom, as well as another 8'h tunnel
with
its floor about 4m above the bottom of the pit. The two
tunnels
from the bottom go to one blower room, while the 3rd
tunnel goes
to another blower room. Total of 8 rooms, 3 tunnels. The
other
pit has a metal roof about 7m down. This is the generator
room
between the two blower rooms.
Features: The depth, blower rooms.
Access: #1,UE: In the Royal Botanic Gardens
[Sw:277L16/026L16/056L16,
UBD:236F08/001L15/000dG14, Grg:346A08/002A15/000bG14,
[GPS:-33.8653532286,151.213376294]], 3m inside the fence
at the
cnr of Macquarie St and Bent St. Under some trees. On the
deep
pit, one of the grille sections is unbolted and can be
moved by
two people. Then you need a wire ladder or a rope and
abseil
gear.
#2,UX: Out door at top of staircase in hub room. This is
actually
the door at the bottom of the set of stairs immediately
outside
the Shakespeare Gates for Botanical Gardens.

UPDATE Hatsumi 07/2011: July 2011 - normally there had
been brackets across the joins of the grilles preventing (easy)
lifting and entry. These have now been removed, in one or
two corners of the pit big chunks of steel missing, looks like
the hulk tore the corner out bolts and all.
Locality: Sydney CBD
Region: NSW
Country: Australia
Notes: UPDATE Hatsumi 2011: No one ever seems to do the twin pits
series, if you like rope work, deep buried city tunnels
and some adventure these are worth chasing down.

Name: University Of NSW Service Tunnels
Alternate: UNSW Tunnels; Dave's STD. Short=Uni NSW Srv Tnls.
Description: Long tunnel with seven side tunnels, supplying power, gas,
water
etc to UNSW.
Features: Big tunnels, up to 12'h, staircases, side tunnels, sloping
tunnels, wall cavities, access to basements, shape and
size
changes. Very expansive.
Access: Law Faculty building, [Sw:298C19/077C19,
UBD:256P15/020M14,
Grg:376J15, [GPS:-33.9178062015,151.233394542]]. Look for
stairs
S side of entrance. At the bottom of this reach thru
louvers in
green door and undo latch, once in, go thru wall cavity
until you
reach gate, contort over this, emerge in tunnel.
Locality: Kensington
Region: NSW
Country: Australia
Care: Don't open door at top of ladder situated at base of steps
as
it's alarmed.
Water Level: Ankle at entrance
Notes: 2008 (Hatsumi) - * Law fac building is actually off main
path
from Anzac pde, see campus pdf online
* There are no green doors but new silver ones
with

vents, the
 gaps between vents are spacious enough for a
 hand but
 wire mesh
 has been secured to door from inside - need tool
 but
 easy stuff
 * new (?) emergency entry to tunnels in
 grounds, door
 sized
 sliding lid on rails with little hand sized
 hatch
 screwed down
 presum for lock mechanism
 TO DO
 * 5-5.5FT drainage tunnels through campus seen
 through
 various
 new looking swing grilles
 * Climb inside cds units (4) around the main
 oval, we
 looked in
 but didn't enter as inflow pipes, from what we
 could
 tell, was
 only 2ft. Not locked and handy ladders provided.
 * Take a drayne key with you, we didn't, and
 missed
 plenty of
 interesting new and old gattics and manholes
 Care
 * rooftop corners of buildings, not all, have
 domes, at
 that
 height assume zoom capabilities are very good.
 Also
 some paths
 have poles and domes
 Seccers in lil cars doing random runs but look
 like a
 student and
 no problem, we played there for hours
 Recommend arriving at sunset or just after, easy
 to
 blend into
 scenery, still ppl about so not so conspicuous
 as
 arriving at
 midnight and being only ones there.

 Found: 2001 Oriface.
 Rating: 5.0/5.0

Update: 2012-04-14 14:00:00 (Toothpick) - The old vent door that we used to use, as we have known for a while now, has long been missing. I went by the other night and saw that the uni has finally gotten around to locking it up tight. Access is thus no longer possible from the stairs on the SW corner of the library building. See gallery for picks of new door and lock.

Name: Wilson Creek Culvert and Dam
Alternate: Elephant Eye
Description: 90m long, 15ft high X 20ft wide culvert running beneath the old & current Illawarra railway lines. Dam with 7ft deep swimming pool at upstream end. 15 degree 'kink' where the old & new culverts meet about a 1/3rd of the way in. Lots of local graff, yabbies.

a mark Coolest spot to hang out in Helensburgh during summer. Has
an on the bottom of the dam that Oriface suggested looks like
Elephant's Eye, hence the alternate name.
On the way between Helensburgh train station & Cawley
Tunnel.
Features: Texture changes from red brick to white brick at the kink
signifying the 2 different periods of construction.
Swimming pool with 'Tarzan' rope to swing from tree into
pool.
side Large albeit short tunnel, 15 high X 20ft wide. Has dry
bench on southern side to sit on.
Access: Drive north along Wilson Creek Road from Helensburgh
station, & as the road turns right (heading north) you pass over the
well signposted Wilson Creek here...
[GPS:-34.176054,150.992824]
& then Park somewhere around here without disturbing the locals,
climb down & follow the creek upstream through the tunnel
upstream to the dam. 15m downstream from the road is a 15m
tall waterfall, nice spot for lunch or a rest. The actual dam
is on the other side of the railway line beneath the Helensburgh
Train Station carpark here...
[GPS:-34.17595,150.991673]
Locality: Helensburgh
Region: NSW
Country: Australia
Care: Floor can be rather slipper. Locals live nearby but never
seem to mind visitors.
Eek!: Don't fall in the dam while carrying your camera & other
electrical thingies.
Water Level: Slimey - Swim
History: Originally built in the 1880s to take the single Illawarra
line over Wilsons Creek at Helensburgh, but it was widened in
the 1910's to accommodate the 2nd line upon duplication.
To-Do: Have a party at the swimming hole.

Name: Woy Woy Tunnel
 Alternate: FarknTrainComin.
 Description: 1.77km straight double-track railway tunnel near Woy Woy
 with no warning lights. Plus a further 100m of cutting W (Sydney)
 end before safety and security of ladder. TEL=1.77km.
 Features: Total 1.9kms of heart-stopping, donger-free, non-
 lubricated train-spotting, train-avoiding action. The challenge. The
 adrenalin. It is bloody worth it.
 Access: #1,UA: Woy Woy Rd, near Woy Woy. Park at Correa Bay
 Reserve, SW of Woy Woy [Sw:NDR, UBD-CC:106G03], or Horsefield Rd
 [Sw:NDR, UBD-CC:106F02, XED, XNL, XWPT]. Walk to Abattoirs entry at
 bend of road near creek. Use track that heads uphill. Go under
 SRA padlocked gate. Do not use torches until you get inside
 tunnel. Watch out for cattle grid. Take LH fork up to railway
 gate. Be quiet when walking - Abattoir resident caretaker calls
 police. Through gate, head W (line S) until you get to portal.
 Note: Tunnel actually runs E/W, but for ease of instructions,
 N/S is used to indicate train direction: (N=E, S=W).
 *East portal: [Sw:001M01/008D01, UBD-CC:106B03, Grg:NDR,
 [GPS:-33.4943114723,151.289723787], XED, XNL].
 *West portal: [Sw:001L01/008C01, UBD-CC:095K15, Grg:NDR,
 [GPS:-33.486360024,151.272994003], XED, XNL].
 *Advice: Wait (hidden) for southbound train & follow in.
 This will, but DO NOT rely on it, give you 5-10 minutes to get
 some distance between you and the end of the tunnel before the
 next southbound train. You may have a considerable wait. Use
 CityRail timetable to time yourself to arrive a few minutes before
 a southbound train.
 Take #2,AX: Back through the tunnel, or via a 3.5+ km bushwalk:
 Follow path from ladder at Sydney end of tunnel to above portal.
 following gravel & cement road up hill. Turn L at junction. Keep
 under a dirt road. At intersection of roads (not path & road),

power line, turn L. Power line runs directly above tunnel.
Follow

Horsefield Rd and a further few more kms to the Correa Bay
Reserve carpark. GPS waypoint & track data available from
you will be seen. Keep an eye on the horizon (both tunnel
for changes in light caused by oncoming headlights. For
reason, never shine bright torches at the tunnel portals.
#3: Maximum of 6 people, two groups of 3, keeping a
at least 25m between groups. Lead group keeps an eye on
end, trailing group keeps an eye on behind end. Use only
dull torches. Do not shine towards train - drivers will
#4: Total of 77 alcoves (39 southbound side & 38
side). Alcoves are numbered from S to N, odd being
side. Distance between alcoves on the same side is approx
Maximum 3 people per alcove, however some are deep, but
two are very shallow. As a rule, when a train approaches,
forward to the next alcove.
#5: Once in an alcove, when a train is coming, stay there
not put your head out (even just a little) as it WILL BE
CLEARLY SEEN. After passenger trains have passed, do not
of alcove, as guard in train rear will see you. Wait until
gets to other end. Be aware, train coming in opposite
at the same time will be harder to see. Be wary of freight

number well - cars are not lit up, and a train may consist of a
of empty flat cars joined together.
#6: Use care when approaching the S/W end (alcoves <#7),
as you still have to negotiate the 100m cutting. Keep quiet &
listen, as approaching train noises echo up the valley, and this
noise is an indicator not to attempt the cutting. But watch out
behind you as a train is southbound at 115 kph!.
>#60), #7: Use greater care when approaching the N/E end (alcoves
train as you get very little warning of approaching train. If a
will not approaches, do not run the length of the cutting, there
be enough time.
exit #8: If you are seen, but are not caught, use the bushwalk
will be (see Exit), otherwise it is likely rail staff & police
usually waiting for you at the Woy Woy end. Train drivers will
short blast the horn if they see you. Note, it is SOP to give a
Eek!: blast when entering tunnels, however some drivers do not.
You Trains, trains & more trains. 24/7. Passenger & freight.
passenger cannot avoid them. XPT speed limit is 120, inter-urban
will is 115. Only daily operational timetables for track staff
so will help you. Abattoir stinks of flesh, blood, and death. And
explorers who the tunnel, if you aren't careful. Consider future
will not want to tread in/on your remains.
Notes: #1: The corner at the S/W end gives you a little more
warning when train headlights light it up, but be warned, some
drivers operate without headlights. What do you expect from those
that drive on bald tyres?. Take scanner and listen to
450.050mhz. You will need to listen to Rail M-net as well. Driver may not
blast horn, but use the radio to send messages about people in
tunnel. Most drivers are issued with mobile phones, so they may
use these

people in to notify controllers and transit coppers or police of
the tunnel.
#2: Always park at least 1 car near the speed camera - it
can be used to transport other drivers to their cars, who in turn
can pick up all the others. The camera is in a remote area, so
is a parking an emergency car there is dodgy (thieves) - there
an more secluded place 200m towards Woy Woy. Use a car with
immobilise facility.
#3: It takes about 40 mins to walk one way through the
tunnel.
This does not include waiting times.
#4: Get experience playing with big, real trains at Cowan
or Long Island tunnels before you try to tackle this mother.

Region:         NSW
Country:        Australia

```

Notes: Anakaine Update 09/2008:
South-western side of bridge (Menai side),
underneath,
has a
raised grill topped structure leading to 1ft
drains
below that
once climbed will grant explorers access to the
3ft
platform that
services the expansion gaps. Getting on to this
platform means
you walk right in to the bridge.

Caution: Climbing the structure is easy enough,
it's
getting from
structure to platform that is tricky. There is
5ft chin
up to do
from structure to platform, and a 5m fall on to
rocks 3
inches to
your left.

How to: Currently there is a snap strap
installed to
aid
climbers. It is dodgy at best. To do this, you
should
take a rope
approximately 5-6m in length. A small square
hole in
the side
wall of the upper most platform can be used to
feed
rope around
the concrete and back to the climber to be tied
off,
effectively
wrapping it around a wall and creating a
footrest and
safety
line.

It's simpler than it sounds. Just take rope!

Name: Collosus
 Description: Large sized, extreemly long twin span road bridge with internal stormwater conduits. Two dead straight, 10' high 15' wide smooth floor bridgerooms (approx 1.1km long!).
 Features: Current access to pylons via hanging/floating gantrey from deck.
 Access: Boats on deck along with big-arsed plant and machinery. Located on Karuah bypass freeway. Second of two bridges encountered when northbound on Pacific Hwy. Crosses very wide river Entrance doorway on Southern side of Abutment on Eastern end of bridge. Possible belly squeeze under span into abutment when completed. [NDR].
 * Current acc: Turn north off Pacific Hwy along major road through aboriginal village and follow Riverside Dr to gate of Karuah Wildlife Reserve. Drive Through gate into reserve and follow main track northwards 2 km to locked boom gate. Walk past boom gate to bypass under construction. Walk East along Fwy - go past construction camp. This is the SECOND bridge you cross over. WARNING: security patrol along bypass and access road - watch for headlights Construction camp was empty at 1AM on weeknight - however procede with caution. Cammeras in construction camp - no not enter - walk along fwy. [NDR].
 Locality: Karuah

Name: Dogtrap Bridge
Description: Bridge, built 1983, which takes Dogtrap Rd over the F3 Freeway. 3
rooms linked by small round cavities in walls. Thin people
only.
Features: Weighted hatch provides upsidedown cover to access hole.
Access: #1,UA: Follow Dogtrap road up from Pacific Hwy until you reach
the freeway overpass [Sw:NDR, UBD-CC:067D07, Grg:NDR,
[GPS:-33.3593129838,151.338733829]]. Park on W side of
bridge and
climb down rocks on SW side of bridge till you get under
bridge.
Use screwdriver or crowbar to pry the hatch down as it is
held up
by a weight on a pulley.
#2,AA: Manholes in middle of road surface also provide
access, if
you have gatics, and are willing to open them up.
Locality: Ourimbah
Region: NSW
Country: Australia
Care: Very steep drop to freeway.
Eek!: OH&S safety issue: How could the RTA be so stupid in
designing
that pulley system? The weight is directly over the edge
of the
hole. If it were to slip off its clamps and bean you -
instant

resulting massive fatal head injuries or possible neck injuries
take some in permanent paralysis. Next visitor to Dogtrap please
wire cutters and remove the stupid thing.
* Wear a helmet if visiting Dogtrap Bridge.

 Brand new. No pidgeon poo, and let's keep it that way by
 them out.
 (From Wikipedia) In April 2009, the NSW Government
 to construct a second bridge over Iron Cove as part of the
 West Busway along Victoria Road.
 The new bridge has been constructed on the western side of
 existing bridge and holds three westbound traffic lanes
 lane designated as an AM bus lane. The existing bridge now
 carries three city bound traffic lanes and a 24 hour bus
 The existing outrigger lane has been closed and is now
 for maintenance reasons. There is also a 4.3 metre wide
 pedestrian and cycle path on the western side of the new
 which connects to both the The Bay Run and Victoria Road.
 Work on the duplicate bridge commenced in July 2009. It
 opened to traffic late on Friday 28th January 2011.
 Continue ensuring that bolts nuts washers and plates
 intact and installed into the mesh; in addition to
 the mesh does not get cut. No tagging or graff.

Name: Knapsack Viaduct
Description: In John Whitton's words, the bridge 'consisted of five spans of fifty feet and two of twenty feet each, built in masonry . . . for a single line of railway on an incline of 1 in 30'. This primary description failed to convey the majesty of the block sandstone viaduct sweeping across Jamisons Creek, a deep sandstone gully, with maximum pier heights of 38m, and excellent stonemasonry. The tall ribbed piers taper with height and are topped with classical semi-circular sandstone arches built on corbels at the spring lines. The current configuration incorporates sandstone faced reinforced concrete cross beams at each pier which cantilever to support a reinforced concrete road deck has a road width of 30 feet (9.1m). The bridge terminates in traditional sandstone abutments which have been widened to accommodate the revised road width. The bridge now sits on a disused road.

Features: Features as described by 'Railway Guide NSW, 1879' - 'the Railway may be seen winding upwards - past huge rocks and steep declivities, alternating with dense woods; the noble viaduct across Knapsack Gully being hence already distinguishable . . . You have by this time arrived at the Knapsack Gully Viaduct - boldly erected across a steep and stony gorge by the genius of the Engineer in Chief, John Whitton. This admirable and imposing structure (which Imperial Rome . . . might have been proud to claim) consists of seven successive arches'. 'It must have seemed like flying.'

Access: The most rewarding access is via method #1 #1: Locate corner Old Great Western Highway and Walkers Crescent, Emu plains.

cross it. Immediately west (50m) is the rail line and a bridge to
of old Head over bridge, and park in parking bay. Observe ruins
the cottage and obelisk in front of you. Up the hill further
bridge, track begins. At a leisurely walk it is 10 minutes to the
Heading down not the 30minutes that the NPWS signage suggests. #2
descent. (east) the Great Western Highway there is an unmarked, but
blocked off side road towards the bottom of the last
parking in this area provides a short 1 minute walk to the
bridge. [GPS:-33.759103,150.639899].

Eek!: This writeup infringes heavily on copyright.

Water Level: Dry

Cond: Excellent condition

History: The Knapsack Viaduct was designed by and built under the
direction of John Whitton, second Engineer-in-Chief for

Railways. Its purpose was to carry the original Western Railway Line
across

part of Knapsack Gully at the head of Jamison Creek. It formed

from Emu the Little Zig Zag, which climbed the eastern escarpment

to Plains to today's Glenbrook. Whitton repeated this Zig Zag

incorporating descend the western escarpment of the mountains,

Nepean similar stone viaducts. The Victoria Bridge across the

the same River at Penrith was also designed by Whitton as part of

programme, as were the Springwood Railway Station (1884)
and the Bowenfels Railway Station Group (1869).

Modified: 2007-01-14 13:00:00

Name: Legohead
Description: 6.5 foot high bridge room crossis the M7. About 200 metres
long
and tilted on an angle to compliment the curve.
Features: Lego bricks all the way through the bridge. Weird black
goo on
the walls that makes tagging with a nail easy.
Access: Similar access to Aspidgeonosis. [Sw:231J07, UBD:169N07,
Grg:246C07]. Park in the suburbs on the Norwest side of
the
Norwest Blvd access to M7. Walk up to the M7 and its easy
to get
to the abbutment. [GPS:-33.74495,150.937686]

UPDATE SWIM 2013:
Anti-pigeon mesh is currently intact on Norwest Blvd side
of
bridge.
Park in Sporing Avenue or Enda Pl, Kings Langley, and walk
onto

your left cycleway -33.747546,150.941913, and follow cycleway on
hand-side until you get to the M7.
Follow cycleway till it ends -33.745804,150.94001,

Locality: Norwest
Region: NSW
Country: Australia
Care: Don't get spiked on the anti-pidgeon screen.

UPDATE SWIM 2013:
Beware of big rocks & holes when you walk/run on the
grass.
Eek!: No Eeks.
Water Level: Dry
History: Found by Dougo on his second trip to Sydney in 1994,
rebound by Onyx, Ogre, Tyr, Bolt and Hatchet after construction in
2005.
To-Do: Acknowledge Dougo.
Found: 2005 Siologen.

Name: Lennox
Description: Short, narrow tunnels through stonework of old bridge over
Parramatta River. MPL=15m. TEL=30m.
Access: Bridge on Church St [Sw:252N13/080N13, UBD:211C01/024H05,
Grg:308C01, [GPS:-33.8106758809,151.004945849]]. Small
opening at base of NE end of arch. Was blocked with a large concrete
block that had to be car- jacked out of the way. Block is gone
(hmm ... into the river perhaps) but the local council may block
entrance in some other way.
Locality: Parramatta
Region: NSW
Country: Australia
To-Do: Get into the other tunnels, if they exist. Need heavy duty
winch, spade, etc.
Notes: The layout suggests there should be four sets of tunnels,
but only one set is now accessible. There is a story that the
tunnels in this bridge connect up with very old convict built
tunnels

these that go Nth from the bridge up under Church St. Supposedly
concrete tunnels were used as a gaol in early days. Earth &
block.
Found: 1993 Diode/Mullet.
Rating: 4.0/5.0
Update: 2015-01-04 13:00:00 (Red) - Bridge has been renovated and
that landscaped again. There is a concrete block with a reo bar
block 'could' be removed, but there is another, larger concrete
a lot blocking said smaller block. The yellow sandstone has had
not of mortar replaced. Enter is either extremely difficult or
possible.

entering.

however. We have a high security screen fence with large spaced) spikes on the top (although this is climbable gate at a foothold). Fence is otherwise flush with the the sides, leaving this main gate bit the only way to get Going under is an issue, unless you dig under the main the rest of the fence has reo-bars close together digging the ground thus preventing digging underneath to gain However, even if one was to get past this we have, in both corners, a large black dome with camera inside pointing the centre of the caged area. This camera has a large, attached to it and on top of this is something resembling camera or other type of PIR and is black/grey. There is dome camera at the back of the caged area facing the gate several power boxes nearby. Nothing seemed to activate in of security sensors, and several of us where here sussing area for a while. Each white PIR has a little white dome about 1cm cubed which looks like it could light up red nothing came of it. I imagine this little thing could also another type of sensor. Although, we never did cross the the PIRs. Security lock on the gate is a weird shape - I describe it as a Mickey Mouse head silhouette shape.

covering gate can easily be removed with a larger-than-your-average-large Philips head screwdriver.

tells workers/contractors to contact the RTA before

Update: 2010-01-03 13:00:00 (H2odeluxe) - cameras at either end of bridge, two each side, motion motor appeared to activate
Created: 1995-12-31 13:00:00
Modified: 2011-01-31 13:00:00

Name: Northbridge Bridge Pylons
Description: High concrete pylons of bridge. Hollow, approx 25m high inside,
with metal ladder. Room near top, access to cross arch space and
to outside at very top (under roadway).
Features: All the pigeon poo you could want.
Access: Park in The Boulevard, steps down to park at cnr with Miller St
[Sw:257K15/036K15, UBD:216E03/022K05, Grg:315K03, [GPS:-33.8177337938,151.212769165]], down thru bush to SE pylon
of Suspension Bridge. Need to get through approx 20cm w x 1m h
slit window, that is about 3m above ground. There was a wooden
beam leaning against wall, which helped. Once inside, edge round
on 25cm ledge above 5m drop, to ladder on other wall.
Update: Hatsumi 10/2008: Immediately under the bridge at each end
is a raised area under the road deck...this is accessed over a
12ft high wall which has a 4ft wide ledge in front of it with a
35ft drop to the base of the pylons. Easy to walk down side of
bridge to ledge at either end of bridge no problem. Both ends
have had ropes installed with foot rungs tied in although ropes
at the northbridge end are better. Alongside the bridge at Cammeray end is a cable pit 6ft deep and 10ft long...don't disrupt communications to anywhere;p
Update: 2013 (Axel) - Northern footings are inhabited or were
recently. Various camps/beds dug into the slope. Cooking area,
gravity fed water drum, also power has been spliced from the
bridge cabling. New access created, no climbing. Walk behind
fence on NE end, down slope to foundations, duck through freshly
dug hole. Even better party spot than it used to be.
Locality: Northbridge
Region: NSW
Country: Australia
Care: Don't fall off narrow ledges. Keep someone outside.

Found: 1992 Diode.
Rating: 2.0/5.0
Created: 1995-12-31 13:00:00

Name: Skeleton Crawl
 Description: Platforms hung from the roof of tunnel were M2 crosses under
 Epping Rd. Used to carry cables.
 Features: Walkways crossing over road, with three joining rooms.
 Lots of cables. Nice view over motorway. Has a very sci-fi feel,
 only problems are the crossbars on the walkways forcing you to
 crawl under them. Pigeon shot abounds.
 Access: #1,UE: Cross Epping & Pittwater Rds [Sw:255P06,
 UBD:194G10, Grg:283B10, [GPS:-33.7963116239,151.137436024]]. Park
 Blenheim Rd. Cross Epping Rd. Look over fence & you'll see the
 slide/bridge. Walk Sth to the end of the fence, then
 around it. Easier not to go thru gate, but along fence until you
 reach the slide/bridge, clamber down this into room.
 #2,UX: You can climb out at the S room.
 Locality: North Ryde
 Region: NSW
 Country: Australia

Care: Be careful climbing down slide/bridge.
To-Do: Piss on hot four cylinder cars with big subwoofers in the back.
Found: 2002 Mr India.
Rating: 3.0/5.0
Created: 1995-12-31 13:00:00
Modified: 2004-08-14 14:00:00

Name: Slateford Aquaduct
Description: Old stone aquaduct carrying the Union Canal over the Water of Leith.
Features: Numerous high, narrow chambers, all separate unfortunately, pidgeons, pidgeon poop.
Access: Go down walkway on the eastern side of the Water of Leith from Lanark Road, past the WOL info centre(near int with inglis Green Rd). [Collins:30J13] Under the Aquaduct arch use something (a pallet from the nearby B&Q did the trick) to climb up to the holes(or stand on railing i guess), Shoo pidgeons away, climb thru hole. Scale down inside walls. Look around.
Locality: Slateford
Region: Scotland
Country: United Kingdom
Care: Make sure you can get back out before climbing down, is a fair way down.
To-Do: Go back with a long, narrow ladder.
Found: 2004 Siologen
Rating: 1.5/5.0
Created: 1995-12-31 13:00:00
Modified: 2007-06-02 14:00:00

Name: Space Dust Wheel of Heaven
Alternate: Sky Wheel Bridge
Description: The climbable truss span towers of Ryde Bridge Rd with big wheels that used to raise/lower sections of the bridge.
Features: Giant wheels, panoramic views, good vibrations as trucks roar beneath on Concord Rd

Access: Walk south along pedestrian footpath from north side of
bridge on northbound side of Concord Rd. Come to first tower with
ladder, use good bridge climbing skills to get onto ladder and
climb to top.

[GPS:-33.823136,151.095389]

Locality: Ryde
Region: NSW
Country: Australia
Care: Be quick in ascent as you can be seen getting onto ladder
but are less visible whilst at top of tower.
Water Level: Dry - Dry
History: The middle section used be raisable until they removed the
lift device. The bridge was built to replace an old ferry
system.
To-Do: The other tower & free the wheels.
Notes: Enjoy the space dust sparkle!
Found: Rascal & Scarecrow 2010
Rating: 3.0/5.0
Update: 2013-11-07 13:00:00 (Siologen) - Ladders have been
removed. I asked at the local fire station,the fireys there said the
ladders were removed in August 2013. The absence of the ladders
make climbing the bridge exceedingly difficult, if not
impossible.

Name: Stan Unwell
Alternate: Stanwell Park Viaduct.
Description: A huge brick viaduct with a bit missing! Catwalks underneath the bridge about 40 metres off the ground.
Access: #1: Stanwell Park station [Sw:431P19, UBD-Wg:013N10, Grg:NDR].
Walk down access road towards the S. Walk around the tunnel and you're there. Catwalks are SRA padlocked. Climb over gate on bridge.
Locality: Stanwell Park
Region: NSW
Country: Australia
Care: Don't drop anything valuable!.
Cond: One section of the bridge is missing, and is replaced by steel girders. There are a number of steel cables through the vertical piers to hold the bridge together which go tight when a train goes over the bridge.
History: The bridge was constructed in the 1920s when the line was deviated and duplicated.
To-Do: Sit on steel cables when a freight train is going over the top, Abseil off the catwalks to the creek.
Notes: The mountains on each side are crushing the bridge over time as they get closer together. The overhead wiring is also not helping its condition.
Found: 1995 Trainman.

Name: Stonecutters Bridge
Alternate: Symonds Rd Bridge
Description: 5ft high concrete bridge room on Symonds Rd overpassing
the M7-Motorway in Dean Park, near new Stonecutters Ridge
housing estate. The two sections of the bridge are joined by an
interesting circular black hole that one must climb
through to continue on to the next section. TEL=80m. U2.
Features: Of interest is perhaps the neat tiling on the outside of
the bridge, along with the spotlights from the M7-Motorway
lighting up the way before one discretely enters. Inside, there are
tags and random spray cans, including evidence of repairs of
the mesh

and one particular panelled section which looks to have
been kicked in and is now fixed.
Access: Park on Symonds Rd or Stonecutters Dr and jump fence on
north side of bridge. Enter bridge here, at
[GPS:-33.731648,150.865775], by removing a pre-cut square
mesh.
Please put back to keep out birds and teenage boys.

Utterance
Bennelong Bridge
An utterly spectacular bridge linking the suburbs of
Wentworth point. It is Australia's largest piece of
funded infrastructure and the first bridge to be built in
Harbour since 1995. TEL= 330 m;
Just utterly. Cool tiered stairway system at both ends,
grates looking down to the water that provide awesome
lighting during the day, height varies from 6-10ft - which
looking at the bridge from outside doesn't look possible?!
also appears to be acting as a cable tunnel with a ducting
running down the guts. There's a temporary fluro lighting
in place.
From Rhodes - Gauthorpe street [GPS:-33.827979,
underneath the bridge and wade 2-3m's through the water to
door located at the base of first pylon. Alternatively,
plank to cross or use a boat to avoid getting wet. Door
be opened from the outside. No locks or padlocks, just
standard "dad shed" drop bolt and slide plate.

water

From Wentworh Point. Make your way along the
front to underneath the bridge, look for small hole in

and up construction fence and pop on through, head to your left
temp ladder into bridge [GPS:-33.826624, 151.080413].
Exact same door as the Rhodes side i.e. just two drop bolts. NB: This
access will change once the construction that's taking place here
is completed.
Locality: Rhodes
Region: NSW
Country: Australia
Care: Permanent security patrols at the Wentworth point side due
to the vast amount of construction taking place. Road side cctv
system will be installed in the near future - though, the main
purpose of the cctv is to catch drivers crossing the bridge
illegally.
Eek!: Ongoing cabling work seems to be taking place inside the
bridge.
Water Level: NA
Cond: Excellent. Brand new.
History: The Bridge took 10 years planning and two years of
construction to complete and is the first privately funded bridge and
first new bridge to be built in Sydney Harbour since 1995.

Name: Barnton Quarry ROTOR Bunker

Alternate: Barnton Bunker

Description: Vast, 5 level, 60 room Radar Receiving nuclear shelter.

Arsoned.

Features: Dozens of empty rooms, numerous corridors, 200m long, 12' dia reinforced steel tunnel littered with old tyres and containing a

burnt out truck. Large main operations hall, Basement
 Aircon plant, radar/coms rooms, 4 staircases, canteen, toilets,
 two emergency exits, two vent shafts. Partly flooded basement
 level, with mess hall and mezzanine levels. Above ground
 structures with a few open rooms, covered in graffiti.
 Access: Take gated road off Clermiston Rd North, 100m north of
 Drum Brae Drive. Go in past mobile phone tower gates to second gate
 on left. [Collins: 17G17]. Climb over gate and go towards
 bunker, heading # to right hand side. Go down right side of bunker
 and take track in bushes up around the back of the cutting the
 bunker sits in. Once at the top of the cliff above bunker, head
 towards concrete building then cut north down hill, which is very
 steep.
 Head down At bottom of hill in second quarry is a 2 storey tower.
 shaft to this and climb thru hole in mesh. Carefully climb down
 the using bolts, brackets and the rickety ladder hanging from
 wall. Good idea to use rope as well. Sometimes there are
 otherways in.
 Locality: Clermiston
 Region: Scotland
 Country: United Kingdom
 Care: Asbestos littered all over main hall. Dont stir up dust,
 better still take a mask. Areas in annexe area that have been
 taped off are either flooded or structurally unsafe. Nasty burnt
 smell pervades entire complex. Shaft is a dodgy entrance!
 Water Level: Lower Annexe level is flooded, knee deep
 Cond: All but the Air Con Plant near the entry shaft has been
 damaged by fire.
 History: Built at the end of WW2, used during 1950s as Radar
 receiving station. Was to be sold off in late 1980's, but was
 arsoned. Thoughts of refurbishment in mid 90's were discarded after
 the rest of the place was arsoned in 1996. Firefighter said it
 took 3 days to extinguish.

To-Do: Explore flooded levels.
Found: 1997 Sub Brit
Rating: 0.0/5.0

Modified: 2003-12-31 13:00:00

Name: Battery Point
Description: Gun circles, open tunnels, great views.
Access: East side of Princes Park. Can walk around bunkers, barred up and padlocked, no internal access. [Map 18,N22], [GPS:-42.8876028,147.3370472].
Locality: Battery Point
Region: TAS
Country: Australia
History: The first construction near this strategic site was the 1818 Mulgrave Battery, built on the site of today's Castray Esplanade, and renamed Prince of Wales Battery in 1855. In 1841 the Prince Albert Battery was constructed higher up the hill - guided walks now visit its well-preserved tunnels. The semaphore station and signal mast still standing on the edge of Princes Park once signalled ships entering the harbour, and relayed messages via a chain of stations to Port Arthur.

Notes: This park is the home of a recently constructed childrens' playground and provides public convenience facilities. Take bolties do late at night if you want to get internal access.
Found: Melb Clan 1998?
Rating: 3.5/5.0
Update: 2013-07-22 14:00:00 (Aeon_floss) - The gate blocking internal access is located on Castray Esplanade and looks like it can be (and has occasionally been) lifted off its hinges. This will make a gap large enough for entry. It's heavy - needs a few people or a good lever, but the entry is shielded from view.

Name: East Point Battery
Alternate: East Point Military Museum
Description: Disused WW2 coastal artillery emplacement. Many tunnels,
towers,
& underground rooms to explore. Very good condition.
Features: Vandal free WW2 complex similar to North Head (in Sydney).
Many

tunnels & underground rooms to explore, as well as
observsation towers, original damage from Japanese WW2 aerial attacks,
steeped in history.
Access: Alec Fong Lim Drive, East Point, NT.
[GPS:-12.406393,130.820182]
Locality: East Point, Darwin, NT
Region: NT
Country: Australia
Care: Active museum, although most emplacements can be
infiltrated after hours.
Eek!: DO NOT get caught trespassing as heavy fines apply.
Official tour recommended (\$14).
Water Level: Dry - Dry
History: The Darwin Military Museum was originally established as
an artillery museum by the Royal Australian Artillery
Association (NT) Inc (RAAA) to exhibit photographs and artefacts from
Darwin's history during World War II. The Museum now has a
large exhibits of items from the war, including Navy, Army and
Air Force items from Australian, US and other armed forces.
Its setting is, appropriately, amongst concrete gun
emplacements and other fortifications in an area that was one of the most
heavily fortified parts of Australia during the war.
forces At the peak in around 1943, there were over 110 000 armed
Darwin personnel based in Darwin and nearby areas. It was from
liberate that General Douglas MacArthur launched his campaign to
Manila and more generally to reclaim the Philippines from
Japanese occupation.
years, During the war Darwin was bombed 64 times over almost two
resulting in with the first two raids alone on 19 February 1942
the deaths of an estimated 243 people. Other sources place
the figure as much higher, even up to 1000, and a memorial
plaque on the Darwin Esplanade overlooking the harbour says 292
people were killed. ABC TV News on 28 February 2010 carried an item
saying

John

that Darwin City Council has commissioned Naval Historian

Bradford to get to the truth on how many died.

<http://www.abc.net.au/news/video/2010/02/28/2832484.htm>

Locality: Republic of Nauru

Region: NSW

Country: Australia

Care: Heat, sun stroke, wild dogs (carry a stick(.

Water Level: Dry - Dry

History: Nauru was occupied by a 2500 Japanese army garrison in 1942. They brought in 1500 Korean laborers to fortify the island. As the americans thought it too well defended and having a limestone and coral reef surrounding it as well as it not being of strategic importance it was bypassed and isolated as the US Marines island hopped towards Japan. The Japanese garrison surrendered to an Australian force in September 1945

To-Do: There are two or three more hill top AA batteries still in situ as well as the Japanese command bunkers supposedly covered in jungle behind the air terminal. According to locals you might still be able to find Japanese army helmets and empty magazine casings in the jungle there. And a shot down US bomber wreckage for those keen to climb between the limestone outcrops.

Name: Fort Scratchley
Description: Abandoned historic coastal defence fort & museum.
Features: Within the sandstone walls & dry moat is historic Fort Scratchley. It consists of 2 Gun Emplacements with connecting tunnels, trenches, & shafts. The emplacements are host to 2 x fully restored 6 inch Breach Loading Naval Guns that traverse on their pivots; the breaches are operational but have been locked up. There is a 3 level Observation Tower, a Lower Ammo Room with Tunnels (*locked up & alarmed, see Eek!). There are lots of brick & wooden topside buildings (barracks, mess halls etc) in various stages of disrepair (broken windows, doors kicked in etc). There are also cannon barrels, anchors & other military paraphernalia laying randomly about. Lots of original doors, electrical equipment, & other fittings in rooms & tunnels.
Access: End of Nobbys Rd. [Sw:NDR, UBD-Nc:146E04, Grg:NDR, [GPS:-32.925664,151.791464]]. Nobbys Head Bunker is at the Northern end of Nobbys Rd (near lighthouse), while Fort Scratchley is at the southern end. After going over/under/thru temporary perimeter fence, walk up the driveway to the main gate. From the main gate, follow the (10ft tall) wall & dry moat around to your left (west) until the wall becomes smaller (5ft) & the moat flattens out, climb over wall & explore Fort. Tunnels, Obs Tower, & Gun Emplacements are all on the far Eastern side of the Fort facing the ocean. You can enter & exit the Fort by going over the wall at other places, just scout around.
Locality: Newcastle East
Region: NSW

Country: Australia
 Care: Although abandoned, it is still an active military
 property administered by the Defence Department, don't get caught
 in there. Is in a built up residential area with houses full
 of nosey neighbours overlooking the entry points. The whole
 Fort can be seen by almost anywhere in Newcastle because of it's
 prominent location high up on a rock, you can & will be seen from a
 trenches distance unless you are carefull. Lots of deep shafts &
 NOT trash about, be carefull while walking around in the dark. DO
 locals the place up or put any graff up, it's bad enough that the
 Eek!: have already begun to wreck the place.
 red The Lower Ammo Room & Tunnels which are accessed thru big
 red door doors are locked & alarmed! If you attempt to open that
 barely a loud siren will sound - woop woop!! Don't panic, it can
 didn't be heard from outside the Fort perimeter, & seccers/cops
 make our show up in the 5 mins it took us (beachbum & blakjak) to
 Cond: way out of the fort in an orderly manner in broad daylight.
 History: Abandoned, topside buildings falling down. Bunkers in top
 against condition. May be restored soon!.
 Built in the 1880's, in use till after WW2. Only Coatsal
 Artillery in Australia to fire a shot in anger during WW2
 Japs in 1942.
 To-Do: <http://www.ozatwar.com/ozatwar/fortscratchley.htm>
 or Explore Lower Ammo Room & Tunnels without triggering alarm
 being detected in any way. Explore all topside buildings.
 Have a proper CC expo there.
 Notes: Temporary fencing suggests that there is gonna be major

Name: Kangaroo Bluff

Description: From the time of the first official white settlement of the Derwent at Risdon Cove in 1803, there was concern over the possibility of attack by sea. By 1836, it was thought that mutually supporting batteries on both sides of the Derwent could turn Hobart Town into a fortress. Kangaroo Point, with its steep bluff, was an ideal site located on the eastern shore.

At the close of 1840, arrangements were made to purchase the land. However, it took almost forty years of re-cast plans, financial delays and further land purchases before excavations commenced.

Battery The Kangaroo Bluff site was built to support the Queens battery. (located at the Domain in Hobart) and the Battery Point Access: Kangaroo Bluff Historic Site is situated on Hobart's Eastern Shore, only 10 minutes drive from the city centre. From Hobart head east over the Tasman Bridge to Bellerive, then along Victoria Esplanade and Gunning Street.

Battery Bluff Reserve. [GPS:-42.8814583,147.3671528].

Locality: Site is padlocked.
Region: Bellerive
Country: TAS
Australia
Care: The battery is surrounded by a deep moat and care must be taken when walking around the area.

Notes: The Historic Site is open between 9:00 am and 5:00 pm every day and entry is free.

Name: Lower Casemate
Alternate: Official name. AKA Beehive.
Description: 1870s bunker and gun emplacement. Two wooden mounts remain, one burned. High domed ceiling. Seen in the 1970s film "Stone".
Access: Take track starting near the N end of Upper Casemate, which leads to stairs & door [Sw:278M02/048M02, UBD:217H10, Grg:317H10, [GPS:-33.8349693,151.2601814]]. The usually locked door has 1872 inscribed above it.
shaft. *Near the door (12m bear 154 deg) is a covered vertical Ladder down this.
be *Gun portals (3 square holes cut into the cliff face) can be reached by following track starting from next carpark towards Middle Head from Upper Casemate. Follow track to water and head W along waterline. However these are usually barred and have perspex windows.

Update Hatsumi 09/2008: Locked tight, combination of bars
with perspex shielding behind it. Entry not possible
without substantial effort - bars aren't even locked,
they are just fixed into place.

Locality: Georges Heights
Region: NSW
Country: Australia
Found: 1992 Predator.
Rating: 5.0/5.0
Update: 2016-01-31 04:10:39 (Red) - Update Access: The door has a
new lock, but it looks to be someone's custom lock, i.e. it is
low quality and cheap and different in appearance to other
ones spread out across the headland; probably due to recent
graffiti tagging inside. So, either NPWS is keeping people out
specifically now due to recent vandalism, OR someone has
'personalised' their own access.

Name: Obelisk TG&B
Description: Pre-World War II Tower, Gun emplacement, and Bunkers (TG&B). Some of the bunker entrances are sealed with bricks. Probably has the same layout as Georges Head bunker.
Access: From Middle Head carpark (non-oval side), follow perimeter path. When you get to double gates in the cyclone fencing, use path opposite. Walk towards clearing. RH path takes you to Obelisk TG&B, provided you use the rule "Always go downhill, and do not deviate". Centre path will take you to 1801 [GPS:-33.829198,151.264366], provided you, once again, do not deviate.
*Tower: [Sw:258N20/038N20, UBD:217J08, Grg:317J08, [GPS:-33.829869,151.263434]].
Locality: Obelisk Bay
Region: NSW
Country: Australia
To-Do: Get into bunker. Probably the same layout as Georges Head bunker, the W entrances (1 bricked up) lead to shelters, whilst the E two (again 1 bricked up) lead to the magazine. The metal door will definitely lead to the magazine.
Notes: Nearby is the "Oops" - Obelisk Observation Post & Seawall [NDR, [GPS:-33.828199,151.265154], XED, XNL, XWPT].
*Acc: Head down onto rock platform & go towards Middle Head. Named for "Oops, I'm about to be blasted out of existence". This location would be certain death for any observer during military action, as there is absolutely no cover.

Nearby: * Oops can be safely viewed from 1801.
 Nothing 1801: Sydney's oldest fortification still in existence.
 there but the gun emplacement, but listed because of the
 surrounding area. Originally 4 guns were mounted here, but
 only 3 mounts remain. 1802 has less to be seen.
 *Acc 1801: From Middle Head carpark (non-oval side), follow perimeter path. After
 a few changes in direction, you get to double gates in the
 cyclone fencing, use the path opposite. Walk towards clearing. The
 centre path takes you to 1801, provided you do not deviate. RH
 path takes you to Obelisk TG&B. Site = [NDR, GPS:56H 339291
 6255234, XED, XNL, XWPT]. From the E end of 1801, you get a very
 good view of Oops (Obelisk Observation Post & (optional) Seawall).
 *Acc 1802: Follow the same perimeter path, but keep going. At
 radio tower, follow stone wall to its end [NDR, GPS:56H 339423
 6255436, XED, XNL, XWPT].

Country: Australia
To-Do: Obtainium an aerial photo, scan and indicate entrances.
Notes: Bunkers (B), Gun Emplacements (G), little-to-see Locations
(L),
and Structures (S) in order of approach, then clockwise
(NE-Centre-W). Where possible, non-GPS directions are

given:

*B Dog Box Bunker: Look for entrance LHS before you get to
the
main structure [Sw:258Q18/038Q18, UBD:217L06, Grg:318A06,
GPS:56H
339581 6255516, XED, XNL, XWPT]. The entrance has hand
rails and
is near skylights. This bunker houses the dog boxes used
to train
Vietnam war soldiers. The bunker exits the W side of the
highest
point of the complex.

*G Gun Circle 1 (1877): First GC you see LHS [NDR, GPS:56H
339629
6255489, XED, XNL, XWPT]. This was discontinued when the
two 1912
GCs were installed.

*G Inner 1912 Gun Mount: Metal mount next to GC1 [NDR,
GPS:56H
339642 6255485, XED, XNL, XWPT].

*B 1912 magazine room: Enter thru a window near the Outer
1912
Gun Mount (closest to the point). In this room SCC show
Urbex
Videos.

*G Outer 1912 Gun Mount: Metal mount [NDR, GPS:56H 339647
6255445, XED, XNL, XWPT].

*BG Eastern Gun Circle & Magazine (1877): Sandstone GC and
Bunker
at the point. Proceed past the Outer 1912 Gun Mount to the
1871
GC nearest the point [NDR, GPS:56H 339680 6255476, XED,
XNL,
XWPT]. The accompanying bunker was linked to the main
complex,
but when the newer gun emplacements were installed in the
early

1910s, the connection was wiped. This bunker has 3 split levels, with entry to a lower room thru a walk-in hole in the wall. That room was part of the original bunker no longer in existence. Down the outside stairs, there are:

*L Searchlight [NDR, GPS:56H 339683 6255489, XED, XNL, XWPT], and

*S Observation Post [NDR, GPS:56H 339691 6255500, XED, XNL, XWPT]. Bypass the locked gate by following a narrow track, LHS of stairs.

*B Cancer Bunker: Under the highest point of the complex. NPWS do not hold tours in here due to cancer ridden concrete. Entrances are: East [NDR, GPS:56H 339624 6255469, XED, XNL, XWPT], North (ramp) [NDR, GPS:56H 339619 6255473, XED, XNL, XWPT], West: [NDR, GPS:56H 339609 6255462, XED, XNL, XWPT]. The ramp entrance can be viewed in the Australian movie "Stone (Take The Trip)".

XED, *S Highest point (OBS post): [NDR, GPS:56H 339619 6255466, XWPT]. The three cubicle rooms were telephonist rooms. Camouflage netting covered the entire area around this point.

339600 *G Western Gun Circles (4) RHS of complex: [NDR, GPS:56H 6255455, XED, XWPT], [NDR, GPS:56H 339590 6255462, XED, XNL, XWPT], [NDR, GPS:56H 339563 6255464, XED, XNL, XWPT], and [NDR, GPS:56H 339548 6255458, XED, XNL, XWPT] All date from 1870s. Originally there were 8 of these, the other four were destroyed by installation of the two 1877 & two 1912 GCs.

[NDR, *B Western Magazine Rooms (1870s): Enter via gates (2) GPS:56H 339641 6255466, XED, XNL, XWPT] in the Western Gun Circles.

Nearby: *S Forward Obs Post: The ruin towards the cliff edge [NDR, GPS:56H 339644 6255430, XED, XNL, XWPT].

*L Searchlight: [NDR, GPS:56H 339660 6255410, XED, XNL].

*S Unknown Trench in thick bush off a track to Mark Battery: [NDR, GPS:56H 339487 6255604, XED, XNL, XWPT].

*B Bunker: Location

unknown, found by dTrog 1988. Lost/misplaced.
Found: 1998 Mr India/Ogre/Dirge.
Rating: 4.0/5.0
Update: 2016-07-07 10:06:07 (Tim Dole) - Update Care: There seems
to be a man hired to 'hover' and make sure you're not damaging the
bunkers. He wears fluro green, easy to spot. If you're
squeezing into one of the bared off areas, make sure he doesn't
realize ie don't take a group in...

Name: Sandy Creek Watch Post
Description: Part of the 'stop line' against an invasion by sea, Sandy
Creek Watch Post was one of many beach defence strong-
points developed along the coastline north of Darwin. Made of
concrete and steel, Sandy Creek is the best preserved example of
the remains of some of the watch posts that can still be along
along Casuarina and Lee Point beaches.

Access: Casuarina Coastal Reserve, south of the carpark at the end
of Lee Point Road. Follow signs. [UBD:008,D4].
[GPS:-12.337473,130.890115]. Door locked with silver Abus
padlock. Squeeze through the turret slits (only for those
that are slim).

Locality: Lee Point
Region: NT
Country: Australia
Water Level: Dry - Dry
History: The Singapore-type observation post was one of six built
during WWII and was an integral part of the coastal defence
network. (Four of these are located along the Casuarina Coastal
Reserve and two others were located at Dripstone Caves and East
Point).

cemented They were completed by the 2/4th Machine Gun Battalion and
quarry at 2 civilian labour on 15 February 1940 having been built from
Darwin). reinforced concrete sections which were subsequently
all but a together. The stone aggregate most likely came from a
1/2 Mile site (so named because it was 2 1/2 miles from
The walls were designed to be thick enough to withstand
direct hit from enemy guns.

based on The actual design and shape of the observation post were
their military experience with the most important aspect of
design being the angle of side walls to back wall. This
allowed each of the two circular turrets to house a Vickers
machine gun which was mounted so that it could fire through the slits
in front. The side walls of the observation post were set at
an angle so that both guns did not look directly forward but
could be trained slightly to the rear.

difficult Overland travel between the observation posts was made
series by the tidal range and mangrove swamps, and in late 1941 a
These of corduroy tracks were constructed of mangrove trees.

corduroys were colour coded and instructions were that,
"all members of Coys are to be made aware of the colour signs
which information they will be instructed to treat as SECRET and
will also be instructed not to divulge the information to
civilians."

beach. Squeeze through the tiny hole in the brick wall
blocking

the tunnel entrance.
 It may also be possible to go through the bunker under the
 rear
 unit at 65 Nesca Pde, right at the end of the drive way.
 Not
 recommended as this is very exposed (in someone's car port
 overlooked by unit blocks, directly under someone's
 floor), not
 sure if the door is locked.

 Locality: The Hill 2300
 Region: NSW
 Country: Australia
 Care: Small hole in brick wall only for the slim, may be
 partially
 submerged.
 The cliff is not that steep, but is treacherous when wet
 as it is
 made out of mud.
 The above ground bunker is very expose and is the
 foundations for
 someone home, be quiet.

 Eek!: Not that much water in tunnel but you have to lie in it to
 get
 through the hole.
 Water Level: Dry - Ankle
 Cond: Sound, no graff in tunnel
 History: Provided search light for Shepherds Hill Military
 Installations.
 Heritage listing of some kind.
 Notes: Part of the complex that includes 'Shepherds Hill' and
 'Shepherds
 Hill Communications'
 Found: Batou 2011
 Rating: 2.0/5.0
 Created: 2011-11-11 13:00:00

Name: Signal Hill #1
 Alternate: Signal Battery (part).
 Description: Two levels of rooms under WW1 gun emplacement atop cliffs.
 Lower
 level is reached via shaft and ladder at back of top
 level.
 Access: Signal Hill Reserve, Dunbar Head, Vauclause
 [Sw:279F08/049F08,
 UBD:218C16, Grg:318H16, [GPS:-
 33.8494609352,151.287351501]].
 Metal door furthest from old lighthouse.
 Locality: Dunbar Head
 Region: NSW

Country: Australia
To-Do: In the same reserve, closest to the lighthouse and facing
Old Sth Head Road, there is another bunker door. See Signal
Hill#2.
Notes: 2009 (Scarecrow) - The entry doors are now chained up and
pad-locked shut.
05/05/09.
Found: 1996 Bunker Boyz.
Rating: 3.0/5.0
Update: 2015-04-19 14:00:00 (Scarecrow) - Two doors are wide open;
one near the road, the other one from the gun circle. Chain
and padlock are still hanging from open door. April 2015.
Update: 2012-06-23 14:00:00 (Blakjak) - Entry door locked & welded
24-6-12.

Name: Squeeze, The
Alternate: Cape Banks Bunker #1.
Description: WWII army shell storage for surface gun.
Features: Long staircase going down, Very deep. Various rooms,
backfilled staircases, bare rock sections. Machinery and fittings in
lower

level. Called The Squeeze, cos that's what you used to
have to do to get into it.
Access: Turn off Anzac Pde onto road for NSW Golf Club (1st L
after Grose St). Head to Pistol Club and National Park and park there.
Entry to bunker is just S of Pistol Club near toilets.
[Sw:338K13, UBD:317F01/297iP13, Grg:467F01/438iF13,
[GPS:-33.9939095577,151.250375064]].
Locality: La Perouse
Region: NSW
Country: Australia
Care: When lower section is flooded, sediment can be stirred up
while walking around, making it difficult to see the large hole
in the floor. Remember their locations.
Water Level: Lower section is usually always flooded
Cond: Lots of old pipes lying around. Staircase covered in
rubble.
Notes: Housed 9.2" guns, gun circle filled in but clearly visible
above bunker. Commanded from Lapa Lookout.
The entry to the stairs that lead to the lower level
says High CO2. Gas meters and detectors have been taken down and
nothing unusual was found. Caution is advised. If in doubt take
matches to test CO2 presence.
Nearby: (Henry Head), Howies, Lapa Lookout, Pistol Range, Squeeze.
Found: 1992 Predator.
Rating: 5.0/5.0
Update: 2011-05-20 14:00:00 (Blakjak) - All previous entries have
been recently obliterated. There is still a possible way in if
the bars on the emergency escape can be 'played' with. If not,
might as well move this into gone.doc unless you have a
bulldozer handy. :(

Name: Sub Stop
Alternate: Submarine Stop. Blow Job 2002.
Description: Not a Bus Stop, but a place to catch a submarine. This is a submarine access point. A shaft (sealed long ago) from fortifications above was dug behind the cliff face. From the base of the shaft, steps lead down into the water, totally concealed from view by a concrete roof. Here, supposedly, scuba divers could gear up and swim out to a submerged sub (sizes unknown) that could park in water ranging from 7 metres to 31 metres.
Features: Truly deserves a sign "Sub Stop - Signal Captain". Very unique. Swim out into the harbour. Mid tide gives Blow Job effect at the window.
Access: Chowder Bay Rd. Park before the boom gate, walk back along the road, and take the route to Georges Head TG&B.
site. * Lower (shaft): Circle around the Tower & go to the gun
Keep The track to the R (looking towards harbour) leads to it.

Name: Tomaree Head
Alternate: Shoal Bay, Port Stevens South Head. Hype's
Description: 2 x Gun Circles
2 x Bunkers / buildings behind gun circles
Many assorted gunnery / lookout / storage / communications
positions
Many rooms to be explored once inside buildings behind gun
circles.

headland Look around in the bush for much more stuffs. This one
and the is littered with lookout positions, storage bunkers etc,
summit. remains of WW2's longest serving radar station at the

Access: Tommoree Head [NDR, [GPS:-32.7126522322,152.188341244],
RDI].
lot on Drive to end of Shoal Bay Rd until you come to the parking
the the headland. Follow the signposted NPWS walking track up
welded shut mountain. Follow signs to Gun Circles.
chain Once at gun circles, you will notice one building is
thin. at every entry, but the other has doors locked shut with
and padlock. Squeeze over door. High, and you need to be
track, Lockwood NPWS Padlock.
Torpedo Launching sites can be accessed down a fishermans
with extreme caution, from in front of the first gunnery

position.

Locality: Shoal Bay
Region: NSW
Country: Australia
Care: When exploring the headland, watch out for cliffs.

tours The Bunker with the padlock is accessed now and then by
that can be organised through NPWS in the area. Don't
break it.

Water Level: Dry - Dry
Cond: Excellent Condition
History: This site formed part of the main coastal defense for Port
Stevens, and the radar tower (radar array now removed) at
the summit was the first Australian built coastal radar
station, and was the longest serving. 1942 - 1947.
There is speculation among the local preservation groups
that another large bunker is located very near to the summit,
but was backfilled once the radar station fell into disuse.

To-Do: Completely explore the mountain. There's lots of hidden
gems away from the main track(s).

Notes: When walking down the mountain from gun circles, there is
a road that splits to the right with a sign that reads "No Entry,
Private Property". Take this, it makes the trip back to
the car a lot easier, and all the locals take it. You will however,
be walking through the areas main mental institution, which
can be a little unnerving.

the [Update 9/1/12] Some Knucklehead has snapped a key off in
padlock of the northern most bunker. Bound to be fixed.

Also, I'm thin, and could not squeeze thru gap above door. Chain too
tight. Check out unique gun emplacement @ northern point IN water
-

Fl@sh.

Found: Anakaine, 2007
Rating: 3.0/5.0
Update: 2017-01-14 23:39:18 (Tim Dole) - Update Access: Chain is
significantly tighter, way too small for a human to enter.

During tourist season, however, NPWS do routine inspections on
the

let tourists. When asked, they are happy to open the padlock &
you wander in.

Modified: 2008-01-04 13:00:00

Name: Tour of Duty
Alternate: Fort Wallace Battery.
Description: Massive underground bunker (possibly the biggest?), with
tower extensive tunnel network. Gun circle topside, lookout
nothing in topside, shell storage rooms, and many more rooms with
them, but occasionally used by military.
Features: Old shell loader (in-tact!), original roof (rusted), long,
long tunnels and pristine rooms, one of which looks like a
conference or social hall (lino floors!?) doors on either side of
this room are hardcore. The fact that there was absolutely no
graffiti was very, very nice.
Access: From the intersection of Mitchell St and Flint St [Sw:NDR,
the UBD-Nc:134F05, Grg:NDR], head onto Stockton Beach. Follow
link) ends beach N until the boarder fence of Fort Wallace (chain
thru and the dunes start. Jump fence and head up narrow trail
Land to a bushes. Upon reaching a gun circle head S, past No Mans
it's northward facing grilled door. Go thru this. Apparently
always open, and all the rest were locked.

UPDATE Goretex 2012:
used Beach entrance is full fenced with cyclone fencing, Rarely
covers on for anything, All buildings boarded up, New locks and
regain bunker and tunnel entrances. Will be scoping this out to
entry as we had it at the first Hunter Hardcore :)

Locality: Stockton
Region: NSW
Country: Australia
Care: Military police patrol the area in pairs. Good luck! If
you do attempt this note that you are on military land and heavy

penalties apply if you're caught. When we got to explore
it was pure luck the MP's were cool and in fact showed us round.
Cond: Excellent.
Notes: UPDATE Goretex 2012:
No Military police visit here any more, Private contracted
security, Current guard is a fat BnS ball attendee with
bogan ute and antennas.
Found: 2003 Dsankter/Mr India/NeXuS/Millsy/Siologen/Willow.
Rating: 5.0/5.0
Update: 2017-03-02 04:31:13 (Goretex) - Update Notes: No more
security on site, place has opened up like a tin of baked beans, every
man and his dog has been in there, increased graffiti,
hospital/respice centre next door has sold land and
they're possibly letting this fall into disrepair to bulldoze a
lot of the topside to build homes. People have been chased out by
police recently while others have spent all day in there.

Name: West Head Fortifications
 Alternate: Dirges.
 Description: WWII Gun placements and pill boxes.
 Features: Abandoned light railway down cliff, Good views.
 Access: West Head Lookout (McCarrs Ck Rd) [Sw:159M08, UBD:078J08, Grg:109D08, [GPS:-33.5787175028,151.308755715]]. At the
 lookout
 (W end) where the armco railing ends, follow track to
 start of
 railway. Railway requires rope to assist descent & ascent. Alternative is find a way down following path (no longer existing) shown on plan. Lantana abounds, so take machete.

(Update- SIDS 18/9/16): "Access: The
 path down to the bunkers from the West Head lookout is
 complete.
 Park at the end of West Head Road, look for sign for path
 to
 bunkers (on the left near the guard rail just before the
 lookout). There is some signage at the lookout that has a
 bit of
 history about the fortifications. One of the bunkers
 currently
 has temp fencing all around it, same deal with the
 underground
 magazine room."

Locality: Ku-ring-Gai Chase NP
 Region: NSW
 Country: Australia
 Care: Take note of the McCarrs Ck Rd gate closing time.
 Eek!: Eek: the nice new path is likely to result in increased
 activity
 in the area from mouthbreathers. (Sids- 2016)
 Photos: Plans: <http://www.trioxide.net/bunkers/>.
 To-Do: To do: be a tourist and sign the NPWS guestbook.
 Notes: Originally two locations now appear as one, as we now have
 a
 plan.
 Nearby: SL31 is accessed by following a barely distinct path down
 towards
 the water from the lookout toilets.
 *CDOP: Located along the
 Track to West Head & Resolution Beaches track. Single room
 observation post (pill box).

Name: White's Hospital
Alternate: D/C's Dungeon
Description: This is the remnants of an old air raid shelter and
casualty station/infirmary.
Features: An old partly overgrown concrete structure, with several
rooms (in which a fire has been through parts), old bed frames,
toilets and an old generator/furnace room,. Sadly much of this
site has been stripped down.
Access: Squeeze through the hole in the fence at N/E corner of the
Lithgow Rifle Range.

Park at the
end of Commonwealth Ave [GPS:-33.492445,150.141843], and
follow the main dirt track S/W for 300m to the site.

The steel doors at north end of shelter are
unlocked.
Locality: Lithgow
Region: NSW
Country: Australia
Care: Watch out for rifle range staff. The building is off in
the bush just within the grounds of an active rifle range (the guns
are shooting the other way though).
Eek!: Machine guns!
Water Level: Dry - Dry
Cond: Poor
History: This site was called "White's Bunker". It was built to be
used if required as an air raid bunker and emergency hospital
during WWII. It is located in the bush just behind the Lithgow
Small Arms/ADI factory.
To-Do:
Found: 2009 DC and Cactua
Rating: 2.0/5.0

Modified: 2007-01-17 13:00:00

Name: Church Cave
Alternate: Medlow Hotel Cave
Description: A small cave (roughly 6x6m) beneath the Hydro Majestic building
at Medlow Bath. This cave has a concreted floor and several brick walls. Was originally used as a church until replaced by an actual church across the rail line. It is located on the grounds of the Hydro Majestic.
Features: Church Cave features brick walls and a window, concreted floor,
carved steps, even stacked firewood and a rolled up swag!!
Access: Park in Medlow Bath Train Station Carpark to avoid attention,
Jump fence at northern corner of the Hydro Majestic, head around
behind the Hydro Majestic, then the follow paths down and to the

right.

The Cave is located in the sandstone rock outcrop directly behind the Hydro's Tennis Courts.

The GPS to Church Cave is:
[GPS:-33.675319,150.279697]

Locality: Medlow Bath
Region: NSW
Country: Australia
Care: Hydro Majestic Security
Eek!: Steep Cliffs!!!
Water Level: Dry - Dry
History: <http://www.statemine.org.au/docs/BMHJ2.pdf> (page 16 or 20)
To-Do: While your here, may as well visit the nearby Auditorium and
Coliseum.
Notes: This was originally listed as "The Auditorium" until more info
came to light.
Found: 2013 DC
Rating: 0.0/5.0

Modified: 2017-02-15 07:20:37

Name: Clarence Art Caves
Description: Two caves, one either side of the road. Both have very significant Aboriginal art in them.

Features: A third larger cave around the corner.
One cave has dancing men depicted (highly significant and rare),
the other cave has a shield and very small children's handprints.
Both caves feature many handprints in red ochre. One cave was a
womens cave and the other was the mens cave.

There is a much larger cave around the corner from the
Art Caves, which is accessed by following the cliffline behind
the shield cave. It is a perfect auditorium cave, with little
stage bit and all. [GPS:-33.492292,150.206311]
Access: Turn of Bells Line of Road at the Tunnel 9 and 10
(Ratholes)
access road, here: [GPS:-33.484932,150.206473]

Rathole Follow this road straight ahead (past the
access gate on left), the road takes a right curve into a
cutting. Caves are each side of the road here:
[GPS:-33.491822,150.206838]
Locality: Clarence
Region: NSW
Country: Australia
Care: Do not damage/disturb this site please, it is not very
well known.
Water Level: Dry - Dry
Cond: Good/Excellent
History: The road they bored between these caves is the old access
to the first ever commercial coal mine in Australia (Hartley).

Notes: The road is blocked not far past the caves.
Please read this article before visiting this location:

<http://www.theglobalmail.org/blog/rock-art-threat-spurs-state-investigation/629/>

TLDR; Archaeologist Wayne Brennan aired his
concerns about the condition of the "Twin Shelters" site
at
Clarence. Brennan fears that evidence of ancient activity
there,
possibly dating back thousands of years, is being
destroyed by
tourists.
Found: 2009 DC
Rating: 3.0/5.0

Modified: 2017-02-15 07:22:25

Name: Colosseum
Description: A huge cave under a 100m overhanging waterfall.
Stone embankments give a terraced flat finish to the
floor.
Features: Cool stone table
Nice place to camp
Access: The cave is here [-33.6761399,150.2773798] at the base
of the 100m cliff.

Park here
[-33.6718944,150.2776319] , and walk down the track at the
end of
the road.
Turn off right, at the side track that
is approximately here [-33.6723609,150.2749309].

Descend the cliff here (approximately) [-
33.6710149,150.2736568]

The descend is pretty cool; It goes past a
climbing area, then down a ladder in a slot in the cliff
face.
Locality: Medlow Bath
Region: NSW
Country: Australia
History: It was used by the Hydro Majestic for concerts
To-Do: Visit the nearby Auditorium and the Church Cave while your
here.
Found: 2016 Rodent (Various)
Rating: 2.5/5.0
Update: 2016-12-19 23:55:04 (Rodent) - Update Eek!: This location,
although it still exists, will not be safely accessible
for a
year or so.

A huge landslide
caused by a cliff collapse has wiped out the track. Trying
to
negotiate the landslide is dangerous... as we found out!

Created: 2016-07-05 04:07:07
Modified: 2016-07-05 08:36:14

Name: Dr Darks Cave
Alternate: Darks Cave
Description: A large cave in which Dr Dark and his wife Eleanor used as
a
retreat. It is also rumoured that he used this cave as a
base for
guerrilla combat army training during WWII. There are also
rumours
that he actually ran away evading conscription and he
lived out
the war years in hiding there with his wife. Eleanor was a
famous
writer and it is said she wrote some of her books here
too.
Features: A large cave with a spectacular view, Dr Darks old
original pots,

inside pans and other odds and ends, a large waterfall and pond
for the cave, two small "tunnels" cut into the rock, probably
and a sleeping in, rock furniture, boardgames, reading material
geocache.
Access: Cave is located here: [GPS:-33.6502527,150.3540051]

To get there, drive out Mt Hay rd (dirt, but
2wd accessible) and park at the gate/intersection to the
Forrest Ridge Firetrail here: [GPS:-33.6584599,150.3645301] (on
left, signposted). Follow the Forrest Ridge firetrail around the
bend and turn of onto the trail on the right here:
[GPS:-33.6540751,150.3576314]. Follow the path down into
the gully to the creek, cross the creek and follow the path
around to the left and along the ridge around to the cave. Don't
stop at the first small cave you go through, the main cave is
around the corner.

Locality: Katoomba/Mt Hay
Region: NSW
Country: Australia
Care: Some steep cliffs in the area watch your step.
Eek!: Take water, pretty long walk with no reception either.
Water Level: Dry-Ankle
History: <http://bmlocalstudies.blogspot.com.au/2011/08/dark-eric-payten-1889-1987-medical.html>
To-Do: Find remnants of guerrilla warfare training.
Notes: I know it's just a cave, but its pretty impressive.
Definitely worth a visit if you are into this kind of thing.

Info on the geocache:
<http://geocaching.com.au/cache/ga4661>
Found: Pandaman. Listed 2016 DC
Rating: 2.0/5.0

Name: Lunchbox Grill
Alternate: Cahill Skylights
Description: Cavity by the Cahill expressway .9ft h, 5ft w, 20m lng
with

grilled roof, would be good for a hideaway, or access to
the
cahill underpass on foot, probably not much else.
Features: the grill roof, might get some nice night shots sandstone
wall,
pipes and milk crates (not much actually)
Access: In Harrington street, see underpass for freeway, 10m away
see
stone stairs heading up...then circular garden area. Wall
in
corner, see section of steel fencing above, climb, thence
onto
grill roof, see missing access section, drop in here. seen
as
block dot in top left next to freeway [UBD: 1F11,
[GPS:-33.861137,151.207099]]
Locality: The Rocks
Region: NSW
Country: Australia
Care: Not much really, just don't fall onto road...check for
street
urchins although no obvious signs anyone has been there
for a
long time
Water Level: Dry
Cond: Good
History: Hats thought this may be part of the aircon system for the
expressway or even better the choo choo system Checked it
out on
the way to lunch to discover he was quite wrong
To-Do: Use TBM to make it something more useful Reafix access
cover and
lock it and have private storeroom
Notes: Listed so if you see it from another vantage point you
don't get
excited like i did and go clambering in expecting
something else
- can be seen from Cahill message board area

Name: Oceanic Vista
Alternate: Ocean Rubble.
Description: Natural Cave in cliff face.
Features: Very spectacular scenery at the base of the cliffs at
water
level. Many nooks and crannies to be explored in rubble
left from

collapsed cliff edge. Giga-tons of rock which has fallen
over
many years from the waves continually pounding away at the
cliffs. HUUUUUGE overhanging cliffs (look up... scary!).
Access: Botany Bay NP (usually gate is unattended so entry should
be
free) and keep following Cape Solander Dr all the way
around to
the right to the car park at the end [Sw:358B05,
UBD:316N13,
Grg:466H13, [GPS:-34.0211209535,151.229467761], XWPT].
Follow
worn path to waters edge and start heading south. Once you
go
around the 3rd or 4th "point" you should come across
Oceanic
Vista.
Locality: Kurnell
Region: NSW
Country: Australia
Care: Low Tide Only. Be very careful navigating rocks.
Eek!: Slippery rocks. Big swell. At the "points" you may have to
time
the passage with the waves so that you can get past the
point
when the water is receding just after a wave has come in.
Water Level: Tidal, Shoe-Death
Cond: Unstable footing. Rocks may be loose. Big overhanging rock
sections.
To-Do: Ascertain any southern access.
Found: 2004 Lazyboy.

Name: Pool of Immortality
Alternate: Pool of Life
Description: Large, round circular around 6ft high cave, with a pool in
the middle. Lots of Nook's and Kranny's.. goes into the
mountain by about 10-14 meters.
Features: Spectacular views from inside looking out. Mofo crabs.
Access: Acc: Turn off Captain Cook Dr at the CALTEX sign onto St
Joseph Banks Dr. Follow this road all the way too the end. Go
right into the small road that has 1000 speed humps, (watch out it's
2 way).
up the Park at the end of this road, than walk about 300m North,
that rock along the edge, you will see a fisherman access rope,
around will help you get down onto the rocks at water level. Walk
towards the way you came (south) around the main headland

waves (200ft), you will see a col-de-sac type feature where the
are smashing in.... look up and you got the cave. Walk up
onto the rock & It's all self explanatory from here. Can get
dangerous at high tide.
[GPS:-34.04125617383977,151.21386229991913]
Locality: Kurnell (Boat Harbour)
Region: NSW
Country: Australia
Care: 1: Watch the tides (low tide is best). 2: Only do in day
time. 3: Very large person's, this is not recommended.
Eek!: Tide
Water Level: Slimey - Ankle
Cond: slimey,
History: Ask the dinosaurs
To-Do: Take better photos (I had my phone)
Notes: I am giving it a 5 only because the views are spectacular
and the pool is very pretty. too the lame ones it may be average
Found: 2008 Neptune

Name: Rambo's Nest
Alternate: The Porch Of The Caryatids
Description: A small but interesting cave/pagoda in the cliffs far
above Ratholes 9 and 10, with a spectacular view overlooking the
Ratholes, as well as straight down the valley below to
Hartley.
Features: Brick columns supporting the roof.

An amazing view.

On the way you
pass through an old burned out miniature railway, and also
through an old mustard gas storage tunnel(Gatemouth
Brown).
Access: Either park on side of Bells Line of Road here:
[GPS:-33.478069,150.209273], or cross the Bells Line of
Road at Lithgow end of Gatemouth Brown. Follow the dirt road which
leads through the an miniature railway ([GPS:-
33.478078,150.21203])
until you reach a fire trail on the right

signs on it ([GPS:-33.479554,150.212191]) with "Private Property"
(It isn't..).
At the end of this
you will see yellow arrows sprayed on rocks taking you to
this cave. The actual GPS is [GPS:-33.483509,150.210196]
It can also be accessed via the end of Donald
Road, but its to dodgy/complicated/tresspassy to bother.
Locality: Clarence
Region: NSW
Country: Australia
Care: Huge cliffs, steep and slippery terrain.
Eek!: Huge cliff straight down onto the railway line below,
certain death!
Water Level: Dry - Dry

Name: Remarkable Cave
Description: Massive walk-through cave at the right tide (apparently
summer is better)
MPL = 50-100m
There are two
exits to the sea, and while walking out, there is a dead-
end
tunnel/cave to your right. Wet pants were got while in
there,
nearly drowned a phone
Access: Carpark at end of Safety Cove Road (-43.18764, 147.84553).
Follow
path and stairs down to viewing platform.
Locality: Port Arthur
Region: TAS
Country: Australia
Care: Try to visit at low low tides, it looks to be possible to
get all
the way through, very rough
Water Level: Tidal. Very tidal. Keep an eye on wave sets
History: Would have started life as a sea cave, roof collapsed
creating a

blowhole, its now more of an arch
Notes: Google Review: "Fairly remarkable, not unremarkable, but
not
overly remarkable."
Found: Unknown, listed in 2016 by NoPro based on visit in March

Name: The Auditorium
Description: Yet another cave that has been terraced by the Hydro
Majestic.
It's a very cool place and a great place to
hang on a
hot summer day.
Features: The cave is actually a listed sport climbing crag. Great
if you
can climb +28!
If your feeling
game follow the death-walk out to an old lookout.
There is a dodgy track that goes from the cave to the
lookout.
Don't slip while you walking there.. It will be your last
mistake, and don't lean on the rusty railing.

Access: The lookout is here [-33.6765328,150.2773476]
right Park here -33.6718676,150.2775192, and follow the track
down to the lookout.
From the lookout
[-33.6727203,150.2741987], follow the track south. When
the track gets to this gully [-33.6739257,150.2782971] follow the
goat-trail down the canyon.
The
cave is here [-33.6749525,150.2778089] (Which is 100m
above the Coliseum!)

Locality: Medlow Bath
Region: NSW
Country: Australia
History: In years gone by, it was used for outdoor events by the
Hydro Majestic.

Modified: 2016-07-09 10:54:59

Name: The Temple Of Colossus
Alternate: Slavens Cave
Description: A large cavernous cave, in fact its the largest 'Karst'
cave in NSW and 10th biggest in the world! Accessed via squeezing
in through
a small hole in the hillside behind
Thompsons Creek Dam. Cave is around 10m high and 35m
across (at least), access hole is only around 1.5m in diameter. This
cave is rumoured to be connected via a small crawl tunnel into a
large underground river beneath but this needs to be confirmed.
(I do believe it though, as I heard that off one of the guys
that actually helped build the dam and P.S.).

The walk in from the gate to cave is around 3.5km
one way so take a drink.

Features: A huge cave, with a very steep and dangerous entrance, an
"altar" like rock, a hole in one part that was dug as an
archeological survey, many scattered animal bones, preserved dead
butterfly wings, several hardcore "squeeze" tunnels, rumours of an
large underground river, and accessed via walking in across a
dam.
Access: Turn up the road directly across from the old cemetery on
Wallerawang Rd here: [GPS:-33.3994707,150.0403261]

Follow the road until you reach a large gate with
"Thompsons Creek Dam" signs, park here:
[GPS:-33.4238841,150.0149632]
Jump
out and continue along the road, around a bend and up a
hill,
(the hill is actually the start of the dam).

Walk across the dam until you reach the
structures
here: [GPS:-33.4293461,149.9918532]

Turn right and follow the path along beneath the 330kv
powerlines N/E for roughly 1km (through a '1st' gate)
until you reach a junction with a smaller 132kv powerline here:
[GPS:-33.4228812,149.996016]

Turn
right through the 2nd gate and follow the 132kv powelines
for
150m or so till you reach a 3rd padlocked gate here:
[GPS:-33.4226439,149.9971479]

Cave
is located roughly 70m past this gate in the scrub on the
right,
here: [GPS:-33.4231767,149.9977916]. (33° 25.382'S, 149°
59.890'E).
(If you reach a large swamp and creek
area, you have gone too far down the track from the last
gate).

UPDATE- Rodent, 2016.

This is a quicker route to the cave. It knocks off about 2.6km for the return trip:

and ~Walk down the dam wall access road, jump the fence cross the small dam wall here [-33.4272218,150.0026894].

dam, ~ Then easily walk through a field to this small and cross it's wall here: [GPS:-33.422579,150.0003961]

the ~Walk up the hill on the other side of the dam, to cave.

Locality: Pipers Flat

Region: NSW

Country: Australia

Cave: This is accessed via Energy Australia land for a point, unless

private you want to bush-bash in from the dam, which may be property.

EEK!: Extremely steep, slippery and very jagged rocks at

entrance. We decided a rope should probably be used here from now on.

Water Level: Take a first aid kit too just in case.

Cond: Slimey-Dry-Death

rocks Pretty good for a large cave, a small part of the roof has collapsed at some point, just adding to the steep slope of

cave too. at entrance. Some huge boulders scattered around in the

History: Was originally located during the surveying/construction of

to be Thompsons Creek Dam. In fact, the dam was originally meant

moved in the larger gully just West of this one, but had to be

of due to locating this cave. The dam workers pumped millions

measure litres of water down into one of the holes here to try to

even 1mm the size of the cavity, but the water level did not rise

enormous. so they gave up. Meaning the river beneath is indeed

rumours of ...why would they have to "move the dam" just because it may submerge a cave? Unless the

"underground
would

the river are actually true. It is said that the
river" heads out towards Mt Piper, and inundating the cave
drain the dam.

Then, there is this:

the

"A line of gravel extends right along Piper's Flat over
Main Divide.

rest,

Consideration of a number of factors
shows the possibility of it being river
gravel,
could not have been derived from the rocks on which they

feet

although every
rock-type found in them may have
come from the district. The conclusion is,

therefore, that they represent an old stream line about 50

above the modern
flat, and have been put in their
present position by stream action. Possibly, in

lower

time past, they extended over the area now occupied by the
Piper's Flat.

in hard

An interesting confirmation of this
view is obtained from Slaven's Cave, four
miles
up Thompson's Creek. This cave is situated on a hillside

porphyry,
and was probably formed by the
dissolving out of a small limestone pocket. Part

thirty

of the roof has fallen in, but the cave is still about

yards across, and twenty
to thirty feet high. A
small hole leads into it from the top. The floor, which is

covered

about sixty feet above the modern stream, is
with fine brown laminated
silt, although now no
water flows through the cave. Other unexplored caves

old occur below. The floor of the cave represents a higher stream-level, which agrees with the evidence of the gravels".

(<http://www.biodiversitylibrary.org/item/108641#page/338/mode/1up>).

this It is also said to be in an important local Aboriginal area, and that they try to hush location up as the civil works they did there were actually illegal. There is said to be some Aboriginal artwork in the area also, but we did not see any (it was night).
To-Do: Access the underground river, find the rumoured "other caves" and artworks in the area.
down There is a bunch of locked
nearby hatches here: [GPS:-33.4273539,149.9985534] that would go into a pumping station, probably very similar to the ones at [Wang Dam] (<http://www.expobase.cc/known/location/1734>)

We ran Also, heard of the same guy that this area may be worth a check too: [GPS:-33.4246004,149.9796438].
the out of time, but heard you'd need scuba gear to get into actual "river" anyway.

Modified: 2017-02-15 07:11:40

Name: Asgard Mine and Kiln
Alternate: Mackenzie's Mine
Description: An old mine adit and sandstone and brick kiln overlooking
the
Grose Valley. Great views.

Mine
begins around 5ft tall and goes in for around 25m and then
opens
up into a decent sized room around 5.5ft high.

The old kiln was built to be a coke oven of
some
type but does not appear it ever got used.

This location is just up the road from the listed
Blair
Athol Colliery too.

Features: An old mine with a room and a the ruins of an old
sandstone and
brick kiln.

Great views of the
Grose Valley.

Access: Turn off the G.W.H into Victoria Falls rd here:
[GPS:-33.5951929,150.2640009]. (Roughly in between Medlow
Bath
and Blackheath).

Swamp Follow this road
for 4km until you reach an intersection signposted Asgard
trail. Here: [GPS:-33.5677884,150.2851582].

around Park car and follow the Asgard Swamp trail for
1.5km (past the swamps and a large pyramid shaped pile of
rocks) and look out for a sign on the right labelled "Asgard
Swamp Mine and Historic Site- 300m". Follow this trail down the gully
(it's more like 1000m than 300m), then follow path around to the
left past the waterfall. Mine is located in the cliff face
here: [GPS:-33.5540561,150.2989769], Kiln is roughly 50m past
the mine on same track.

Locality: Blackheath
Region: NSW
Country: Australia
Care: Pretty long walk to the mine from Victoria Falls rd, and
the final gully down to the mine is quite steep and slippery.

Take a drink.

Water Level: Dry to slimy.
Cond: The mine is in pretty good condition considering its age
(1880-1920 or so), the kiln is in pretty poor shape
though.

History: [LINK] ([http://www.dingogap.net.au/historical/asgard-swamp-](http://www.dingogap.net.au/historical/asgard-swamp-mine)
mine)
To-Do: Find the other adits and relics they mention in the link
^above^, unless they just mean Blair Athol and Canyon Collieries
which are both kinda close anyway.

[Canyon
Colliery]
(<http://www.expobase.cc/unknown/location/490#general>).

[Blair Athol
Coalmine] (<http://www.expobase.cc/known/location/515>).
Notes: There is a large camping area and bunch of other walks in
the area too if that's your thing.

Created: 2016-07-23 06:20:47

Modified: 2017-02-15 07:13:49

Name: Blair Athol Coalmine
Description: Coal mine.
Access: Great Western Hwy, turn off at Victoria Falls Rd (between
Blackheath & Mt.Victoria) follow road until you get to
power transmission lines, park there. Follow lines SE until the
vehicular track becomes 5-way intersection. Take track
that veers to the Left (not hard left). Follow this vehicle track
until you get to the end. Ignore all bypasses. Go through all fallen
trees. At the end the track becomes a single foot track follow
this. This is actually the track used by horses & carts to haul
the coal out. The track goes direct to the mine entrance. The
mine descends steeply until it begins to level off, and then it
explores. becomes flooded. There are no unflooded side passages to
[Sw:442M18, UBD-BM:002Q06, Grg:NDR,
[GPS:-33.5906465698,150.274166958]].

Locality: Mt.Victoria
Region: NSW
Country: Australia
Water Level: Flooded at end
History: The mine was an exhibit by National Parks but has gone off
their favour list. At the 5-ways there is a signpost (look to
the right as you veer off).
Found: 2004 dTrog.
Rating: 0.5/5.0
Created: 1995-12-31 13:00:00
Modified: 2007-01-17 13:00:00

Name: Cellular Division
Alternate: The Odyssey
Description: Extensive gold fields featuring square kilometres of
mines, old machinery, vertical shafts, 4WD adventures, camping,
swimming and absolute isolation.
Currently there are 6 small

in the mines positively identified but there are dozens of others
immediate vicinity. See Vox and Intrepid for details.
Features: Miles from anywhere. Convict roads, machinery, hand cut
mines, swimming, 4WDing, convict cell wagons, ancient wooden
bridges...
Access: Drive to Boot Camp then continue along Knodingbul Rd to
the SECOND Blue Mountain Creek Rd turnoff here:
[GPS:-31.45757,152.151457]
Veer right onto Cells
Jeep Trail here: [GPS:-31.463372,152.135364]; go good
4WDer. You will come to a very obvious split in the road here:
[GPS:-31.4448,152.1118]. The really overgrown track on the
right is the walking track to Moncktons Vein mine - take your
swimmers, you will get wet. The road straight ahead is
Corn Cob Trail follow his and stop when you get to the bottom and
see Cleal, the 100 year old stamping battery here
[GPS:-31.443282,152.111538].
Mines are located
here [GPS:-31.443081,152.111463]. Wander around, there are
a lot of mines which have not been found. Return to the split in
the road and take the turn which is now on your right. Follow
this through numerous creeks paying close attention to tracks
on the left. See the really steep one? That leads to a mine and a
long vertical shaft - be careful. Staying on the 'main' road
will take you past a few more mines. If you get to a shack you have
gone too far. Turn around. THIS IS 4WD ACCESS ONLY and we don't
mean Rav4s. If your vehicle doesn't have low range and minimum
2 inches lift you are not getting in.

Update: (Aydun 10/02/2016)- There is a short
mine just after the creek crossing, behind the hut before
the start of Eaglehawk Trail [GPS:-31.454138,152.100003]
Locality: Cells Creek
Region: NSW
Country: Australia

Care: Don't underestimate the difficulty of the terrain - this truly is 4WD only access. At least 6 creek crossings, very steep grades and the high likelihood of fallen trees.

Eek!: You are in a very isolated location so make sure people know you are there and when to expect you back.

Water Level: Dry - Neck

Cond: parts are untouched for decades

History: Cell's Creek has a mining history dating from 1880 to the mid 1960s. Gold, silver, manganese and copper were mined in the area. Alluvial and quartz mining were both pursued. There were dozens of mining leases issued which can be searched on the interwebs.

To-Do: Locate each of the mines in the area AND please add location updates. Provided below is a list of mines within Cells Creek catchment.

Notes: KNOWN - The Cells Creek Mine is a gold mine. Another name for this mine is the Terrace Mine. Up Corn Cob Trail from here on a hairpin bend is Kazman's mine.

KNOWN - The Kirkmans Mine is an underground gold mine.

The Beehive Shaft Mine is an underground gold mine.

KNOWN - The McClennans Reef Mine is an underground gold mine.

This mine is also known as the Campbells Area Mine and Mud Lode Mine.

KNOWN - The Moncktons Vein Mine is an open cut and underground gold mine. Another name for this mine is the Sunday Times Lode Mine.

LOCATION SUSPECTED - The Laws Mine is an open cut manganese mine.

The Rocky Nob Mine is an open cut and underground manganese mine.

The Tobin Mine is an open cut gold mine.

The Andrews Mine is an open cut manganese mine.

LOCATION SUSPECTED - The Graeme Mine is an open cut manganese mine.

The Myrtle Scrub Mine is an open cut and underground manganese mine. This is also the location that convict cell wagons can be found.

The Doyles River Mine is an open cut and underground manganese mine.

and
The Oakbourne Mine is an open cut and underground gold silver mine.

The Morcoms Mine is an open cut and underground copper, gold, lead, silver and zinc mine.

The Wallis Mine is an open cut gold mine.

The
Bedfords Mine is an underground gold mine.

The
Comboyne Mine is an open cut and underground mine.

The Tirrill Creek Mine is a non-specified gold mine.

Name: Hartley Vale Shale
Alternate: Petrolea Vale Kerosene Ruins
Description: An old mining area. Over the years it went by the names of
the Hartley Kerosene Oil and Paraffin Company, the Western
Kerosene Oil Company, New South Wales Shale and Oil Company and
Commonwealth Shale Oil Company. The place is very cool, so
many ruins and remnants of the old shale oil days scattered
around.

TEL = 8+km
Features: The gully has many griddled off tunnels and shafts, ruins
of an old paraffin candle factory and kerosene refinery, two
very steep incline railways featuring winding engine and retort
ruins, an old branch line to up to the now demolished Hartley Vale
station at Mt Victoria, and old skips, boilers and other random
ruins everywhere.
Access: Main gate here: -33.5352421/150.2397537

the old Hartley Vale Station and spur line:
-33.5386538,150.262177

Kerosene
refinery ruins here: -33.5280338,150.2425218

Map of most features here:
<http://infoblue mountains.net.au/rail/upper/hartley.htm>

Locality: Hartley Vale
Region: NSW
Country: Australia
Care: Nosey neighbours and farmers.

One
particular local farmer is rumoured to chase people off
with a
bike
shotgun, even though it is a public area with a mountain
trail running through it..
Eek!: Watch where you step..
Water Level: Dry - Ankle
Cond: Mostly ruins.
History: The Hartley shale site was discovered by William Lawson in
while
1824
constructing a road from Mt Victoria to Hartley in 1813-
and the
called "Lawsons Long Alley". Mining began here in 1865
shale (Torbanite) was originally sent to Sydney to be
refined
until they opened the Hartley refinery in 1880. The site
predates
the Newnes and Glen Davis sites. Torbanite and coal were
both
mined here and used to produce "Comet" brand kerosene
which was
supplied to the railways and navy, where the coke was
supplied to
the Lithgow Small Arms Factory.

higher
Mining and kerosene production ceased here in 1921 due to
quality shale being mined at Newnes.
To-Do: Explore the Kerosene refinery ruins across the street.

Name: Hollow Mountain
Alternate: Mt Keira Coal Lowering Facility
Description: This multi building facility was used until the early 2000's to lower coal from the top of the Illawarra escarpment down into the coastal tablelands south west of Wollongong where a rail line was, and is still able to transport the coal to the Port Kembla docks.
2 story The site currently consists of a few demountable buildings serving as offices, tea rooms, and lavatories. There is a demountable on site too.
where The two large sheds house a total of 3 truck dumping areas
areas coal was able to be emptied into the tunnel and holding
appear below via an inverted square pyramid style funnel. These
listening to head approximately 40m down into the mountain.
mining The tunnel below is still lit and one may head if
tunnels keenly the activity of the site below. Assumed to be the
however works of the nearby Dendrobium facility which has access
2008) to this facility linked further back into the escarpment,
this particular conveyor is not used by Dendrobium. (April

Features: 6 Total buildings, 4 being demountable style offices, 2
being sheds.
Some very large holes in the ground
For the curious: Shed B, Southernmost end, side closest to
the road. Peer down through the metal sheet flooring to see
into the tunnels below.

Access: Harry Graham Drive, Illawarra State Conservation Area, Mt
Keira.
[GPS:-34.402382,150.833187]
If you are trying to find something local as a way to find
your direction, the Mt Keira lookout is well signposted. If you
can find your way to the entrance, follow the main road
uphill, and keep on staying on this road (mt Keira Rd). You will
eventually hit a road heading towards the escarpment, with a national
parks sign, and currently a sign pointing to the mine facility.
Take this road. Follow for approx 2km.
Access is apparent once you spot the facility.
Note: There are 2 places to park. The first driveway you
encounter will have the demountable 2 storey building.
there is a second driveway further down.

Locality: Mt Keira
Region: NSW
Country: Australia
Care: Whilst probably stable, don't walk on the metal sheets
covering the dumping chutes. The chutes are large, deep, and will
kill you with 100% certainty if the sheeting collapses. Should you
happen survive, you are now inside a mostly disused mine
approximately a kilometre away from the nearest available portal.

Water Level: Dry - Dry
Cond: Vandalised
History: This facility was put in place during the 70's to help
laden coal trucks avoid the steep and somewhat dangerous descent down
Mt Ousley. By dumping coal down through the mountain, and
then pushing it onto a conveyor system to be transported
through the

greatly mountain out to the rail lines, production was able to
Picton based increase without substantial expense increase at the
mines.
To-Do: There is a bush track off the back that leads past some
large metal grilles. This track supposedly leads to a lookout.
There are some excellent views in this area, may be good for
some less common views on Wollongong and Port Kembla.
Notes: Best done in daylight.

closed At the time of writing (April 2008) Harry Graham Drive is
Restoration half way through due to cliff falls and land slips.
historic work is continuing. You may access this location via the
Mt Kembla mining township once the road is restored.

very Probably best not to do this on a weekend, as there is a
of the large and well maintained Moto Cross track towards the end
road.

Found: 2004 Pandaman.
Rating: 3.0/5.0
Update: 2013-11-09 13:00:00 (DC) - This was not actually State
Mine, but a separate mine altogether called "Dobbs Drift", (hence
that part of Newnes being called "The Drift"). Many of the
structures were removed long ago, but the ruins of one large winding
building remain (with a Drainbiz tag in it!)The bricked of wall is
very bricked off, entry here seems impossible.

directly There is also a double 5ft drain (Newnes Drain) running
beneath this spot.

Name: Long way to the drop
Alternate: Rathole Ck Mine
Description: Derelict mine with 4 identified shafts here (-31.890544,
141.192959), tramway formation, a cool cutting, stone
culvert, aqueducts, some machinery and a head race for climbing
here(-31.891066, 141.192848).
Features: Same as description
Access: Drive to Silverton, as you leave town the road to Mundi
Mundi veers right here (-31.883143, 141.215794), at this point
take the track on the left of the road and follow the track towards
the ridge line. Keep looking left as you approach the top. See
the head race in the distance to the west? Go good explorer.
This

slowly, track is passable with a 2wd vehicle if you travel VERY
and the the corrugations just about shook me to pieces in places
the way sand on the bottom of the creek bed can be quite soft. On
formation. back to town it is possible to follow the tramway
Locality: Silverton
Region: NSW
Country: Australia
Care: Its the desert, take water. Beware of undiscovered shafts
- falling down them doesn't hurt but landing at the bottom
does.
Don't piss off the locals
Eek!: Undiscovered shafts, snakes, scorpions...
Water Level: Ha!
Cond: Hot and dry, derelict and baking away, no tags
History: to come...
To-Do: Abseil into the shafts to find out if they meet up. Camp
the night.
Found: Intrepid

Name: Lost Duck Mine
Description: Vertical shaft mine head, trashed but not yet demolished.
It seems to be the last one in the district, all the others
are leveled and sealed.
Features: Winding tower, mine lift cage that vehicles can drive
into, huge open deep vertical shaft, constant sound of falling water,
hatches, ladders, airlocks, random junk.
platform Hatch in floor at cage loading level, accessing small
suspended in the shaft. Freaky scary.
me. Which Lost duckling that adopts explorer - well there was for
really complicated things.
longer. See this place asap - I don't think it will be there much
mining The demolition teams have been working through the various
sites in the area, and will probably do this one next.

Access: <http://maps.google.com/?ie=UTF8&ll=-34.065308,150.504134&spn=0.004337,0.006394&t=k&z=17>
Best by bicycle. Park on Egans Rd back in Oakdale rather than near the mine road gate. Don't want to alert the locals. There's an occupied house with dog right at the intersection with the main road. Go 100m past that junction to gated bush track. Rejoin the sealed access road once out of sight of the house. If not cycling, it's a fair walk. Alternative access/exit - follow powerline up hill to motocross racetrack.
[GPS:-34.065557,150.504284]
Locality: Nattai
Region: NSW
Country: Australia
Care: Certain death open mineshaft. 5 seconds freefall. NO ladders, without air quality monitoring equipment.
Eek!: Cage winding machinery trashed, no idea how solidly 'not going to fall' the cage is. It didn't move when I got into it. One thing's for sure - if it goes down, it ain't coming back up.
Water Level: Dry - Dry
Cond: Trashed, stripped, wrecked
Notes: God dammit I hate people that smash everything technical they see. And copper strippers.

Modified: 2004-08-23 14:00:00

Name: Rainbow mine
Description: A nice short mine of about 50m (lower level), cut through
solid
rock so its nice and safe.
There is another two
upper levels currently unexplored.
Features: The walls are covered with mineral rich deposits, which
glisten
in vivid blues and greens.
Access: Follow this eroded gully up to the lower entrance
[-42.162123,145.5921292]
Locality: Queenstown
Region: TAS
Country: Australia
Water Level: Slimey
Cond: Excellent ... Nice and safe
To-Do: Explore upper two levels.
Apparently there are 3

levels, with an entrance to each.
Found: Rodent, Traceroute (2014)
Rating: 3.0/5.0
Created: 2016-07-06 07:37:44
Modified: 2016-07-09 10:50:47

Name: Shale Trail
Alternate: Mt Kembla Shale and Kerosene Mine
Description: Partially bricked up shale/kerosene mine
Extremely hidden in the bush on publically accessible
land.
the
2 mostly bricked up tunnel portals, 1 with iron bars over
entrance

Features: Many very large sandstone blocks, heaps of old stuff
around in
the bush for those that brave the lantana.
Nearby abandoned explosives shed.... explosives not
included.

Access: Mt Kembla Ring Track. Easiest access is from the bottom of
the
ring track, which is very hard to find unless you have a
local
map and/or guide.
Several hundred meters along the ring track there are some
wooden
posts forming a place marker for a non-existant path. take
the
non existant path, use your imagination and follow the
groups of
rocks that pretend to be the edge of the path down into
the
valley. When you reach the big flat section you are
standing
almost on top of the portals. Keep heading straight down,
through
the coral trees, and watch out for the drop that's about
to
appear immediately in front of you! Down there is where
you want
to be. Use your imagination.

Locality: Mt Kembla
Region: NSW
Country: Australia
Care: Seriously not recommended unless you have a guide. The
entire
area consists of stinging nettles, leaches, ticks, and the
odd
mad hatter tree. Getting stung by a mad hatter entails
many hours

of searing pain. The -entire- area consists of plants that
 will hurt you if you do not know what you are looking at.
 Eek!: Entering this mine should be done at ones own risk, and
 should only be done with a gas metering device. The fumes from
 shale/kerosene mines are quite toxic.
 Water Level: Dry - Ankle
 Cond: Extreme Disrepair
 History: This mine was the site of the 1902 kembla mine disaster.
 This is to date Australias largest mining disaster claiming the
 lives of 94 miners and 2 rescuers.
 coal dust The previously reported 'non gassy' mine exploded when
 explosions was ignited by a naked light, and caused a series of
 addition that could be heard in Wollongong 12 kilometres away in
 to blowing machinery and sandstone blocks weighing several
 hundred kilos over the mountainside.
 Closed 1902.
 To-Do: Obtain gas monitoring device.
 Notes: This place is difficult to find, and the terrain is
 dangerous for those who dont know it. The notes about how many stinging
 plants and bugs are around were not just for show, they are dead
 serious. wear long clothes, and take salt for leaches.
 During discovery 2 leeches were found on one explorer,
 another was hit by a mad hatter tree, all were hit by stinging
 nettles, one tick was obtained, and 2 red belly black snakes were
 spotted.
 All explorers know the surrounding bushland well.

Name: Sunny Corner
 Alternate: Montana Mine, Sunny Corner Mine, Silverking Mine and
 Copeland Tunnel mines
 Description: This place is epic! Its a huge gully where 4 different
 mines meet up and were processed. Silver, lead, gold, copper, zinc,
 antimony

takes hours and more were all mined here. The site is massive and
Features: to explore properly.
Heaps of old grilled off shafts and tunnels, GIGANTIC slag
heaps, a (mostly) collapsed red brick tunnel leading up the hill
to a massive old brick chimney, large poppet head, a building
ruin built completely from pure slag formed into bricks, an
abandoned shanty and stamping battery for branding the finished
silver ingots, as well as railway sidings, skips, old boilers and
many other old remnants from the old mining days, including an
old flooded cave.

There are sections
straight where vivid blue copper sulphate crystals are growing
out of the rocks!
Access: Either turn into Silver Street or Austral Steets in Sunny
Corner and follow till you reach large steel gates, then walk
down into the valley.

[GPS:-33.374293,149.893003]
Locality: Sunny Corner
Region: NSW
Country: Australia
Care: Watch your step and don't drink the water..
Eek!: Bigger than it looks. Very steep access.
Water Level: Dry - Shoe
Cond: Average to ruined.
History: This place was a hydrothermal vent and once at the bottom
of an ancient ocean. Many minerals have been leached out into
this deep valley and many precious metals were mined from the
different ore seams here.
To-Do: Explore the many other tunnels in the area:

Name: The Irondale Colliery
Alternate: Commonwealth Portland Cement Company Mine
Description: This is a very large old shut down mine site with many
interesting ruins and structures.

and It was handed over to the community after the mine closed
sealed in the 1940's.

TEL= 3+
kilometres..
Features: Old dams and railway structures, a large 3 train at once
coal

a way loader, with many large conveyor structures heading quite up the hill to the entrance, with several small rooms and cavities along the way.

rooms, Near the top you see the ruins of an old rail bridge and a few more one of these is the tram station where workers would catch the tram for the 3km journey.

entrance There is also a large rail track entering here, but the main mine padlocked. has been bricked off, and the steel access door is

large There is a ventilation shaft in the hill about 100 metres N/W of the main entrance and another

Access: one about 100 metres N of the main blocked doors. Head along Wallerawang Rd towards Portland, directly across from the Range Rd intersection, pull into the little dirt rd that heads across the train tracks. Park here: [GPS:-33.370314, 149.994211].

saying Get out, cross train tracks (caution, active line), and head through gates "Caution: Mine Site", and "Land Rehabilitation Area" ect..

reach the Cross creek and turn right, follow the old road and rail lines past the old quarry until you loading structures and dam: -33.369747, 150.001511

Follow the structures up the hillside..

Locality: (A good 4wd would probably make it all the way from the rail crossing to the loaders).
Region: Portland
Country: NSW
Care: Australia
Nosey neighbours walking dogs and trail bike hoons.

Watch for trains on the live railway crossing.

Also, be careful around the
ventilation shafts.

One has a 4
second drop to the tram tunnel, and possibly beyond by the
sound
of it..
Eek!: It's a mine..
Water Level: Dry - Dry
Cond: Excellent-Scary
History: This is the old Commonwealth Portland Cement Company
Colliery,
which supplied coal to the listed Portland Cement Company.
A rail
line used to run from here to the cement factory.

A separate line also ran from here to the also
shut "Ivanhoe No.2 Colliery..

Irondale mine was closed when the Cement Company shut.
To-Do: Enter the tram tunnel..
Notes: Don't tell Eschelon!
Found: 2013 DC
Rating: 5.0/5.0
Update: 2016-07-13 05:31:07 (DC) - Update Access: It is possible
that

this location could be attacked via the old Portland
railway
station road here: [-33.3574702,149.9940634], but the
gates may
or may not be locked and potentially could a much longer
walk,
but this would make an excellent bicycle ride.

Update: 2016-07-13 05:28:59 (DC) - Update Eek!: The creek rises
substantially after rain and gets pretty deep/wide. Best
spot to
cross in poor weather is the dodgy old rotting railway
bridge
